FORMER SHELL STATION (Continued) **S103936181**

Total of 590tons of petroleum contaminated soil was removed from site. 9/03 Amoco construction not started yet. To finish dig during construction. Phoenix is consultant for site. 11/24/03 AUSTIN - TRANSFERRED FROM MULQUEEN TO FOLEY - END 6/8/04 Meeting with Shell and Phoenix. Shell excavated and completed endpoint sampling in 12/01. Amoco was developing property but have not completed. Shell will be submitting plan for well points. Will possibly excavate this summer. Will submit report. Summary of Site History April 1999- A subsurface investigation utilizing a direct-push(Geoprobe) was performed to determine if petroleum impacted soil would be encountered during UST removal activities. Based on lab results, EnviroTrac reported spill. 1" MW-1 and MW-2 were installed. October 1999-Three 4000gal singel-wall steel gas USTs, one 550gal used oil UST, two hydraulic lifts, product dispensers, piping and remoate fills were removed. Endpoints were collected from the gas UST, used oil UST and dispenser island excavations which exceeded STARS guidance values. 210tons of soil was removed. Four 2" MWs (MW-3 thru MW-6) were installedwithin the excavations of the gas UST and dispenser islands. Water table was estimated 10'bgs. Wells were constructed with approx 10' of 0.01 slot screen with bentonite seal set at approx 2'bgs. To enhance natural degradation, approx 500lbs of oxygen releasing material(ORM) was distributed at the bottom of the 4000gal gas UST and dispener island excavations. April 2000- A test pit investigation was conducted on site. 34 test pits were dug. December 2001-Phoenix Environmental conducted asoil excavation in the area of the yard drains behind the building. A total of 590 tons of petroleum impacted soil was removed. Preliminary endpoint data and site map were submitted during 6/8/04 meeting which show hot spots across property. Needa final report. 11/23/04 Met with P. Sherwood, B. Hoashi(Phoenix) and R. Rule(Shell). This station was supposed to undergo site redevelopment as a proposed Amoco station. The station building was demolished in 2003. Because site redevelopment has been postponed, Phoenix will install 4 monitoring wells in the winter 2004/2005. GW at approx 8'bgs. 2/1/06 Met with Shell, SAIC, Longshore. SAIC installed four wells. Concentrations pretty low. Will monitor for trends, do sensitive receptorsurvey, exposure assessment. 3/22/06 Reassigned from Foley to Tang. (KMF) END DECRemark - 9900467

DEC Memo: Start DECRemark - 9303243 Prior to Sept, 2004 data translation this spill Lead DEC Field was "SUN" 12/23/05- Andersen - Reviewed quarterly report dated 11/7/05. Eight MW sampled on September 23, 2005. Max BTEX 729ppb (MW5), max MTBE 352ppb (MW3).SVE system shut down May 5, 2005 due because low influent vapors. RAP required for remaining contamination. 12/29/05: RAP required letter sent. RAP due 2/9/06. 1/26/06: 1/25/06 meeting with Quantum, NYSDEC, and ET. A sensitive receptor surveyand soil vapor survey will be performed, and then site closure will be considered. A kiosk vapor abatement system is in place. 2/2/06: Reviewed the fourth 2005 quarterly report. Max BTEX 497 ppb (MW5), max MTBE 351 ppb (MW6). A sensitive receptorsurvey will be prepared. 6/30/06: Meeting on 6/28/06 with Hess, Quantum, NYSDEC, EnviroTrac and GSC. Will submit request for closure. Sub slab vapor sampling conducted. 7/25/06: Received the results of sub-slab sampling and a sensitive receptor survey. Two sub slab samples were collected from beneath the kiosk on site. MTBE and BTEX were not detected above method detection limits. The sensitive receptor survey revealed that residential houses with basements are located within 1,000 ft ofthe site. Closure was requested. 10/6/06: Emailed Dawn Coughlin to followup on quarterly report. Received email from Ed Russo: "the site was sampled on August 15, 2006. Results indicated concentrations that we feel warrant closure, especially due to the positive results of the soil-gas sampling and sensitive receptor survey. The report was just finalized yesterday, so you should be receiving it by the middle of next week." 11/1/06: Received closure request. Max benzene 158ppb in MW3,MTBE 338 in MW3. Continued groundwater sampling required. 1/17/07: Meeting on 1/16/07 with Hess, Delta, NYSDEC. 1/23/07: Received update report. Wells samples on

