EXECUTIVE SUMMARY

Environmental Monitoring & Consulting Associates, Inc. conducted a Phase I Environmental Site Assessment of the property located at 48 East 43rd Street in the Borough of Manhattan, New York City, New York. The subject property is identified as Block 1277, Lot 46 on the municipal tax map. 48 East 43rd Street encompasses approximately 22,850 rentable square feet.

The Phase I Environmental Site Assessment was completed in a seven day time period and all of the regulatory agencies have not yet responded to our requests for information. Any significant findings resulting from pending city, state and federal agency responses to our written requests for environmental information under the Freedom-of-Information Act will be forwarded as an Addendum to this report.

This assessment is restricted to observations made during EM&CA's inspection of limited portions of the subject property and research into its history. The scope of work did not address compliance with any federal, state, or local laws, rules, regulations, ordinances or codes. It also did not include the collection or environmental laboratory analysis of any samples of building materials, air, water, or soil, and EM&CA makes no representations or warranties concerning their quality.

For the purpose of preparing this report, EM&CA has relied upon certain verbal information and representations provided by state and local government agency personnel, and documents in state and local government agency files. EM&CA did not attempt to independently verify the accuracy or completeness of this information, but did not detect any inconsistency or omission of a nature that might call into question the validity of any of this information. To the extent that the conclusions in this report are based in whole or in part on such information, they are contingent on its validity.

Our Phase I assessment discovered no major documented environmental violations or confirmed environmental liabilities. At the time of our assessment, no potential areas of environmental concern were identified as posing an immediate environmental risk to the subject property or it's occupants. EM&CA recommends that an asbestos survey be performed and that an Asbestos Operations & Maintenance Program be implemented for 48 East 43rd Street.

Environmental Monitoring & Consulting Associates

Report
Phase I Environmental Site Assessment
48 East 43rd Street
Borough of Manhattan, New York City, New York

Part A - Introduction

I. Purpose and Scope of Work

The purpose of our Phase I Environmental Site Assessment was to perform a preliminary evaluation of potential or existing environmental liabilities which may be associated with the property. We reviewed information provided to us by New York City, New York State and USEPA offices contacted by us.

Our Phase I Environmental Site Assessment included:

1) a site visit;

2) a general site characterization;

3) a review of site data and records made available to us by our client;

4) a review of an environmental database search report conducted for the property and adjacent properties;

5) a review of historic maps;

6) discussions regarding the history of the site with personnel made known to us by our client or discovered by us during the study period;

7) a limited visual inspection for accessible asbestos containing materials and

8) an assessment of whether or not a more detailed investigation is considered appropriate to identify and quantify potential contamination and related environmental liabilities.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

As requested, our scope of work did not include collection or analysis of air, water, soil, or other material samples. Further, our scope of work did not include an inspection of all interior building spaces, or a review of historic aerial photographs regarding the subject property.

II. Property Identification

Address: 48 East 43rd Street is located in the Midtown Business District on the south side of East 43rd Street between Madison Avenue and Vanderbilt Street in the Borough of Manhattan, New York City, New York.

Tax Lot & Block: The property is identified as Block 1277, Lot 46, on the municipal tax map.

Zoning: The subject property is zoned C5-3.

III. Property Description

The subject property, constructed in 1922 is a commercial office building with 22,850 rentable square feet. The building consists of seven stories, sub-basement, basement, and penthouse elevator machine room on an irregular shaped plot with 42 feet of frontage on East 43rd Street approximately 100 feet deep (0.077 acre plot). The entire plot is overlain by the building and paved walkways. The building is of brick and masonry construction supported by a steel superstructure. The sub-basement level is utilized as mechanical and building maintenance areas (i.e., boiler room, cleaning supply room, sump pump room, elevator machine room) and building and tenant leased storage areas. The ground floor and basement are occupied by the Annie Moore Restaurant. There is a small courtyard in the rear of the property where numerous tenant electric a/c compressors are located as well as the Annie Moore Restaurant kitchen exhaust duct.

There were no dry cleaning plants or photo finishing shops observed at the subject property. The facility utilizes Consolidated Edison electricity. There is no central a/c system. The building is cooled with seven (7) ac units, one per floor. Steam heat and hot water are provided by a natural gas fired boiler located

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

on the basement level. Steam is then piped to cast iron radiators located at the perimeter of the building on all floors.

IV. Property Characteristics

We reviewed the following maps and reports to evaluate the general surface and subsurface characteristics of the subject property:

* Central Park, NY-NJ, 7.5 Series U.S.G.S. Topographic Map;
* "The Geology of New York City and Environs," by Christopher J. Schuberth, The National History Press, dated 1967; and
* National Wetlands Inventory Map, Central Park, NY-NJ, U.S. Department of Interior, April, 1980.

Our review of these references indicates that the subject property is relatively level with an approximate ground surface elevation of +50 feet (MSL). The topography in the site vicinity slopes in a westerly direction toward the Hudson River. The subject property is reportedly located on the Manhattan Formation, where the mica schist bedrock lies within several feet of the ground surface. Depth to groundwater is estimated to be shallow. The inferred direction of groundwater flow, based on topography, is to the west, but EM&CA has not verified this inferred direction with monitoring wells. Our review did not identify any Federal mapped wetlands on or adjacent to the subject property.

V. Surrounding Property Uses

The subject property is located in the Midtown East District. Abutting buildings include 44 East 43rd Street on the west side and 51 East 42nd Street on the east and south sides. The Diamond District on 47th Street is located close by, as well as Grand Central Station, which is one block east which consists primarily of high rise, mid rise and low rise commercial office buildings with ground level shops including restaurants, shoe stores, clothing stores, parking garages, barber shop, hair salons, hotels, etc.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

Part B - Document Search

I. Historical Search

Historic Maps: A review of the available Sanborn Maps indicate that previous structures that were present on this property include residential structures on the 1890, 1899 and 1910 maps. The building currently known as 48 East 43rd Street first appears on the reviewed maps in 1929. The surrounding area was predominantly residential. Potential USTs which may have been used in the former structures for heating or fuel purposes may represent a potential environmental liability for the site. However, any former USTs or chemical spills are likely to have been excavated and removed from the site during construction of the existing structure which is underlain by a basement and sub-basement. During our review of the historic maps, no off-site, adjacent property uses were confirmed as potential sources of contamination migration onto the subject property. The following Sanborn Maps for the subject property were reviewed:

1890	2 Maps	1980	2 Maps
1899	2 Maps	1985	2 Maps
1910	2 Maps	1988	2 Maps
1929	2 Maps	1991	2 Maps
1950	2 Maps	1996	2 Maps
1968	2 Maps		

1890 Sanborn Map

The area is primarily residential with row style type housing shown throughout the entire midtown area and at 48 East 43rd Street as well. There is a school at 44 – 46 East 43rd Street and a large Episcopal Church (Church of the Holy Minister) immediately behind the subject property on East 42nd Street between Madison Avenue and Vanderbilt Street. The present day Grand Central Station is called the Grand Central Railroad Depot and it appears as a basic rail yard with multiple railroad tracks with no buildings.

1899 Sanborn Map

Same as the 1890 Sanborn Map except the school and the Episcopal Church of the Holy Minister is gone and has been replaced by commercial buildings.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

1910 Sanborn Map

Same as the 1899 Sanborn Map except Grand Central Railroad Depot now shows as the Grand Central Terminal.

1929 Sanborn Map

Same as the 1910 Sanborn Map except the surrounding midtown area around the building is now more commercial than residential. The subject property is now shown on the map as being constructed in 1922. There is also now shown on the map the Biltmore Hotel and incoming station for the New York Central Lines and NYNH & HRR CO on 43rd Street between Madison Avenue and Vanderbilt Street directly across from the subject property.

1950 Sanborn Map

Same as the 1929 Sanborn Map. Map is very blurry and difficult to read.

1968 Sanborn Map

Same as the 1950 Sanborn Map except the Pan American Building is now shown as being built over Grand Central Terminal.

1980 Sanborn Map

Same as the 1968 Sanborn Map.

1985 Sanborn Map

Same as the 1980 Sanborn Map except the Biltmore Hotel is gone and is now called the Bank of America Building.

1988 Sanborn Map

Same as the 1985 Sanborn Map.

1991 Sanborn Map

Same as the 1988 Sanborn Map.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

1996 Sanborn Map

Same as the 1991 Sanborn Map except the Pan American Building is now called the Metropolitan Life Building.

Local Municipal Agency - Past Uses: During this assessment, we attempted to contact the following New York City municipal offices for information on the subject property: Building Department, Planning/Zoning, and Department of Environmental Protection (NYCDEP).

We have not yet received a response to our written request for information within the assessment period. Any future findings based on our review of the requested information will be provided in an Addendum to this report.

II. Database Search

We reviewed the results of a State and Federal environmental database search report conducted for the subject property by Toxics Targeting. The database search report and a description of each database is included in its entirety as Appendix C. The Toxics Targeting database search did not identify the subject property on any of the search databases. The following databases were searched:

ASTM-Required 1 Mile Search

Regulatory Records Review

i. National Priority List Sites for Federal Superfund Cleanup:

A listing of sites known to pose environmental or health hazards that are being investigated or cleaned up under the Federal Superfund program. There are no National Priority List for Federal Superfund Cleanup sites within 1 mile of 48 East 43rd Street.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

ii. New York Inactive Hazardous Waste Disposal Site Registry:

A state listing of sites that can pose environmental or public health hazards requiring investigation or cleanup. There are no (0) New York Inactive Hazardous Waste Disposal Sites registered within 1 mile of the subject property.

iii. New York Inactive Hazardous Waste Disposal Site Registry Qualifying:

A state listing of sites that qualify for possible inclusion to the NYDEC Inactive Haz. Waste Disposal Site Registry. There are no (0) New York Inactive Hazardous Waste Disposal Sites Registry Qualifying registered within 1 mile of the subject property.

iv. RCRA Corrective Action Activity Sites:

Waste facilities with RCRA corrective action activity reported by the USEPA. There are no RCRA corrective action activity sites within 1 mile of the subject property.

v. Delisted National Priority List (NPL) Sites

A listing of NPL Sites that have been removed from the National Priority List. There are no Delisted National Priority List Sites within ½ mile of the subject property.

vi. CERCLIS – Superfund Non-NFRAP Sites:

A federal listing of CERCLIS Sites that have no further remedial action planned. The subject property is not on the list. There are no (0) CERCLIS sites within ½ mile of the subject property.

vii. CERCLIS - Comprehensive Environmental Response, Compensation, And Liability Information System NFRAP Sites:

A check was made of the most recent U.S. Environmental Protection Agency's (USEPA) National Priorities List of Superfund hazardous waste sites which fall under CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act of 1980) and SARA (Superfund Amendments and Reauthorization Act of 1986). The subject property is not on the list. There are no (0) CERCLIS sites listed within ½ mile of the subject property.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

Sites that USEPA decides do not warrant further evaluation are given a "No Further Remedial Action Planned" (NFRAP) designation in CERCLIS, which means that no further action under CERCLA is presently anticipated for that site. A NFRAP designation does not necessarily indicate that there is no hazard associated with the site, only that, based on available information, USEPA does not plan further investigation at this time.

There is one CERCLIS NFRAP Site (Anchor Casting Co. Inc. Map ID #1) within ½ mile of the subject property. The EPA has designated this site as no further remedial activity planned (NFRAP). This site should not impact the subject property.

viii. Brownfield Cleanup Sites:
Voluntary Cleanup Program
Environmental Restoration Program
Brownfield Cleanup Program

A listing of Brownfield Sites that are abandoned, idled or under-used industrial and commercial sites where expansion or redevelopment is complicated by real or perceived environmental contamination. There are no (0) Brownfield Sites within a ½ mile radius of the subject property.

ix. New York Solid Waste Facilities:

Active and inactive landfills, incinerators, transfer stations or other solid waste management facilities. The subject property is not on the list. There are no (0) New York Solid Waste Facilities within ½ mile of the subject property.

x. New York and Federal RCRA Hazardous Waste Treatment, Storage or Disposal Facilities:

Sites reported by the NYS manifest system and the USEPA's Resource Conservation and Recovery Act Information System (RCRIS). Also includes the following databases:

- RCRA Violations: waste facilities with violations reported by the USEPA pursuant to the Resource Conservation and Recovery Act.
- RCRIS corrective action activity (CORRACTS): waste facilities with RCRIS corrective action activity reported by the USEPA.

There are no (0) sites located within ½ mile of 48 East 43rd Street.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

xi. Toxic Spills: active and inactive or closed spills reported to state environmental authorities, including remediated and unremediated leaking underground storage tanks. This database includes the following categories:

* Tank Failures
* Tank Test Failures
* Unknown Spill Cause or Other Spill Causes
* Miscellaneous Spill Causes

There are three hundred thirty (330) spills within ½ mile of the subject property and two (2) spills within 100 feet and corrective actions have been taken on these two (Map ID #9 and #296).

These three hundred thirty (330) sites are not considered to represent an environmental concern to the subject property based upon willing responsible parties, corrective actions taken and due to their cross gradient locations relative to the presumed direction of groundwater flow and the minor nature of the spills.

xii. New York State Major Oil Storage Facilities:

Sites with more than a 400,000 gallon capacity for storing petroleum products. The subject property is not on the list. There are no (0) sites within approximately ⅛ mile of 48 East 43rd Street.

xiii. New York State and Local Petroleum Bulk Storage Facilities:

A check was made of the most recent NYSDEC Petroleum Bulk Storage (PBS) database. Petroleum bulk storage facilities have petroleum storage capacities in excess of eleven hundred (1,100) gallons, and less than four hundred thousand (400,000) gallons.

The subject property is not on the list.

There are no (0) NYS major oil storage facilities within 0 – ⅛ mile of the subject property.

There are a total of fifteen (15) local PBS facilities listed within 100 feet - ⅛ mile of the subject property. None of these is expected to impact the subject property.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

xiv. New York and Federal RCRA Hazardous Waste Generators And Transporters:

RCRA Hazardous Waste Handlers (which include waste generators, transporters, and treatment/ storage/disposal operators) are regulated by the Federal government under the Resource Conservation and Recovery Act (RCRA). The latest available USEPA List of Hazardous Waste Handlers was checked for the subject businesses and businesses adjacent to the subject property. An inventory of hazardous waste handlers is useful to assess the kinds of hazardous materials in the vicinity of the site, as well as on the subject property. The presence of hazardous waste generators or transporters in the immediate vicinity does not necessarily imply risk of contamination to the subject property.

Sites reported by the NYS manifest system and the USEPA's Resource Conservation and Recovery Action Information System (RCRA). Also includes the following database:

- RCRA Violations: waste facilities with violations reported by the USEPA pursuant to the Resource Conservation and Recovery Act.

There is one (1) hazardous waste generator, Consolidated Edison (Map ID# 347) located 44 feet northwest of the subject property with a waste manifest for removal of petroleum contaminated PCBs.

There are also sixty-three (63)other RCRA Hazardous Waste Generators listed within 100 feet - ⅛ mile radius of the subject property. None of the sixty-three (63) generators should present an environmental concern to the subject property.

xv. New York State Chemical Bulk Storage Facilities:

Sites storing hazardous substances listed in 6 NYCRR Part 597 in aboveground tanks with capacities of 185 gallons or more and/or underground tanks of any size. There are no New York Chemical Bulk Storage Facilities listed within ⅛ mile of the subject property.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

xvi. Historic New York City Utility Sites (1890's to 1940's):

Power generating stations, manufactured gas plants, gas storage facilities, maintenance yards and other gas and electric utility sites. There are no Historic New York City Utility Sites located within ⅛ mile of the subject property.

xvii. New York City Environmental Quality Review Requirements ("E") Sites:

There are no New York City Environmental Quality Review Requirements ("E") Sites within 100 feet of the subject property.

xviii. ERNS: Federal Emergency Response Notification System Spills (ERNS):

A listing of federally reported spills. The subject property is not on the ERNS list.

xix. New York City Fire Marshall Tank Sites (On Site):

The subject property is not on the New York City Fire Marshall Tank Sites list.

xx. New York City 1934 Solid Waste Sites:

A listing of solid waste disposal sites operated by New York City municipal authorities circa 1934. There are no New York City Solid Waste Sites within ½ mile of the subject property.

xxi. New York Hazardous Substance Waste Disposal Site:

A state listing of sites contaminated with toxic substances that can pose environmental or public health hazards. These sites are not eligible for state cleanup funding programs. There is one (1) site, Anchor Castings (Map ID# 417), which although listed in the database, has been removed from the Hazardous Substance inventory and is listed as being of no threat to the environment or public health.

xxii. New York Toxic Release Inventory Facilities:

Discharges of selected toxic chemicals to air, land, water or treatment facilities. There are no New York Toxic Release Inventory Facilities within ⅛ mile of the subject property.

xxiii. Federal Permit Compliance System Toxic Wastewater Discharges:

Permitted toxic wastewater discharges. There are no permitted toxic wastewater discharges within ⅛ mile of the subject property.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

xxiv. Air Discharges:

Air pollution point sources monitored by U.S. EPA and/or state and local air regulatory agencies. 48 East 43rd Street is not on the air discharge list. There are eight (8) additional NYS air discharges located within ⅛ mile of the subject property. None of these eight (8) facilities should have any environmental impact on 48 East 43rd Street.

xxv. Federal Civil & Administrative Enforcement Docket:

Civil judiciary cases filed on behalf of the U.S. Environmental Protection Agency by the Department of Justice. There are six (6) civil judiciary cases within ⅛ mile of the subject property. None of these six (6) cases should impact the subject property.

B. N.Y.C. Department of Sanitation

The following inactive landfills are located in New York City: Pelham Bay, Bronx; Pennsylvania and Fountain Avenues, Brooklyn; Edgemere Avenue, Queens; and Brookfield Avenue, Staten Island, New York. Only one active landfill is located in New York City: Fresh Kills, Staten Island. None of these landfills are located within .5 miles of the subject property.

III. Permit Status

There are no environmental permits for the subject property.

IV. Utilities Available and Connections

The subject property is reportedly serviced by New York City water and sanitary sewer utilities and Consolidated Edison steam and electricity.

V. Other Environmental Information

Knowledgeable Contact Interview: EM&CA interviewed Mr. Andy Murray, Building Superintendent for twenty years. This gentleman arranged a tour of typical building areas. Mr. Murray reported that there is one (1) natural gas fired boiler located in the sub-basement boiler room. The building

is heated by steam which is piped to cast iron radiators on the perimeter of the building. There is no emergency power generator in the building.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

Part C - Site Inspection

An on-site reconnaissance of the ground level exterior of the building and limited interior building spaces was conducted by Mr. Joel Russell (EM&CA) on January 10, 2007. During his reconnaissance, Mr. Russell inspected the sub-basement and basement areas, as well as roof areas, penthouse and typical tenant spaces.

I. Areas Of Environmental Concern

A. Storage Tanks

No fuel oil storage tanks were observed. The building is heated by a natural gas fired boiler.

B. Asbestos

During Mr. Russell's limited walkthrough of the building, the following potential suspect asbestos containing materials were observed:

Sub-Basement

Boiler Room: 20 fittings and 15 LF pipe insulation

Annie Moore Restaurant Storage Room: 25 LF pipe insulation

Sump Pump Room: 20 LF pipe insulation and 5 fittings

Annie Moore Restaurant Compressor Room: 130 LF pipe insulation and 40 fittings

Superintendent's Office: 6 LF pipe insulation

Corridor: 275 LF pipe insulation and 45 fittings

Annie Moore Restaurant Storage Room: 10 LF pipe insulation

Annie Moore Restaurant Liquor Storage Room: 5 LF pipe insulation

Bathroom Pipe Chases: A pipe shaft with suspect pipe insulation material was observed inside an access panel in the tenant bathrooms on most floors.

