HIV
PAST, PRESENT & FUTURE

Theodore H. Lenox, MD, AAHIVS will provide an overview on HIV: its prevalence, diagnosis, evaluation, and treatment. Dr. Lenox will discuss the history of HIV/AIDS, prevention, current treatment, future concerns as well as available resources and support.

Dr. Lenox is Chief of Infectious Disease at Metropolitan Hospital Center and Assistant Professor, Internal Medicine at New York Medical College.

Monday, December 2, 2013
12 noon - 1 PM

Metropolitan Hospital Center
6th Floor Auditorium

Light lunch will be provided.

Free event. All are welcome.

Metropolitan Hospital Center hosts monthly informational sessions on important health topics impacting our community. Participants have the opportunity to meet doctors and clinical experts from various areas.