210 GREEN PT AVE. (Continued) **S102146603**

11/8/06. Max BTEX 63 (MW3), max MTBE 222 (MW6). 4/20/07: Reviewed update report. Max BTEX 12.3 ppb (MW1). As reportedin the sensitive receptor survey, soil vapor sampling showed soil gas MTBE and BTEX concentrations ND. ND concentrations in downgradient wells. NFA issued. END DECRemark - 9303243

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

245 South 1/2-1 0.750 mi. 3958 ft. | **BAYSIDE OIL**
1-65 NORTH 12TH STREET
BROOKLYN, NY 11211 | **VCP** | **S105775540**
N/A

Relative: Lower
Actual: 1 ft.

VCP:
Program Type: VCP
Site Code: 57122
Assessment: Not reported
Env Problems: Previous studies at the Site confirm widespread petroleum contamination with MGP involvement. For example, fuel oil and naphthalene odors are reported in boring logs as deep as 60 feet, and in July 2002 TRC Environmental (TGE's consultant) found heavy staining and MGP waste in a boring 20 feet below grade and reported the occurrence to NYSDEC as a spill (No. 0203677). In addition to organic pollutants, a 1997 investigation also found soil samples with elevated levels of lead. The Phase IIassessment was completed in January 2003 and confirmed widespread groundwater and soil contamination with MGP waste and petroleum related contaminants. Heavy staining and odors (coal tar) observed from 20 feet depths to top of clay at 60 feet depths. VOCs and PAH exceed RSCOs below 20 feet depth. Benzene concentrations below 20 feet depth observed up to 864,000 ppb. Off-site benzene detected upto 128,000 ppb. Free product observed (wells B4, MW7). On-site groundwater impacted from water table to top of clay by petroleum and coal tar related compounds. Benzene detected throughout the site at concentrations of 6.5 ppb to 29,500 ppb (in MWB-11). MTBE ranged from 1.2 to 329 ppb and naphthalene ranged from 1.6 to 579 ppb.
Site Desc: The TransGas Energy (TGE) Facility is a project for a new energy facility located on the East River waterfront between the Greenpoint and Williamsburg sections of Brooklyn. TGE proposed to construct and operate an 1100-megawatt gas-fired plant on the Brooklyn waterfront near Bushwick Inlet between the communities of Greenpoint and Williamsburg. For over 100 years, the Site has been operated as a fuel oil storage and distribution facility. Site soils and groundwater are contaminated with Petroleum spill contaminants, MGP Waste and heavy metal contamination. TGE entered the Department's Voluntary Cleanup Program (VCP) in December 2002. The site must be remediated before the facility can be constructed. The current owner of the Site, which TGE has optioned for its cogeneration facility, is the Bayside Fuel Oil Depot. Under Bayside Fuel and previous owners (which include Socony Mobil, Texaco Refining

BAYSIDE OIL (Continued) **S105775540**

and Marketing and others), the Site has been operated as a fuel oil storage and distribution facility for over 100 years. There is an existing oil spill stipulation (Spill No. 9804544) with Texaco Refining and Marketing that has resulted in ongoing recovery of free-product and contaminated-groundwater. The Phase II assessment was completed in January 2003 and confirmed widespread groundwater and soil contamination with MGP waste and petroleum related contaminants. RI is on-going.

Actual:
10 ft.

VCP:
Program Type: BCP
Site Code: 371406
Assessment: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.
Env Problems: The primary contaminants of concern at the site known at this time include VOC and SVOCs. Investigations indicate that exceedances of SVOCs and metals were detected in soil samples collected from a Phase II investigation during July 2005. Additionally, VOC and SVOC exceedances were detected in 1 groundwater sample during the same investigation. Groundwater samples taken in September 2005 revealed 2 inches of free product and elevated VOC and SVOCs in a newly installed well. A Phase II Investigation conducted in May 2006 concluded that VOCs and metals in soil samples were above TAGM and that VOCs and metals exceeding SCGs were detected in groundwater from additional monitoring well.
Site Desc: The OCA LIC site is located in an urban portion of Queens County, NY. This site is approximately 1 acre in size and the site is intended for residential and commercial use. The site will be redeveloped as a mixed-use project with ground floor retail along the 5th Street frontage, residential townhouses along 46th Road, and accessory parking below grade. The main site features consist of thirteen (13) structures on site, 60 of which are currently vacant. The site is located in an industrialarea of Queens with a significant amount of residential and commercial development currently taking place in the immediate vicinity of the site. The property has a long history of industrial use that may have resulted in subsurface contamination.Past industrial uses include: varnish works, an ink factory, metal castings and plating, cleaners and dyers and a dry cleaner. Hazardous materials associated with the historical uses include: industrial solvents, lubricating and cutting oils, metalpolishing material, plating bath solutions, paint and painting products and dye products. In addition, Sanborn maps indicate the presence of two (2) gasoline storage tanks, twenty-two (22) Varnoline storage tanks, three (3) solvent tanks and one (1)10,000 gallon #6 fuel UST. Completed investigations include Phase I and Phase II Investigations, which were submitted as part of the BCP application.

Other Pertinent Environmental Activity Identified at Site

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Env Problems: Site contamination caused by historic filling, historic oil refinery systems, historic paint and varnish operations and underground storage tanks resulted in petroleum-related impacts, impacts of hazardous and non-hazardous metals and a localized arThe results of the RI with respect to OU1 indicated the presence of OU1-wide soil contamination caused by historic filling (SVOCs and metals), petroleum-related impacts caused by historic oil refinery systems, limited impacts (i.e., metals) by histSeveral investigations have been done on the property since 1985. Based on these investigations, remediation (IRM) was performed (January through March , 2005). Soil remediation in the OU4 waterfront area consisted of removal and off-site disposalBased on the investigation and reuse and disposal sampling results, remediation was performed between January 3, 2005 and March 7, 2005. Soil remediation along the OU3 waterfront area consisted the excavation and off-site disposal of about 3,100 tea of elevated levels of tetrachloroethylene in Site soil. SVOC and VOC impacted material located in 47th Road area, likely resulted in these contaminants in groundwater. The paint factories were located on the southern part of the site. Metaloric paint and varnish operations at the southeast end of OU1 and impacts from likely off-site sources of SVOCs and VOCs at the south end of OU1 (47th Road area). Except for the dissolved VOCs and naphthalene in groundwater at the south end of OU1,of about 5,200 tons of historic fill and soil from within the waterfront area in OU4. The RIWP for OUs 3 and 4 (approved January 2006)describes the remedial investigation activities to be conducted Originally, the entire Site was part of the Huons of historic fill and soil from within the waterfront area in OU3. In-situ soil sampling was conducted and identified need for additional soils requiring remediation. Originally, the entire Site was part of the Hunter family farm in the early1800s. Devoe Manufacturing Company developed a petroleum processing facility in the 1860s, and utilized OU3 to process crude oil into kerosene for lamps. In 1873, Standard Oil Company of New York (SOCONY) acquired Devoe and the property, and continter family farm in the early 1800s. The Devoe Manufacturing Company developed a petroleum processing facility in the 1860s, and utilized OU3 and OU-4 to process crude oil into kerosene for lamps. In 1873, Standard Oil Company of New York (SOCONY)the mobility of contaminants is low. Portions of the site have floating petroleum product on the groundwater. The weathered petroleum in the soils, when handled, causes a nuisance odor that has to be controlled with foam and a misting spray. Origicontamination in soils is present in the south-eastern portion of the site (OU-2). 1880s, the N.Y. Mastics Company Works and Enamel Sign Company occupied the south end of OU2. The Standard Oil Company of New York (SOCONY) occupied the remainder ofnally, the entire Site was part of the Hunter family farm in the early 1800s. In the late 1880s, the N.Y. Mastics Company Works occupied the south end of OU1 (i.e., south of existing 47th Avenue); the Standard Oil Company of New York (SOCONY) occupacquired Devoe and continued similar operations until the early 1900s, when SOCONY modified its petroleum distilling

PEPSI COLA PLANT (Continued) **S102149658**

operations to produce gasoline and other oil products. The Historic Sanborn Map for 1898 shows that aboveground oil storage tanks oOU2. SOCONY had steam stills for petroleum refining and a container factory on OU2. By 1915, the National Varnish Company had replaced the Enamel Sign Company. The varnish company contained several buildings labeled gum storage, oil storage, oilnued similar operations until the early 1900s when SOCONY modified its petroleum distilling operations to produce gasoline and other oil products. The Historic Sanborn Map for 1898 shows steam stills and a coal shed on the eastern half of OU3 and aied the northernmost end of OU1 (i.e., north of the existing 47th Avenue). The SOCONY had a tin can factory, a storage building and a boat slip on OU1. By 1915, the area formerly occupied by the Mastics Company Works had become vacant and the remaiccupied the eastern end of OU4, and a structure used for oil filling and packaging occupied the remainder of OU4. The 1915 Historic Sanborn Map indicates similar petroleum refining operations on the Site. By 1936, the SOCONY operations had ceasedtank storage, oil tank shed, coke shed, alcohol storage, and benzene and turpentine tanks. By 1947, PepsiCo occupied buildings in OU2 to the north of 47th Avenue. The remainder of OU2 was occupied by a manufacturer of machine products, Buchmann Spbox factory on the western half of OU3. By 1936, the SOCONY operations had ceased on OU3. SOCONY sold the Site to PepsiCo in 1936. By 1947, PepsiCo occupied buildings on the Site.ning area of OU1 continued to be occupied by the same SOCONY operations. The 1936 the occupant of the buildings is unidentified. By 1947, PepsiCo occupied buildings in OU1 to the north of 47th Avenue. The remainder of OU1, located to the south ofon OU4, as evident by the disappearance of oil refinery systems (aboveground oil tanks, etc.). SOCONY sold the Site to PepsiCo in 1936. By 1947, PepsiCo occupied buildings on the Site. Sanborn maps for subsequent years show no significant changearkwheel Corporation, and a manufacturer of industrial sanitary and maintenance chemical products. Sanborn Maps for subsequent years show no significant change in the use of OU-2.in use. After the completion of the Remedial Investigation (RI), a Remedial Action Work Plan (RAWP) will be prepared and implemented for OU4. After remediation, OU4 will be developed for residential high-rise buildings which will not have basem47th Avenue, continued to be vacant at this time. Sanborn Maps for subsequent years show no significant change in usage of OU1.ent or subgrade levels.

Site Desc: The site is located in an urban area in Queens along the East River and bounded by OU3 to the north, 5th Street to the east, 47th Road to the south and OU1 to the west. OU2 (Site B) covers approximately 6 acres in Tax Blocks 20 and 21, separated byThe site is located in an urban area in Queens along the East River and bounded by 47th Road to the south, 5th Street to the east and Anabel Basin to the north. The entire property consists of contiguous parcels corresponding to Tax Blocks 20 and 2The entire Site consists of contiguous parcels corresponding to Tax Blocks 20 and 21 in Queens, New York. OU4 covers approximately 5 acres in Tax Blocks 21. OU4 is bordered by Anable Basin to the north, 5th Street to the east, OU3 to the south andThe entire property consists of contiguous parcels corresponding to Tax Blocks 20 and 21 in Queens, New York (the "Site"). OU3 covers approximately 5 acres in Tax Block 21. OU3 is bordered by OU4 to the north, 5th Street to the east, OUs 1 and 2 t47th Avenue. Originally, the entire Site was part of the Hunter family farm in the early 1800s. In the late 1880s, the N.Y. Mastics Company Works occupied the south end of OU2 (i.e., south of existing 47th Avenue); the Standard Oil Company of New1 in Queens, New York (the "Site"). OU1 (Site A)is located in Tax Block 20 and is bordered by OUs 2 and 3 to the north, OU2 to the east, 47th Road to the south and the East River to the west. Originally, the entire Site was part of the Hunter famithe East River to the west. Originally, the entire Site was part of the Hunter family farm in the early 1800s. The Devoe Manufacturing Company developed a petroleum processing facility in the 1860s, and utilized

describes the remedial investigation activities to be conducted The remedy, conducted (January - Mao the north. OU1 will be developed for residential high-rise buildings which will include commercial establishments on the ground floors, parks and roads, courtyards, and parking. The buildings will not have basement or subgrade levels. Several it and to the north. Several investigations conducted on the property from 1985 through 2004. Remedial Investigation indicated OU-2-wide soil contamination caused by historic fill, petroleum related impacts from historic subterranean oil refineryh-rise residential buildings south of the Site and various warehouses and private homes to the east and to the north. Several investigations have been done on the property since 1985. The Operable Units Three and Four Remedial Investigation Workrch 2005) as part of the IRM, included Soil remediation along the OU3 waterfront area through the excavation and off-site disposal of soil hot spots, subsurface sumps and pits and grossly contaminated soil above and below the water table. About 3,1systems, underground tanks and localized areas of elevated metals and tetrachloroethylene in soil. The remedy, primarily completed (2006), included excavation and off-site disposal of contaminated soil, removal of tanksa and historic piping systePlan was approved by the Department on January 5, 2006. The RIWP for OUs 3 and 4 describes the remedial investigation activities to be conducted Based on these investigations, remediation (IRM) was performed (January through March , 2005). Sonvestigations have been done on the property since 1985, and additional investigation was done in 2004 to supplement previous investigations. The results of the July 2005 RI with respect to OU1 indicated the presence of OU1-wide soil contaminatioil remediation in the OU4 waterfront area consisted of removal and off-site disposal of about 5,200 tons of historic fill and soil from within the waterfront area in OU4. Pre-remediation supplemental investigation of both OU3 and OU4 waterfront ar00 tons of historic fill and soil from within the waterfront area in OU3 were excavated and disposed offsite. In-situ soil sampling was conducted for the purpose of characterizing soil for on-site reuse or off-site disposal along the proposed watems and in-situ soil oxidation. Groundwater remediation included removal of floating, free phase petroleum products. Remediation of OU2 has resulted in the excavation and off-site disposal of over 55,000 tons of material, removal of residual producn caused by historic filling (SVOCs and metals), petroleum-related impacts caused by historic oil refinery systems, limited impacts (metals) by historic paint and varnish operations at the southeast end of OU1 and impacts from likely off-site sourceas consisted of a geophysical survey over the entire area and the installation of 19 test pits and 6 direct push borings. In-situ soil sampling was conducted for the purpose of characterizing soil for on-site reuse or off-site disposal along the pes of SVOCs and VOCs at the south end of OU1 (47th Road area). Interim Remedial Measures (IRMs) conducted on the southern part of the site, mostly consisted of hot spot removals of soils and groundwater remediation. A remedial action Report has beirfront structure excavation area in OU3. Based on the results of the in-situ disposal and reuse sampling, additional soil requiring remediation was identified. After the completion of the Remedial Investigation (RI), an Remedial Action Work Plant, decommissioning and removal of historic subterranean refinery systems, removal of underground storage tanks, and tetrachloroethylene-contaminated surface soil. Engineering and Institutional Controls involving deed restrictions are in place. Reroposed waterfront structure excavation area in OU4. Based on the results of the in-situ disposal and reuse sampling, additional soil requiring remediation was identified. After the completion of the Remedial Investigation (RI), a Remedial Actio(RAWP) has been prepared. The OU-3 will be developed for residential high-rise buildings which will include commercial establishments on the ground floors, parks and roads, the Pepsi sign, a possible school, courtyards and parking.

PEPSI COLA PLANT (Continued) **S102149658**

Buildingsng prepared for the entire site. Remediation of OU1 has resulted in the excavation and off-site disposal of over 24,000 tons of material, installation of a subsurface barrier wall, removal of residual product, and decommissioning and removal of sudevelopment of OU-2 included new residential high rise buildings with commercial space on ground floor, roads, utilities, parks and landscaped areas. A vapor barriers and an active sub-slab depressurization system has been installed to minimize then Work Plan (RAWP) has been prepared for OU3. After remediation, OU4 will be developed for residential high-rise buildings which will include commercial establishments on the ground floors, parks and roads, courtyards and parking. The buildingswill be constructed with vapor barriers and an active sub-slab depressurization system to minimize the potential for soil vapor to enter the buildings. The buildings will not have basement or subgrade levels.bsurface structures of concern. Groundwater remediation consisted of source removal and enhanced biodegradation of dissolved phase contaminants. Development of OU-1 includes new buildings, roads, utilities, parks, landscaped areas, and new watepotential for soil vapor to enter the newly constructed buildings. Road and utility corridors have been backfilled with at least two feet of clean fill and/or paving. Parks and landscaped areas are constructed with an upper layer of at least two frfront bulkhead and platform structures. Buildings will be constructed with a vapor barrier and an active sub-slab depressurization systems to minimize the potential for soil vapor to enter the buildings.eet of clean fill.will not have basement or subgrade levels.

Program Type: VCP
Site Code: 359688
Assessment: Public water is provided to the area, thereby preventing exposures to groundwater. Contaminated material has been removed from two of the four operable units. The RIWP for OUs 3 and 4 describes the remedial investigation activities to be conducted The remedy, conducted (January - Mao the north. OU1 will be developed for residential high-rise buildings which will include commercial establishments on the ground floors, parks and roads, courtyards, and parking. The buildings will not have basement or subgrade levels. Several it and to the north. Several investigations conducted on the property from 1985 through 2004. Remedial Investigation indicated OU-2-wide soil contamination caused by historic fill, petroleum related impacts from historic subterranean oil refineryh-rise residential buildings south of the Site and various warehouses and private homes to the east and to the north. Several investigations have been done on the property since 1985. The Operable Units Three and Four Remedial Investigation Workrch 2005) as part of the IRM, included Soil remediation along the OU3 waterfront area through the excavation and off-site disposal of soil hot spots, subsurface sumps and pits and grossly contaminated soil above and below the water table. About 3,1systems, underground tanks and localized areas of elevated metals and tetrachloroethylene in soil. The remedy, primarily completed (2006), included excavation and off-site disposal of contaminated soil, removal of tanksa and historic piping systePlan was approved by the Department on January 5, 2006. The RIWP for OUs 3 and 4 describes the remedial investigation activities to be conducted Based on these investigations, remediation (IRM) was performed (January through March , 2005). Sonvestigations have been done on the property since 1985, and additional investigation was done in 2004 to supplement previous investigations. The results of the July 2005 RI with respect to OU1 indicated the presence of OU1-wide soil contaminatioil remediation in the OU4 waterfront area consisted of removal and off-site disposal of about 5,200 tons of historic fill and soil from within the waterfront area in OU4. Pre-remediation supplemental investigation of both OU3 and OU4 waterfront ar00 tons of historic fill and