Roof

New roof installed approximately seven (7) years ago.

Rear of Building: Old windows were observed with suspect window caulking materials.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

The suspect asbestos containing pipe and fitting insulation materials observed were in generally poor condition.

It is recommended that an asbestos building survey be conducted and an Asbestos Operations & Maintenance Program (O&M) be implemented.

C. Odors

Strong, pungent or noxious odors were not detected during the site reconnaissance.

D. Pools Of Liquid

There were no pools of standing surface liquid observed.

E. Chemical/Drum Storage

EM&CA did not observe storage of any hazardous materials.

Cleaning agents, etc., are stored in the building cleaning storage area on the sub-basement level.

F. Unidentified Substance Containers

Unidentified substance containers were not observed.

G. Stains Or Corrosions

Stains or corrosions on floors, walls or ceilings were not observed.

H. Drains And Sumps

A sump was observed in the sub-basement street car elevator pit and sump pump room. There was a small pool of liquid in the street car elevator pit in the sump pump room. According to the building superintendent, Andy Murray, these pits both have pumps connected to them and the water is pumped out to the New York City sanitary sewer lines.

I. Pits, Ponds or Lagoons

There were no pits, ponds or lagoons observed during the site reconnaissance.

There were no septic systems observed. All sewage flows into the municipal New York City sewer system.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

J. Proceedings Involving The Property

The building superintendent, Mr. Andy Murray of Will Rock Management and Consulting, Inc., informed EM&CA that to the best of his knowledge, he was not aware of any pending, past, or threatened litigation, administrative proceedings or notices from any governmental entity regarding possible violation of environmental laws or possible liability relating to Hazardous Substances or Petroleum Products.

K. Polychlorinated Biphenyls ("PCBs")

Prior to 1979, PCB's were widely used in electrical equipment such as transformers, capacitors, switches and voltage regulators for their cooling property. The manufacture, processing, commercial distribution, and use (except in a "totally enclosed manner") of PCB's was banned in 1979, under the Toxic Substances Control Act (40 CFR Part 761). PCB spills are subject to strict reporting, clean-up and disposal requirements, due to the toxicity of the substance, and its threat to human health and the environment.

a. PCB-Containing Transformers

No "wet type" transformers were observed on the subject property.

b. PCBs In Fluorescent Light Ballasts

Fluorescent lights were noted in the subject building. It is possible that the small capacitors in the ballasts of these fluorescent lights contain PCBs. None of the fluorescent light ballasts that were visually inspected during the site visit were observed to be leaking.

c. PCB Cable Wrap

Suspect PCB cable wrap was observed in the sub-basement sump pump room and restaurant basement electric closet. These would need to be properly removed and disposed of if they are going to be disturbed.

Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

Before USEPA banned the manufacture of PCBs in 1979, PCBs were used in the small capacitors of fluorescent light ballasts. All light ballasts manufactured since 1979 should be marked by the manufacturer with the statement "No PCBs". Ballasts that were manufactured prior to 1979, or that contain no statement concerning PCB content, should be assumed to contain PCBs.

L. Evidence of Chemical Spills

There was no indication of any chemical spills on site.

M. Wastewater Discharges

There is no treatment of wastewater on site. The building discharges wastewater to the New York City sewer system.

N. Solid Waste Disposal

There is no significant treatment of solid waste on site. Trash and recyclables are removed by a private trash hauler (Classic).

O. Lead paint

a. *Definitions and Regulations*

Lead-based paint is hazardous when in a deteriorating condition (i.e., chipped, broken, crumbling, pulverized); lead is toxic to humans, and particularly to children, if ingested, inhaled, or otherwise absorbed. Lead-based paint debris removed during construction/ renovation work may be required to be disposed of as hazardous waste. Lead dust generated during renovation/demolition activities also poses a potentially significant health threat to workers and residents.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

Lead-based paint hazards in New York City are regulated by the New York City Department of Environmental Protection, the Bureau of Lead Poisoning Control, New York City Department of Health, and the Department of Housing, Preservation and Development Code Enforcement Office. According to New York City's Local Law 1, lead-based paint hazards are defined in apartment building dwelling units (with children under the age of seven) where paint is found to have 0.5 percent of metallic lead based

on the non-volatile content of the paint. Lead-based paint hazards are presumed to be

present in any dwelling unit with children under the age of seven, built before 1960, where the paint is found to be peeling (unless satisfactory evidence that no lead-based paint is present can be produced).

b. *Site Visit Observations*

Given the age of the subject building (constructed circa 1922), it is likely that lead-based paints were used at this site. Painted surfaces in the subject building were observed to be generally in good condition.

P. Soil Contamination

A site inspection of the outside of the premises was made. The inspection did not identify any new environmental concerns. There was no evidence of any spillage or contamination on the exterior areas.

Q. Elevators

The building is serviced by one (1) passenger (1) freight and one (1) street car electric cable type elevators. No hydraulic elevators were observed.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

R. Radon

Radon, a naturally occurring radioactive gas, is the product of the radioactive decay of radium. It is found most frequently in high concentrations in rock formations containing uranium, granite, shale, phosphate, and pitchblende. Radon may also be found in soils contaminated with industrial waste from uranium and phosphate mining. Radon as a gas can move through the soil and water,

and into the atmosphere, and is a potential health concern if confined in sufficiently high concentrations in indoor environments. The U .S. Environmental Protection Agency (USEPA) has set an "action level" of 4.0 picocuries per liter for continuous long term exposure to radon gas. If radon gas is measured above this level, USEPA suggests follow-up testing and remediation measures.

According to data compiled by the Bureau of Radiation Protection, New York State Department of Health, New York City has one of the lowest average levels of basement radon measurements in New York State. The latest available statistics indicate an average of 1.5 picocuries/liter for New York County (as an average of the five counties), compared to a statewide average of 5.6.

Based on these low average basement measurements, it is unlikely that radon gas levels with the subject building exceed the USEPA action level of 4.0 picocuries/liter and therefore basement radon testing is typically not recommended. However, if specific readings of radon gas levels

within a particular building are needed then testing for continuous radon gas levels would be necessary.

S. Tenant Listing

A tenant listing has been obtained and is attached to Appendix D.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

II. SCOPE OF WORK

A. Purpose And Limitations

This Phase I Environmental Site Assessment (ESA) involves research into the history of uses of the site, checks with appropriate government agencies, and a visual inspection of the building and property to determine the possible presence of toxic and hazardous materials, and/or chemical products. An evaluation is then made regarding the potential for significant site contamination by toxic or hazardous materials and/or chemical products from past or present use.

Since the Phase I scope of work does not typically include testing of building materials (for asbestos, lead-based paints, PCBs, etc.) or of subsurface soils or groundwater, no definitive assessment of the presence of asbestos, lead-based paint, PCBs, soil or groundwater contamination (from on-site or off-site sources) is made. In addition, specific testing for radon levels is also not undertaken. It should be noted that other issues that may relate to property value impairments (e.g. ambient air quality, noise pollution, perceived risk from electromagnetic fields, etc.) are outside the scope of a Phase I ESA, and are not addressed.

If further determination of any potential contamination or analysis of specific materials is needed, then testing and/or additional investigation (Phase II) would be necessary.

B. Conformance with ASTM Standard Practice

This report has been generally prepared in conformance with the scope of the ASTM Standard Practice for Phase I ESAs (E 1527-00) as well as any protocols required by most major lending institutions. In several aspects the scope of work exceeds the ASTM (E 1527-00) scope (e.g., additional database searches, asbestos, radon, lead-based paint issues, wetlands).

C. Sources of Information and Research Methods

Historical site research is important in the assessment of the likelihood of past releases of hazardous substances (which include petroleum products). Sources of historical information for the subject property may include:

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

- Local library documents (historical maps, atlases, address directories).
- Interviews with site contacts, current site operators, and property owners.
- USGS topographic maps, land use and zoning maps, flood plain maps.
- New York City Buildings Department for building history including construction, demolition, and alteration permits.

The following regulatory agency lists and databases of documented hazardous waste sites, waste handlers, and spills are checked for the vicinity of the subject property:

- U.S. Environmental Protection Agency for location of Superfund and CERCLIS sites, ERNS database, and RCRA Hazardous Waste Handlers and Treatment/Storage/Disposal Facilities (TSDF).
- New York State Department of Environmental Conservation, Region 2, for hazardous waste spill logs, Significant SPDES facilities, Inactive Hazardous Waste Disposal Sites, and registered tank lists.
- New York City Fire Department, for permits for petroleum storage tanks, and for the bulk storage of other flammable materials, and records of environmental violations, storage issues, tank leaks or spill incidents.
- New York City Department of Sanitation for location of active and inactive landfills.

The site visit involves a review of current operations, interviews with knowledgeable on-site occupants or building managers, and inspection of accessible areas of the building and inspection of the property for visible indications of any significant contamination by toxic or hazardous materials. The investigation includes the following objectives:

- To identify sources of potential on-site contamination, such as underground storage tanks, dry wells, interior floor drains, transformers and fluorescent light ballasts (which may contain PCBs), suspected asbestos containing materials, and suspected lead-based paints, etc.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

- To examine the property for signs of potential contamination: stained soils, unusual odors, stressed or dead vegetation, improperly stored drums, oil slicks, on-site waste disposal/dumping, etc.
- To identify the quantity and type of toxic or hazardous substances (if any) used in the on-site operations.
- To determine if any on-site toxic and hazardous materials are stored, handled and disposed of in accordance with good practice, minimizing the potential for contamination.
- To identify potential off-site sources of contamination. Adjacent uses are noted, particularly auto-related and industrial sites.
- To identify on-site or adjacent off-site sensitive receptors, such as wetlands, surface waters, drinking water wells.

Not all of the objectives described above are applied to every site; investigations are tailored to the particular nature of the site. It should be noted that information requested from regulatory agencies may be incomplete or unavailable within a reasonable time period.

In accordance with ASTM standards, a Phase I ESA is not prepared as an environmental compliance report. This Phase I report addresses the general regulations for toxic and hazardous

materials, but does not necessarily stipulate the specific compliance requirements under Federal, State and local laws for storage, use, transport, discharge or disposal of such materials at the subject property (specific compliance issues and questions about a particular site must be addressed directly to the regulatory agency with jurisdiction). In addition, no judgment is made with respect to the facility's compliance with worker exposure standards established by the Occupational Safety and Health Administration (OSHA).

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

III. DISCLAIMER

This report is only to be used as a guide in determining the potential for contamination by toxic or hazardous materials on the subject property at the time of the site visit. This Phase I Environmental Site Assessment (ESA) was undertaken in accordance with generally accepted assessment protocols, including the ASTM Standard Practice for Phase I ESAs (E 1527-00). This Phase I ESA is based principally on the review of historic and regulatory records (made available within a reasonable time period), relating to past occupants and usage of the subject property, as well as activities at nearby sites, and upon a visual assessment of the subject property, and makes no determinations with respect to portions of the subject property and its structures which were not inspected.

This Phase I ESA does not involve any sampling, testing, or laboratory analysis of subsurface soils, groundwater or building materials or other substances on-site, but constitutes only the professional opinion of EM&CA based on established procedures and protocols. This Phase I ESA is not, and should not be construed as, a guaranty, warranty, or certification of the presence or absence of toxic or hazardous

substances, which can be made only with testing, and contains no formal plans or recommendations to rectify or remediate the presence of any toxic or hazardous substances, which may be subject to regulatory approval.

Any and all liability on the part of EM&CA shall be limited solely to the cost of the Environmental Site Assessment report. EM&CA shall have no liability for any other damages, whether consequential, compensatory, punitive, or special, arising out of, incidental to, or as a result of, this assessment. EM&CA assumes no liability for the use of this report by any person or entity other than the institution and/or entities or persons for whom it has been prepared.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

Part D - Conclusions

Our Phase I assessment discovered no major documented environmental violations or confirmed environmental liabilities. At the time of our assessment, no potential areas of environmental concern were identified as posing an immediate environmental risk to the subject property or it's occupants. EM&CA recommends that an asbestos survey be performed and that an Asbestos Operations & Maintenance Program be implemented for 48 East 43rd Street.

Curriculum Vitae Of Environmental Professional

JOEL RUSSELL - PRESIDENT

Joel Russell – President, M.S. Environmental Engineer. Mr. Russell, a graduate of Florida Institute of Technology and New Jersey Institute of Technology, holds a Masters Degree in Environmental Engineering. He has twenty-five years of experience with a wide variety of environmental concerns including asbestos and lead based paint testing and remediation, indoor air quality, microbiological testing, Phase I, II and III property audits, underground storage tank remediation, water quality testing, air and water pollution and hazardous waste cleanups. Mr. Russell has performed numerous asbestos and lead based paint surveys and inspections, prepared expert reports and has analyzed thousands of bulk, air and wipe samples for public and private school boards, Fortune 500 companies, architects, engineers, hospital administrators and government clients throughout the United States. At EM&CA, Mr. Russell has been the principal design engineer for hundreds of environmental cleanup projects in the Tri state area. He has designed numerous inspection and sampling systems and procedures in accordance with all government regulations. Mr. Russell is a New York City licensed asbestos investigator and has been trained as a U.S. Environmental Protection Agency AHERA inspector, management planner and project designer. He has performed hundreds of New York City controlled asbestos investigations for a wide variety of New York City construction projects and has prepared the Asbestos Control Project (ACP-5) forms required by the New York City Building Department. Mr. Russell has provided expert witness testimony on multimillion dollar environmental remediation projects. He attended the McCrone Research Institute's internationally recognized course on asbestos identification. He also attended the U.S. Environmental Protection Agency Air Pollution Training Institute Course on Air Pollution Microscopy. Mr. Russell is a member of the American Industrial Hygiene Association.

290 Broadway
New York City, New York 10007-5000

RE: 48 East 43rd Street
Block 1277, Lot 46
New York City, New York

Dear Ms. Vasquez:

Environmental Monitoring & Consulting Associates is conducting a Phase One Environmental Site Assessment of the above referenced project site. This letter is a request for the USEPA Office of External Programs to perform a review of their records for any files having information on 48 East 43rd Street, New York, New York regarding any of the following:

- Superfund site listing
- Hazardous materials or spills
- Environmentally related permits
- Environmental clean-ups or remediations
- Violations recorded with the US EPA

Following your search, please contact us with the results. For our documentation purposes, we would appreciate having your response in writing. We will pay any reproduction fees necessary.

Thank you for your time and cooperation regarding this request.

Very truly yours,

Joel Russell

Dear Mr. Ribeck:

Environmental Monitoring & Consulting Associates is conducting a Phase One Environmental Site Assessment of the above referenced location.

EM&CA is requesting information on Consolidated Edison Pole Mounted or Vaulted Transformers located within the building or adjacent to the building servicing the above subject property.

EM&CA would like to request the following information concerning any PCB containing transformers and/or cable insulators at the above property:

- Age of transformer and/or cable insulators
- PCB content in PPM if any
- Information concerning past spills
- Community Right To Know notification
- Registration of Violations at the above referenced property

Please inform us whether or not there are files for the above site. If possible, please send a copy of the file(s). We will pay any reproduction fees necessary.

Your prompt attention to this request is greatly appreciated.

EXECUTIVE SUMMARY

Environmental Monitoring & Consulting Associates, Inc. conducted a Phase I Environmental Site Assessment of the property located at 327-331 Madison Avenue in the Borough of Manhattan, New York City, New York. The subject property is identified as Block 1277, Lot 52 on the municipal tax map. 327-331 Madison Avenue encompasses approximately 91,594 rentable square feet.

The Phase I Environmental Site Assessment was completed in a seven day time period and all of the regulatory agencies have not yet responded to our requests for information. Any significant findings resulting from pending city, state and federal agency responses to our written requests for environmental information under the Freedom-of-Information Act will be forwarded as an Addendum to this report.

This assessment is restricted to observations made during EM&CA's inspection of limited portions of the subject property and research into its history. The scope of work did not address compliance with any federal, state, or local laws, rules, regulations, ordinances or codes. It also did not include the collection or environmental laboratory analysis of any samples of building materials, air, water, or soil, and EM&CA makes no representations or warranties concerning their quality.

For the purpose of preparing this report, EM&CA has relied upon certain verbal information and representations provided by state and local government agency personnel, and documents in state and local government agency files. EM&CA did not attempt to independently verify the accuracy or completeness of this information, but did not detect any inconsistency or omission of a nature that might call into question the validity of any of this information. To the extent that the conclusions in this report are based in whole or in part on such information, they are contingent on its validity.

EM&CA recommends that a Phase II Environmental Audit be performed to investigate possible soil and/or groundwater contamination due to a former aboveground fuel oil tank. EM&CA also recommends that an asbestos survey be performed and an Asbestos Operations & Maintenance Program be implemented for 327-331 Madison Avenue, and that the water infiltration into the basement be addressed.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

Report
Phase I Environmental Site Assessment
327 – 331 Madison Avenue
Borough of Manhattan, New York City, New York

Part A - Introduction

I. Purpose and Scope of Work

The purpose of our Phase I Environmental Site Assessment was to perform a preliminary evaluation of potential or existing environmental liabilities which may be associated with the property. We reviewed information provided to us by New York City, New York State and USEPA offices contacted by us.

Our Phase I Environmental Site Assessment included:

1) a site visit;

2) a general site characterization;

3) a review of site data and records made available to us by our client;

4) a review of an environmental database search report conducted for the property and adjacent properties;

5) a review of historic maps;

6) discussions regarding the history of the site with personnel made known to us by our client or discovered by us during the study period;

7) a limited visual inspection for accessible asbestos containing materials and

8) an assessment of whether or not a more detailed investigation is considered appropriate to identify and quantify potential contamination and related environmental liabilities.

As requested, our scope of work did not include collection or analysis of air, water, soil, or other material samples. Further, our scope of work did not include an inspection of all interior building spaces, or a review of historic aerial photographs regarding the subject property.

II. Property Identification

Address: 327 – 331 Madison Avenue is located on the southeast corner of East 43rd Street and Madison Avenue in Midtown Manhattan in the Borough of Manhattan, New York City, New York.

Tax Lot & Block: The property is identified as Block 1277, Lot 52, on the municipal tax map.

Zoning: The subject property is zoned C5-3.

III. Property Description

The subject property, constructed in approximately 1923, is a commercial office building. The building consists of fifteen stories, sub-basement, basement and rooftop penthouse elevator machine room on a rectangular shaped plot of approximately 100' x 66'8" (0.15 acres). The entire plot is overlain by the building and paved walkways. The building is of brick and masonry construction supported by a steel superstructure. The sub-basement level is utilized as mechanical (boiler room, telephone room, electrical room, sprinkler valve room) and tenant leased and building storage areas. The basement level is also utilized for tenant storage, building maintenance offices, employee locker room, Patrick Conway Restaurant kitchen and electrical room. Also in the basement there is a kitchen for the restaurant. The ground floor is occupied by the following tenants:

- Bandolino Shoes
- Shoe Mania
- Prada Grusel Salon
- Patrick Conway Restaurant

There were no dry cleaning plants or photo finishing shops observed at the subject property. The facility utilizes Consolidated Edison electricity. There is no central A/C system. The building is cooled with individual tenant owned and operated A/C units. There is typically one or two A/C units per floor. Heat and hot water are provided by a natural gas fired boiler located on the sub-basement level. Hot water is then piped to cast iron radiators located at the perimeter of the building on all floors.

IV. Property Characteristics

We reviewed the following maps and reports to evaluate the general surface and subsurface characteristics of the subject property:

* Central Park, NY-NJ, 7.5 Series U.S.G.S. Topographic Map;
* "The Geology of New York City and Environs," by Christopher J. Schuberth, The National History Press, dated 1967; and
* National Wetlands Inventory Map, Central Park, NY-NJ, U.S. Department of Interior, April, 1980.

Our review of these references indicates that the subject property is relatively level with an approximate ground surface elevation of +50 feet (MSL). The topography in the site vicinity slopes in a westerly direction toward the Hudson River. The subject property is reportedly located on the Manhattan Formation, where the mica schist bedrock lies within several feet of the ground surface. Depth to groundwater is estimated to be shallow. The inferred direction of groundwater flow, based on topography, is to the west, but EM&CA has not verified this inferred direction with monitoring wells. Our review did not identify any Federal mapped wetlands on or adjacent to the subject property.

V. Surrounding Property Uses

The subject property is located in the Midtown East District which consists primarily of high rise, mid rise and low rise commercial office buildings with ground floor retail shops including restaurants, shoe stores, clothing stores, parking garages, barber shops, salons, etc. Abutting buildings include 325 Madison

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

Avenue, a large commercial office building located immediately adjacent to 327-331 Madison Avenue on the south side and a small commercial building (44 East 43rd Street) on the east side. Grand Central Station is located on block east of the subject property.

Part B - Document Search

I. Historical Search

Historic Maps: A review of the available Sanborn Maps indicate that previous structures that were present on this property include residential structures on the 1890, 1899 and 1910 map. The building currently known as 327-331 Madison Avenue first appears on the reviewed maps in 1929. The surrounding area was predominantly commercial. Potential USTs which may have been used in the former structures for heating or fuel purposes may represent a potential environmental liability for the site. However, any former USTs or chemical spills are likely to have been excavated and removed from the site during construction of the existing structure which is underlain by a basement and sub-basement. During our review of the historic maps, no off-site, adjacent property uses were confirmed as potential sources of contamination migration onto the subject property. The following Sanborn Maps for the subject property were reviewed:

1890	2 Maps	1980	2 Maps
1899	2 Maps	1985	2 Maps
1910	2 Maps	1988	2 Maps
1929	2 Maps	1991	2 Maps
1950	2 Maps	1996	2 Maps
1968	2 Maps		

1890 Sanborn Map

The area is primarily residential with row style type housing shown throughout the entire midtown area and at 327-331 Madison Avenue. There is a school at 44 – 46 East 43rd Street and a large Episcopal

Church (Church of the Holy Minister) immediately adjacent to the subject property on 42nd Street between

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

Madison Avenue and Vanderbilt Street. The present day Grand Central Station is called the Grand Central Railroad Depot and it appears as a basic rail yard with multiple tracks and no buildings.

1899 Sanborn Map

Same as the 1890 Sanborn Map except the school and the Episcopal Church of the Holy Minister are gone and have been replaced by commercial buildings.

1910 Sanborn Map

Same as the 1899 Sanborn Map except Grand Central Railroad Depot now shows as the Grand Central Terminal.

1929 Sanborn Map

Same as the 1910 Sanborn Map except the surrounding midtown area around the building is now more commercial than residential. The subject property is now shown on the map as being constructed in 1923 and it is called the Prudence Building. There is now shown the Biltmore Hotel and incoming station for the New York Central Lines and NYNH & HRR CO.

1950 Sanborn Map

Same as the 1929 Sanborn Map. Map is very blurry and difficult to read.

1968 Sanborn Map

Same as the 1950 Sanborn Map except the Pan American Building is now shown as being built over Grand Central Terminal.

1980 Sanborn Map

Same as the 1968 Sanborn Map.

1985 Sanborn Map

Same as the 1980 Sanborn Map except the Biltmore Hotel is gone and is now called the Bank of America Building.

1988 Sanborn Map

Same as the 1985 Sanborn Map.

1991 Sanborn Map

Same as the 1988 Sanborn Map.

1996 Sanborn Map

Same as the 1991 Sanborn Map except the Pan American Building is now called the Metropolitan Life Building.

Local Municipal Agency - Past Uses: During this assessment, we attempted to contact the following New York City municipal offices for information on the subject property: Building Department, Planning/Zoning, and Department of Environmental Protection (NYCDEP).

We have not yet received a response to our written request for information within the assessment period. Any future findings based on our review of the requested information will be provided in an Addendum to this report.

II. Database Search

We reviewed the results of a State and Federal environmental database search report conducted for the subject property by Toxics Targeting. The database search report and a description of each database is included in its entirety as Appendix C. The Toxics Targeting database search did not identify the subject property on any of the search databases. The following databases were searched:

ASTM-Required 1 Mile Search

i. National Priority List (NPL) Sites
ii. NYS Inactive Hazardous Waste Disposal Site Registry
iii. NYS Inactive Haz Waste Disposal Site Registry Qualifying
iv. RCRA Corrective Action (CORRACTS) Sites

Regulatory Records Review

i. National Priority List Sites for Federal Superfund Cleanup:

A listing of sites known to pose environmental or health hazards that are being investigated or cleaned up under the Federal Superfund program. There are no National Priority List for Federal Superfund Cleanup sites within 1 mile of 327-331 Madison Avenue.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

ii. New York Inactive Hazardous Waste Disposal Site Registry:

A state listing of sites that can pose environmental or public health hazards requiring investigation or cleanup. There are no (0) New York Inactive Hazardous Waste Disposal Sites registered within 1 mile of the subject property.

iii. New York Inactive Hazardous Waste Disposal Site Registry Qualifying:

A state listing of sites that qualify for possible inclusion to the NYDEC Inactive Haz. Waste Disposal Site Registry. There are no (0) New York Inactive Hazardous Waste Disposal Sites Registry Qualifying registered within 1 mile of the subject property.

iv. RCRA Corrective Action Activity Sites:

Waste facilities with RCRA corrective action activity reported by the USEPA. There are no RCRA corrective action activity sites within 1 mile of the subject property.

v. Delisted National Priority List (NPL) Sites

A listing of NPL Sites that have been removed from the National Priority List. There are no Delisted National Priority List Sites within ½ mile of the subject property.

vi. CERCLIS – Superfund Non-NFRAP Sites:

A federal listing of CERCLIS Sites that have no further remedial action planned. The subject property is not on the list. There are no (0) CERCLIS sites listed within ½ mile of the subject property.

vii. CERCLIS - Comprehensive Environmental Response, Compensation, And Liability Information System NFRAP Sites:

A check was made of the most recent U.S. Environmental Protection Agency's (USEPA) National Priorities List of Superfund hazardous waste sites which fall under CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act of 1980) and SARA (Superfund Amendments and Reauthorization Act of 1986).

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

Sites that USEPA decides do not warrant further evaluation are given a "No Further Remedial Action Planned" (NFRAP) designation in CERCLIS, which means that no further action under CERCLA is presently anticipated for that site. A NFRAP designation does not necessarily indicate that there is no hazard associated with the site, only that, based on available information, USEPA does not plan further investigation at this time.

There is one CERCLIS NFRAP Site (Anchor Casting Co. Inc. Map ID #1) within ½ mile of the subject property. The EPA has designated this site as no further remedial activity planned (NFRAP). This site should not impact the subject property.

viii. Brownfield Cleanup Sites:
Voluntary Cleanup Program
Environmental Restoration Program
Brownfield Cleanup Program

A listing of Brownfield Sites that are abandoned, idled or under-used industrial and commercial sites where expansion or redevelopment is complicated by real or perceived environmental contamination. There are no (0) Brownfield Sites within a ½ mile radius of the subject property.

ix. New York Solid Waste Facilities:

Active and inactive landfills, incinerators, transfer stations or other solid waste management facilities. The subject property is not on the list. There are no (0) New York Solid Waste Facilities within ½ mile of the subject property.

x. New York and Federal RCRA Hazardous Waste Treatment, Storage or Disposal Facilities:

Sites reported by the NYS manifest system and the USEPA's Resource Conservation and Recovery Act Information System (RCRIS). Also includes the following databases:

- RCRA Violations: waste facilities with violations reported by the USEPA pursuant to the Resource Conservation and Recovery Act.
- RCRIS corrective action activity (CORRACTS): waste facilities with RCRIS corrective action activity reported by the USEPA.

There are no (0) sites located within ½ mile of 327-331 Madison Avenue.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

xi. Toxic Spills: active and inactive or closed spills reported to state environmental authorities, including remediated and unremediated leaking underground storage tanks. This database includes the following categories:

* Tank Failures
* Tank Test Failures
* Unknown Spill Cause or Other Spill Causes
* Miscellaneous Spill Causes

There are three hundred thirty (330) spills within ½ mile of the subject property and two (2) spills within 100 feet and corrective actions have been taken on these two (Map ID #9 and #296).

These three hundred thirty (330) sites are not considered to represent an environmental concern to the subject property based upon willing responsible parties, corrective actions taken and due to their cross gradient locations relative to the presumed direction of groundwater flow and the minor nature of the spills.

xii. New York State Major Oil Storage Facilities:

Sites with more than a 400,000 gallon capacity for storing petroleum products. The subject property is not on the list. There are no (0) sites within approximately ⅛ mile of 327-331 Madison Avenue.

xiii. New York State and Local Petroleum Bulk Storage Facilities:

A check was made of the most recent NYSDEC Petroleum Bulk Storage (PBS) database. Petroleum bulk storage facilities have petroleum storage capacities in excess of eleven hundred (1,100) gallons, and less than four hundred thousand (400,000) gallons.

The subject property is not on the list.

There are no (0) NYS major oil storage facilities within 0 – ⅛ mile of the subject property.

There are a total of sixteen (16) local PBS facilities listed within 100 feet - ⅛ mile of the subject property. None of these is expected to impact the subject property.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

xiv. New York and Federal RCRA Hazardous Waste Generators And Transporters:

RCRA Hazardous Waste Handlers (which include waste generators, transporters, and treatment/ storage/disposal operators) are regulated by the Federal government under the Resource Conservation and Recovery Act (RCRA). The latest available USEPA List of Hazardous Waste Handlers was checked for the subject businesses and businesses adjacent to the subject property. An inventory of hazardous waste handlers is useful to assess the kinds of hazardous materials in the vicinity of the site, as well as on the subject property. The presence of hazardous waste generators or transporters in the immediate vicinity does not necessarily imply risk of contamination to the subject property.

Sites reported by the NYS manifest system and the USEPA's Resource Conservation and Recovery Action Information System (RCRA). Also includes the following database:

- RCRA Violations: waste facilities with violations reported by the USEPA pursuant to the Resource Conservation and Recovery Act.

There is one (1) hazardous waste generator, Consolidated Edison (Map ID# 348) located 68 feet east southeast of the subject property with a waste manifest for removal of petroleum contaminated PCBs.

There are also sixty-eight (68)other RCRA Hazardous Waste Generators listed within 100 feet - ⅛ mile radius of the subject property. None of the sixty-eight (68) generators should present an environmental concern to the subject property.

xv. New York State Chemical Bulk Storage Facilities:

Sites storing hazardous substances listed in 6 NYCRR Part 597 in aboveground tanks with capacities of 185 gallons or more and/or underground tanks of any size. There are no New York Chemical Bulk Storage Facilities listed within ⅛ mile of the subject property.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

xvi. Historic New York City Utility Sites (1890's to 1940's):

Power generating stations, manufactured gas plants, gas storage facilities, maintenance yards and other gas and electric utility sites. There are no Historic New York City Utility Sites located within ⅛ mile of the subject property.

xvii. New York City Environmental Quality Review Requirements ("E") Sites:

There are no New York City Environmental Quality Review Requirements ("E") Sites within 100 feet of the subject property.

xviii. ERNS: Federal Emergency Response Notification System Spills (ERNS):

A listing of federally reported spills. The subject property is not on the ERNS list.

xix. New York City Fire Marshall Tank Sites (On Site):

The subject property is not on the New York City Fire Marshall Tank Sites list.

xx. New York City 1934 Solid Waste Sites:

A listing of solid waste disposal sites operated by New York City municipal authorities circa 1934. There are no New York City Solid Waste Sites within ½ mile of the subject property.

xxi. New York Hazardous Substance Waste Disposal Site:

A state listing of sites contaminated with toxic substances that can pose environmental or public health hazards. These sites are not eligible for state cleanup funding programs. There is one (1) site, Anchor Castings (Map ID# 417), which although listed in the database, has been removed from the Hazardous Substance inventory and is listed as being of no threat to the environment or public health.

xxii. New York Toxic Release Inventory Facilities:

Discharges of selected toxic chemicals to air, land, water or treatment facilities. There are no New York Toxic Release Inventory Facilities within ⅛ mile of the subject property.

xxiii. Federal Permit Compliance System Toxic Wastewater Discharges:

Permitted toxic wastewater discharges. There are no permitted toxic wastewater discharges within ⅛ mile of the subject property.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

xxiv. Air Discharges:

Air pollution point sources monitored by U.S. EPA and/or state and local air regulatory agencies. 327-331 Madison Avenue is not on the air discharge list. There are ten (10) additional NYS air discharges located within ⅛ mile of the subject property. None of these ten (10) facilities should have any environmental impact on 327-331 Madison Avenue.

xxv. Federal Civil & Administrative Enforcement Docket:

Civil judiciary cases filed on behalf of the U.S. Environmental Protection Agency by the Department of Justice. There are six (6) civil judiciary cases within ⅛ mile of the subject property. None of these six (6) cases should impact the subject property.

B. N.Y.C. Department of Sanitation

The following inactive landfills are located in New York City: Pelham Bay, Bronx; Pennsylvania and Fountain Avenues, Brooklyn; Edgemere Avenue, Queens; and Brookfield Avenue, Staten Island, New York. Only one active landfill is located in New York City: Fresh Kills, Staten Island. None of these landfills are located within ½ mile of the subject property.

III. Permit Status

There are no environmental permits for the subject property.

IV. Utilities Available and Connections

The subject property is reportedly serviced by New York City water and sanitary sewer utilities and Consolidated Edison steam and electricity.

V. Other Environmental Information

Knowledgeable Contact Interview: EM&CA interviewed Mr. Pat McAuley, Building Superintendent for twenty years. This gentleman arranged a tour of typical building areas. Mr. McAuley reported that there is one (1) natural gas fired boiler located in the sub-basement boiler room.

The building is heated by hot water which is piped to cast iron radiators on the perimeter of the building. There is no emergency generator in the building.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

Part C - Site Inspection

An on-site reconnaissance of the ground level exterior of the building and limited interior building spaces was conducted by Mr. Joel Russell (EM&CA). During his reconnaissance, Mr. Russell inspected the sub-basement, basement areas, as well as roof areas, penthouse and typical tenant spaces.

I. Areas Of Environmental Concern

A. Storage Tanks

No fuel oil storage tanks were observed during our inspection. The building is currently a natural gas fired boiler.

EM&CA has obtained drawings of the building showing the presence of an aboveground fuel oil storage tank in the basement and sub-basement levels in the northeast corner of the building (see Appendix E). It is recommended that this area be tested for possible soil and groundwater contamination.

B. Asbestos

During Mr. Russell's limited walkthrough of the building, the following potential suspect asbestos containing materials were observed:

Sub-Basement:

Boiler Room: 4 fittings above boiler with fiberglass insulated pipes
MNM Electric Storage Room: 20 LF and 6 fittings
Elevator Machine Room: 8 LF pipe insulation
Electric Room: 10 LF ACM and 2 fittings
Corridor: 425 LF pipe insulation and 40 fittings
Paul Cowen Greenburg Storage: No access
Storage Room Adjacent Passenger Elevator Room: 12 LF
Corridor Adjacent Telephone Room: 8 LF
Patrick Conway Restaurant A/C Room: 20 LF and 4 fittings
Bandolino Shoe Store A/C Room: 10 LF and 5 fittings

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

Basement:

Superintendent's Work Shop: 12" x 12" floor Tile

Superintendent's Office: 12" x 12" floor Tile

Locker Room: 12" x 12" floor tile

Corridor Adjacent Superintendent's Office: 12" x 12" Floor Tile

Stairwell A Near 43rd Street Exit: 24 LF pipe insulation

Eighth Floor:

Barash Freidman A/C Room: 9" x 9" vinyl asbestos floor tile

The suspect asbestos containing pipe and fitting insulation materials observed were in fair to poor condition. The non-friable suspect 9" x 9" and 12" x 12" vinyl floor tiles are in good condition. It is recommended that a building asbestos survey be conducted and an Asbestos Operations & Maintenance Program (O&M) be established for the building.

C. Odors

Strong, pungent or noxious odors were not detected during the site reconnaissance.

D. Pools Of Liquid

There were no pools of standing surface liquid observed. Evidence of water leakage and damage to the plaster ceiling was observed in the basement building manager's office and hallway adjacent to the kitchen. According to the building superintendent, Mr. Pat McAuley, this water comes in from the street and may be caused by a blocked storm drain or sewer outside the building. It is recommended that this water infiltration into the building be addressed.

E. Chemical/Drum Storage

EM&CA did not observe storage of any hazardous materials.

Paints, cleaning agents, etc., are stored in the building storage area on the sub-basement level.

F. Unidentified Substance Containers

Unidentified substance containers were not observed.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

G. Stains Or Corrosions

Stains or corrosions on floors, walls or ceilings were not observed.

H. Drains And Sumps

Several sump pumps and floor trenches were observed in the sub-basement.

All sumps and trenches are reportedly connected to the New York City sanitary sewer system.

I. Pits, Ponds or Lagoons

There were no pits, ponds or lagoons observed during the site reconnaissance.

There were no septic systems observed. All sewage flows into the municipal New York City sewer system.

J. Proceedings Involving The Property

The building superintendent, Mr. Pat McAuley of Will Rock Management and Consulting, Inc., informed EM&CA that to the best of his knowledge, he was not aware of any pending, past, or threatened litigation, administrative proceedings or notices from any governmental entity regarding possible violation of environmental laws or possible liability relating to Hazardous Substances or Petroleum Products.

K. Polychlorinated Biphenyls ("PCBs")

Prior to 1979, PCB's were widely used in electrical equipment such as transformers, capacitors, switches and voltage regulators for their cooling property. The manufacture, processing, commercial distribution, and use (except in a "totally enclosed manner") of PCB's was banned in 1979, under the Toxic Substances Control Act (40 CFR Part 761). PCB spills are subject to strict reporting, clean-up and disposal requirements, due to the toxicity of the substance, and its threat to human health and the environment.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

a. PCB-Containing Transformers

No "wet type" transformers were observed on the subject property.

b. PCBs In Fluorescent Light Ballasts

Fluorescent lights were noted in the subject building. It is possible that the small capacitors in the ballasts of these fluorescent lights contain PCBs. None of the fluorescent light ballasts that were visually inspected during the site visit were observed to be leaking.

Before USEPA banned the manufacture of PCBs in 1979, PCBs were used in the small capacitors of fluorescent light ballasts. All light ballasts manufactured since 1979 should be marked by the manufacturer with the statement "No PCBs". Ballasts that were manufactured prior to 1979, or that contain no statement concerning PCB content, should be assumed to contain PCBs.

L. Evidence of Chemical Spills

There was no indication of any chemical spills on site.

M. Wastewater Discharges

There is no treatment of wastewater on site. The building discharges wastewater to the New York City sewer system.

N. Solid Waste Disposal

There is no significant treatment of solid waste on site. Trash and recyclables are removed by a private trash hauler (Classic).

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

O. Lead paint

a. *Definitions and Regulations*

Lead-based paint is hazardous when in a deteriorating condition (i.e., chipped, broken, crumbling, pulverized); lead is toxic to humans, and particularly to children, if ingested, inhaled, or otherwise absorbed. Lead-based paint debris removed during construction/ renovation work may be required to be disposed of as hazardous waste. Lead dust generated during renovation/demolition activities also poses a potentially significant health threat to workers and residents.

Lead-based paint hazards in New York City are regulated by the New York City Department of Environmental Protection, the Bureau of Lead Poisoning Control, New York City Department of Health, and the Department of Housing, Preservation and Development Code Enforcement Office. According to New York City's Local Law 1, lead-based paint hazards are defined in apartment building dwelling units (with children under the age of seven) where paint is found to have 0.5 percent of metallic lead based

on the non-volatile content of the paint. Lead-based paint hazards are presumed to be

present in any dwelling unit with children under the age of seven, built before 1960, where the paint is found to be peeling (unless satisfactory evidence that no lead-based paint is present can be produced).

b. *Site Visit Observations*

Given the age of the subject building (constructed circa 1923), it is likely that lead-based paints were used at this site. Painted surfaces in the subject building were observed to be generally in good condition.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

P. Soil Contamination

A site inspection of the outside of the premises was made. The inspection did not identify any new environmental concerns. There was no evidence of any spillage or contamination on the exterior areas.

Q. Elevators

The building is serviced by two (2) passenger and one (1) combination passenger/freight electric cable type elevator and one (1) street car cable type elevator. No hydraulic elevators were observed.

R. Radon

Radon, a naturally occurring radioactive gas, is the product of the radioactive decay of radium. It is found most frequently in high concentrations in rock formations containing uranium, granite, shale, phosphate, and pitchblende. Radon may also be found in soils contaminated with industrial waste from uranium and phosphate mining. Radon as a gas can move through the soil and water,

and into the atmosphere, and is a potential health concern if confined in sufficiently high

concentrations in indoor environments. The U .S. Environmental Protection Agency (USEPA) has set an “action level” of 4.0 picocuries per liter for continuous long term exposure to radon gas. If radon gas is measured above this level, USEPA suggests follow-up testing and remediation measures.

According to data compiled by the Bureau of Radiation Protection, New York State Department of Health, New York City has one of the lowest average levels of basement radon measurements in New York State. The latest available statistics indicate an average of 1.5 picocuries/liter for New York County (as an average of the five counties), compared to a statewide average of 5.6.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

Based on these low average basement measurements, it is unlikely that radon gas levels with the subject building exceed the USEPA action level of 4.0 picocuries/liter and therefore basement radon testing is typically not recommended. However, if specific readings of radon gas levels within a particular building are needed then testing for continuous radon gas levels would be necessary.

S. Tenant Listing

A tenant listing has been obtained and is attached to Appendix D.

II. SCOPE OF WORK

A. Purpose And Limitations

This Phase I Environmental Site Assessment (ESA) involves research into the history of uses of the site, checks with appropriate government agencies, and a visual inspection of the building and property to determine the possible presence of toxic and hazardous materials, and/or chemical products. An evaluation is then made regarding the potential for significant site contamination by toxic or hazardous materials and/or chemical products from past or present use.

Since the Phase I scope of work does not typically include testing of building materials (for asbestos, lead-based paints, PCBs, etc.) or of subsurface soils or groundwater, no definitive assessment of the presence of asbestos, lead-based paint, PCBs, soil or groundwater contamination (from on-site or off-site sources) is made. In addition, specific testing for radon levels is also not undertaken. It should be

noted that other issues that may relate to property value impairments (e.g. ambient air quality, noise pollution, perceived risk from electromagnetic fields, etc.) are outside the scope of a Phase I ESA, and are not addressed.

If further determination of any potential contamination or analysis of specific materials is needed, then testing and/or additional investigation (Phase II) would be necessary.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

B. Conformance with ASTM Standard Practice

This report has been generally prepared in conformance with the scope of the ASTM Standard Practice for Phase I ESAs (E 1527-00) as well as any protocols required by most major lending institutions. In several aspects the scope of work exceeds the ASTM (E 1527-00) scope (e.g., additional database searches, asbestos, radon, lead-based paint issues, wetlands).

C. Sources of Information and Research Methods

Historical site research is important in the assessment of the likelihood of past releases of hazardous substances (which include petroleum products). Sources of historical information for the subject property may include:

- Local library documents (historical maps, atlases, address directories).
- Interviews with site contacts, current site operators, and property owners.
- USGS topographic maps, land use and zoning maps, flood plain maps.
- New York City Buildings Department for building history including construction, demolition, and alteration permits.

The following regulatory agency lists and databases of documented hazardous waste sites, waste handlers, and spills are checked for the vicinity of the subject property:

- U.S. Environmental Protection Agency for location of Superfund and CERCLIS sites, ERNS database, and RCRA Hazardous Waste Handlers and Treatment/Storage/Disposal Facilities (TSDF).
- New York State Department of Environmental Conservation, Region 2, for hazardous waste spill logs, Significant SPDES facilities, Inactive Hazardous Waste Disposal Sites, and registered tank lists.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

- New York City Fire Department, for permits for petroleum storage tanks, and for the bulk storage of other flammable materials, and records of environmental violations, storage issues, tank leaks or spill incidents.
- New York City Department of Sanitation for location of active and inactive landfills.

The site visit involves a review of current operations, interviews with knowledgeable on-site occupants or building managers, and inspection of accessible areas of the building and inspection of the property for visible indications of any significant contamination by toxic or hazardous materials. The investigation includes the following objectives:

- To identify sources of potential on-site contamination, such as underground storage tanks, dry wells, interior floor drains, transformers and fluorescent light ballasts (which may contain PCBs), suspected asbestos containing materials, and suspected lead-based paints, etc.
- To examine the property for signs of potential contamination: stained soils, unusual odors, stressed or dead vegetation, improperly stored drums, oil slicks, on-site waste disposal/dumping, etc.

- To identify the quantity and type of toxic or hazardous substances (if any) used in the on-site operations.
- To determine if any on-site toxic and hazardous materials are stored, handled and disposed of in accordance with good practice, minimizing the potential for contamination.
- To identify potential off-site sources of contamination. Adjacent uses are noted, particularly auto-related and industrial sites.
- To identify on-site or adjacent off-site sensitive receptors, such as wetlands, surface waters, drinking water wells.

EM&CA
Environmental Monitoring & Consulting Associates
P.O. BOX 872 • SOMERVILLE, NJ 08876 • (732) 249-3005 • FAX (732) 249-3384

Not all of the objectives described above are applied to every site; investigations are tailored to the particular nature of the site. It should be noted that information requested from regulatory agencies may be incomplete or unavailable within a reasonable time period.

In accordance with ASTM standards, a Phase I ESA is not prepared as an environmental compliance report. This Phase I report addresses the general regulations for toxic and hazardous materials, but does not necessarily stipulate the specific compliance requirements under Federal, State and local laws for storage, use, transport, discharge or disposal of such materials at the subject property (specific compliance issues and questions about a particular site must be addressed directly to the regulatory agency with jurisdiction). In addition, no judgment is made with respect to the facility's compliance with worker exposure standards established by the Occupational Safety and Health Administration (OSHA).

III. DISCLAIMER

This report is only to be used as a guide in determining the potential for contamination by toxic or hazardous materials on the subject property at the time of the site visit. This Phase I Environmental Site

Assessment (ESA) was undertaken in accordance with generally accepted assessment protocols, including the ASTM Standard Practice for Phase I ESAs (E 1527-00). This Phase I ESA is based principally on the review of historic and regulatory records (made available within a reasonable time period), relating to past occupants and usage of the subject property, as well as activities at nearby sites, and upon a visual assessment of the subject property, and makes no determinations with respect to portions of the subject property and its structures which were not inspected.

This Phase I ESA does not involve any sampling, testing, or laboratory analysis of subsurface soils, groundwater or building materials or other substances on-site, but constitutes only the professional opinion of EM&CA based on established procedures and protocols. This Phase I ESA is not, and should not be construed as, a guaranty, warranty, or certification of the presence or absence of toxic or hazardous

EM&CA

substances, which can be made only with testing, and contains no formal plans or recommendations to rectify or remediate the presence of any toxic or hazardous substances, which may be subject to regulatory approval.

Any and all liability on the part of EM&CA shall be limited solely to the cost of the Environmental Site Assessment report. EM&CA shall have no liability for any other damages, whether consequential, compensatory, punitive, or special, arising out of, incidental to, or as a result of, this assessment. EM&CA assumes no liability for the use of this report by any person or entity other than the institution and/or entities or persons for whom it has been prepared.

Part D – Conclusions

EM&CA recommends that a Phase II Environmental Audit be performed to investigate possible soil and/or groundwater contamination due to a former aboveground fuel oil tank. EM&CA also

recommends that an asbestos survey be per rmed and an Asbestos Operations & Maintenance Program be implemented for 327-331 Madison Avenue, and that the water infiltration into the basement be addressed.

Curriculum Vitae Of Environmental Professional

JOEL RUSSELL - PRESIDENT

Joel Russell – President, M.S. Environmental Engineer. Mr. Russell, a graduate of Florida Institute of Technology and New Jersey Institute of Technology, holds a Masters Degree in Environmental Engineering. He has twenty-five years of experience with a wide variety of environmental concerns including asbestos and lead based paint testing and remediation, indoor air quality, microbiological testing, Phase I, II and III property audits, underground storage tank remediation, water quality testing, air and water pollution and hazardous waste cleanups. Mr. Russell has performed numerous asbestos and lead based paint surveys and inspections, prepared expert reports and has analyzed thousands of bulk, air and wipe samples for public and private school boards, Fortune 500 companies, architects, engineers, hospital administrators and government clients throughout the United States. At EM&CA, Mr. Russell has been the principal design engineer for hundreds of environmental cleanup projects in the Tri state area. He has designed numerous inspection and sampling systems and procedures in accordance with all government regulations. Mr. Russell is a New York City licensed asbestos investigator and has been trained as a U.S. Environmental Protection Agency AHERA inspector, management planner and project designer. He has performed hundreds of New York City controlled asbestos investigations for a wide variety of New York City construction projects and has prepared the Asbestos Control Project (ACP-5) forms required by the New York City Building Department. Mr. Russell has provided expert witness testimony on multimillion dollar environmental remediation projects. He attended the McCrone Research Institute's internationally recognized course on asbestos identification. He also attended the U.S. Environmental Protection Agency Air Pollution Training Institute Course on Air Pollution Microscopy. Mr. Russell is a member of the American Industrial Hygiene Association.

RE: **331 Madison Avenue**
Block 1277, Lot 52
New York City, New York

Dear Ms. Vasquez:

Environmental Monitoring & Consulting Associates is conducting a Phase One Environmental Site Assessment of the above referenced project site. This letter is a request for the USEPA Office of External Programs to perform a review of their records for any files having information on 331 Madison Avenue, New York, New York regarding any of the following:

- Superfund site listing
- Hazardous materials or spills
- Environmentally related permits
- Environmental clean-ups or remediations
- Violations recorded with the US EPA

Following your search, please contact us with the results. For our documentation purposes, we would appreciate having your response in writing. We will pay any reproduction fees necessary.

Thank you for your time and cooperation regarding this request.

Very truly yours,

Joel Russell

Dear Mr. Ribeck:

Environmental Monitoring & Consulting Associates is conducting a Phase One Environmental Site Assessment of the above referenced location.

EM&CA is requesting information on Consolidated Edison Pole Mounted or Vaulted Transformers located within the building or adjacent to the building servicing the above subject property.

EM&CA would like to request the following information concerning any PCB containing transformers and/or cable insulators at the above property:

- Age of transformer and/or cable insulators
- PCB content in PPM if any
- Information concerning past spills
- Community Right To Know notification
- Registration of Violations at the above referenced property

Please inform us whether or not there are files for the above site. If possible, please send a copy of the file(s). We will pay any reproduction fees necessary.

Your prompt attention to this request is greatly appreciated.

Very truly yours,

Joel Russell

EMTEQUE

March 9, 2007

Ms. Marianna Freda
SL Green Realty Corporation
420 Lexington Avenue
New York, New York 10170

Re: 327-331 Madison Avenue, NY, NY
EMTEQUE Corporation Project No. 07-3238

Dear Ms. Freda,

EMTEQUE Corporation ("EMTEQUE") has been retained to provide environmental consulting services to SL Green Realty Corporation during its due diligence investigations of the above referenced property. Specifically, EMTEQUE was retained to review a Phase I Environmental Site Assessment (ESA) for the property as prepared by EM&CA with specific emphasis placed on the past presence of a heating oil tank, and the recommendation which had been provided to perform a subsurface investigation at the site.

Our review concludes the following; The Phase I ESA as stated in the report was performed to the ASTM standard E1527-00. This standard has since been revised in 2005 and is known as E1527-05. Furthermore, the Federal government has also issued a similar standard in 2006 known as the "All Appropriate Inquiries" rule, and to that end, the Phase I ESA was not performed to current industry standards. The author indicated in his site review that a review of certain architectural drawings suggested the past presence of a heating oil tank in the basement/subbasement which was no longer on site. As a result of the potential past presence of a tank and absence of any tank closure documentation, a Phase II subsurface investigation was recommended to ascertain whether the subsurface soils had been impacted by petroleum product which might have leaked from this tank.

Our site investigation and interviews indicated the following; the tank could not be located. The drawings which we reviewed on site did not indicate the presence of any heating oil tanks. Visual observations of the floors in the storage rooms near the boiler did not reveal any staining to the concrete slab which may have been indicative of a former tank. An interview of the building staff, some of which have had considerable years with the building did not suggest the knowledge of a tank at the site. A tank, if present in the past, and located in a subbasement, might have been an aboveground storage tank installed on donnage, and any past leakage from the tank would have stained the concrete slabs and this would have been visible.

A call placed to the author of the Phase I ESA indicated that the presence of a tank was noted on architectural drawings of the facility which were available online through the building's sales broker. EMTEQUE Corporation was unable to access this web site.

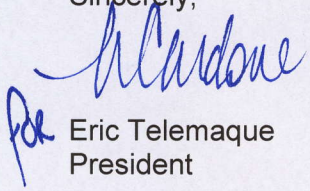
505 Eighth Avenue • Suite 900 • New York, NY 10018
Phone: 212.631.9000 • Fax: 212.631.8066 • www.emteque.com

In our opinion, insufficient evidence exists to conclude that a subsurface investigation was required. Additional steps which should have been performed during the Phase I ESA should have included Freedom of Information requests made to the New York State Department of Environmental Conservation (NYSDEC) and to the New York City Fire Department (NYFD) to determine whether they had any knowledge of the past presence of a heating oil tank. We do not know if such requests were forwarded to these agencies.

Finally, groundwater in Manhattan is not potable (drinking water), and as such, the regulatory agencies are more lenient with regards to contamination to subsurface soils. In the event that contamination of petroleum product to the soils had been confirmed, a spill would have been assigned to the site, but is unlikely that any soils remediation would have been required at this time. In the event that the structure was scheduled for demolition and redevelopment, soils remediation would have been required at that time. The extent of the required remediation would have been to the depth of the new foundation or potentially to bedrock in the event that bedrock was shallow, the potential installation of a vapor barrier and possible subslab depressurization systems, all of which have finite quantifiable costs.

Should you have any questions or require further clarification, please feel free to contact me at your earliest convenience.

Sincerely,



Eric Telemaque
President

Project No. 13-6684.02 January 9, 2014

EXECUTIVE SUMMARY

Under Contract with Hines (the "Client"), WCD GROUP ("WCD") conducted a Phase I Environmental Site Assessment ("ESA") of a property located at 331 Madison Avenue, New York, NY 10017 (Tax Block 1277, Lot 52) (hereafter referred to as the "Site"). WCD understands that the Client has requested this Phase I ESA in order to identify recognized environmental conditions (RECs) and environmental concerns that may affect the suitability of the Site for redevelopment.

The Phase I ESA was conducted in accordance with the scope and limitations of the ASTM International Standard E 1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and the "due diligence" regulations of the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") and Section 9601 (35)(b) of the Superfund Amendments and Reauthorization Act. In addition, this Phase I ESA included an assessment of vapor encroachment conditions (VECs) as per ASTM E 2600-10. The Phase I ESA also includes a preliminary evaluation of specific potential environmental issues or conditions that are, according to ASTM E 1527-13, considered non-scope considerations. These issues include assessments of potential radon, asbestos-containing material (ACM), polychlorinated biphenyl (PCB)–containing light ballasts and caulking materials, lead-containing paint (LCP), chemical storage, wetlands, regulatory compliance issues, mold, biological agents, and methane.

The Site is located at 331 Madison Avenue, New York, New York 10017. An alternative address for the Site is 327 Madison Avenue, New York, New York 10017. The Site is defined as Tax Block 1277, Lot 52 in the Borough of Manhattan. The Site consists of a 15-story office/retail building with a basement and sub-basement, owned by SL Green. The Site's 15-story building occupies approximately the entire 6,666 square foot square-shaped lot. The building is currently occupied by various commercial tenants leasing office space, as well as a first floor "Shoe Mania" retail shop, "Easy Spirit" retail shop, and an empty commercial storefront space. Based on review of Sanborn® fire insurance rate maps, the existing building was constructed in 1923. The New York City Department of City Planning (NYCDCP) zoning map indicates the Site is designated as zone C5-3, which is designated for commercial/office use.

Summary of RECs, VECs and Environmental Concerns

RECs/VECs

This Phase I ESA has identified the following RECs/VECs associated with the Site:

- A spill at 317 Madison Avenue, New York, New York was reported to the NYSDEC on September 6, 2013 when approximately six (6) inches of oil covered the floor of the basement tank room during the removal of 7,500 gallons of No. 2 fuel oil from the 7,500-gallon AST. The spill was reportedly contained to the tank room and reportedly did not result in an environmental release. The NYSDEC assigned the incident spill number 1305985. The spill does not have a closure date. **The NYSDEC spill site is located adjacent to and south of the Site.**

Environmental Concerns

The Phase I ESA has revealed the following environmental concerns associated with the Site:

- Visible water damage was observed in the sub-basement as well as on the tenth floor. Repair of the moisture source on the tenth floor had not been addressed at the time of inspection. The presence of stagnant water and mold, where present, should be regarded as an environmental concern;

- Based on the age of the Site building, suspect ACM may be present and is considered an environmental concern;

- Based on the age of the Site building, the painted surfaces may contain lead and LCP is considered an environmental concern; and

- Fluorescent light fixtures and caulking materials were observed during the Site inspection. Based on the age of the building, the fluorescent light fixtures and caulking materials may contain PCBs. The potential presence of PCB-containing lighting ballasts and caulking materials is considered an environmental concern.

Recommendations

Based on the findings of this Phase I ESA, WCD believes that a Phase II Environmental Site Investigation should be performed to determine if the identified RECs/VECs have affected the Site. WCD recommends that any water/mold damaged, ACM, Lead Containing Paint, and PCB-containing components affected by future renovations, repairs or demolition at the Site be identified and properly managed during such activities. In addition, stored chemicals and petroleum products should be managed in accordance with applicable federal, state and local regulations.

1.0 INTRODUCTION

This report presents the findings of the Phase I Environmental Site Assessment ("ESA") prepared by WCD GROUP ("WCD") at the request of Hines (the "Client"), for the property located at 331 Madison Avenue, New York, New York 10017. The legal description for the Site is Block 1277, Lot 52 in the Borough of Manhattan. WCD understands that Hines is considering the Site for potential redevelopment as a commercial office space. Figure 1 shows the Site location.

1.1 PURPOSE

The purpose of this survey is to identify the presence of any Recognized Environmental Conditions ("RECs")[1], Historical Recognized Environmental Conditions ("HRECs")[2] and/or Controlled Recognized Environmental Conditions ("CRECS")[3] as defined by ASTM International ("ASTM") Standard Practice E 1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process,* with respect to the Site. In addition, the standard included an assessment for Vapor Encroachment Conditions (VECs)[4] at the Site per ASTM Standard E 2600-10. This report has been prepared for and at the request of the Client within the context of ASTM E 1527-13.

The application of ASTM Standard Practice E 1527-13 in the preparation of this report is intended to permit the designated User of this report to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser (collectively, "landowner liability protections") limitations on liability with respect to the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"). This report, therefore, intends to represent "all appropriate inquiry" into the previous ownership and uses of the Site, consistent with good commercial or customary practice, as defined by CERCLA in 42 U.S.C. §9601(35)(B).

1.2 SCOPE OF SERVICES

WCD's scope of services for this Phase I ESA consisted of the following components, as further detailed in subsequent sections of this report:

- Regulatory records review;
- Review of prior reports;
- Site visit and reconnaissance;
- Interviews with present and past owner, operators, and occupants of the property; and
- Evaluation of information and preparation of a Phase I ESA report.

The User's responsibilities, as set forth in Section 6 of ASTM Standard Practice E 1527-13, with respect to the identification of RECs in connection with the Site, comprise an additional scope of inquiry. These responsibilities consist of the following tasks and information sources, as further discussed in Section 3 of this Phase I ESA:

[1] ASTM Standard E 1527-13 defines "Recognized Environmental Conditions" as follows: "The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."
[2] ASTM Standard E 1527-13 defines "Historical Recognized Environmental Condition" as follows: "A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."
[3] ASTM Standard E 1527-13 defines "Controlled Recognized Environmental Condition" as follows: "A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."
[4] ASTM Standard E 2600-10 defines "Vapor Encroachment Condition" as follows: "The presence or likely presence of Chemical(s) of Concern (COC) vapors in the subsurface of the Target Property caused by the release of vapors from contaminated soil or groundwater or both either on or near the Target Property."

- Review of Title and Judicial Records for Environmental Liens or Activity and Use Limitations ("AULs");
- Specialized Knowledge or Experience of the User;
- Actual Knowledge of the User;
- Reason for Significantly Lower Purchase Price;
- Commonly Known or Reasonably Ascertainable Information; and
- Reason for Requesting a Phase I ESA.

1.3 SIGNIFICANT ASSUMPTIONS

In general, WCD has assumed in the conduct of this Phase I ESA, that respondents to our inquiries offered information in good faith and that through our research we obtained reasonably correct and accurate information from the sources consulted.

1.4 LIMITATIONS AND EXCEPTIONS

This investigation was limited to the review of available records, interviews with local officials and persons familiar with the Site, and an on-site visual inspection. The Site inspection was limited to observation of surficial conditions only. Such an inspection cannot be expected to reveal all oil or hazardous materials or situations that might be present on-site; some hazardous materials or conditions may exist and not be detected because they are beyond the scope of this study. The investigation was conducted in a manner consistent with that level of care and skill exercised by environmental professionals currently practicing under similar conditions and was based on information made available to the representatives of WCD. All documents prepared by or furnished by WCD pursuant to this project are to be used in the context of the scope of services contracted. This document is not intended or represented to be suitable for reuse by the client or others on modifications of the project scope. Reuse or release to third parties without the expressed written permission of the consultant is prohibited.

1.5 SPECIAL TERMS AND CONDITIONS

Terms and Conditions of the contract for this Phase I ESA are set forth in the WCD proposal to Hines.

1.6 USER RELIANCE

This Phase I ESA was conducted in a manner consistent with the level of care and skill exercised by environmental professionals currently practicing under similar conditions and was based on information made available to WCD representatives. WCD conducted interviews and file and data reviews to obtain information that could reveal the past or present use, storage and/or disposal of hazardous substances or petroleum products on or near the Site. WCD performed a visual reconnaissance of the Site to identify evidence of potential sources of contamination. The Phase I ESA conforms to the general content requirements of ASTM Standard E-1527-13, to address the due diligence provisions of CERCLA. This report was prepared in accordance with Section 9601 (35)(b) of the Superfund Amendments and Reauthorization Act, to satisfy the provision that "all appropriate inquiry" be made into the presence or potential presence of hazardous substances or petroleum products on the Site.

Additional information which was not available at the time of this report's preparation may result in the modification of the information present herein. The scope of work for this Phase I ESA did not include evaluation of radon gas.

2.0 SITE DESCRIPTION

2.1 LOCATION AND LEGAL DESCRIPTION

The Site is located at 331 Madison Avenue, New York, New York 10017. An alternative address for the Site is 327 Madison Avenue, New York, New York 10017. The Site is defined as Tax Block 1277, Lot 52 in the Borough of Manhattan. The Site consists of a 15-story office/retail building with a basement and sub-basement, owned by SL Green. The Site's 15-story building occupies approximately the entire 6,666 square foot square-shaped lot. The building is currently occupied by various commercial tenants leasing office space, as well as a first floor "Shoe Mania" retail shop, "Easy Spirit" retail shop and an empty commercial storefront space. Based on review of Sanborn® fire insurance rate maps, the existing building was constructed in 1923. The New York City Department of City Planning (NYCDCP) zoning map indicates the Site is designated as zone C5-3, which is designated for commercial/office use.

A map showing the location of the Site is presented as Figure 1. A Site Plan showing the physical layout including adjacent land use is presented as Figure 2. A Site Plan indicating the physical layout of the sub-basement is presented as Figure 3. Photographs of the Site and surrounding areas are included as Appendix A.

2.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The Site is located in a heavily developed commercial, institutional, and residential neighborhood. The Site is located west of Grand Central Terminal, a major underground and aboveground railway station.

2.3 CURRENT USE OF THE SITE

The 2nd to 15th stories of the 15-story structure are occupied by commercial office space tenants. All floors are currently occupied with the exception of the 10th and 11th floors. The first floor consists of various retail vendors including "Shoe Mania" and "Easy Spirit" as well as a vacant commercial storefront space.

2.4 DESCRIPTIONS OF STRUCTURES, ROADS, OTHER IMPROVEMENTS ON THE SITE

The Site is occupied by a 15-story commercial structure currently occupied by offices/commercial tenants.

2.5 CURRENT USE OF THE ADJOINING PROPERTIES

The Site is located in the midtown area of New York City, which is mixed use, consisting of commercial, residential and institutional structures. The Site is bounded to the north by 43rd Street followed by mid- and high-rise commercial buildings with first floor retail space, to the east by Vanderbilt Avenue followed by Grand Central Terminal and mid- and high-rise commercial buildings, to the south by 42nd Street followed by mid- and high-rise commercial buildings with first floor retail space and to the west by Madison Avenue followed by mid- and high-rise commercial buildings with first floor retail space. The surrounding community is highly urbanized with mid- and high-rise commercial and institutional buildings.

3.0 USER PROVIDED INFORMATION

The "User" of the Phase I ESA Report, in accordance with ASTM Standard Practice E1527-13, is Hines. WCD's point of contact, Ms. Jan Hilgeman on behalf of Hines was provided a User Questionnaire for completion as part of this Phase I ESA on December 18, 2013, however the User Questionnaire was not completed.

3.1 TITLE RECORDS

The User did not provide information regarding title records.

3.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

The User did not provide information regarding environmental liens or activity and use limitations (AULs) relevant to the Site.

3.3 SPECIALIZED KNOWLEDGE

The User did not provide information regarding specialized knowledge with respect to the Site.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

The User did not provide pertinent commonly known or reasonably ascertainable information relevant to the Site.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

The User did not provide information regarding the purchase price of the Site.

3.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

Information provided by the Site owner, property manager, and/or occupant is provided in Section 6 and where otherwise stated.

3.7 REASON FOR PERFORMING PHASE I ESA

The Phase I ESA was performed by WCD at the request of Hines to to identify recognized environmental conditions (RECs) and environmental concerns that may affect the suitability of the Site for use as commercial office space with first floor retail use.

4.0 RECORDS REVIEW

In order to supplement and cross-reference the information received from various sources, WCD commissioned a search of federal and state databases conducted by Environmental Data Resources, Inc. ("EDR") of Milford, Connecticut. A complete copy of the database report is contained in Appendix B.

The databases discussed in this section were reviewed for information regarding documented and/or suspected releases of regulated hazardous substances and/or petroleum products on or near the Site.

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

A summary of sites identified through the Federal and State regulatory agency databases review is provided in the following table:

Federal and State List	Last Updated (Date of Government Version)	Search Radius*	No. of Sites within Search Radius	Site Appears on List	RECs Identified
National Priorities List for Federal Superfund Cleanup (NPL)	04/26/2013	1 mile	0	No	No
Delisted NPL Site List	04/26/2013	1 mile	0	No	No
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS), including CERCLIS NFRAP Sites	04/26/2013 and 4/26/13	½ mile	1/1	No	No
Resource Conservation and Recovery Information System – Corrective Action Activity RCRIS CORRACTS and Non-CORRACTS Treatment, Storage, or Disposal Facilities (RCRA-TSD).	7/11/2013 and 7/11/2013	1 mile / ½ mile	0/0	No	No
Resource Conservation and Recovery Information System Generators/Transporters (RCRIS Gen/Trans)	7/11/2013	¼ mile	77**	No	No
Federal Institutional Control/Engineering Control Registries	06/17/2013	½ mile	0	No	No
Emergency Response Notification System (ERNS)	12/31/2012	Site	[1]NA	No	No
Toxic Release Inventory System (TRIS)	12/31/2011	Site	[1]NA	No	No
New York State Inactive Hazardous Waste Disposal Site (SHWS)	09/25/2013	1 mile	0	No	No
New York State Hazardous Substance Waste Disposal Site Inventory (HSWDS)	01/01/2003	½ mile	0	No	No
Solid Waste Facilities/Landfill Sites (SWF/LF)	10/08/2013	½ mile	0	No	No

Federal and State List	Last Updated (Date of Government Version)	Search Radius*	No. of Sites within Search Radius	Site Appears on List	RECs Identified
Vapor Reopened	01/01/2013	1 mile	0	No	No
New York State Spills Information (SPILLS)/Leaking Underground or Aboveground Storage Tanks (LTANKs)	08/19/2013	1/8 mile/ ½ mile	51/92	No	YES
Petroleum Bulk Storage Tanks (USTs/ASTs)	10/01/2013	¼ mile	7/90	No	No
State Voluntary and Brownfield Cleanup Program Sites (VCP/BROWNFIELDS)	06/24/2013	½ mile	0/0	No	No
Registered Dry Cleaners (DRY CLEANERS)	10/17/2013	¼ mile	2	No	No
Manufactured Gas Plant Sites (Coal Gas)	NA	1 mile	3	No	No
E Designation Sites	09/17/2013	1/8 mile	0	No	No

* The surrounding area search radius indicates the radial area (measured from perimeter of the Site) for which the databases review was performed.
** The database search identified sixty-one (61) conditionally exempt small quantity generators (CESQGs), eleven (11) small quantity generators (SQG) and five (5) large quantity generators (LQG) within one-quarter mile of the Site.
[1]NA – Not Applicable

The following subsections provide a discussion of the listings for the Site and surrounding properties, which have been identified within the search radius and listed in the table:

4.1.1 Federal NPL Site List

The EPA NPL (or "Superfund" List) is a federal listing of uncontrolled or abandoned hazardous waste sites that pose a potential risk to human health or the environment. The list is created from the CERCLIS database and is primarily based upon a score that each site or facility receives from the EPA's Hazard Ranking System ("HRS"). After a site or facility has been identified as a CERCLIS site, the EPA conducts an assessment of the property. The HRS score associated with the degree of environmental risk found is one of the determinations made as to whether the site is placed on the NPL. These sites are then prioritized for possible long-term remedial action and referred to the state for further action under state programs.

Neither the Site nor any other facilities within a one mile radius of the Site are listed in the in the NPL database.

4.1.2 Federal Delisted NPL Site List

The National Oil and Hazardous Substances Pollution Contingency Plan establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 Code of Federal Regulations 300.425.(e) sites may be deleted from the NPL where no further response is appropriate.

Neither the Site nor any other facilities within a one mile radius of the Site are listed in the Delisted NPL database.

4.1.3 Federal CERCLIS Site List

The CERCLIS List is a compilation of records from a nationwide database created to maintain and regulate those facilities or sites that the EPA has investigated or will investigate for suspected or uncontrolled releases of hazardous substances, contaminants or pollutants as reported by states, municipalities, private companies and private citizens under the CERCLA Program. Once a site is placed on the CERCLIS List, it may be subjected to several additional levels of evaluation, to determine the severity of the contamination from discovery and preliminary assessment to site inspection, and possibly the application of the HRS. Such a determination could ultimately place the site under consideration for inclusion on the NPL. Inclusion on the CERCLIS List does not confirm the presence of an environmental problem or a public health threat.

Former CERCLIS sites that have been granted the status of No Further Remedial Action Planned (NFRAP) are listed in this database.

The Site is not listed in the CERCLIS database. One (1) CERCLIS site was identified within a one-half mile search radius of the Site. Based on distance from the Site, assumed hydraulic relationship, and/or current regulatory status the facility identified within one-half mile of the Site in the CERCLIS database is not expected to impact the environmental integrity of the Site.

4.1.4 Federal CERCLIS NFRAP Site List

Former CERCLIS sites that have been granted the status of No Further Remedial Action Planned (NFRAP) are listed in this database.

The Site is not listed in the CERCLIS NFRAP database. One (1) CERCLIS-NFRAP site was identified within a one-half mile search radius of the Site. Based on distance from the Site, assumed hydraulic relationship, and/or current regulatory status the facility identified within one-half mile of the Site in the CERCLIS-NFRAP database is not expected to impact the environmental integrity of the Site.

4.1.5 Federal RCRA CORRACTS/RCRIS-TSD Facilities List

The Resource Conservation and Recovery Act (RCRA) program identifies and tracks hazardous wastes from the point of generation to the point of disposal. The RCRIS database tracks those facilities that treat, store and/or dispose of hazardous materials as defined by RCRA (referred to as TSD facilities). The RCRIS CORRACTS database identifies TSD facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA.

Neither the Site nor any other facilities within a one mile radius of the Site are listed in the RCRIS CORRACTS database and neither the Site nor any other facilities within a one-half mile radius of the Site are listed in the RCRIS-TSD database.

4.1.6 Federal RCRA Generators List

RCRA Info is the EPA's comprehensive information system, providing access to data supporting RCRA (the Resource Conservation and Recovery Act of 1976) and the Hazardous and Solid Waste Amendments of 1984. Inclusion on the list is not necessarily indicative of contamination; rather, it indicates the presence of potential sources of contamination. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. Conditionally exempt small quantity generators ("CESQGs") generate less than 100 kilograms ("kg") of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators generate over 1,000 kg of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. Treatment, Storage or Disposal Facilities ("TSDFs") treat, store, or dispose of the waste.

The Site is not listed in the RCRIS Gen/Trans database. The database search identified sixty-one (61) conditionally exempt small quantity generators (CESQGs), eleven (11) small quantity generators (SQG) and five (5) large quantity generators (LQG) within one-quarter mile search radius of the Site.

Based on distance from the Site, assumed groundwater hydraulic relationship, lack of reported spills and/or current regulatory status, none of the facilities identified within one-quarter mile of the Site in the RCRIS Gen/Trans database are expected to impact the environmental integrity of the Site.

4.1.7 Federal Institutional Control/Engineering Control Registries

Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on-site. Deed restrictions are generally required as part of the institutional controls. Engineering controls include various forms of caps, building foundations, liners and treatment methods to eliminate pathways for regulated substances to enter environmental media or affect human health.

Neither the Site nor any facilities located within one-half mile from the Site are listed in the Federal Institutional Control/ Engineering Control Registries database.

4.1.8 Federal Emergency Response Notification System List

The ERNS List is a compilation of records from a national computer database and retrieval system created to store information on accidental releases of oil and hazardous substances. The information stored in this database is acquired through the National Response Center. Each reported incident is required to contain and provide the discharger name, date of release, amount released, and type of substance released.

The Site is not listed in the ERNS database.

4.1.9 Toxic Release Inventory System (TRIS)

TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

The Site is not listed in the TRIS database.

4.1.10 New York State Inactive Hazardous Waste Disposal Sites (SHWS)

The New York State Inactive Hazardous Waste Sites database, compiled by the NYSDEC, maintains information regarding the investigation and cleanup of suspected hazardous waste sites.

Neither the Site nor any other facilities within a one mile radius of the Site are listed in the SHWS database.

4.1.11 Hazardous Substance Waste Disposal Site Inventory (HSWDS)

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that USEPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites. The sites on the list will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry.

Neither the Site nor any other facilities within a one mile radius of the Site are listed in the HSWDS database.

4.1.12 Solid Waste Facilities/Landfill Sites (SWF/LF)

The State of New York maintains an inventory of the permitted solid waste facilities in the state. This inventory is a database that contains information from permitted solid waste disposal and management facilities including landfills, incinerators, and transfer stations.

Neither the Site nor any other facilities within a one-half mile radius of the Site are listed in the SWF/LF database.

4.1.13 Vapor Reopened

"Vapor Intrusion" refers to the process by which volatile chemicals move from a subsurface source into the indoor air of overlying or adjacent buildings. The subsurface source can either be contaminated groundwater or contaminated soil which releases vapors into the pore spaces in the soil. Improvements in analytical techniques and knowledge gained from site investigations in New York and other states has led to an increased awareness of soil vapor as a medium of concern and of the potential for exposures from the soil vapor intrusion pathway. Based on this additional information, New York State is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

Neither the Site nor any other facilities within a one mile radius of the Site are listed in the vapor reopened database.

4.1.14 New York State Spills Information Database (NY Spills)/Leaking Underground or Aboveground Storage Tanks (LTANKS)

The NY Spills database was researched to identify listings within one-eighth mile of the Site and the LTANKS database was researched to identify listings within one-half mile of the Site.

The Site is not indentified in the NY Spills/LTANKS databases.

The databases identified fifty-one (51) reported NY Spills incidents within a one-eighth mile radius of the Site and ninety-two (92) LTANKS incidents within a one-half mile radius of the Site. The following site has the potential to impact the environmental integrity of the Site and is considered a REC:

- The NY Spills/LTANKS database identified one (1) documented spill at 317 Madison Avenue, New York, New York. A spill was reported to the NYSDEC on September 6, 2013 when approximately six (6) inches of oil covered the floor of the basement tank room during the removal of 7,500 gallons of No. 2 fuel oil from the 7,500-gallon AST. The spill was reportedly contained to the tank room and reportedly did not result in an environmental release. The NYSDEC assigned the incident spill number 1305985. The spill does not have a closure date. **The NYSDEC spill site is located adjacent to and south of the Site.**

Based on distance from the Site, assumed hydraulic relationship, and/or the nature of the incident/regulatory status, the remaining facilities located within the search radius of the Site identified in the NY Spill/LTANKS database are not expected to impact the environmental integrity of the Site.

4.1.15 Petroleum Bulk Storage Tanks (USTs/ASTs)

The NYSDEC petroleum bulk storage tank database was researched to identify listings for the Site and properties located within one-quarter mile from the Site.

The Site is not listed in the PBS database.

The databases identified the presence of seven (7) UST and ninety (90) AST petroleum bulk storage tank facilities located within one-quarter mile from the Site. Based on distance from the Site, assumed

groundwater hydraulic relationship, the lack of known releases, and/or current regulatory status, none of the facilities identified within one-quarter mile of the Site identified in the PBS database are expected to impact the environmental integrity of the Site.

4.1.16 New York State Voluntary and Brownfields Cleanup Program (VCP/BCP)

The NYSDEC Voluntary and Brownfields Cleanup Programs database was researched to identify listings for the site and within a one-mile radius of the Site.

Neither the Site nor any other facilities within a one-half mile radius of the Site are listed in the VCP/BCP database.

4.1.17 Registered Dry Cleaners

The registered dry cleaners database was researched to identify listings within one-quarter mile of the Site.

The Site is not listed in the registered drycleaners database. The database identified two (2) registered dry cleaners within one-quarter mile radius of the Site. Based on distance from the Site, assumed groundwater hydraulic relationship, and/or current regulatory status, none of the facilities identified within a one-quarter mile radius of the Site in the registered drycleaners database are expected to impact the environmental integrity of the Site.

4.1.18 Manufactured Gas Plant Sites (Coal Gas)

The EDR manufactured gas plant database was researched to identify listings for the Site and within a one-mile radius of the Site.

The Site is not listed in the manufactured gas plants sites database.

The regulatory agency database search identified three (3) manufactured gas plants sites within a one-mile radius of the Site. Based on distance from the Site, assumed groundwater hydraulic relationship, and/or current regulatory status, none of the facilities identified within a one-mile radius of the Site in the manufactured gas plant database are expected to impact the environmental integrity of the Site.

4.1.19 E-Designation Site Listing (E-Designation)

The E (Environmental) Designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The E-designations require that the owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of city agencies.

Neither the Site nor any other facilities within a one-eighth mile radius of the Site are listed with an E-Designation.

4.2 FEDERAL AND STATE REGULATORY AGENCY DATABASE REVIEWS

Additional state and local records sources were investigated in an attempt to supplement information obtained through review of standard environmental record sources. The additional records and sources consulted in conjunction with this Phase I ESA are listed below. Copies of correspondence to and received from, any of these record sources are included in Appendix I.

4.2.1 United States Environmental Protection Agency (US EPA)

A Freedom of Information Act (FOIA) request was sent to the US EPA on November 14, 2013. WCD received a response from the department dated November 14, 2013 acknowledging receipt of the FOIA

request. Upon receipt of additional information, WCD will review the response and, if conclusions contained within this report are affected, WCD will submit an addendum to Hines.

4.2.2 Fire Department of the City of New York

A FOIA request was sent to the Fire Department of the City of New York on November 20, 2013. WCD has not yet received a response to this request from the department. Upon receipt of this information, WCD will review the response and, if conclusions contained within this report are affected, WCD will submit an addendum to Hines.

4.2.3 New York State Department of Environmental Conservation (NYSDEC)

A FOIA request was sent to the NYSDEC on November 19, 2013. WCD received a response from the NYSDEC dated December 5, 2013 acknowledging receipt of the FOIA request. Upon receipt of additional information, WCD will review the response and, if conclusions contained within this report are affected, WCD will submit an addendum to Hines.

4.2.4 New York State Department of Health (NYSDOH)

A FOIA request was sent to the NYSDOH on November 13, 2013. WCD has not yet received a response to this request from the department. Upon receipt of this information, WCD will review the response and, if conclusions contained within this report are affected, WCD will submit an addendum to Hines.

4.2.5 New York City Department of Environmental Protection (NYCDEP)

A FOIA request was sent to the NYCDEP on November 19, 2013. WCD has not yet received a response to this request from the department. Upon receipt of this information, WCD will review the response and, if conclusions contained within this report are affected, WCD will submit an addendum to Hines.

4.2.6 Prior Environmental Reports

No prior environmental investigations performed at the Site were available for review.

4.3 PHYSICAL SETTING SOURCE(S)

4.3.1 Topography and Drainage

The Site elevation is approximately 62 feet above mean sea level (amsl) sloping gently to the east by northeast (USGS, 1999). The nearest surface water features are the East River located approximately 3,600 feet east of the Site and the Hudson River, located approximately 7,250 feet west of the Site. Figure 1 is an annotated USGS 7.5-minute quadrangle showing the site location, local topography, surface water, and cultural features (USGS, 1999).

4.3.2 Geology and Soils

The unconsolidated surficial deposits in NYC consist almost entirely of Pleistocene till and stratified drifts. The till was deposited as a ground moraine, is typically discontinuous and less than 25 feet deep in most areas (Perlmutter, Arnow, 1953). The soil survey of New York City classifies site soils to be Pavement and Building. Underlying the unconsolidated Pleistocene deposits is the pre-Cambrian Manhattan Formation, also known as the Manhattan Schist. The schist is typically dark-gray to black micaceous rock composed of biotite, muscovite, quartz, feldspar and small amount of accessory minerals. Locally the formation contains dikes and veins of pegmatitic material. Bedrock has been mapped to contain some joints, irregular fractures, faults and in some places chemical weathering has filled these openings with clay (Perlmutter, Arnow, 1953).

4.3.3 Groundwater

Information obtained from EDR indicated that the groundwater moves through the joints, irregular fractures, and faults of the Manhattan Formation, but the schist does not generally yield enough water for industrial use. Hence, the formation is not considered to be an important source of groundwater in Manhattan. Locally, where bedrock is intensely fractured and is overlain by water bearing glacial deposits, generally higher yields may be observed. Groundwater beneath the Site is expected to be encountered greater than 50 feet below ground surface and is anticipated to flow southeast towards the East River and southwest towards the Hudson River, however, depth and direction of flow will be greatly affected by subsurface infrastructure such as buildings, subway tunnels, etc.

4.4 HISTORICAL USE INFORMATION

Information regarding the historic use of the Site and surrounding properties was obtained through review of the following historic records.

4.4.1 Aerial Photographs

WCD reviewed aerial photographs of the Site and surrounding areas provided by EDR in order to identify historical land use that may have involved hazardous substances and petroleum products. These photographs range from 1924 to 2011. The following table summarizes descriptions and interpretations from the aerial photograph reviews:

Year	Comments
1924 1"=500'	**Site:** The Site appears developed as it does today. No further information is discernable. **Surrounding Properties:** The surrounding properties are fully developed with what appear to be mid-rise and high-rise residential, commercial and institutional buildings. Bryant Park is located approximately 1,000 feet west of the Site. Grand Central station is adjacent to and east of the Site.
1945 1"=500'	**Site:** The Site is not discernable. **Surrounding Properties:** The surrounding area is not discernable.
1954 1"=500'	**Site:** No significant changes from the 1924 aerial photograph are noted. **Surrounding Properties:** No significant changes from the 1924 aerial photograph are noted.
1966 1"=500'	**Site:** No significant changes from the previous aerial photograph are noted. **Surrounding Properties:** The Pan-Am building (MetLife) is developed northeast of the Site.
1975 1"=500'	**Site:** No significant changes from the previous aerial photograph are noted. **Surrounding Properties:** Several additional high-rise buildings are visible to the northwest.
1984 1"=500'	**Site:** No significant changes from the previous aerial photograph are noted. **Surrounding Properties:** Several additional high-rise buildings are visible to the northeast.
1994 (1) 1"=500'	**Site:** The Site is not discernable. **Surrounding Properties:** The surrounding area is not discernable.
1994 (2) 1"=750'	**Site:** The Site is not discernable. **Surrounding Properties:** The surrounding area is not discernable.
2006 1"=500'	**Site:** No significant changes from the 1984 aerial photograph are noted. **Surrounding Properties:** No significant changes from the 1984 aerial photograph are noted.
2008 1"=500'	**Site:** No significant changes from the previous aerial photograph are noted. **Surrounding Properties:** No significant changes from the previous aerial photograph are noted.
2009 1"=500'	**Site:** No significant changes from the previous aerial photograph are noted. **Surrounding Properties:** No significant changes from the previous aerial photograph are noted.

2010 1"=500'	**Site:** No significant changes from the previous aerial photograph are noted. **Surrounding Properties:** No significant changes from the previous aerial photograph are noted.
2011 1"=500'	**Site:** No significant changes from the previous aerial photograph are noted. **Surrounding Properties:** No significant changes from the previous aerial photograph are noted.

The review of aerial photographs did not indicate the presence of RECs at the Site and surrounding areas. Copies of reproducible aerial photographs are included in Appendix C.

4.4.2 Fire Insurance Maps

WCD reviewed Sanborn® fire insurance rate maps of the Site and surrounding area, supplied by EDR between 1890 and 2005. The following table presents descriptions and interpretations from historical fire insurance map review.

Year	Comments
1890	**Site:** The Site appears developed with 2-, 4-, and 5-story commercial structures. **Surrounding Properties**: East 43rd Street appears north of the Site. Vanderbilt Avenue appears east of the Site. East 42nd Street appears south of the Site. Madison Avenue appears west of the Site. Surrounding properties are primarily developed with commercial, institutional, and residential properties. East of the Site is Grand Central station. The area to the north is undeveloped. Hotels are located south and west of the Site. A safety deposit box facility is located southeast of the Site. The building immediately south and adjacent to the Site is developed with the Church of the Holy Trinity Episcopal and a school is located immediately east and adjacent to the Site.
1899	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1910	**Site:** The Site is redeveloped with 4- and 12-story structures identified as a dwelling and store/office spaces. **Surrounding Properties**: Surrounding properties north of the Site are developed with commercial, institutional, and residential properties. The property immediately south and east of the Site is identified as a commercial/office space.
1929	**Site:** The Site is identified as the Prudence Building and is noted to have been built in 1923 with a steel skeleton, cinder concrete floor, and roof arches. The building consists of 12- and 14-story sections and an 18-story fire tower. The building features two horizontal steam boilers. **Surrounding Properties**: Surrounding properties are further developed with commercial, institutional, and residential properties. The building located east of the Site is identified as the Vanderbilt Avenue Building. The building located adjacent to and immediately south of the Site is redeveloped as a 12-, 15-, 17-, and 22-story commercial office space. It is identified as the Leggett Building and is noted to have been built in 1920 with a steel skeleton, reinforced concrete floor, and roof arches. The property is noted to contain a 12,000-gallon tank and a 7,500-gallon tank. The contents of the two tanks is not indicated. The property located west of the Site across Madison Avenue is now labeled as the National City Building. The property located south of the Site across East 42nd Street is redeveloped as the Lincoln Building and a commercial office space. The surrounding area is a highly developed commercial neighborhood.
1950	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: The building located adjacent to and immediately south of the Site is identified as the Columbia Carbon Building. Additional stories are added to the Site building, making it 17-, 18-, 22-, and 25-stories. The building located north of the Site across East 43rd Street is identified as the Biltmore Hotel.

Year	Comments
1968	**Site:** Automatic sprinklers are installed in portions of the building. No other significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1980	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: The building located west of the Site is identified as The Sperry & Hutchinson Building occupied by commercial office space and a bank.
1983	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1985	**Site:** In addition to onsite store/office space, a public or institutional building is noted to exist at the Site. No other significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: The building located north of the Site across East 43rd Street is identified as the Bank of America Office Building.
1987	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1988	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1991	**Site:** Land-use notations at the Site are altered from store/office space to commercial/office space. No other significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: North of the Site, an alternative street name is designated to East 43rd Street; it is identified as David Ben-Gurion Place.
1992	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1993	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1994	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1995	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1996	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
2001	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
2002	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
2003	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
2004	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
2005	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.

A review of Historic Sanborn Maps indicated the Site was occupied from at least 1890 to 1910 by several low-rise structures that were demolished to allow construction of the existing structure in 1923. A copy of the Historical Fire Insurance Map report is included in Appendix D.

4.4.3 Recorded Land Title Record

Recorded Land Title Records were not searched. Available records indicate the Site was purchased by SL Green 331 Madison LLC on April 23, 2007.

4.4.4 USGS Topographic Maps

WCD reviewed available historical USGS Topographic Quadrangles for information regarding past uses of the Site. Copies of the historical USGS topographic maps are included in Appendix F.

Year	Comments
1897 Harlem 1:62,500	**Site:** Due to map scale, no information is discernable. **Surrounding Properties:** Central Park appears approximately 1 mile north of the Site. The East River appears approximately ¾ mile east of the Site. Grand Central Terminal is east of the Site. The Hudson River appears approximately 1½ miles west of the Site. Bryant Park is located approximately ⅛ Site. Due to map scale, no further information is discernable.
1947 Central Park 1:25,000	**Site:** The Site appears developed; however, no indications of occupants or use(s) are discernable. **Surrounding Properties:** Surrounding properties appear developed; however, due to the scale of the map, no indications of occupants or use(s) are discernable. "42nd Street" and the "public library" appear south of the Site. "Bryant Park" appears west of the Site. No other significant changes from the 1897 topographic map are noted.
1956 Central Park 1:24,000	**Site:** The Site appears developed; no further information is discernable. The Site is shown at the 50-60 foot elevation contour. No other significant changes from the 1947 topographic map are noted. **Surrounding Properties:** "Times Square" appears west of the Site. No other significant changes from the 1947 topographic map are noted.
1966 Central Park 1:24,000	**Site:** No significant changes from the 1956 topographic map are noted. **Surrounding Properties:** No significant changes from the 1956 topographic map are noted.
1979 Central Park 1:24,000	**Site:** No significant changes from the 1966 topographic map are noted. **Surrounding Properties:** No significant changes from the 1966 topographic map are noted.
1995 Central Park 1:24,000	**Site:** No significant changes from the 1979 topographic map are noted. **Surrounding Properties:** No significant changes from the 1979 topographic map are noted.

The review of the historical USGS topographic quadrangles did not indicate the presence of RECs or VECs at the Site and surrounding areas. The Site appears to have been developed since at least 1897, however, no indications of occupants or uses(s) were discernable due to lack of information provided on the map(s) and/or map scale. In addition, the review of the historical USGS topographic quadrangles did not reveal any indications of historic filling or significant changes in topography. Copies of the historical USGS topographic quadrangles are included in Appendix F.

4.4.5 Local Street Directories

A review of historical city directories was conducted by EDR. Telephone listings were available for the Site from 1920 to 2013. The review of city directories did not indicate RECs associated with the Site or surrounding properties. Copies of the historic City Directory Abstracts are included in Appendix E.

4.4.6 Other Historical Sources

NYCDOB records for the Site were reviewed to determine whether there were any references to buildings, tanks or other structures, property usage or inspection reports that may have indicated the presence, past use, or release of hazardous substances, wastes or petroleum products within the Site.

Review of the NYCDOB records indicated that there are nine (9) complaints, sixty-six (66) NYCDOB violations and twelve (12) Environmental Control Board (ECB) violations recorded for Block 1277, Lot 52.

The nine (9) complaints were resolved and are associated with defective/exposed wiring, failure to obtain proper permits for exterior construction work, and unsafe construction practices.

All sixty-six (66) DOB violations were resolved and are associated with the building elevators and boilers.

All twelve (12) ECB violations were resolved and are associated with failure to post/properly display permits and other signage, failure to provide/inadequate emergency power exit lighting and signage, unsafe work practices, and failure to maintain elevators.

Based on the nature of the complaints and ECB/DOB violations, no RECs were identified from the records review.

Copies of the NYCDOB records are included in Appendix G.

5.0 SITE RECONNAISSANCE

The Site reconnaissance was performed on December 4, 2013 by WCD representative Mr. James Wilson. Mr. Wilson was escorted on the Site reconnaissance by Mr. Jorge Sepda, the building superintendent. The weather conditions during the Site visit were approximately 40 degrees Fahrenheit and sunny with light wind.

5.1 METHODOLOGY AND LIMITING CONDITIONS

WCD did not inspect all commercial spaces during the Site reconnaissance. Inspected areas include the basement, sub-basement, roof, and the unoccupied office on the 10th floor. WCD was not provided access to occupied office spaces. Mr. Sepda indicated that floors 2 to 15 share the same floor plan.

5.2 GENERAL SITE SETTING

The Site is located at 331 Madison Avenue, New York, New York 10017. An alternative address for the Site is 327 Madison Avenue, New York, New York 10017. The Site is defined as Tax Block 1277, Lot 52 in the Borough of Manhattan. The Site consists of a 15-story office/retail building with a basement and sub-basement, owned by SL Green. The Site's 15-story building occupies approximately the entire 6,600 square foot square-shaped lot. The building is currently occupied by various commercial tenants leasing office space, as well as a first floor "Shoe Mania" retail shop, "Easy Spirit" retail shop, and an empty commercial storefront space. Based on review of Sanborn® fire insurance rate maps, the existing building was constructed in 1923. The New York City Department of City Planning (NYCDCP) zoning map indicates the Site is designated as zone C5-3, which is designated for commercial/office use.

The location of the Site and a Site Plan are shown on Figures 1 and 2, respectively. A Site Plan indicating the physical layout of the sub-basement is presented as Figure 3. Photographs of the Site are included in Appendix A.

Two (2) staircases and three (3) elevators provide access throughout the building. The main entrance to the Site building is from Madison Avenue.

The Site is located in the midtown area of New York City, which is mixed use consisting of commercial, residential, and institutional structures. The Site is bounded to the north by 43rd Street followed by mid- and high-rise commercial buildings with first floor retail space, to the east by Vanderbilt Avenue followed by Grand Central Terminal and mid- and high-rise commercial buildings, to the south by 42nd Street followed by mid- and high-rise commercial buildings with first floor retail space and to the west by Madison Avenue followed by mid- and high-rise commercial buildings with first floor retail space. The surrounding community is highly urbanized with mid- and high-rise commercial and institutional buildings.

The building was constructed using masonry load bearing walls, structural steel framing members, concrete slab floors, and masonry and concrete foundations. The exterior façade of the Site building consists of brick and concrete masonry with ornamental marble elements. The interior finishes of the office space and common areas consist of carpeting and tiled floors, painted gypsum, finished wood, suspended acoustical ceilings and fluorescent lighting.

The sub-basement consists of storage, fan, telephone, meter, boiler, sprinkler, gas, pump, and electrical rooms.

Water drip stains and rust were visible on the walls and other building materials in the sub-basement boiler room at the time of inspection. The damage was the result of a previous steam leak from the boiler. The approximate date of the steam leak was unknown to Mr. Sepda, although he noted that the leak was resolved and is not a continuing issue.

Two (2) oil drums containing waste kitchen grease were stored in the sub-basement. The oil drums appeared in good condition with no evidence of significant spills or staining at the time of inspection. PCB-containing ballasts and fluorescent light bulbs are stored in the sub-basement in marked recycling bins until they are removed and disposed of by a licensed contractor. Additional stored chemicals observed include mercury-containing compact fluorescent light bulbs, cylinders of compressed carbon dioxide, calcium carbonate rock salt, paint, and janitorial cleaning supplies.

The sub-basement contains two sump pumps and surface water discharge drains.

The basement level is used primarily for food and miscellaneous storage by the “Bread and Company” restaurant located on the street level of the immediately adjacent building at 317 Madison Avenue.

Inspection of the vacant tenth floor revealed significant water staining on the panels of the drop ceiling. Visible mold growth was not observed at the time of inspection. Mr. Sepda indicated that the source of the water damage has not been resolved to his knowledge.

