September 9th, 2016

Dear Sunnyside Resident:

All efforts are made to schedule work for when it will have the least impact on the surrounding community, however due to the limited number of tracks outages, which are required for safety reasons, it is occasionally necessary to perform work at night and on weekends.

Please be advised of the following East Side Access work:

Friday, September 9th to Sunday, September 11th
Starting tonight, at **9 p.m. and continuing until Sunday, at 7 p.m.**, the contractor will continue to work on a new retaining wall being constructed along a small portion of the alignment north of Barnett Avenue and east of 50th Street. There will be additional activity at track level to support this operation.

Residents in close proximity may see lights in use and hear noise from this construction activity. The contractor has been directed to aim lights away from residential areas as long as it does not impact the safe execution of this work or operations of trains as they travel past. All work is being performed in conformance with the established safety standards and current regulations for noise, dust and surface vibration.

ESA Community Outreach aims to provide the most up to date information on work activities; **however the schedule of work is subject to change**.

We apologize in advance for the potential disruptions you may experience from the ongoing work. For questions or concerns about the work, please contact the East Side Access Community Outreach team:
