Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY SITE HAS ONGOING PROBLEM OF WATER COMING INTO BSMT; SUMP PUMP BROKE AND BSMT FLOODED, STRONG GASOLINE ODOR AND SHEEN ON WATER. THERE'S AN OLD 550 GAS TANK UNDER BSMT FLOOR, BUT NOT CLEAR HOW OR IF WATER GOT INTO TANK. FIRE DEPT. PUMPED OUT STANDING WATER; PLUMBER REPLACED SUMP PUMP; OPEN DOORS AND FAN ALLEVIATED STRONG ODOR. KOLLEENY WENT TO SCENE, FLOOR STILL DAMP, LIGHT GASOLINE ODOR. SPOKE WITH BATTALION COMMANDER CHIEF KEENE; ALSO SPOKE WITH KIRKYLA & REMEZA, CM FOR SITE, ASKED THEM TO EXPEDITE PROPER CLOSURE OF TANK AND INVESTIGATE FOR CONTAMINATION. WILL UPDATE. TANK WAS CLOSED IN '98; GW GRAB SAMPLE FROM TANK PIT HAD MODERATE CONTAM., URS IMPLEMENTED GW MONITORING USING 3 WELLS INSTALLED IN '97. AS OF OCT. 2001, ALL WELLS HAVE NOW MET STANDARDS FOR AT LEAST TWO CONSECUTIVE SAMPLING EVENTS. THERE HAVE BEEN NO FURTHER ODOR COMPLAINTS FROM FIRE DEPT. PERSONNEL. "

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR MINOR

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110020503597

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance

Map ID	Site	Database(s)	EPA ID Number

MONTEFIORE CARE FOR THE HOMELESS (Continued) **1008158107**

information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 03/12/03 Rommel- Office Duty There are two existing spills (for the same incident) assigned to this site for a spill caused by a faulty gauge. 9912043 and 9912045. Spoke to Mark Rosen cell-201-446-0447 from Summit. Summit is delivering for Hess. Eric from Hess was on site. Approximately 50 gallons spilled, 10-15 gallons spilled in basement. There is a sump which discharges to a drain on the side of the building (on Walton Ave). The sump pump has been turned off. The rest of the oil spilled out the vent and impacted the same drain that the sump pumps to. AL Eastmond (Rene) expects to be on site by 17:30 tonight.JMR 3/13/2003 Sangesland and Vought visited the site. Property manager: Joe Chaims of MP Management, 1274 49th St Suite 175, Brooklyn, NY 11219. Tel #718-972-7660 Gave written direction to do the following: 1) 24 hours to have the sump pit properly cleaned 2) 15 days to have tank tested, vent line gauge repaired. 3) Update PBS to show tank is buried. 1/8/2004 Sangesland spoke to new property manager. Property has been sold and new owner didn't know about the open spill number. Sangesland wrote a letter outlining the work listed above. 1/20/2004 Return Receipt sent back to DEC to prove that letter was accepted by owner/manager: 1920 Walton LLC, 3511 Highway 9 North, Howell, NJ 07731 2/24/2004 Management company sent in an updated PBS form, but no other documentation. Sangesland called requesting a boiler company come to the building, inspect the site and send a writeup saying that the site was clean and tank/gauge are operational. 3/15/2004 Sangesland received a letter from the management company which included an invoice from New York City Tank Testing Inc. 1624 Webster Ave Bronx (718-731-7011). This invoice shows that NYC Tank did an inspection of the tank and lines and found no DEC violations. Everything was in compliance and had been repaired by the old owner. Spill closed "
Remarks:	"broken guage caused spill. clean up in progress"

DEC Memo:	"7/1/15-Zhune spoke to Steve Malinowski from AKRT Inc. 631-574-3724. He said he is assisting in the redevelopment of an 11 story residential building with a basement that is going to be built. Today they removed two 550-gallons USTs and no contamination was found. They did waste test excavations. They installed 4 test pits in four quadrants at other location on the site. One pit in each quadrant. They found a third tank in the last quadrant. This tank is smaller than the others two. They observed soil contamination adjacent to the third tank. They will remove the tank and the contamination. The

phase I, Phase II and the Remedial Action Plan will be sent to the DEC. 8/27/15: Mahat DEC Mahat received a closure report for the spill case. It has been uploaded on D2 for reference. Report include manifest, pictures, end point samples, and closure request. The report indicated that the end point sample are below CP 51 guidance VALUE. All the source of the contamination has been removed from the site. Necessary adjustment in PBS section is also performed. Based on the report, no further investigation is warranted by the Department. Spill case will be closed in DEC Spill Database. "

Test Failure Spill Case. VB 10-23-2015 - V. Brevdo Returned call to Danielle of GCP Group (516-487-5900). Danielle is a mortgage broker for the building owner who bought the building in 2013. I explained Danielle what type of documents and/or information needs to be submitted to the DEC to accomplish closure of the spill as well as the process - that we need to understand whether release of product have occurred or not, and all relevant information about tank repair, retesting, etc. Danielle will be speaking with the owner of the building suggesting that he communicates with oil delivery and tank testing company to obtain needed information. VB"

Remarks: "Tank test failed. Repair & retest being scheduled."

DEC Memo:	"7/13/05 mt//ttf letter sent//// 5,000 gal UST, borings around the tank, three borings around tank showed clean soil, one boring above the tank found contaminated soil. Gasket was replaced a year ago. Mr. Mort, the owner, said the report will be sent to the Department for review. 1/9/2006 - JZ: As per Randy's direction, this spill is reassigned to Feroze. 03/15/06. Spill is transferred from Feroze to Kumer Patel. 04/06/06-Hiralkumar Patel. Spoke with Mr. Mort. he will call back with more information. Received call from Mr. Mort. as per him, they are planning to remove the tank, which is burried outside of building, and install new 5000 gal tank inside the building. when they take out old tank, they will remove all pipings associated with that and will remove any contaminated soil. as per the report he has, they found some contamination at vent pipe location and he thinks it only reached couple of feet in ground. i told him that this case will be closed when he submit endpoint sample results after tank removal. he will call me once he start working removing tank from location. he has submitted the report to DEC_Zhoe. 05/05/06-Hiralkumar Patel. Spoke to Mr. Mort (718-601-2000). they haven't start tank removal yet. will start in couple of weeks. 06/05/06-Hiralkumar Patel. spoke to Mr. Mort. they are working at another site in Manhattan. once they done there, they will remove tank from this location. 07/31/06-Hiralkumar Patel. spoke with Mr. Mort. they will finish work by end of August. 08/31/06-Hiralkumar Patel. spoke with Mr. Mort. Mr. Mort mentioned that he was dealing with DEC Leszek. he will send me copy of letter from Leszek. now Mr. Mort is planning to remove contaminated soil and to use same tank. received copy of letter sent by Leszek. old spill# is 0210857. this was also reported as tank test failure. spoke with Mr. Mort and asked to submit all documents to Leszek. spoke with DEC Leszek. he will work on this case under older spill case. Refer spill#: 0210857."
Remarks:	"Tank test failure. Vent line will have to be repaired. Unsure who will be fixing the vent line."

DEC Memo:	"11/13/07 - Zielinski ABC Tank Repair and Lining, Inc., sent a report, dated November 9, 2007, that shows no VOCs contamination next to the previously used fill box. SVOCs analyses indicate chrysene 100 ppb, fluoranthene 2100 ppb, pyrene 2200 ppb. Previously taken four soil samples next to the tank were below TAGM # 4046 with exception of benzo(a)anthracene - 884 ppb. The tank was replaced by an AST on April 25, 2007. EDOCs contain above-stated information and also results of tank testing, DEC letter of August 24, 2006, two faxed information from Home Company (the operator of the tank). The case is closed. 08/27/07 - Zielinski Spoke with Mort Yuter; he said that within one, two weeks he would hire a company to remove contaminated soil and perform analyses of endpoint soil samples. 08/24/06 - Zielinski Leszek Zielinski is assigned to this case. Faxed a letter to the owner of the tank requesting retesting the tank immediately. file transferred to co 7/05, assigned to Jarratt. Contacted M. Yates of Home Company who informed us the tank is being replaced. DEC should check back in Dec '05 for update. 12/29/05: called Home Company (718) 601-2000. They are still negotiating for the tank replacement. 08/31/06-Hiralkumar Patel. refer notes from spill # 0504353, as these both cases are for same site."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

2200 MORRIS AVE FRONT OF **ECHO** **N/A**
BRONX, NY 10453

FINDS:

Registry ID: 110060212078

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT PBS registration is expired - owner was notfied and will file renewal. DEC Sigona contacted Mystic who referred to County Oil who owns the account. Spoke to Morris at 718-626-4161 at County Oil who provided name of property owner- Mike at (347)885-0028, who said the spill was being cleaned up. DEC (Vought) is responding to investigate the cleanup. DEC Vought arrived at approximately 1 PM found oil residue in basement and evidence of oil washed down street. DEC Vought to contact Mystic for action. 4/4/2003-Vought-Site visit by Vought. Spill out of vent onto concrete sidewalk which also ran down set of concrete stairs into tankroom. Floor of tankroom was sealed and no cracks found. Spill cleaned by Mystic using biolsolve. No sewers or drains affected. Spill closed by Vought."
Remarks:	"Mystic is performing the cleanup which is currently underway."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 133395: Glenford Patterson, Employee # 51055 reported that while doing pipe survey a leak developed in heavily corroded area on pipe causing an oil leak at the rate of approximately 1 gallon per hour; approximately 5 gallons of oil is presently in sump. The pipe was being surveyed for damage caused by corrosion. A high pressure crew is presently on site with clamps and pads. Bucket placed under leak. Temp clamp was installed at 11:00 9/14/00 but clamp not holding 100% due to pipe corrosion. Safeway on site excavating outside wall and wall broken out. Custom 6'7 barrel fabricated on9/15/00 and installed on 9/16/00. Corroded bypass line replaced also. All liquid contained in manhole and was pumped out be Con Ed tanker. Loss estimated to be 170 gallons of dielectric fluid (from pumphouse readings). Chem lab reported 00-08896 <1 ppm PCB."
Remarks:	"leaking feader pipe. clean up will be done when leak is clamped. ref #133395."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was MILLER 2/23/10 - Austin - Reassigned to Ketani to followup and bring spill to closure - end 3/11/10 - Raphael Ketani. The spill occurred on 11/4/92 and involved a tanker truck. Twenty gallons of #6 oil spilled in the back of the building in the courtyard. The caller was Luis Cruz of Highbridge Heights (212) 293-3100. According to Property Shark, the block and lot are 2521 and 27. The main address is 1385 Nelson Avenue. There are no alternate addresses. The site is an apartment building. ACRIS shows that the deed was transfered on 11/13/98 to 1385 Nelson Avenue HDFC (Housing Development Fund Corp.) c/o Belmont Arthur Local Development Corp., 660 East 183 Street, Bronx, 10458. There are no other spills cases. However, there is a PBS case. This is #2-603851. There is a 2500 gal. AST with #2 oil on site. Mail goes to Belmont Arthur L.D.C., 660 East 183 Street, Bronx. The owner is 1385 Nelson Avenue HDFC at the 660 East 183 Street address. The phone is (718) 295-2882. There is no paper file. There are no E-docs. I will make a site visit. 3/22/10 - Raphael Ketani. I made an unannounced site visit and met the super. for the building, Jose Aponte. He said that he has been the super. here for the past 5 years. He took me to the back of the building and showed me the back courtyard and the alleyway that leads to the back courtyard. Both

Map ID	Site	Database(s)	EPA ID Number

APARTMENT BUILDING (Continued) **S102671977**

areas were free of oil and did not show any signs that an oil spill had taken place back in 1992. I took some pictures of the areas (see E-docs). Mr. Aponte said that, about 20 years ago, the owners of the building had made a major renovation. I looked at the vent pipe and it looked as if it had been installed not too long ago because the metal had only a slight rust color. The whistle cap to the vent pipe looked to be in very good condition with no signs of corrosion or oil seepage. The location where the vent pipe enters the building looked like it had been rebuilt fairly recently. It was not clear from looking at the site how the spill had happened. However, I told Mr. Aponte that it was an outside spill. Mr. Aponte told me that he did not know how the spill had happened. After this, I left the site. As the spill occurred outside the building, and as any oil that had entered the drains must have been washed down the sewer years ago from the 18 years of rain, and as the spill appears to have been cleaned up from the pavement, there is no threat to the public or the environment. Therefore, I am closing the spill case."

Remarks: "SPILL IS AT BACK OF BLDG IN COURTYARD NO CLEAN UP YET CON -ED TOLD MATTO CLEANUP"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"01/10/08 - See eDocs for Con Ed report detailing cleanup and closure. 162020. 23-November-2005 14:06 Hrs. Quality Assurance Senior Engineering Technician Giuseppe Graci, 42890, reported that while performing a manhole inspection for future work (Layout S0510032x) in manhole 14941 located on the southeast corner of West 170th Street at Plinton Avenue in the Bronx found 4 ounces of an unknown oil leaked into the manhole from secondary duct and saturated the secondary cable, and spilled onto feeder arcproofing and to the floor of the manhole where it is contained. No fire or smoke is/was involved. No sewers, waterways, or private property affected. No injuries involved. It is likely that the found oil is secondary cable oil due to the degraded nature of the secondary cable in the manhole, but because the oil is leaking into the manhole from the secondary duct the source is unknown and the spill is reportable per CEP. Environmental tag 46618 applied. Chain of Custody EE20918 has been used for PCB and Oil ID analysis. Parking is sure access - this is a corner manhole. Cleanup is pending lab results and cleanup crews, and crews to repair the deteriorated cable. CIG notified. J.Siesfeld 84253 From: Siesfeld, James Sent: Wednesday, November 23, 2005 2:27 PM To: Mullen, William E.; Famelio, Peter; D'Alisera, Charles A Cc: dl - BX/West EH&S C.C. Subject: Manhole 14941 Oil was found leaking

Map ID	Site	Database(s)	EPA ID Number

MANHOLE #14941 (Continued) **S107488629**

from secondary duct into Manhole 14941 at the s/e/c of W 170th Street at Plinton Avenue in the Bronx. Based on the initial description of conditions, it is likely the secondary cable has degraded and is leaking oil. Please inspect and evaluate the secondary cable in the structure, and implement appropriate repairs. "

Remarks: "4 ounces that leaked into the manhole from a secondary duct.clean up pending lab results and crew. con ed#162020. no to five questions."

DEC Memo:	"10/07/13-Hiralkumar Patel. 12:45 PM:- left message for Neil. 12:54 PM:- spoke with Mr. Rivera, building manager. he mentioned that there are three apartment buildings in area, owned by Neighbourhood Restore HDFC, connected to a single tank/boiler system located in basement of buiding 131. building 131 is vacant for past six months for complete renovation. during month of Sept., someone broke into basement and stole items includig copper tube on fuel line that connects to boiler. the boiler is suction fed, so after disconnecting the fuel line, there was about 2-5 gal oil spilled onto boiler room floor. there was no continuous discharge. site has one 5,000 gal aboveground tank. Mr. Rivea mentioned that during the same vendalism event, sewer pump was also damaged. so boiler room floor was flooded with water with oil sheen. they hired contractor who pumped out 600 gal water for disposal. contractor has also collected subsurface soil samples. PBS #: 2-469432. as pe PBS record, the site has one 4,500 gal #2 oil AST in vault with access. the tank was installed in Mar. 1968. other spills: 0006943, 0611873 spill # 0006943 was reported on 09/12/2000 as 8 gal #2 oil spilled due to loose nozzle during fueling. oil spilled onto sidewalk. case closed. spill # 0611873 was reported on 01/26/2007 as #2 oil spilled from broken valve on bottom of tanker truck. oil spilled onto roadway. case closed. Neighborhood Restore Housing Development Fund Corp. **property owner** 150 Broadway, Suite 2101 New York, NY 10038 Ph. (212) 584-8414 Highbridge Community Development Corp. **property management** 1465 Nelson Ave, Suite A Bronx, NY 10452 Attn.: Martin Rivera **property manager** PH. (718) 293-3100 (O) (646) 242-8414 (C) email: mrivera@highbridgecdc.com 10/22/13-Hiralkumar Patel. 1:08 PM:- spoke with Neil. he mentioned that about removing about 5-6 inches of water from flooded basement, they noted strong petroleum odors. as such, they drilled some holes in boiler room and found contamination to about 1.5 ft below floor. asked Neil to submit sample results for review. he mentioned that another environmental company is doing subsurface investigation. 10/25/13-Vought-Recieved message from GCI Jill Garra (Ph:631-851-1600x206) inquiring as to who DEC PM was. Vought returned call and left message with phone number of DEC Patel. 10/29/13-Hiralkumar Patel. 11:32 AM:- sent email to Jill and asked her to submit available documents for review. 11/1/13-Vought-Received call from and spoke to Alana Smith (Community Preservation Corporation Ph:646-822-9400) and they are providing mortgage for the

Map ID	Site	Database(s)	EPA ID Number

BASEMENT BOILER ROOM (Continued) **S114560461**

company and are a non for profit organization and working via NYC HPD. She is looking for approval for the Remedial Action Plan and whether or not it is acceptable to DEC. 11/1/13 TJD Response to Alana Smith's request for approval of Work Plan was sent via e-mail. Response is as follows: I have reviewed the work plan submitted by GCI concerning the above referenced site. Currently, I do not have enough information to approve the work plan as proposed. I need copies of all the historical documentation associated with previous investigations (specifically sampling data) before the work plan can be approved. Based upon a review of Kumar's notes this information request was made via e-mail to Jill Guerra @GCI on 10/29/13. Please forward this information ASAP to both Kumar and myself and we will review and respond as quickly as possible. 11/06/13-Hiralkumar Patel. while I was out of office, DEC Demeo received and reviwed Phase II and RAWP prepared by GCI. he conditionally approved the work plan stating that DEC may require additional work. abstract of Phase II: - subject site is improved by a six (6) story residential apartment building, with a basement - there are forty (40) apartment units within the building - according to Sanborn maps, the subject building was consructed sometime between 1909 and 1952. prior to that time, the site existed as vacant land - unknown amount of oil spilled onto the concrete floor of the boiler room as copper lines connected to AST located within the boiler room had been stolen - tweleve (12) soil borings (SB-1 through SB-12) were installed in the boiler room - borings SB-3 through SB-7 were completed to a depth of one (1) ft bg, where refusal was encountered which appears to be a concrete sub-slab - borings SB-1, SB-2, SB-8 through SB-12 were completed to a depth fo five (5) ft bg - groundwater was not encountered in any boring - soil samples from 1 ft bg from borings SB-6 and SB-7; and from 5 ft bg from borings SB-1, SB-8, SB-10 and SB-12 were submitted for analysis - VOC contamination noted in boring SB-10 (at 5 ft bg) sample analyticals: ----------SB-10 (5 ft bg) Xylene----------563 1,2,4-Trimethylbenzene-----4,570 1,3,5-Trimethylbenzene-------915 GCI proposed excavation of contaminated soils. Alana Smith Mortgage Officer The Community Preservation Corporation 28 East 28th Street, 9th Floor New York, NY 10016 Ph. (212) 869-5300 Ext. 547 email: asmith@communityp.com Jill K. Guerra GCI Environmental and Engineering Consultants Ph. (631) 851-1600 Ext. 206 Fax (631) 851-0535 email: jill_guerra@gci-env.com 02/10/14-Hiralkumar Patel. 3:03 PM:- spoke with Jill. she is waiting for endpoint sample results and disposal manifests. report will be submitted by end of Feb. 2014. 03/13/13-Hiralkumar Patel. 4:09 PM :- received email from Jill including report. - three excavation areas: 1) 7 ft by 9 ft and 1 ft deep; 2) irregular shpae approx. 3 ft by 7 ft and 4 ft deep; and 3) 2 ft by 2 ft and 5 ft deep - estimated 15 tons of impacted soil and concrete debris were removed - total of eight (8) endpoint samples (B-1 through B-8) were collected - no contamination noted in endpoint samples based on available information, case closed."

Remarks: "When pumping water out of the basement a sheen on the water was discovered. The owner said it was due to vandalism. Clean up is pending an investigation."

DEC Memo: "12/30/05. Mr Feroze talked with James Mcgoldwick (718-206-2000 347-452-3866), he informed that the system is fine and he will send DEC the tank test result soon. TTF also sent: Samaritan Village Inc, 138-02 queens Blvd, Briarwood, NY 11435. 01/18/06 . Feroze received a fax from Lee Selinger (631-360-8901, 516-330-8170) of WINDMILL Oil Tank service. He mentioned that he will change the fill & vent pipe. He is requested to submit manifest and tank test result to DEC. PBS of this Spill 2-349542. 02/22/06 . Feroze received a letter from Lee Selinger (631-360-8901, 516-330-8170) of WINDMILL Oil Tank service. He mentioned that they excavated the top of the tank and replaced the vent and fill line. They will change gaskets of undisclosed manhole cover and will test the tank. 02/06/06, Feroze talked Lee Selinger (631-360-8901).They wiil submit DEC the manifest to change the fill and vent lines. 03/13/06 Feroze , Mr. James Mcgoldrick e-mailed me that they will submit tank tightness test result within a week. 03/14/06 Feroze. Received the passed tank tightness test result and manifest regarding change of fill and vent lines. The spill is closed. "

DEC Memo:	"Multiple Vehicle Accident involving Oil Fuel Delivery Truck. 1,000 gal lost from truck. DEC Sharif Rahman responded to the site. ****duplicate spill report #0813256 was closed out already**** Notes from that spill report said: Caller- Claudia Sharpe 718-991-1300 CALLER STATES THAT DUE TO A 4 VEHICLE MVA THE TANKER CONTAINING THE PRODUCT WAS RUPTURED RESULTING IN A SPILL OF ABOUT 1500 GALLONS TO THE ROAD. UNK WHAT RESOURCES ARE AFFECTED. CLEAN UP STATUS UNK. 03/10/09 I responded to the site after receiving the report through hotline. A straight chassy tanker truck was hit by car and made a hole on its right side front compartment.The truck lost approx. 800 gallon #4 fuel to the street.Oil travelled along the curb for approx 1/4 mile where it found it's path into a catch basin.FD made sand dike along the curb to capture oil before it goes to the drain.Truck owned by Century Star.Century Star has retained HMHTTC to clean the spill from street and catch basin.Few Con Edison manholes may be

Map ID	Site	Database(s)	EPA ID Number

HIT AND RUN W/ FUEL TRUCK (Continued) **S109580800**

impacted by the oil. I notified ConEdison ERT desk about the spill and the possible impact of their service box.Approx 50-100 gallon went into the catch basin and service box.HMHTTC has a 3,000 gallon vac truck on site to suck up the oil.Clean up may take full day as the impacted curb line is approx 1/4 mile long. DEP Industrial Waste was inspecting the catch basin. Contact Info: Century Star 304 Whittier Street Bronx. Ph (718)991-2600,Manager: Claudia @(718)991-1300 HMHTTC Response Incorporated Manager: Pat Garrison @(201)725-9165 DEP Industrial Waste: Sagar Chatterji @(347)672-6078 Rec'd a call from ConEdision Paul Walsh@(212)580-8383. Paul indicated that one service box has oil entered into it. ConEdison is going to clean the service box by their own clean up crew.(sr) (sr) 04/08/09 Clean up completed.Case closed.(sr)"

Remarks: "500gal in the street/500gal in the sewer. NYFD on scene in progress containment."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL CON ED E2MIS REPORT 4-12-01 15gals.of unknown oil found on 20gals. of water in SB 15081. Sample taken, tag installed, cleanup pending test results. DEP representatives St. Jean at location informed Sup. that he was issuing a Commisioners Order for this job because we did not take samples direclty to lab but brought them back to Van Nest tool room and had them take samples to lab. Flashpoint 174 degrees we notified Sup. to have tanker start to drain S/B at 1345hrs. Cleanup has been completed and the environmental stop tag removed. 250gals. of oil and water was generated and was transported via tanker truck. Structure was double washed using Bio Gen 760. Cleanup complete."
Remarks:	"15 gals unk oil on 20 gals of water - clean up in progress no smoke or fire, no private property affected con ed #136407"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT e2mis no. 128658: 10/26/99 @ 14:15 hrs. Mechanic R. Mercado reports approximately (1) gallon of unknown oil in dirt on floor of manhole # 23915. Conduit plate 24-H-2 indicates no sewer connection at this location. He took (2) samples, one for PCB, and one for oil identification. He placed environmental tag # 09475. Clean up pending sample results. 10/28/99 @ 15:15 hrs. Lab Sequence Number: 99-11326 PCB 26 PPM 10/28/99 @ 15:15 hrs. Lab Sequence Number: 99-11327 ANALYSIS INDICATES THE PRESENCE OF AN OILY SUBSTANCE SIMILAR TO A HEAVY FUEL OIL. Cleanup completed on 11-8-99 at 1430 hours. 1-gallon oil and 200 gallons water removed via tanker. PCB 26 PPM. Manhole flushed. No sewer connection. Tag Removed. 21-MAR-2002 @ 10:00 Hrs Flush Operating Supervisor Charlie D'Alisera and EH&S Sr. Specialist Jim Grahan inspected MH's 23914 & 23915 on Wednesday 3/20/02 and found both manholes were dry and there was no oil present. Supervisor D'Alisera remembers that these holes were found to have heating oil in them do to the apartment building filler neck being broke. Contractor repaired and problem was corrected."
Remarks:	"1 gal of unk oil not on any water - sample taken - clean up is pending lab results - pcb test and id test taken con ed # 128658"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL e2mis no. 133395: Glenford Patterson, Employee # 51055 reported that while doing pipe survey a leak developed in heavily corroded area on pipe causing an oil leak at the rate of approximately 1 gallon per hour; approximately 5 gallons of oil is presently in sump. The pipe was being surveyed for damage caused by corrosion. A high pressure crew is presently on site with clamps and pads. Bucket placed under leak. Temp clamp was installed at 11:00 9/14/00 but clamp not holding 100% due to pipe corrosion. Safeway on site excavating outside wall and wall broken out. Custom 6'7 barrel fabricated on9/15/00 and installed on 9/16/00. Corroded bypass line replaced also. All liquid contained in manhole and was pumped out be Con Ed tanker. Loss estimated to be 170 gallons of dielectric fluid (from pumphouse readings). Chem lab reported 00-08896 <1 ppm PCB."
Remarks:	"leaking feader pipe. clean up will be done when leak is clamped. ref #133395."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"DECPiper repsponded ot site. Tank was overpressurized and patch on top blew off. Patch is 2' x 2'. Oil spilled in tank room and soaked into debris .Speedy dry was down. Vapors were high in unfinished basement. 15 ppm in hallway and 5ppm in 1st floor apt. I entered apt and vapors were only existant near door as it was open. I instructed tennant to keep door closed. Milro to perform surface cleanup and set up ventilation. I spoke with Milro in am. Floor was in poor condition and borings will need to be taken. Bases of walls need to be cut out as well. DECpiper recveived closure report. Based on work to date, this spill is closed. See e-docs if warranted. "
Remarks:	"Wooden Floor in basement-clean up ordered."

Spiller City,St,Zip:	BRONX, NY
Spiller Company:	001
Contact Name:	MR. FRANK DELEONARDIS
Contact Phone:	Not reported
DEC Memo:	"4/27/2005 - Sangesland spoke to Stephanie Salvelina at consultant Warren & Tanzer She said the site was a gas station from 1940-1980. In 1980 the NYFD ordered 4 tanks to be abandoned/closed. Consultant is now digging on the site, in preparation of building residential housing, and found gasoline contaminated soil. At least 2 of the tanks have NOT been properly abandoned or filled. Unknown what the owner will be doing for remediation. Contaminated Soil Letter sent to owner (name from consultant) Mr. Frank DeLeonardis 15 Laural Ave. Mt. Vernon, NY 10552 - SS 5/19/05 - North East Environmental, Joe called and left a message that he is preparing site investigation, would like a call back at 914-777-1930. Assigned to Imdadul Islam. - KST 6/8/05- Joe informed over tel. that four USTs have been removed from the site by excavating a 20'*25' area approx. 15' deep. No GW encountered. Approx. 200 tons of contaminated soil has been removed and stockpiled for disposal. In addition to end-point soil samples and a composite sample from the stockpile, three borings for soil & GW samplings in and around the tank grave have been advised and the results along with boring logs be submitted with the tank closure report.- II 8/16/05- Left message for Joe (contractor) at N-E Envtl. about the submission of the tank closure and SI report. Also, spoke to Mr. Chat Bijoor of consultant Warren & Tanzer . He is supposed to get back to me with the latest information on this spill case asap.- II 8/24/05- Warren & Tanzer is no more involved on the project. NE Envtl. submitted a Tank Closure Report dt. Aug. 22/05. Four gasoline USTs were removed from the site and exceedances of some VOC levels were observed in two soil samples from the west and north wall of the tank grave. A site visit was made today and met Joe of NE Envtl. and the owner at the property. Today mailed a letter requiring three soil borings and both soil and GW samplings. The Investigation Summary report is due by the end of Sept./05. Also, requested for a copy of the phase II investigation report for the site. -II 9/30/05- Received and reviewed the Phase II investigation report for the site, as wanted. It reveals that soil at a depth of 6'to 10'bgs (boring B-1 & B-2)at the location of the historical gas station has impacted with VOCs. Awaiting the results of the additional soil and GW investigation as outlined above.- II 11/28/05- Reviewed the SIR dt. Sept. 8/05 submitted by NE Envtl. The data and the report reveal that both soil and GW at the site particularly at the north-northwestern area adjacent to the Jerome Avenue side have been impacted (soil-TVOC approx 100,000 ppb: GW- TVOC 131 ppb). Wrote a letter to consultant cc'd to RP to delineate the contamination completely with installation of 3 monitoring wells, establish GW flow direction and a pragmatic RAP including monitoring plan. - II 02/03/06: This spill transferred from Imdad to Q.Abidi. Reviewed rpt dt. Jan.10,2006. At least Warren & Panzer has to take one sample at groundwater interface plus any other contamination, soil samples at the interval of highest contamination based on PID screening. To remove VOC from groundwater by utilizing in-situ methods such as soil vapor extraction. This is for soil samples not for groundwater samples.- QA 02/22/06: Sent E-mail to Warren & Panzer, the body of which is seen below: The work

Map ID	Site	Database(s)	EPA ID Number

FORMER GAS STATION (Continued) **S106868506**

plan you sent states that a soil sample will only be collected from the most contaminated interval during well installation. This is contrary to the Department's usual soil sampling protocol, which requires that a sample be collected from the interval with the greatest indications of contamination, and that another sample be collected at the water table. If no field indications of contamination are encountered, then a sample should be collected at the water table. Also, the plan says that VOCs will be removed from groundwater by utilizing in situ methods such as soil vapor extraction , however, this approach does not remove VOCs from groundwater. This should be clarified. The work plan is not approved. Please revise and re-submit the plan. - QA 04/17/06: Discussed with Mr. Chat Bijoor of Warren & Panzer need for delineation by additional wells. Warren & Panzer will submit plan for installation of additional wells in two weeks. - QA 04/26/06: On date 04/25/06 during conversation on phone with Mr. Chet Bijoor phone #(212)922-0077, Jon Kolleeny instructed that they install 2 permanent monitoring wells. Wells should be surveyed to find out groundwater flow direction, and Warren & Panzer should be ready to install addt'l wells if necessary; soil sampling will be done during well install'n. - QA 4/28/06 - JK: Emailed and mailed Sidewalk Permit Letter to Chet Bijoor of Warren & Panzer, to help them obtain NYCDOT approval to install 1 on-site and 1 off-site well in sidewalks in front of and across from the site. - J. Kolleeny 5/08/06: JK and QA visited site to observe installation of wells. First well (MW-4) in sidewalk along Jerome Ave, south of MW-3, had high soil contam, PID up to 1500 ppm; depth to water about 12 feet. Next drilling location also had high soil contam at GW interface, so they moved further down sidewalk to south, put in well MW-6 and found only slight contam (~6 ppm on PID) at water table. Also put in well across the street (MW-5), to west-southwest of MW-4, soil appeared to be clean. - J. Kolleeny 6/6/06: Received email from Chet Bijoor of Warren & Panzer with attached preliminary soil & GW results of additional site investigation. Results show soil contamination in MW-4 and TW-1 (to south of MW-4); serious GW contam. in MW-3 & MW-4, moderate in MW-2 and TW-1, wells MW-5 and MW-6 had minor exceedances for xylenes (both) and ethylbenzene (MW-5); MW-1 and MW-7 (to east and southeast of tank pit, resp.) were non-detect. GW flow direction is to southwest, curving more southward down Jerome Ave. with distance. - J. Kolleeny 6/8/06: This spill case transferred from Q. Abidi to J. Kolleeny. Spoke with Chet Bijoor of W&P, discussed incorporating remedial system in planned building design. He wants to do SVE and avoid having to discharge water, I suggested DPE, and also noted that MW-7 was not put in near boring IG as I requested, to delineate free product detected in MW-3. I suggested doing an SVE pilot test to see concentrations of vapors recovered to see what kind of treatment is needed, and determine radius of influence; Chet suggested they could put in well by boring IG as part of pilot test. I also told him to submit a formal rpt summarizing investigation results and recommending remedial action, and put together a draft Remedial Action Plan. - JK 07/25/06: Reviewed Supplemental Phase II Site Investigation Report dated June 29, 2006, submitted by Warrent & Panzer and received July 5th. Report concludes there is serious soil and groundwater contamination on site, with groundwater plume extending off-site to south-southwest along Jerome Ave. (Smear zone of soil contamination at water table accompanies plume.) Report recommends performing a pilot study to evaluate suitable remedial technologies at site. Also reviewed Proposal for

Map ID	Site	Database(s)	EPA ID Number

FORMER GAS STATION (Continued) **S106868506**

Conducting Pilot Study to Select a Remedial System to Address Contaminant Plume at... also dated June 29th and received July 5th. Proposal involves using a mobile Enhanced Fluid Recovery (EFR) system, utilizing an internal combustion engine followed by catalytic converter to burn off and polish recovered vapors. A new 4 well will be installed in area of severe soil contamination at boring IG, which I requested earlier, and vacuum will be applied and measured in nearby monitoring wells. Spoke with Chet Bijoor of W&P, who says they hope to use this mobile unit to perform a number of EFR events as an interim measure to bring down high contaminant levels, so that if later a groundwater recovery system must be installed, groundwater may not need much treatment to meet DEP sewer discharge requirements. I told Chet that proposal needs more details and a diagram. Met with Chet on Monday July 24, 2006, to discuss this. I asked that pilot test plan include greater detail about duration of test, wells that will be involved, and sampling of untreated recovered vapors and extracted groundwater, and that a diagram be added to show where new well will be installed and which monitoring wells will be involved in pilot test. I sent Chet an email on 7/25/06 asking for electronic version of Supp. Phase II, and of Pilot Study proposal once requested revisions are made. - J. Kolleeny 07/27/06: Received revised Pilot Study Work Plan from Chet Bijoor of W&P on 7/26/07, with more details about the pilot test, collection of vapor influent sample for TO-15 analysis, revised diagram showing new well location to be installed at boring IG, and supplemental information about the mobile EFR unit, as I had requested. Also received electronic version of W&P's Supplemental Phase II Site Investigation report (now dated July 24, 2006). Issued an approval letter for the pilot study work plan to the RP, Frank DeLeonardis, by regular mail (he apparently doesnt have email), and copied Chet Bijoor of W&P by email. - J. Kolleeny 08/15/06: DEC staff (Qasim Abidi and Stephen Kraszewski) visited site to observe installation of 4-inch pilot test well, for use with mobile EFR unit. During well installation, soil with PID readings up to 220 ppm was encountered. Groundwater from the well will be sampled prior to performing the pilot test. - J. Kolleeny 02/02/07: Reviewed Pilot Study Rpt by Warren & Panzer, dated Oct. 19, 2006. Rpt presents results of mobile EFR unit pilot test, noting that groundwater samples collected after test did not show any noticeable reduction in dissolved-phase contaminant levels. W&P therefore proposed additional excavation of petroleum-contaminated soil and installation of groundwater recovery and treatment system consisting of 3 extraction wells and a GAC unit to treat recovered GW; treated water would be discharged to NYC sewer system. Spoke with Chet Bijoor of W&P about plan, he said RP wants to combine remedial action (soil excavation & system installation) with site development, as he plans to construct a building that might be used as a school. I recommended installation of vapor barrier (Chet said they already planned on that) and sub-slab depressurization system (Chet said he would check with RP and architect). I said remedial plan seemed reasonable, but that a full round of groundwater samples should be collected from all on- and off-site wells to confirm that groundwater conditions are consistent with remedial design, before final approval of plan. I sent an email to that effect on 2/2/07, and asked for electronic version of Pilot Study Rpt. - J. Kolleeny 03/01/07: Received phone call from Bryan Shaw of Warren & Panzer, said he will forward my email request for round of GW sampling to site owner and get moving on that, and asked if I needed an electronic version of Pilot Study

Map ID	Site	Database(s)	EPA ID Number

FORMER GAS STATION (Continued) **S106868506**

Report. I said yes, he sent report by email (in eDocs). He said there was some delay in project caused by construction contractor backing out, since system installation will be coordinated with site development. - J. Kolleeny 03/07/07: Spoke with Chet Bijoor of Warren & Panzer who said he felt another round of GW sampling was not warranted, as data were less than a year old. In support, he emailed me table with comprehensive GW data showing most wells were last sampled in Sept. '06 (in eDocs). He also said there was no plan for sub-slab depressurization system. I said considering well MW-8 had significant amount of benzene (140 ppb) when last sampled and planned use of site is as school, I'm not comfortable with just building over that area and having no way to monitor GW contamination which may pose vapor intrusion concern. He argued that contaminated soil would be excavated down to water table in that area, and extraction wells in sidewalk would be capturing contaminated GW from that area. I said I would have to think about it and continue reviewing data. - J. Kolleeny 06/22/07: Received phone call on 6/20/07 from Jill Haimson of Preferred Environmental, who has taken over project from Warren & Panzer. She said owner has agreed to install a sub-slab depressurization system as I had suggested, and in light of that she requested holding off on additional groundwater monitoring until after remediation is performed. She sent an email to that effect: As per our conversation, this email notifies you that property owner Frank DeLeonardis has retained Preferred Environmental Services (Preferred) and P.W. Grosser Consulting Engineers (PWG) to finalize remedial approach for above spill, in addition to providing oversight of redevelopment activities. We are continuing work flow previously proposed by Warren & Panzer Engineers (WPE). As per requirements set forth in most recent telephone correspondence between NYSDEC and WPE, property owner has agreed to install an active sub slab depressurization system (SSDS) in addition to a vapor barrier. PWG has been contracted to design system and is currently coordinating with project architect. We anticipate a 3-4 week turnaround on design of system for submittal for NYSDEC/NYSDOH review. We respectfully request that any additional site or groundwater monitoring be performed after remedial efforts and will reinstall any damaged monitoring wells at that time. As we further discussed, PWG will be performing a limited technical review of previously proposed groundwater remediation plan (by WPE) to evaluate effectiveness of this technology. If changes need to be made, we will resubmit a remedial approach for NYSDEC consideration. Either way, extraction wells were to be placed exterior to building footprint, so construction will not diminish ability to proceed with any groundwater treatment that may be required. At your suggestion, we will evaluate effectiveness of direct in-situ groundwater treatment via chemical oxidation or some other means of enhancing biodegradation of residual petroleum in groundwater at time of open excavation. In summary, in consideration of above, we respectfully request that NYSDEC provide us with an update as to what aspects of Remedial Action Plan (e.g., soil removal, etc.) can be approved for immediate implementation. Contractor has building permit and is anxious to get started. On 6/22/07, I emailed reply: Regarding request to hold off on addt'l GW monitoring until after remedial actions: Although it's standard to collect round of samples prior to remediation to serve as baseline, in recognition of fact that property owner is willing to install active sub-slab depressurization system as DEC had requested, I'm willing to waive requirement for

Map ID	Site	Database(s)	EPA ID Number

FORMER GAS STATION (Continued) **S106868506**

pre-remediation baseline GW sampling. As for which aspects of remedial plan can be approved at this point, I would rather not approve remedial plan in piecemeal fashion, with portions of one consultant's recommendations and portions of another consultant's proposals. I suggest that once Preferred and PWG have completed their technical review of Warren & Panzer's remedial plan and their evaluation of my suggestions regarding combining in-situ chemical oxidation or similar treatment with planned soil excavation, a comprehensive Remedial Action Plan should be prepared and submitted which states clearly what you are proposing for site, in considerable detail and with various contingencies spelled out. In other words, RAP should state dimensions of area that will be excavated, whether or not dewatering will be performed, and if you are proposing chemical oxidation or ORC, what quantities of substances will be applied to excavation. RAP should explain which wells will be monitored after excavation/redevelopment are complete and for which parameters, whether or not you anticipate having to replace certain wells or install addt'l wells to adequately monitor on- and off-site GW impacts and remedial progress, whether or not you are proposing to install and operate a GW extraction & treatment system as W&P had suggested, or what conditions would warrant install'n of such a system, with details of system design and layout, discharges from system, etc. Please let me know if this approach seems reasonable to you, or if you have any questions about anything I've written. - J. Kolleeny 6/25/07: Jill Haimson replied to my 6/22/07 email: I will approach client regarding preparation of comprehensive Remedial Action Plan with all required details, subsequent to our review of prior proposed measures. In interim, as we discussed, we are going to proceed with preparatory work including installation of appropriate fencing and removal of former concrete slabs at Lots 10, 8 and 6. As we discussed, only Lot 14 had a prior suspect use (former gasoline station). A geophysical survey has been performed (by others) across entire property and no suspect features (e.g., buried tanks) were identified at Lots 10, 8 and 6. As agreed, we will have contractor stop work if any suspect conditions are encountered and we will respond immediately to ascertain site conditions and whether a spill is present. I will keep you informed as to our progress as well as a schedule for submittals. - JK 7/10/07: On 7/6/07, received update email from Jill Haimson of Preferred Envt'l: (1) Client has agreed to and we are in process of preparation of comprehensive Remedial Action Plan (RAP) as you requested with all required details, subsequent our review of prior proposed measures. In interim, as we discussed, general contractor (GC) has proceeded with preparatory work which included installation of appropriate fencing and removal of former concrete slabs at Lots 10, 8 and 6. (2) There has been a lot of dumping on portion of property that had been formerly excavated on Lot 14; there's a sizeable hole, with groundwater at bottom. As mentioned, waste oil containers, tar, etc. and other garbage has been thrown on site, there are impacts to groundwater and property owner has been cited by sanitation department. While we are preparing detailed RAP, we ask permission to preferentially address removal of garbage in hole and pump out of any residual petroleum on groundwater. Waste material will be drummed or otherwise properly containerized and manifested for off-site disposal, and a Part 364 licensed vacuum truck will be used to remove and transport waste oil/mixed groundwater to an appropriate disposal/treatment facility. Any contaminated soil generated will be containerized or stockpiled

Map ID	Site	Database(s)	EPA ID Number

FORMER GAS STATION (Continued) **S106868506**

(under plastic and covered) for later appropriate off-site transport and disposal. Preferred will provide oversight of these activities and will provide you with a description of activities, photographic log and manifests. Please advise us at your earliest opportunity. On 7/10/07, I sent email reply: Your proposal to remove refuse (petroleum-contaminated and otherwise) and pump out standing water with residual petroleum from open excavation at site as interim remedial measures is approved. All petroleum-contaminated materials should be properly disposed of and documented. I understand that a comprehensive remedial plan to address on- and off-site subsurface petroleum contamination is currently being developed and will be submitted to DEC in near future. - J. Kolleeny 08/01/07: On 7/27/07, received electronic copy and on 7/31/07, received hard copy of Remedial Action Work Plan dated July 2007 prepared by Preferred Environmental Svcs. of Merrick NY (in eDocs). Will review. - J. Kolleeny 08/03/2007: This spill case was transferred to A Doronova. - AD 08/08/2007: Reviewed RAP dated July 2007 submitted by Preferred Env. Services. It proposes remedial excavation of contaminated soil during redevelopment of the site followed by collection of end-point soil samples, and application of chemical oxygent (REGEN-OX) during the remedial excavation. In addition, a vapor barrier and sub-slab venting system will be installed beneath the planned on-site building to prevent intrusion of any residual petroleum vapors. The work plan also proposes longer-term groundwater treatment by introduction of oxygen via diffusion probes, if necessary, based on groundwater monitoring data. The plan proposes to excavate cont. soil to the smear zone, where groundwater will be encountered, but it does not say if groundwater grab sample will be collected for sure, instead of bottom end-point soil samples in such case. Also, proposal of REGEN-OX application provides general information only and is not site specific. Post remedial site monitoring proposes only two follow-up monitoring rounds. AD 08/09/2007: Spoke to Ms. Haimson of PES regarding groundwater grab samples and Regen-Ox application. She promised to collect GW grab sample if GW will be encountered and said that she will submit additional documentation on Regen-Ox application prior to its implementing. AD 08/13/2007: Sent letter to Mr. DeLeonardis (site owner)approving RAP with following requests: - to submit additional documentation to clarify how the chemical oxidant will be applied to the smear zone prior to its implementation; - if end-point soil samples cannot be collected from the bottom of the excavation, then a groundwater grab sample should be collected instead; - post-remedial groundwater monitoring should be performed and reported quarterly for at least one year, based on results. (copied this letter to J. Kolleeny - DEC; J. Haimson - PES; file). AD 09/06/2007: Received an email from Jill Haimson. They plan to start excavation and stockpiling the soil on September 12, 2007. She will call back with exact date. AD 09/12/2007: After ongoing phone correspondence with Jill Haimson regarding the site visit, scheduled it for September 14, 2007. AD 09/14/2007: Visited the site together with Jon Kolleeny. We arrived at the site at 10:10 AM. Jill Haimson was at the site. They already started excavation the day before, on September 12, 2007. Strong gasoline odor was present around excavation area. PID readings were ranged from ND to 389 ppm in the vicinity of MW-02. Asked consultant if they had any complains regarding odors. No groundwater was encountered during excavation, although they were expecting to hit it at 9-10 feet bgs. They started to deepen the pit close to MW-03 in order to encounter GW to collect

Map ID	Site	Database(s)	EPA ID Number

FORMER GAS STATION (Continued) **S106868506**

GW grab sample. It was successful. J. Haimson collected the GW grab samples. She told us, that next week they will collect end-point samples and then apply RegenOx to the excavation pit. AD 09/19/2007: Visited the site to observe collection of end-point soil samples and groundwater sampling. Ms. Haimsom told me, that they encountered contaminated soil deeper than was expected. PES were digging test pits 15-20 feet bgs. PID readings from test pits range till 645 ppm. No GW was encountered in these test pits. Very strong odor around excavation pit. PES is planning to excavate deeper to remove contaminated soil. Because final depth of the excavation was not decided yet, only sidewall soil samples were collected during my visit. Due to discovered deeper contamination, application of RegenOx is postponed. Jill Haimson will contact me when they will be ready to apply oxidant. AD 10/03/2007: DEC was contacted by the Fire Department, who was on-site responding to vapor complaints from tenants of a nearby apartment building. J. Kolleeny and I went to the site and instructed the consultant to stop work, cover the contaminated soil pile with plastic sheeting, and apply clean soil over the exposed contaminated soil and groundwater in the excavation. We also asked the consultant to monitor indoor air at various locations in the apartment building with a PID and submit a reading log to DEC. AD 10/05/2007: Received an email from David Khan(project geologist) stating that they resumed excavation work at the site, using a foam-dispensing truck to suppress vapors. The excavation work was completed without further odor complaints from neighbors, and PID monitoring inside the apartment building did not detect any VOCs. AD 10/09/2007: Received a call from David Khan of PES. He asked for permission to backfill excavation pit. All required end point soil samples were collected, chemical oxidant was applied to the excavation. Asked him to take pictures of excavation pit prior to backfill. Spoke with J. Kolleeny and approved backfilling of the excavation. AD 01/09/2008: Called and left a message for J. Haimson regarding submission of summary rpt. AD 02/19/2008: Received summary report for the site. Will review. AD 03/04/2008: Reviewed the report. An area of approx. 50’ wide and by 70’ lond and 14’ deep was excavated. 1,136 tons of non-hazardous petroleum impacted soils were removed from the site to the regulated facility. 15 end-point soil samples were collected along the excavation perimeter and bottom. Analytical soil data indicated elevated levels of contamination in samples collected from 2N, 3Nw and 4W, ranging from 94,265 ppb to 1,098,489 ppb. One groundwater grab sample was collected from the bottom of the excavation pit with TVOCs - 103,668 ppb. Regen-Ox was applied within the excavation in to the smear zone. Follow up groundwater monitoring conducted on November 15, 2007 indicated small decrease in VOC concentrations. MW-2 decrease from 76ppb TVOCs to 22ppb; MW-4 from 7936ppb TVOCs to 7833ppb. As groundwater impacts still present, the consultant plans to perform approved long-term treatment of groundwater via installation of two infusion probes which will be implemented at a later stage of site construction. AD 05/09/2008: Received an email from Jill Haimson of PES. She plans to install the ISOC groundwater treatment at the locations that were approved by DEC. Ms Haimson wanted to confirm the wells locations (see Figure 4). AD 05/14/2008: Spoke with Ms. Haimson of PES. Requested relocation of one of the two ISOC well from Jerome Avenue to 179th Street. PES will submitt a revised site plan. AD 05/15/2008: Received revised site diagram with a new location for MW-7 (infusion well). Three new wells will be installed: two groundwater monitoring

Map ID	Site	Database(s)	EPA ID Number

FORMER GAS STATION (Continued) **S106868506**

wells and one infusion well. Second inffusion probe will be installed into existing monitoring well MW-4. Installation scheduled for May 20-21, 2008. AD 05/16/2008: Send an email with an approval of the proposed supplemental groundwater treatment. AD 11/04/2008: Called and spoke with D. Khan of PES. Asked him about summary report submission. he promised to submit it till the end of next week. AD 12/03/2008: Spoke with Ms. Haimson of Preferred. Requested to submit a post-remediation summary report. AD 12/04/2008: received an email from J. Haimson saying: The next round of sampling is projected to be the first week of January 2009. Please acknowledge receipt of these documents. Jill S. Haimson, CGWP, PG Principal TEL: 516-546-1100, x32; CELL: 516-647-4211 PREFERRED ENVIRONMENTAL SERVICES Attached to the email were July 2008 Monitoring Report and October 2008 Sampling Report. DL the reports to eDocs. Will review. AD 02/18/2009: Reviewed the report. Several gasoline related VOCs were detected in the groundwater samples collected in the October 2008 quarterly sampling event. The highest concentration of total VOCs were detected in MW-4 (17,136 ug/L) and MW-8 (1,676.1 ug/L). MW-7, located upgradient along East 179th Street and containing one ISOC probe, had a concentration of total VOCs of 64.7 ug/L. MW-5 and MW-6 had the lowest concentration of detected total VOCs with 60.7 ug/L and ND respectively. In comparison with the July 2008 quarterly sampling data, a general decrease in overall total VOCs was seen. MW-5 through MW-8 saw a decrease in total VOCs from the July 2008 sampling event. MW-7 decreased in total VOCs from 858.8 ug/l in July 2008 to 64.7 ug/L in October 2007 and MW-8 decreased in total VOCs from 4,283.9 ug/L in July 2008 to 1,676.1 ug/L in October 2008. MW-2 through MW-4 saw increases in total VOCs from the July 2008 sampling event, of which MW-4 had the greatest increase from 12,350 ug/L in July 2008 to 17,136 ug/L in October 2008. MTBE was detected in 5 wells. Elevated MTBE was detected at wells: MW-2(13ug/L), MW-7(16ug/L) and MW-8(49ug/L). MTBE was not detected in wells MW-4 and MW-6. As compared with the July 2008 sampling event, increases in MTBE were seen in MW-2, and MW-8 at downgradient locations from the subject property. Decreases in MTBE concentrations were observed within wells MW-3, MW-6, MW-7 at an upgradient location, and MW-5 which is located across Jerome Avenue and downgradient. MTBE in MW-4 remained ND since the September 2007 sampling event. Based on the October 2008 sampling data, Preferred offers the following conclusions: " Groundwater at the subject property remains impacted with gasoline-related VOCs at concentrations exceeding applicable NYSDEC Class GA SGVs. " Off-site groundwater impacts are present within MW-5; " MTBE concentrations have decreased at locations MW-3, MW-5, MW-6 and MW-7 while remaining non detect at MW-4; and " A decrease in concentrations of gasoline related constituents was noted in wells downgradient of the ISOC units as compared to post Regen-Ox sampling events. Elevated D.O. Readings in MW-7 and MW-8 indicate that the ISOC Probes are successfully treating groundwater impacts at the property. Preferred will continue monthly maintenance activities on the ISOC probes and quarterly sampling to evaluate the continued effectiveness of the on-site groundwater treatment. The next quarterly sampling event was scheduled for January 6 of 2009. AD 05/18/2009: Called and spoke with Bill of Preferred. requested to submit hard copy and pdf copy of the 1st quarter 2009 monitoring report. He will send them out today. Later received an e-mail saying: Ainura: Attached is the February 2009 Quarterly sampling report for Spill No. 05-01131 for your review and comment. A hard copy is in the mail. Please respond to this

Map ID	Site	Database(s)	EPA ID Number

FORMER GAS STATION (Continued) **S106868506**

e-mail so that I can be sure that you have received this transmission. Thank You, Bill William J. Schlageter Project Manager/Senior Hydrogeologist PREFERRED ENVIRONMENTAL SERVICES DL pdf copy to eDocs. Will review. AD 06/03/2009: Received an e-mail from Bill saying: Ainura: Due to construction activities (i.e., brick facing of the building with mounds of bricks staged atop of wells and the hazards of falling bricks during construction in the area of the on-site wells) we are requesting permission to delay the quarterly sampling event at the above-referenced property until the week of June 15, 2009. Thank You for your consideration, Bill Sent an e-mail approving sampling delay. AD 07/02/2009: Reviewed report. Report states that: on February 6, 2009 seven wells were gauged and groundwater samples from each well (MW-2 through MW-8) were collected and submitted for laboratory analysis for VOCs by EPA Method 8021. The highest concentration of total VOCs were detected in MW-4 (17,828 micrograms per liter [ug/L]) and MW-8 (11,441 ug/L). MW-7, located upgradient along East 179th Street and containing one ISOC probe, had a concentration of total VOCs of 63.4 ug/L. MW-6 had the lowest concentration of detected total VOCs with 33.9 ug/L. In comparison with the October 2008 quarterly sampling data, a general increase in overall total VOCs was seen. MW-2, MW-3 and MW-7 saw a decrease in total VOCs from the October 2008 sampling. MW-4, MW-5 and MW-7 saw only slight increases in total VOCs from the October 2008 sampling event. MW-8 saw the greatest increase in total VOCs from 1,676 ug/l in October 2008 to 11,441 ug/l in February 2009. MW-8 will be monitored closely during the next sampling event. In addition to gasoline related VOCs, the fuel oxygenate Methyl Tert-butyl Ether (MTBE) was detected in all groundwater monitoring wells. MTBE was detected over SGVs at locations MW-2 (16 ug/L),MW-4 (17 ug/l),MW-5 (21 ug/l), MW-7 (11 ug/l) and MW-8 (98ug/l).The concentration of MTBE detected at locations MW-3 (9.3 ug/L) and MW-6 (8.7 ug/L) was below its class GA SGVs. As compared with the October 2008 sampling event, increases in MTBE were seen in MW-2 through MW-6 and MW-8 at downgradient locations from the subject property. A decrease in MTBE concentration was observed within well MW-7 at upgradient location. Based upon the results of the February 2009 quarterly sampling event, Preferred concludes the following: " Groundwater at the subject property remains impacted with gasoline-related VOCs at concentrations exceeding applicable NYSDEC Class GA SGVs. " Off-site groundwater impacts are present within MW-5; " MTBE concentrations have increased at locations MW-2 through MW-6 and MW-8 and decreased at locations MW-7; " With the replacement of the oxygen canisters for the ISOC units, along with continued monthly maintenance visits, ISOC units will continue to treat impacted areas of groundwater. Based upon the above, Preferred will continue to conduct monthly maintenance activities on the ISOC probes and as required by the NYSDEC-approved RAP will conduct quarterly sampling events to evaluate the continued effectiveness of the on-site groundwater treatment. The next quarterly sampling event is scheduled for May of 2009. AD 11/09/2009: Received a June 2009 Quarterly Sampling Report. Will review. AD 12/16/2009: Reviewed the report. The report states that: on June 30, 2009 seven wells were gauged and groundwater samples from each well (MW-2 through MW-8) were collected and submitted for laboratory analysis for VOCs. The highest concentration of total VOCs were detected in MW-4 (10,226[ug/L]) and MW-8 (1,184ug/L), both of which had a significant decline in total VOCs from February 2009 sampling. MW-7, located upgradient along East

Map ID	Site	Database(s)	EPA ID Number

FORMER GAS STATION (Continued) **S106868506**

179th Street and containing one ISOC probe, had a concentration of total VOCs of 43.2 ug/L. MW-6 had slight increase from 33.9 ug/L (February'09) to 169.7 ug/L. In comparison with the February 2009 quarterly sampling data, a general increase in overall total VOCs was seen. MW-4, MW-5, MW-7 and MW-8 saw a decrease in total VOCs from the February 2009 sampling. MW-2, MW-5 and MW-6 saw only slight increases in total VOCs from the February 2009 event. In addition to gasoline related VOCs, MTBE was detected in all groundwater monitoring wells. MTBE concentration over SGVs was detected in wells: MW-2(30ug/L), MW-5(26ug/l), and MW-8(13ug/l).The concentration of MTBE detected at other wells was below its class GA SGVs. Based upon the results of the June 2009 quarterly sampling event, Preferred concludes the following: " Groundwater at the subject property remains impacted with gasoline-related VOCs at concentrations exceeding applicable NYSDEC Class GA SGVs. " Minor off-site groundwater impacts are present within MW-5; " Concentrations of VOCs in GW at the property are decreasing; " With the replacement of the oxygen canisters for the ISOC units, along with continued monthly maintenance visits, ISOC units will continue to treat impacted areas of groundwater. Based on the above, Preferred will continue to conduct monthly maintenance activities on the ISOC probes and will conduct quarterly sampling events to evaluate the continued effectiveness of the on-site groundwater treatment. The next quarterly sampling event was scheduled for November 2009. To request a pdf copy of the report. AD 02/24/2010: Received an e-mail from B. Shlageter of Preferred: Ainura: Attached is the quarterly sampling report for the 1990 Jerome Avenue, Bronx property for your review and comment. Please note that weather permitting we are scheduled to conduct the next quarterly sampling this week, but may have to push it to the first week of march. Please feel free to contact me with any questions or concerns. Regards, William J. Schlageter DL the report to eDocs. Will review. AD 04/20/2010: Reviewed the report. The report states that: on November 6, 2009, Preferred conducted quarterly sampling activities. No free product was detected in any of the seven groundwater monitoring wells. Depth to water across the subject property was measured at depths between 8.93 ft and 11.88 ft bgs on-site. Groundwater in the off-site monitoring well (MW-5), located across Jerome Avenue was measured at a depth of 9.44 ft bg which is an increase in depth from the June 2009 sampling event which was measured at 9.22 ft. bg. The highest concentration of total VOCs was detected in MW-4 (23,033 micrograms per liter [ug/L]) and MW-8 (8,684.6 ug/L), both of which had an increase in total VOCs from the June of 2009 quarterly sampling. MW-7, located upgradient along East 179th Street and containing one of the ISOC probes, had a concentration of total VOCs of 70.05 ug/L. Total VOCs increased in samples collected from wells MW-2, MW-4,MW-7 and MW-8 from the June 2009 quarterly sampling event with an increase in TVOC concentrations in MW-4 (10,226.9 ug/l in June 2009 to 23,033 ug/l in November 2009) and MW-8 (1,184.7 ug/L in June 2009 to 8,684.6 ug/L in November 2009. TVOCs decreased in samples collected from MW-3, MW-5 and MW-6. The next quarterly sampling event is scheduled for February of 2010. AD 11/04/2010: Received a pdf copy of the March 2010 Sampling. DL to eDocs. Will review. AD 12/08/2010: Reviewed the report. The report states that: on March 2, 2010, Preferred conducted quarterly sampling activities. No free product was detected in any of the seven groundwater monitoring wells. Depth to water across the subject property was measured at depths between 8.69 ft and 12.17 ft bgs

Map ID	Site	Database(s)	EPA ID Number

FORMER GAS STATION (Continued) **S106868506**

on-site. Groundwater at the off-site monitoring well (MW-5), located across Jerome Avenue was measured at a depth of 9.19 ft bg which is an slight decrease in depth from the November 2009 sampling event which was measured at 9.44 ft. bg. The highest concentration of TVOCs was detected in MW-4 (16,720 ug/L) and MW-8 (3,669 ug/L), both of which had a notable decrease in TVOCs from the November of 2009 quarterly sampling. MW-7, located upgradient along East 179th Street and containing one of the ISOC probes, had a concentration of TVOCs of 23.20 ug/L. The March 2010 quarterly sampling as compared to the prior sampling event (November 2009) showed the TVOCs decreased in samples collected from wells MW-4 (23,033 ug/L in November 2009 to 16,720 ug/L in March 2010), MW-7 (70.05 ug/L in November 2009 to 23.20 ug/L in March 2010) and MW-8 (8,684.6 ug/L in November 2009 to 3,669 ug/L in March) however, TVOCs concentrations increased in MW-2 (157.2 ug/l in November 2009 to 1,420.5 ug/l in March 2010), MW-3 (26.9 ug/L in November 2009 to 31.62 ug/L in March 2010), MW-5 (ND in November 2009 to 27.01 ug/L in March 2010) and MW-6 (ND in November 2009 to 7.6 ug/L in March 2010). The gasoline additive MTBE was detected in all seven samples collected on March 2010. MTBE was detected at concentrations slightly exceeding its SGV of 10 ug/L at locations MW-2 (42 ug/L), MW-3 (11 ug/L), and MW-8 (40 ug/L). The concentration of MTBE detected at locations MW-4 (1.0 ug/L), MW-5 (10 ug/L), MW-6 (7.6 ug/L) and MW-7 (5.9 ug/L) were slightly below its SGV. Preferred will continue to conduct monthly maintenance activities on the ISOC probes and will conduct quarterly sampling events to evaluate the continued effectiveness of the on-site groundwater treatment. AD 03/02/2011: Received a call from Louis Bascelli of Eastern Environmental Solutions (EES)(631-727-2700). He said that his company was hired by the site owner to perform the site remediation. He asked if he can submit a work plan. Required Mr. Bascelli to verify his company contract with RP, before submitting the plan. AD 03/29/2011: Received a pdf copy of the Remedial Investigation Work Plan. Will review. AD 04/19/2011: Reviewed the work plan. It proposes three rounds of RegenOx injections via existing monitoring wells: MW-2, MW-3, MW-4 and MW-6. baseline GW sampling will be conducted prior injections. AD 04/21/2011: Called and spoke with Louis Bascelli of EES. Asked him to check conditions of wells MW-07 and MW-08. Required to revise WP by eliminating most contaminated well MW-04 from RegenOx application in order to monitor effectiveness of the injections. Suggested to use MW-08 instead, since it is upgradient of well MW-04. Also, suggested to leave well MW-06 out of injection ring, since the well consistently had ND results for TVOCs. Revised WP will be submitted shortly. AD 05/13/2011: Received a RAWP from Louis Bascelli of EES. Will review. AD 06/02/11 [JK for AD]: After receiving a Remedial Investigation Work Plan from Eastern Envt'l Svcs and requesting revisions, received revised RIWP on 5/19/11. RIWP (in eDocs) proposes injection of RegenOx via 4 temporary injection points to address residual GW contamination, plus install'n of addt'l monitoring well across Jerome Ave., near corner of East Tremont St., as requested by DEC, for better delineation and monitoring of plume. A baseline round of GW sampling for petroleum-related VOCs and parameters related to RegenOx effectiveness monitoring will be conducted prior to injections, and follow-up GW sampling will be performed 6 weeks after injections. A summary rpt with recommendations for further actions as appropriate will be submitted to DEC. I sent letter (in eDocs) to Frank DeLeonardis (RP), cc to Lou Bascelli of Eastern, approving plan, but

Map ID	Site	Database(s)	EPA ID Number

FORMER GAS STATION (Continued) **S106868506**

stating that after follow-up GW sampling event, quarterly GW monitoring should be instituted unless otherwise approved by DEC. - JK 08/01/2011: received an e-mail from Mr. Bascelli saying: Good Morning Ms. Doronova, We are planning to begin the first round of Regenox injections tomorrow if this is acceptable. Plase let me know your thoughts. Thank you. Louis J. Bascelli 10/19/2011: Called ans spoke with Mr. Bascelli of EEA regarding site status update. He will send a brief summary via e-mail. 11/30/2011: Called and spoke with Mr. Bascelli of EEA. Required to submit the remedial report. He will do it tomorrow. AD 12/2011: Did not receive the report. AD 01/17/2012: Sent an e-mail to L. Bascelli with a request to submit the report by January 31, 2012. AD 01/20/2012: Received the required report. DL the report to eDocs. Will review. AD 03/07/2012: Reviewed the report. The report states that newly installed MW#9 was advanced as a southerly placed interceptor point. Prior to the injection of the chemical oxidant, a baseline round of sampling was performed to identify the groundwater quality conditions and volatile organic compound concentrations inclusive of MTBE at the site. Analytical reports from the initial sample collection round of July 11, 2011 are included with this report. Injections of RegenOx"! oxidizer into the temporary injection points took place on August 4, September 1 and September 23, 2011. The injection technique utilized a direct push unit placed over each injection point. Comparison of the pre-injection analytical groundwater condition from the four (4) monitoring wells (MW#3, MW#4, MW#5 and MW#9) collected on July 11, 2011 with the first round collected January 4, 2012 indicates a decrease in the concentration of contaminants (from 9,828ppb in MW-4 to 939ppb) identified during the baseline sampling prior to the introduction of the chemical oxidant. Review of the analytical data from the most recent sampling event indicates a decrease in the concentration of contaminants identified during the baseline sampling prior to the introduction of the chemical oxidant, therefore, based on the recent data, the injections appear to have been effective. The next quarterly sampling rounds are scheduled for April, July and October of 2012, after which time all laboratory data for the project will be received and reviewed. A report summarizing the activities with the supporting subsurface investigation data for this project will be generated and submitted to the NYSDEC. AD 07/12/2012: Did not receive April 2012 monitoring report yet. Called and spoke with Mr. Bascelli regarding the report submission. He promised to submit it shortly. Also, inquired Mr. Bascelli regarding building use in the present time. He will submit this info as well. later in the day received analytical data for the GW sampling performed at the site on April 3, 2012. Complete report was not submitted. Received an e-mail from Mr. Bascelli, in which he confirmed that the building is vacant. The submitted data indicate that most contaminated well is MW-3 with TVOCs - 1,165ppb. To request complete report. AD 01/29/2013: Received an e-mail from L. Barscelli with an attached report. DL the report to eDocs. Will review. AD 02/14/2013: Reviewed the report. The report states that collections of groundwater samples from the site-related monitoring wells were accomplished on a quarterly basis which commenced following the last oxygenate injection for the year 2012. GW samples were collected from four wells on the following dates: 1/4/12, 4/3/12, 9/13/12 and 12/27/12. Laboratory data for all rounds of groundwater sampling is missing in the report. Comparison of the pre-injection analytical groundwater condition from the four monitoring wells (MW#3, MW#4, MW#5 and MW#9) collected during each

Map ID	Site	Database(s)	EPA ID Number

FORMER GAS STATION (Continued) **S106868506**

synoptic round indicates a decrease in the concentration of contaminants identified during the baseline sampling prior to the introduction of the chemical oxidant. Sent an e-mail to Mr. Bascelli with a request to submit missing labdata. AD 02/28/2013: Received the requested labdata. DL it to eDocs. Will review. AD 03/12/2013: Reviewed the labdata. It supports Eastern summary tables. TVOCs in groundwater (ug/L): Pre-injection; 1st quarter 2012; 2nd quarter; 3rd quarter; 4th quarter; 1. MW-3 14 ND 1,192 711 ND 2. MW-4 9,822 940 ND 87 ND 3. MW-5 11 11 17 16 ND 4. MW-9 ND ND ND ND ND Based on the data, Eastern recommends spill case closure. Will discuss it with J. Kolleeny of DEC. AD 03/27/2013: Discussed the spill closure request with J. Kolleeny. Given that the following activities were performed at the site: - Petroleum impacted soils were removed from the site. An area of approximately 50 feet wide by 70 feet long and 14 feet deep was excavated. 1,136.58 tons of petroleum impacted soils were removed, transported, and disposed at a regulated facility offsite for recycling; - Regen-Ox was applied within the excavation to extend source area contamination treatment within the unsaturated and underlying perched groundwater saturated zone; - The SSDS and Vapor Barrier were installed under a new building; - Three rounds of Regen-Ox application via injection points to remediate remaining residual levels of VOCs in the site wells; - Post-remediation groundwater monitoring; - Absence of free phase product in any of the site-related wells; - Non-detect levels of concentrations of TVOC in all site-related wells; - No drinking water supply wells in the vicinity of the site; - Labdata from downgradient wells, MW-05 and MW-09, confirm no off-site migration; it was decided to approve the consultant recommendatiion for spill case closure. Issued and sent an approval letter to Mr. DeLeonardo. DL pdf copy of the letter to eDocs. Case closed. AD "

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants.

Map ID	Site	Database(s)	EPA ID Number

J & C FRENCH CLEANERS (Continued) **1016085494**

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when

Map ID	Site	Database(s)	EPA ID Number

EAST TREMONT AVENUE STATION - NORTHERN VALLEY CONTRACTING (Continued) **1008931026**

complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	"7/27/11 - Raphael Ketani. I spoke to Mike Bedoe of the ERT desk (212) 580-8383. He said that there was a large water main break in the area earlier this morning. The contractor was digging to expose the water main and nicked a gas main in the process. About 40 gals. of condensation water spilled out into the dirt excavation hole. Many Con Ed gas customers lost service, but no one was injured as a result of the gas line puncturing. They are still without service. The EMIS is #226786. 9/23/11 - Austin - Con Ed contained and cleaned up the spill reported as non-hazardous sample results - See eDocs files for further information - Spill closed - end "
Remarks:	"Drip water coming from gas main into soil. Cleanup pending."

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Sangesland spoke to Zeb at PW Grosser. He said the heating old tank had been pulled several years ago. The client hired them to do test borings around the former tank area. Only one boring had some minor hits above standards. PW Grosser has prepared a report which will be sent to DEC Piper for review. In addition, Zeb said the property owner is planning construction work on the site in the next few months and will probably be digging out the contaminated area at that time. 12/14/10- DECPiper recieved closure report. All petroleum-contaminated soils were removed from the vicinity of P.W. Grosser boring SB-2 where petroleum contaminated soils had previously been encountered. Laboratoryanalysis of confirmatory endpoint soil samples from the excavation walls and floor documented the absence of VOCs or PAHs at concentrations above guidance levels. CLosed. See edocs if warranted."
Remarks:	"unknown amount lost to unknown size tank. Tank has been removed. Clean up pending."

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region

FINDS:

Registry ID: 110031433232

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Property owner as per Property Shark is: R G Oritz Funeral Home 524 Southern Blvd Bronx, NY 10455-4600 11/7/2005 Property is in the

Map ID	Site	Database(s)	EPA ID Number

R. G. ORTIZ FUNERAL HOME (Continued) **S107417201**

process of being sold and potential purchaser hired NYC Tank Test to test the tanks. Tank failed. Nov. 7, 2005 A Tank Test Failure Letter was sent to: Facilities Manager R G Ortiz Funeral Home 524 Southern Blvd Bonx, NY 10455-4600 11/21/05 - Raphael Ketani. Dan Florio ((718) 585-6200) of Ambassador Fuel called me up to say that he received the tank test failure letter from DEC, but that the site, the R G Ortiz Funeral Home, has been closed for 1 1/2 years with no tenants and no oil deliveries. Mr. Florio said that he and Mr. Ortiz, the owner of the property, would have had to have been notified that someone wanted to do a tank test in order to let them in as the door is chained and locked. He asked that I find out the true address of the place that was tank tested and send him a letter stating that the DEC letter was sent to the wrong address. Mr. Florio added that the tank is 1,080 gals., above ground, and hasn't had a delivery in 1 1/2 years as the building is unused. I told him I would contact NYC Tank Testing and find out where they really went to test a tank. I called up NYC Tank Testing ((718) 731-7011) and asked for Mr. Wexler. The person on the other end said that on November 7, 2005 they did a tank test of a 550 tank. He told me that it was an old funeral home at 58-62 East Tremont Ave. in the Bronx. He said that the potential buyer let Mr. Wexler into the building for the tank test. Mr. Wexler called me, by chance, and I spoke to him about the site. He said that the correct address is 60 East TREMONT. Mr. Wexler said that the leak was in the fill or vent pipe of the 550 gal. tank. I then called up Ambassador Fuel and told George that it was the potential buyer who let Mr. Wexler into the building and that the leak was in the fill or vent line. I told George to call NYC Tank Testing and work out what needs to be done to fix the pipes and check the soil under the tank. He said he would. 12/28/05 - Raphael Ketani. I spoke to Mr. Florio. He said that the tank passed after the vent line was replaced. He said there was only a little bit of staining on the wall where the vent line passed through and no staining on the floor or around the tank. He said he would send me a FAX of the passing tank test. I received the FAX and I am closing the case. 1/17/06 - Dan of Ambassador Oil called saying that his customer, Michael Ortiz (owner of the property), wants an NFA letter to present to the new buyers of the property. I will send Mr. Ortiz the letter to the 524 Southern Blvd. address. 1/24/06 - Raphael Ketani. Brinne (bree-an) Lucyk of Davis Polk (law firm; (212) 450-4861) called to find out what was the basis for my closing the spill case. I told her it was the passing tank test. 1/25/06 - Raphael Ketani. Myles Mahoney (owner's lawyer) called to find out what the NFA letter represents. I told him that it is sent when a spill has been remediated to the satisfaction of the DEC. I told him that there really wasn't a spill, just a failed tank test which later passed. "

Remarks: "NO REMARKSS."

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

AIR MINOR

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with

Map ID	Site	Database(s)	EPA ID Number

POWER TEST-GETTY STA 58513 (Continued) **1001119739**

a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"July 2008 - Tyree submitted a letter/report with the following information: On March 25, 2008 it was noted that there was water with a sheen noted in the tank top sumps. The NYSDEC was immediately notified and spill No. 07-13603 was assigned to the site. On April 3, 2008 Tyree Environmental Corporation (Tyree) was notified of the incident and a vacuum truck was dispatched to the site. A total of approximately 15 gallons of water was pumped out from the tank top sumps. A copy of the waste disposal manifest is included with this report. The water had accumulated most likely as the result of storm water runoff. In addition please note that a review of the statistical inventory reconciliation records for February through May 2008 revealed that there were no product losses detected. The tank top sumps are contained as such there was no release to the environment. Based upon the aforementioned information Tyree, on behalf of Getty Petroleum Marketing Inc., kindly requests the closure of NYSDEC spill no. 07-13603. ********** Spill Closed"
Remarks:	"vac truck scheduled"

DEC Memo:	"4/7/15 TJD Teleconference with David Went from Global - he states the property is an active Getty Gas Station and Global operates the fuel side of business. There is currently active utility work being performed onsite and historical contamination from an unknown source was found along a sewer line. Contaminated soils encountered during utility work has been drummed and/or stockpiled onsite pending disposal. Excavation remains open pending the sewer repairs and collection of endpoint samples. David has been directed to submit

DEC Memo:	"Sangesland spoke to David Orsner (Oil Company) He had a crew of 5 on the site and sent a vac truck to the site. No spill in basement. Spill only on sidewalk no spill to drains. 4/21/2005 Sangesland spoke to Manny Stein (property manager) He said the cleanup is complete. Sidewalk looks very good. 5/5/2005 Sangesland received a manifest showing 11 containers of petroleum contaminated material was removed by Able Environmental. Spill Closed"
Remarks:	"Overfilled due to a faulty gauge."

1900 JEROME AVE **US AIRS** **N/A**
BRONX, NY 10453 **ECHO**

FINDS:

Registry ID: 110001607789

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

COMMERCIAL (Continued) **S108765565**

Patel. received Phase II report. abstract: - site is occupied and utilized by PR auto collision - during Phase I, found suspect vent pipe along north end of structure - suspect vent pipe was determined to likely have gone to AST - two fill ports, noted within sidewalk, were traced and one anomaly was discovered, within the site. second fill port appeared to terminate to soils proximate to the anomaly - 11 boreholes (BH1 through BH11) were completed proximate to the suspect UST area - soil samples were collected from 4 boreholes and remaining got refusal - soil samples were collected continuously from the ground surface until equipment refusal was encountered - fill material consisting of silt, sand and gravel was encountered within each borehole to depths of approx. 5 ft bg. fill material was generally underlain by native soils including miscellaneous sand, silt and clay to depths of approx. 14.6 ft bgs - found contamination in two soil samples ----------BH5-------BH8-----limit 4-6 ft 6-8 ft Benzene----------448----------60 n-Propylbenzene----------32,100-----3,700 n-Butylbenzene----------11,700----10,000 sent letter to Mr. Boyle requiring soil/groundwater delineation and endpoint samples. letter emailed to Mr. Boyle and Mr. Reid. 10/31/07-Hiralkumar Patel. left message for Mr. Boyle. received call from Mr. Boyle. they haven't done any work yet. asked Mr. Boyle to provide schedule for work by end of Nov. 2, 2007. 11/01/07-Hiralkumar Patel. received call from Mr. Reid. they are in process of hiring contractor to remove tank and will remove contaminated soil at that time. Mr. Reid will call back (within two weeks) with schedule for excavation. 11/21/07-Hiralkumar Patel. received email from Mr. Reid. they just got access to site from tenant and will schedule work. Mr. Reid will send work schedule. 12/14/07-Hiralkumar Patel. received email from Mr. Reid. they have scheduled tank removal on Jan. 8, 2008. 01/07/08-Hiralkumar Patel. received email from Mr. Reid. tank removal has been rescheduled on Jan. 15, 2008. 02/14/08-Hiralkumar Patel. received message from Shawn from LCS. they found elevated benzene in one of endpoint samples. left message for Mr. Reid to submit analytical values with site map, including sampling points, for review. asked him to wait before backfilling, as may require further work based on sample analyticals. Shawn Mittlefehldt LCS, Inc. Ph. (716) 845-6145 (O) (585) 370-0051 (C) email: smittlefehldt@lenderconsulting.com 02/22/08-Hiralkumar Patel. received sample analyticals and site map from Shawn. took one bottom and four sidewall samples. no contamination found in any samples. site map shows limit of excavation, but doesn't show sampling depth and locations. 02/29/08-Hiralkumar Patel. sent email to Shawn, Mr. Reid and Mr. Boyle requiring submission of closure report. 03/25/08-Hiralkumar Patel. spoke with Shawn. they are preparing report and will submit soon. 04/09/08-Hiralkumar Patel. received closure report from LCS. abstract: - upon excavation, one approx. 550 gal UST was discovered - total of 550 gal oil/water and sludge mixture were removed - all accessible ancillary piping was also removed - no holes found in UST - excavation measured approx. 15 ft by 32 ft by 6 ft deep - excavation was limited to the east by the exterior wall and to the north by on-going business operations - approx. 14.62 tons of impacted soil was excavated - endpoint samples collected from each sidewall and bottom of excavation - minor contamination found in endpoint samples based on submitted report, case closed. 05/19/08-Hiralkumar Patel. received email from Doug requesting NFA letter. NFA sent to Mr. Boyle. letter emailed to Mr. Boyle and Doug."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"e2mis no 154929 Dominic T. Cleary, 46911, report that while preparing to pull cable using cable truck 60747 there was a catastrophic failure of the vehicle's hydraulic system and as much as 50 gallons of hydraulic fluid leaked from the vehicle and spilled to asphalt where it was contained using absorbent materials from spill kits. NO SEWERS, WATERWAYS, OR PRIVATE PROPERTY AFFECTED. Cleanup is in progress. 18-August-2004 13:54 Hrs Flush Mechanic David Rodrigez, 01075, reports cleanup complete, 10 bags of speedy-dry were applied to absorb the spilled oil, 6 drums of nonhazardous oily debris was generated during the cleanup, the affected street area was power washed using degreaser 760 and approximately 50 gallons of nonhazardous oily washwater was removed by flush truck, and vehicle has been turned in to CFS Garage for repairs before being returned to service."
Remarks:	"hydralic system failed on truck: In process of cleaning up No to 5 questions: coned # 154929"

DEC Memo:	"6/14/06 - DEC Spill Lead changed to GRATHWOL . 6/15/06 - Eddie David, listed as Superintendent on this spill report, has retired. Met with Manny Batista, Superintendent. Mr. Batista was very helpful during the inspection. Inspected petroleum tank. Tank in excellent condition, like new. No spill on floor of tank area. No petroleum odors. Explained to Mr. Batista that I needed invoice for tank repairs to close out the spill. I was provided a church bulletin and asked to call Father Arce on the 19th. 6/19/06 - Spoke with Father Arce and explained the procedure necessary to close this spill project. Fr. Arce will locate the invoice and FAX it to the Department. 7/18/06 - Invoice located and will be faxed to the Department. Spill will be closed upon receipt of this invoice. 7/19/06 - Invoice documenting petroleum tank clean up and cancelled check to pay for this work received from Fr. Arce today. Spill closed. "
Remarks:	"1500 GAL UNDERGROUND TANK TOOK ON WATER AND DISPERSED OIL INTO SURROUNDING GROUND. EXCAVATION OF TANK TOP WILL BE UNDERWAY."

Program:	BCP
Site Code:	461048
Acres:	0.324
HW Code:	C203062
SWIS:	0301
Town:	New York City
Record Added Date:	02/16/2012
Record Updated Date:	05/08/2012
Update By:	BXANDERS
Site Description:	Location: The 92 West Tremont site is located in an urban area of the Bronx with a mix of residential and commercial properties. The southwest side of the site is near the intersection of West Tremont Avenue and Grand Avenue and the northeast side of the site is at the intersection of West Tremont Avenue and West 177th Street. Site

Map ID	Site	Database(s)	EPA ID Number

92 WEST TREMONT (Continued) **S113916506**

Features: The site consists of 0.324 acres and is currently a vacant lot surrounded by a fence. There are no permanent structures on the site. The surface of the site consists of concrete rubble, exposed soils, and vegetative landscaping. The site is on a very steep slope.Current Zoning/Use: The site is currently unimproved land, and is zoned for residential use. The area immediately surrounding the site is residential with some small commercial establishments.Historical Use: There was a dry cleaning facility located on the site from at least 1948 to approximately 1979.Site Geology and Hydrogeology: The first 6 to 10 feet of soil appear to be consistent with urban fill (brick, concrete, glass) mixed with soil. The indigenous soil beneath this strata apear to be brown to light brown in color with a medium to course texture to approx. 19 ft BEG where bedrock is encountered. Groundwater flow is to the southeast.BCP application denied by letter dated May 8, 2012.

Env Problem: BCP application denied by letter dated May 8, 2012.
Health Problem: Not reported

MANHOLE #16889 (Continued) **S106969920**

DEC Memo: "e2mis no 159919 Carl Clarke, 16836, found a leaking primary cable (feeder ID Pending Engineering) in Manhole 16899 at the southwest corner of East 176th Street and Jerome Avenue that spilled 1 quart of dielectric fluid to the floor of the manhole where it is contained. D-Fault tag 00217 assigned. No sewers, waterways, or private property affected. Environmental tag 46318 applied. Chain of Custody DD14143 assigned to PCB sample. Cleanup pending feeder outage. Due to extreme heat criteria suspension of feeder scheduling, required feeder outage and cleanup date unknown at this time."

Remarks: "LEAKING CABLE IN MANHOLE; NO TO 5 QUESTIONS; NO CREW AVAILABLE AT THIS TIME; CONED #159919"