Electricity and natural gas are provided to the Site by Consolidated Edison Company of New York. Potable water and sanitary sewer are provided by the New York City Department of Environmental Protection (NYCDEP). Each floor level contains a HVAC unit which provides air conditioning.

The adjoining properties have not experienced significant changes since the most recent Sanborn Fire Insurance Map, dated 2005.

6.0 CURRENT AND HISTORICAL USE INTERVIEWS

The following knowledgeable persons were interviewed with regard to the Site pursuant to ASTM 1527-13 Section 10:

6.1 CURRENT PROPERTY OWNER

The current property owner was not available for interviews.

6.2 CURRENT SITE OPERATOR OR KEY SITE MANAGER

Name	Title/Company	Telephone #	Years Associated with Site
Mr. Bill Bailey	Building Manager/SL Green	212-557-0610	Approximately 8
Mr. Jorge Sepda	Superintendent/SL Green	212-557-0610	Approximately 2

Mr. Bill Bailey is the building manager for SL Green, the company that manages the building and represents the Site occupant. Mr. Jorge Sepda is the building superintendent and leader of the maintenance team. Mr. Bailey and Mr. Sepda indicated that they were not aware of any activity and use limitations associated with the Site. Mr. Bailey and Mr. Sepda also indicated that they were not aware of any specific environmental issues associated with the Site.

Detailed information provided during the above-listed interviews is referenced in applicable sections of this report.

6.3 SITE OCCUPANTS

Name	Title/Company	Telephone #	Years Associated with Site
Mr. Bill Bailey	Building Manager/SL Green	212-557-0610	Approximately 8

Mr. Bill Bailey is the building manager for SL Green, the company that manages the building and represents the Site occupant. Mr. Bailey indicated that he was not aware of any activity and use limitations associated with the Site. Mr. Bailey also indicated that he was not aware of any specific environmental issues associated with the Site

Detailed information provided during the above-listed interviews is referenced in applicable sections of this report.

6.4 PAST OWNERS, OPERATORS AND OCCUPANTS

There were no prior owners or occupants available for interviews.

6.5 REPORT USER

Name	Title/Company	Telephone #	Years Associated with Site
Ms. Jan Hilgeman	Vice President-Construction/Hines	212-230-2300	<1

WCD was informed by Ms. Jan Hilgerman of Hines that Hines is considering purchasing the Site for redevelopment as a commercial office space. Detailed information provided during the above-listed

interviews is referenced in applicable sections of this report. A User Questionnaire form was not completed by Ms. Hilgerman.

7.0 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS STORAGE AND HANDLING

7.1 HAZARDOUS SUBSTANCES

The facility contains various closets with janitorial commercial cleaning products. Additionally, the basement and sub-basement contain storage areas for small quantities of janitorial chemicals, cleaners, paints, fluorescent light bulbs, mercury-containing compact fluorescent light bulbs, calcium carbonate rock salt, and cylinders of compressed carbon dioxide. There was no evidence of staining or spillage associated with these areas at the time of inspection.

7.2 PETROLEUM PRODUCTS STORAGE AND HANDLING

During the Site reconnaissance, WCD noted the following:

- No aboveground or underground petroleum storage tanks were located at the Site.
- Two (2) oil drums containing waste kitchen grease were stored in the sub-basement. The oil drums appeared in good condition with no evidence of significant spills or staining at the time of inspection.

7.3 SOLID WASTE GENERATION, STORAGE AND DISPOSAL

There was no observed evidence of solid waste generation, storage, and disposal on the Site with the exception of refuse typical of an office or retail space. Solid waste is removed from the Site by the New York City Department of Sanitation (DSNY).

7.4 POLYCHLORINATED BIPHENYLS (PCBS)

Polychlorinated biphenyls (PCBs) are toxic components of dielectric and hydraulic fluids that were formerly used in electrical equipment such as transformers and hydraulic elevators/lifts and in construction materials such as exterior caulking. The manufacture and use of PCBs was banned in the United States in 1978.

Suspect PCB-containing caulking materials and fluorescent light ballasts were noted in the Site building during the Site inspection. Since the Site building was constructed before 1978, the potential for the presence of PCB-containing caulking materials and light ballasts is considered an environmental concern.

7.5 ASBESTOS-CONTAINING MATERIAL (ACM)

Suspect ACM identified at the Site is considered an environmental concern. Any suspect ACM affected by potential future renovation or demolition work should be identified prior to and properly managed during construction activities in accordance with federal and state procedures.

7.6 LEAD-CONTAINING PAINT (LCP)

During the Site inspection, a limited visual assessment of all accessible painted surfaces was performed. No sampling or intrusive work was performed, as this is outside the scope of this Phase I. The interior painted surfaces were generally found to be in good condition with minor evidence of damage or disrepair. Due the buildings age, interior LCP is an environmental concern. Any interior paint that is damaged or in disrepair, or that may be disturbed in any way during construction activities, must be handled in accordance with federal and state policies and procedures. Any construction work that may disturb these painted surfaces should be inspected, and tested as appropriate.

7.7 REGULATORY COMPLIANCE

There were no regulatory compliance issues noted during the Site reconnaissance.

7.8 OTHER ENVIRONMENTAL CONDITIONS (METHANE, MOLD, ETC.)

Water drip stains and rust were visible on the walls and other building materials in the sub-basement boiler room at the time of inspection. The damage was the result of a previous steam leak from the boiler. The approximate date of the steam leak was unknown to Mr. Sepda, although he noted that the leak was resolved and is not a continuing issue.

Examination of the vacant tenth floor revealed significant water staining on the panels of the drop ceiling. Visible mold growth was not observed at the time of inspection. Mr. Sepda indicated that the source of the water damage has not been resolved to his knowledge.

Based on the review of historic sources, including Historic Sanborn Maps, topographic maps, and visual observations of the Site and surrounding area, there was no evidence of historic filling of wetlands or organic deposits on the Site. Therefore, methane is not considered an environmental concern at the Site.

8.0 FINDINGS

WCD has completed a Phase I ESA for the Site located at 331 Madison Avenue, New York, NY 10017 (Tax Block 1277, Lot 52) (the "Site"). The Phase I ESA was conducted in conformance with ASTM E 1527-13 Standards related to the Phase I ESA process. The Phase I ESA was based on a Site inspection, interviews with personnel familiar with the Site, a review of available files and historical records, and the findings of an environmental database report. The purpose of the Phase I ESA was to satisfy the financial lenders requirements and identify recognized environmental conditions (RECs) and environmental concerns that may affect the suitability of the Site for use as commercial office space with first floor retail use.

8.1 RECOGNIZED ENVIRONMENTAL CONDITIONS (RECs)

The Phase I ESA has revealed the following evidence of RECs associated with the Site:

- A spill at 317 Madison Avenue, New York, New York was reported to the NYSDEC on September 6, 2013 when approximately six (6) inches of oil covered the floor of the basement tank room during the removal of 7,500 gallons of No. 2 fuel oil from the 7,500-gallon AST. The spill was reportedly contained to the tank room and reportedly did not result in an environmental release. The NYSDEC assigned the incident spill number 1305985. The spill does not have a closure date. **The NYSDEC spill site is located adjacent to and south of the Site.**

8.2 VAPOR ENCROACHMENT CONDITIONS (VECs)

The Phase I ESA has revealed VECs associated with the RECs identified at the Site.

8.3 ENVIRONMENTAL CONCERNS

The Phase I ESA has revealed the following environmental concerns associated with the Site:

- Visible water damage was observed in the sub-basement as well as on the tenth floor. Repair of the moisture source on the tenth floor had not been addressed at the time of inspection. The presence of stagnant water and mold, where present, should be regarded as an environmental concern;

- Based on the age of the Site building, suspect ACM may be present and is considered an environmental concern;

- Suspect Lead Containing Paint (LCP) on interior surfaces was observed in the Site building during the Site inspection. Based on the age of the Site building, the painted surfaces may contain lead and LCP is considered an environmental concern; and

- Fluorescent light fixtures and caulking materials were observed during the Site inspection. Based on the age of the building, the fluorescent light fixtures and caulking materials may contain PCBs. The potential presence of PCB-containing ballasts and caulking materials is considered an environmental concern.

9.0 CONCLUSION AND RECOMMENDATIONS

Based on the findings of this Phase I ESA, WCD believes that a Phase II Environmental Site Investigation should be performed to determine if the identified RECs/VECs have affected the Site. WCD recommends that any water/mold damaged, ACM, Lead Containing Paint, and PCB-containing building components affected by future renovations, repairs or demolition at the Site be identified and properly managed during such activities. In addition, stored chemicals and petroleum products should be managed in accordance with applicable federal, state and local regulations.

10.0 DEVIATIONS

No deviations from ASTM Standard Practice E1527-13 were noted for this Phase I ESA with the exception of the following:

- WCD did not receive a completed User Questionnaire from the User; and
- Not all commercial spaces were inspected.

11.0 ADDITIONAL SERVICES

The scope of work for this Phase I ESA did not include evaluation of potential radon gas, however, information related to radon gas was provided in the EDR Report (Appendix B), and is therefore conveyed here. According to the EDR Report, the EPA classifies New York County as located in radon zone 3 (indoor average <2 picocuries per liter [pCi/L]). The scope of work for this ESA did not address other non-scope considerations, including, but not limited to:

- Wetlands protection;
- Regulatory compliance;
- Cultural and historic resources;
- Industrial hygiene;
- Health and safety;
- Ecological resources;
- Air quality;
- Biological agents;
- Flood hazards;
- Electromagnetic fields;
- Seismic hazards;
- Stormwater management or drainage;
- Structural engineering or integrity;
- Geotechnical engineering;
- Public safety; or
- Dam safety.

12.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

WCD has performed a Phase I ESA of the property located at 331 Madison Avenue, New York, New York 10036 (the "Site"). The scope of the Phase I ESA was consistent with requirements of ASTM Standard Practice E 1527-13. Signatures of the Environmental Professionals who participated in conducting this Phase I ESA are provided below. Qualifications for these individuals are provided in Appendix H. WCD declares that, to the best of our knowledge and belief, WCD meets the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. WCD has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. WCD has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 04/26/2013 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 04/26/2013 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 07/11/2013 has revealed that there are 5 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 07/11/2013 has revealed that there are 11 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 07/11/2013 has revealed that there are 61 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 08/19/2013 has revealed that there are 92 NY LTANKS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

NY TANKS: This database contains records of facilities that are or have been regulated under Bulk Storage Program. Tank information for these facilities may not be releasable by the state agency.

A review of the NY TANKS list, as provided by EDR, and dated 08/07/2013 has revealed that there are 3 NY TANKS sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
BARCLAYS CAPITAL	200 PARK AVENUE	ENE 0 - 1/8 (0.101 mi.)	R123	229

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 08/19/2013 has revealed that there are 51 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/11/2013 has revealed that there are 160 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

NY MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the NY MANIFEST list, as provided by EDR, and dated 08/01/2013 has revealed that there are 264 NY MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 3 EDR MGP sites within approximately 1 mile of the target property.

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk

Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 33 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"e2mis no. 150-697:10/10/03 found at 10:15 hrs. approx. 1 gallon of transformer oil had leaked from the transformer down the side and onto dirt on the concrete floor in vault V5705. He found the dirt soaked with oil. The oil never migrated to the sump pit. The source of the spill is the transformer and the cause is a leak from the top of the transformer probably caused by corrosion. One liquid sample taken for PCB. Initial cleanup action taken byplacing absorbent pads down. This will not be classified as a 24 hr. spill since the transformer is being condemned and requested OOE Cat II. There is scaffolding over the vault, which needs to be removed in order to remove the transformer & perform the final cleanup.The transformer is a G.E. 1,000 kVA unit with Serial #F529854. The fluid capacity is 385 gallons. The transformer was pressure tested and it failed. The transformer must be de-energized in order to perform a cleanup.10/10 @ 20:44Lab Sequence Number: 03-08409-001TOTAL PCB 18 ppmUpdate 01/07/04Transformer 5705 has been drain & disconnected wait for scaffold to be removed07/30/05 04:15E.Hulser#39723,Cable Supervisor, notified the control center on 07/30/05 at 03:40hrs. to

VAULT #5705 (Continued) **S106018892**

report the cleanup in V5705 was completed, this was a final cleanup.There were no solids removed and no drums or barrels were used. There was liquids removed Via vactor truck from V5705. The method used to clean was double washed with simple green. The yellow environmental tag numbered #17505 was removed from V5705. The cleanup crew were; G.Rosario#11464 and A.D'ateno#20237. The source of the spill, a leking transformer, was removed and replaced with a new unit in V5705. The cleanup was completed on 07/30/05 at 03:30HRS.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number:	001
Tank Id:	12601
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

FIFTY EAST FORTY SECOND CO (Continued) **U003387799**

Equipment Records:

E00 - Piping Secondary Containment - None
H00 - Tank Leak Detection - None
K00 - Spill Prevention - None
I05 - Overfill - Vent Whistle
B01 - Tank External Protection - Painted/Asphalt Coating
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
I04 - Overfill - Product Level Gauge (A/G)
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
G02 - Tank Secondary Containment - Vault (w/access)
J02 - Dispenser - Suction Dispenser
L09 - Piping Leak Detection - Exempt Suction Piping

Tank Location:	3
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/01/1961
Capacity Gallons:	7500
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True
Modified By:	CGFREEDM

DEC Memo:	Building was being demolished to create an air vent for the East side MTA project. At approx 42 ft depth in bedrock cracks, they found a heavy petroleum product. Unknown where the source is. Area was isolated. Need to check spills database for surrounding buildings to see if this is a known spill. Mr. Stalzer will call back to discuss the case with Ryan Piper.Unknown source. Cleaned as best by contractor within scope of their work. Spill closed.
Remarks:	cleanup pending

Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007
Waste name: CHROMIUM

Waste code: D009
Waste name: MERCURY

Waste code: D010
Waste name: SELENIUM

Waste code: D024
Waste name: M-CRESOL

Waste code: P001
Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste code: P075
Waste name: NICOTINE, & SALTS

Violation Status: No violations found

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"e2mis no. 148748:15 gallons of an unknown oil mixed with 100 gallons of water on the concrete floor of the structure. There is a drain in the floor but it is clogged. Sewer connection could not be verified, structure does not show up on conduit plate. Oil absorbent pads were placed on the spill as initial cleanup action. Cleanup to start as soon as resources are available.D Pontecorvo # 85413 reports that he re-calculated the amount of the oil spill to 5 gallons. He also stated that he is going to ask cig to request an ivestigation from the dep industrial waste hotline, due to the fact that the oil seems to have been dumped into the vault, (possibly from a nearby restaraunt). He also agrees with the initial report that the oil is possibly cooking oil.Lab Sequence Number: 03-04979-001 Insufficient amount of sample extracted to perform oil identification.Lab Sequence Number: 03-04980-001 PCB <1 ppm6/21/03 21:10 R. Bracco # 12609 of the I&A called to report that the cleanup was completed at 18:30. The structure was double washed with degreaser. The flush truck removed all debris & liquid.
Remarks:	15 gal of unk oil on 100 gal of water - clean up crew being

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"CON ED E2MIS NOTESApprox. 2 gals. of unknown fluid on approx. 60 gals. of water. Fluid is contained to the vault did not enter any sewers or waterways. Structure has a sump pump and sewer

VAULT 3686 (Continued) **S104506706**

connection, on arrival found pump disconnected. There are no cracks in structure. Two samples taken and sign #25438 hung.5-11-99 Final cleanup on 5-10-99 @18:00hrs.Used Astoria <50ppm tanker to remove liquid from vault. Used Flush truck to flush vault after Astoria tanker complete.In accordiane with I&A OS P. Renzulli, this job was completed using a hard copy dated in Feburary from E2MIS incident #123221. The hard copy showed the pill was <49ppm. However, final sample result were not yet received from this job at time of final cleanup. The I&A discovered this at 5-11-99. 5-11-99 09:15 While I & A planner A. Johnson #81226 was updaing spill that occured in V3686, it was discovered that PCB sample results were not yet recieved. This was verified with the I&A OS involved in the job. The identification sample results posted stated that there was not enough of a sample to identify.5-11-99 Chem Lab stated that the lab sequence number for the PCB analysis would be 99-04779, the results wer not yet posted and within a half an hour the Chem Lab could tell us when the sample would be posted.5-11-99 09:30 Astoria Transp., tanker might be on way to Bklyn, hw willtry to catch it before it gets there and put the tanker on hold.5-11-99 09:35 Flush advised us that the truck that flushed the spill location was #60533. The truck dumped it's load from last night this morning at approx. 08:30 in the W 28 St. WOL PCB pit. They will contact driver of the truck an put the truck on hold in W. 28th St. yard.5-11-99 09:40 Pump and waste treatment facility at W 28th St. WOL shut down.5-11-99 09:45 Called Chem Lab for status on ext.4123- was told that the chain of custody requests only a 4 day turn around, not an emergency turn-around. I&A Planner explained circumstances and requested an excalation to immediate results.5-11-99 09:50 Chem Lab supervisor, Lima Jones contacted and agreed to escalate sample results.09: 55 Astoria tanker is on hold in Astoria until sample results received.10:05 No further notification required at this time. We need to page him back as soon as sample results are recieved. He verified the waste treatment facility was shut down as soon as the lack of a official hard copy was discovered.14:00 Chem Lab results recieved.Lab Seq#99-04779Aroclor, nonePCB <1ppm5-11-99 14:10All involved departments and managers listed in this note were advised of sample results. Hold was taken off flush pit, waste treatment plant, flush truck, and Astoria tanker.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the

MTA METRO NORTH RAILROAD (Continued) **1000366197**

Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "RODRIGUEZ"E2MIS 1486956-11-03 @ 16:35M Milano # 68073 reports he discovered 5 gallons of unknown oil mixed with 2 gallons of water and dirt had spilled onto the concrete floor of the structure. It is possibly transformer oil due to a hole in the unit. There was smoke and fire involved, there is now just light smoke. Verification of sewer or waterway is unverified at this time. There is a sump, sump pump was found disconnected upon arrival. Further investigation is pending safe access and an i&a crew.Update 6-11-03 @ 17:30P Arroyo #15642 states that he will dispatch an I & A crew to v8770 to investigate the trap for a release and do an initial cleanup. P Arroyo reported @ 18:50 hrs that there is no sign of release of oil into the trap in the structure. Also a partial cleanup and a drain and disconnect of the unit has been scheduled for 23:00 hours using an over 50 tanker which has been ordered.Lab Sequence Number: 03-04882-001 PCB 17 ppm.6/12/03 05:00 hrs the partial cleanup was complete. Approx 35 gallons of oil and water mix was removed from the floor of the vault and 80 gallons of oil was removed from the unit. The capacity of the unit is 295 gallons. I asked Mr Ligouri if he checked the trap for oil and he stated the trap was clean of any oil. Absorbent was put down and final cleanup will be done after the unit is removed. The initial discovery was 5 gallons oil and 2 gallons water. During the partial cleanup 35 gallons of oil & water mix was removed and 80 gallons of oil was drained from the transformer. There is approx. 180 gallons of oil unaccounted for. According to Supervisors Arroyo & Liguori there was no evidence of oil in the trap and, therefore, no release to sewer.6/13/03 cleanup is complete as of 18:55. Double washed with slix and flushed.UPDATE: New transformer installed 6/23/2003.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIBBE"See also 0203738.11/12/10 - spill re-assigned from Tibbe to Joe O'Connell12/30/10 - Raphael Ketani. A new spill case was called into DEC on 12/22/10. It was assigned #1010077. The spill consisted of the seepage of several gallons of oil through the walls of the #7 subway line tubes. It is a reoccurrence of a historical spill that has been going on for over 10 years and is being managed through active spill case #0010754.As there is an older active spill case for the site, I have closed spill case #1010077.1/4/11 - Raphael Ketani. Randy Austin, Chief of the Spills Unit, requested an update regarding the seepage. I tried to contact Haroon Aslam of the Environmental Protection Division (646) 252-5774 of the NYCTA, but I could only leave a message.Mr. Aslam returned my call and left a message. He said that workers are still going into the tunnels to "mop up" the seep with pads. Otherwise, noting else has changed.
Remarks: CALLER STATES THERE IS SEEPAGE OF PRODUCT INTO TRACK AREA UNKNOWN SOURCE - NO CLEAN UP

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

VAULT #4012 (Continued) **S106698757**

DEC Memo: e2mis no 155131M. Tamarez found approx. 50 gallons of an unknown oil and approx. 100 gallons of water in V4012. There were three samples taken; one for PCBs, one for oil ID and one for flashpoint. There was no intial cleanup action taken, the cleanup is pending crews and a tanker.[Notify Michelle Tipple if oil ID shows #2 fuel oil - she's working on a spill a block away.]08/30/04 19:15M.Tamez#88368 of I&A notified the control center on 08/30/04 at 18:30hrs. to report that she found approx. 50 gallons of an unknown oil and approx. 100 gallons of water in V4012. The location of V4012 is F/O 301 Madison Ave.(the cross street is E. 41 st) M.Tamez#88368 was at V4012 because Feeder 4M65 had opened auto. M.Tamez#88368 was working under account number #H3282 at the time of the spill. There was no fire or smoke involved and no sewers or waterways were affected. There were no injuries related to this spill and the weather conditions did not contribute to the hazards of this spill. There was no private property affected.There is oil filled equipment in V4012, the transformer. A yellow environmental tag #35946 was hung in V4012. The water in V4012 is standing. There are no substantial cracks in V4012. M.Tamez#88368 could not see a sump or a sump pump at this time. There were three samples taken; one for PCB'S, one for oil ID and one for flashpoint. The samples are taken from the spill. The samples are marked priority E. The chain of custody form is # DD06641. There was no intial cleanup action taken, the cleanup is pending crews and a tanker.08/31/04 04:50Lab Sequence Number: 04-06913-001TOTAL PCB 13 ppm08/31/04 04:52Lab Sequence Number: 04-06914-001Analysis indicates the presence of a transformer oil.08/31/04 04:55A partial cleanup was set up for 08/30/04 at 23:00hrs. The partial cleanup is still in progress at this time.Update 9-9-04 @ 16:25M Tamez # 88368 reports that a partial cleanup has been completed as of 9-4-04 @ 17:30. 268 gallons of transformer oil were removed by a tanker. Oil absorbent pads and speedy dry were applied. Cleanup crew and supervisor are listed in the event involved person screen. Final cleanup is pending transformer removal.Update 1-22-05 @ 06:09G Byrne # 81264 reports that the cleanup is complete as of 05:50. Double washed with slix and flushed. All liquid removed by vactor truck. Tag #35964 removed. Cleanup persons are listed in the event involved person screen. Transformer has been removed and a new transformer installed.

Remarks: 50 gal of unknown oil on 100 gal of water. Material contained to the vault. Clean up crew is already there. There is a transformer in the vault but they are unsure if it is actually involved with the spill.

DEC Memo:	e2mis 1492897/14/03Mike Reiter #27277, I&A South, reportedthat he found approx. 150 gallons of transformer oil in vault V0538 located at 38 West 43 Street between 5th and 6th Ave. The source of the spill is the transformer and the cause is a possible bottom leak due to very heavy rust. The oil was found in a concrete vault. Mr. Reiter stated that it appears to be all oil and no water. He is working under account no. 80484. The feeder associated with this vault is Feeder 5M80. There is no evidence at this time of any release to sewer or waterway. Once the vault is drained the drain connection will be checked. Samples will be taken for PCB and Oil ID. No initial cleanup action was taken due to the amount of oil in the vault. Cleanup is pending an Over 50 Tanker and crews. Update: Lab Reasults,Mon 7/14/2003 20:27 hrsLab Sequence Number: 03-05802-001TOTAL PCB 17 ppmUpdate: 7/14/03 @ 21: 20 hrs.Joe

VAULT #0538 (Continued) **S106016078**

Cumberbatch, I&A South Operating Supervisor, reported at 21:00 hrs. that 620 gallons of oil was removed from the transformer. The transformer is an Allis Charmers with a total capacity of 780 gallons. Therefore, 160 gallons of oil leaked into the vault. The floor drain was checked and found clogged. He reported no release to sewer. A second sample was taken from the transformer. The vault floor was double washed with Slix and rinsed with the Vactor truck. Oil absorbent granules were placed around the transformer. The drain was plugged with absorbent pigs. These pigs were also placed around the drain. The partial cleanup was completed at 21:00 hrs. Final cleanup is pending transformer removal. 7/15/03 @ 07:23 hrs.Lab Sequence Number: 03-05807-001TOTAL PCB 20 ppmLab Sequence Number: 03-05803-001 Analysis indicates the presence of a substance similar to a dielectric fluid.UPDATE 07/25/03 05:10 hrsV Mirance # 58484 Operating Supervisor Manhattan Cable reported to N Muldoon #18723 that the cleanup was completed 100% @ 04:00 hrs. The structure was double washed with slix and 55 gallons of wash water and all debri was removed by the flush truck.UPDATE: A new transformer was installed 8/1/2003.

Remarks: Above material discovered at above location. Samples have been taken and cleanup is pending crew response. Con Ed# 149289.

DEC Memo:	On 10/25 @ 13:17 J Rodriguez rorted to me that while working in V-8901 located @ 511-5 Fifth Av doing phase checks on Feeder 4M61 he discovered approx 6 gallons of an unknown oil in the structure. No sewer/waterway affected, no fire/smoke involved, no injuries, weather did not contribute, No private property was affected. The source and the cause of the spill is unknown at this time. The spill was on the concrete structure floor. There is no standing water. Upon inspection by the finder no piping was seen Environmental tag # 34588 was hung. Chain of Custody # CC 16683 will be used for the samples for PCB and ID. The courier has been called for pick-up. I@A will respond to location to make a determination as to whether the Transformer is the source .Logger R Pagano # 487010/25 @ 13:45Spoke to T Marcinek # 87549 of CIG @ 13:43Logger R Pagano # 4870310/25 @ 14:40After inspection by I&A it has been determined that there is a bottom leak from the Transformer. On conduit plate # 26-H-4 there is no designation for V-8901. The partial cleanup will be scheduled as soon as possible. The vault will be contained byplugging up the weep-hole in the Vault and absorbent pads and granules will be placed to soak up existing leakage and prevent further leakage. The Unit cannot be drained until the Feeder is taken out of service and then the partial cleanup will be completed and crews will be available. Looger R Pagano # 48703NOTE:::: Spoke to Marcinek of CIG @ 16:20 and informed him of change of incident status. Logger R Pagano # 48703UPDATE 10/25/03 19:20R Hardin # 18320 reported to N Muldoon #18723 that a partial cleanup was completed at 19:05 hrs absorbent and pads were placed along with the weep holes were plug up and there was no release to any other structure. Final cleanup is pending removal of unit. Cleanup persons can be found in the Event Involved Screen.Lab Sequence Number: 03-08748-001TOTAL PCB 15 ppmUPDATE 10/25/03Lab Sequence Number: 03-08750-001Analysis indicates the presence of a substance similar to a dielectric fluid.10/25 @ 14:25Gilson # 17065 of I&A reported to me that the partiala cleanup hass been completed . The solid waste has benn appropriately bagged and disposed of. The Tanker removed 450 gallons of mixed liquid. The E nvironemtnal tag has been left in place.NOTE::: Transformer drained and disconnectedFinal cleanup pending Transfromer removal:02/15/05 04:15G.Byrne#81264, Cable supervisor, notified the control center on 02/15/05 at 03:30hrs. to report the clean up in V8901 was completed. This was final cleanup. There were no solids removed and no drums or barrels were used. G.Byrne#81264 states the only liquids removed were from the flush truck. The method used to clean was double washed with slix. A yellow envirnomental tag #34588, was removed from V8901. The clean up crew was G.Byrne#81264, as the cleanup supervisor and G.Rosario#11464 and W.Holder#85940 as the cleanup crew. The old

VAULT 8901 (Continued) **S106126118**

transformer was removed and a new unit was installed in V8901. The clean up was on 02/15/05 atn 03:15hrs.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D009
Waste name: MERCURY

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL

METRO NORTH RR GRAND CENTRAL TERMINAL (Continued) **1000308878**

ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate

SHORENSTEIN CO EAST (Continued) **1000101655**

that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"Con ed e2mis notes:Approx 10 gals dielectric oil mixed w/65 gals water in V-2445, sump pump not working, pcb sample taken, as per cinde dielectric oil is 45ppm. Cleanup started, found spill leaking from waterbury fitting. Repairs were made. No other oil filled equipment in structure. Crews broke piping in trap and found no indication of oil.Drained water and oil mix in vault into 55 gallon drums. Double washed floors and walls with slix and water. Soaked up free standing oil with oil absorb and removed to solid waste drum. Transported 3 liquid and one solid waste drum to West 28th. PCB storage area as per CEP >50 ppm instructions.Lab Seq #99-08768AROCLOR #1260 PCB count 19 ppmFlushed and cleaned vault 2445 with Flush truck, removed oil tag, reclassified drums to 19ppm. Final cleanup complete.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	05/01/13- Zhune spoke to Robert Hil from Rightway 718-855-7272. He said they cleaned the tank then after they performed a tank test. The tank falied the test. They sent the proposal to the owner to do the isolate test. If the owner approved the proposal they will test the lines (vent. fill, suction and return separetly and the tank itself. Plumber checked the lines and found the vent and fill are very old.06/18/13- Zhune spoke to Robert. He said they isolated the lines and found fill line failed the test. Riteway is fixing the line.
Remarks:	6000G #6 Oil tank was empty and failed tank test.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "M TIBBE"6/1/06 - 3:50 PM - Spoke with representative from Petroleum Tank Cleaners concerning spill. A leaking fill line was reported in which Petroleum Tank Cleaners visited the residence to clean the site on the day of the spill. The spill was cleaned in its entirety and the tank was cleaned and repaired not long afterward. The

501 FIFTH AVENUE (Continued) **S104495956**

representative reported the situation was not a big deal and there have been no further reports of problems since. Referred to Abramson Brothers, Inc. if additional information was required. Called Abramson Brothers in which there was no one in the office at the time that could give additional information. Awaiting return call concerning the case. - 6/1/06 Johnathan Antonizio, NYSDEC - HQ7/1/06 - 1:30 PM - Called Abramson Brothers, Inc. concerning spill site and spoke with a general representative. Based on the information that was gathered previously from Petroleum Tank, they had no additional information based on the particular case, but haven't had reports of further problems at the residence. Based on the spill case's age, they did not have any hard copy records on file. However, based on the information provided by Petroleum Tank, no further action is necessary at this time. - 7/5/06 Johnathan Antonizio, NYSDEC - HQ.

DEC Memo:	161498. 10/14/05 14:38. F.Simms#66618, Emergency Dept. Manager, notified the control center on 10/14/05 at 14:20hrs. to report a spill of 50 gallons of transformer oil and 200 gallons of water and foam in V4725, which is located in front of 118 - 132 Park Ave. between E. 41 ST & E. 42 ST. F.Simms#66618 was responding to a FireDept. report of a transformer fire when he found the spill. F.Simms#66618 reports that it is a possible broken bushing on the transformer. The account number is #F3503. There was fire and smoke. There was no sewers or waterways affected. There were no injuries related to this spill and the weather could have had an affect, it is not known at this time. The Fire Dept. was/is on location. There was no private property affected. A yellow environmental tag numbered #01046 was hung in V4725. There will be 1 sample taken for PCB's. The Warhouse PCB History states 10 PPM, as of 09/09/1994. There was no initial cleanup action taken. The cleanup is pending a tanker and transformer removal. M.Schlagel#18276, of CIG, was notified on 10/11/05 at 14:29hrs. Logger : M.Casalta #12684
Remarks:	NO SEWERS OR WATERWAYS 200 GALLONS OF WATER IN HOLE, TRANSFORMER DIEL; FLUID POSSIBLE; THERE WAS FIRE: CREWS ON LOCATION; HISTORICAL PPM OF 10: IN 1992: 161498

Tank Info:

Tank Number:	001
Tank Id:	54911
Material Code:	0002
Common Name of Substance:	#4 Fuel Oil (On-Site Consumption)

Equipment Records:

A01 - Tank Internal Protection - Epoxy Liner
I05 - Overfill - Vent Whistle
D01 - Pipe Type - Steel/Carbon Steel/Iron
G02 - Tank Secondary Containment - Vault (w/access)
J02 - Dispenser - Suction Dispenser
K00 - Spill Prevention - None
C01 - Pipe Location - Aboveground
F01 - Pipe External Protection - Painted/Asphalt Coating
H00 - Tank Leak Detection - None
B01 - Tank External Protection - Painted/Asphalt Coating
I04 - Overfill - Product Level Gauge (A/G)
L00 - Piping Leak Detection - None

Tank Location:	3
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	01/01/1950
Capacity Gallons:	12500
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	08/08/2009
Register:	True

Classification:	Conditionally Exempt Small Quantity Generator
Description:	Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Violation Status: No violations found

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"e2mis no. 143-688:UPDATE:07/01/02 10:00 HRS10:30 hrs.S.Crissey #88097 ugs reported to W.Lee #33243 mcc founded 5 gal of dielectric fluid in adjoining 3 vaults #V2520, V2445, V4719. And approx 5 gal of water.NOTE: Clarification to the above -the amount of dielectric fluid found is 5 gallons per Vault listed.Correction to above entry: Incident #140068 refers to vault V2691. This vault is one of four vaults (transformers) at this location. The other vaults are V2520,V2445 and V4719. An inspection was performed today by Underground Supervisor Scott Crissey. He reported finding 5 gallons of transformer oil in each ofthese vaults which supposed migrated through weep holes from vault V2691 (site of original spill and transformer problem.An inspection was performed of vaults V2520, V2445 and V4719 by the I&A crews with the following results:Vault 2520 - No oil found, just dirtVault 2445 - No oil found, just waterVault 4719 - No oil found, vault is dry.Also, no weep holes were found. According to the Chain of Custody, two samples were taken, one for PCB and one for oil ID from vault V2445. Since there is a discrepancy between the original report and this inspection, a supervisor will be dispatched to this location to verify the findings of the I&A crew.Frank Garafola #15481, Operating Supervisor, reported at 18:41 hrs. that he inspected the subject three vaults and found the following:Vault 2520 - Found dry dirt with no evidence of any oil. Pads were placed on the dirt and no oil residue came up.Vault 2445 - Found just free standing water. Absorbent pads were placed and no residue of oil was seen or discovered. This vault needs a flush cleaning.Vault V4719 - Found just dry dirt and debris. No evidence of any oil.Vault V2691 - Transformer still in place pending removal.Lab Sequence #02-06070-001The lab results confirm the I&A findings of no oil in the vaults; the vaults were flush cleaned with a Vactor truck and completed at 22:10 hrs. on 7/1/02.
Remarks:	unk cause of spill at this time. clean pending lab results ref #

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	e2mis no 157411While Sinclair was Flushing N-50208 with Vehicle # 60533,he sprang a Hydraulic leak from the Vactor system and approx 20 gallons of Hydraulic fluid spilled into the adjacent M-50206 along with approx 50 gallons of water. The truck was temporarily repaired and the cleanup of the truck was started at 18:35 and completed at 18:45.. The truck can be driven into the W.28 St yard without an other Environmental impact and will be permently repaired there either by the driver or Transportation. No sewer/waterway affected. The spill was in the Mankole, nomovement on the standing water, no sumps verified, no cracks. Environmentag Tag # 38687was hung. Two samples for PCB and ID will be taken. Cleanup for the M-50206 will be pending Sample results.2/28 @ 19:50According to Conduit plate E 26 - I - 1, there is no sewer connection.Update 3-1-05 @ 06:07Lab Sequence Number: 05-01745-001 - PCBs < 1 ppmLab Sequence Number: 05-01747-001 - Analysis indicates the presence of a substance similar to a lubricating oil.Update: 3/1/05 @ 17:21 hrs.Manhattan Environmental Desk added manhole M50206 to the "Description" and "Location" fields in order to track the completion of the cleanup in this structure. This was discussed with ERT, Paul Walsh and he agreed with this change. In addition, the Responsible Operation was changed from "Flush Operations" to "Underground South" since they are responsible for the cleanup in the manhole.Based on the results of the sample analysis the oil in the manhole is the lubricating or hydraulic fluid spilled by the Vactor truck. The cleanup of the vehicle was completed but the cleanup of the manhole is pending scheduling of UG crews and Tanker or Vactor truck.Update 3-25-05 @ 05:25A Munro # 13615 reports

CONSOLIDATED EDISON (Continued) **S106866896**

that the cleanup is complete as of 05:25. 2 bags of ppe. 650 gallons of oil and water mixed removed by tanker. Double washed with slix and flushed. Tag # 38687 removed. Source of spill was a vactor truck that was on location previously. Cleanup crew and supervisor are listed in the event involved person screen.

Remarks: sprang leak on hydraulic hose. leak from vehicle recovered. manhole affected 60533

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN

WATCH HOLDINGS LLC (Continued) **1004762189**

OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Violation Status: No violations found

Registry ID: 110004312093

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

530 FIFTH AVE RPFIII ASSOC LLP (Continued) **1004762555**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Waste code:	D008
Waste name:	LEAD
Waste code:	F002
Waste name:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Violation Status:	No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

CUSHMAN & WAKEFIELD (Continued) **1000990471**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

FRED F FRENCH BUILDING (Continued) **1000446197**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Date Last Modified:	4/9/2007

Tank Info:

Tank Number:	001
Tank Id:	216717
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
G02 - Tank Secondary Containment - Vault (w/access)
J02 - Dispenser - Suction Dispenser
I05 - Overfill - Vent Whistle
C01 - Pipe Location - Aboveground
L01 - Piping Leak Detection - Interstitial - Electronic Monitoring
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
B00 - Tank External Protection - None
F00 - Pipe External Protection - None
K01 - Spill Prevention - Catch Basin
E02 - Piping Secondary Containment - Vault (with Access)

Tank Location:	2
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/01/1989
Capacity Gallons:	3600
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ARMENA REFINERY USA (Continued) **1014399374**

Hazardous Waste Summary:
Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also

CROWLEY TAR PRODUCTS CO INC (Continued) **1000437089**

has the capability to track other activities occurring in the Region
that support Compliance and Enforcement programs. These include;
Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Classification: Not a generator, verified

Date form received by agency: 09/06/1996
Facility name: ATLANTIC PRECIOUS METAL CAST
Classification: Conditionally Exempt Small Quantity Generator

Violation Status: No violations found

FINDS:

Registry ID: 110004528217

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number:	001
Tank Id:	23299
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
J02 - Dispenser - Suction Dispenser
L09 - Piping Leak Detection - Exempt Suction Piping
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
I04 - Overfill - Product Level Gauge (A/G)
H00 - Tank Leak Detection - None
B00 - Tank External Protection - None
G03 - Tank Secondary Containment - Vault (w/o access)

Tank Location:	1
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	10/01/1945
Capacity Gallons:	5000
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