PEPSI COLA PLANT (Continued) **S102149658**

soil from within the waterfront area in OU3 were excavated and disposed offsite. In-situ soil sampling was conducted for the purpose of characterizing soil for on-site reuse or off-site disposal along the proposed watems and in-situ soil oxidation. Groundwater remediation included removal of floating, free phase petroleum products. Remediation of OU2 has resulted in the excavation and off-site disposal of over 55,000 tons of material, removal of residual producn caused by historic filling (SVOCs and metals), petroleum-related impacts caused by historic oil refinery systems, limited impacts (metals) by historic paint and varnish operations at the southeast end of OU1 and impacts from likely off-site sourceas consisted of a geophysical survey over the entire area and the installation of 19 test pits and 6 direct push borings. In-situ soil sampling was conducted for the purpose of characterizing soil for on-site reuse or off-site disposal along the pes of SVOCs and VOCs at the south end of OU1 (47th Road area). Interim Remedial Measures (IRMs) conducted on the southern part of the site, mostly consisted of hot spot removals of soils and groundwater remediation. A remedial action Report has beirfront structure excavation area in OU3. Based on the results of the in-situ disposal and reuse sampling, additional soil requiring remediation was identified. After the completion of the Remedial Investigation (RI), an Remedial Action Work Plant, decommissioning and removal of historic subterranean refinery systems, removal of underground storage tanks, and tetrachloroethylene-contaminated surface soil. Engineering and Institutional Controls involving deed restrictions are in place. Reroposed waterfront structure excavation area in OU4. Based on the results of the in-situ disposal and reuse sampling, additional soil requiring remediation was identified. After the completion of the Remedial Investigation (RI), a Remedial Actio(RAWP) has been prepared. The OU-3 will be developed for residential high-rise buildings which will include commercial establishments on the ground floors, parks and roads, the Pepsi sign, a possible school, courtyards and parking. Buildingsng prepared for the entire site. Remediation of OU1 has resulted in the excavation and off-site disposal of over 24,000 tons of material, installation of a subsurface barrier wall, removal of residual product, and decommissioning and removal of sudevelopment of OU-2 included new residential high rise buildings with commercial space on ground floor, roads, utilities, parks and landscaped areas. A vapor barriers and an active sub-slab depressurization system has been installed to minimize then Work Plan (RAWP) has been prepared for OU3. After remediation, OU4 will be developed for residential high-rise buildings which will include commercial establishments on the ground floors, parks and roads, courtyards and parking. The buildingswill be constructed with vapor barriers and an active sub-slab depressurization system to minimize the potential for soil vapor to enter the buildings. The buildings will not have basement or subgrade levels.bsurface structures of concern. Groundwater remediation consisted of source removal and enhanced biodegradation of dissolved phase contaminants. Development of OU-1 includes new buildings, roads, utilities, parks, landscaped areas, and new watepotential for soil vapor to enter the newly constructed buildings. Road and utility corridors have been backfilled with at least two feet of clean fill and/or paving. Parks and landscaped areas are constructed with an upper layer of at least two frfront bulkhead and platform structures. Buildings will be constructed with a vapor barrier and an active sub-slab depressurization systems to minimize the potential for soil vapor to enter the buildings.eet of clean fill.will not have basement or subgrade levels.

After remediation, OU4 will be developed for residential high-rise buildings which will not have basem47th Avenue, continued to be vacant at this time. Sanborn Maps for subsequent years show no significant change in usage of OU1.ent or subgrade levels.

Site Desc: The site is located in an urban area in Queens along the East River and bounded by OU3 to the north, 5th Street to the east, 47th Road to the south and OU1 to the west. OU2 (Site B) covers approximately 6 acres in Tax Blocks 20 and 21, separated byThe site is located in an urban area in Queens along the East River and bounded by 47th Road to the south, 5th Street to the east and Anabel Basin to the north. The entire property consists of contiguous parcels corresponding to Tax Blocks 20 and 2The entire Site consists of contiguous parcels corresponding to Tax Blocks 20 and 21 in Queens, New York. OU4 covers approximately 5 acres in Tax Blocks 21. OU4 is bordered by Anable Basin to the north, 5th Street to the east, OU3 to the south andThe entire property consists of contiguous parcels corresponding to Tax Blocks 20 and 21 in Queens, New York (the "Site"). OU3 covers approximately 5 acres in Tax Block 21. OU3 is bordered by OU4 to the north, 5th Street to the east, OUs 1 and 2 t47th Avenue. Originally, the entire Site was part of the Hunter family farm in the early 1800s. In the late 1880s, the N.Y. Mastics Company Works occupied the south end of OU2 (i.e., south of existing 47th Avenue); the Standard Oil Company of New1 in Queens, New York (the "Site"). OU1 (Site A)is located in Tax Block 20 and is bordered by OUs 2 and 3 to the north, OU2 to the east, 47th Road to the south and the East River to the west. Originally, the entire Site was part of the Hunter famithe East River to the west. Originally, the entire Site was part of the Hunter family farm in the early 1800s. The Devoe Manufacturing Company developed a petroleum processing facility in the 1860s, and utilized OU3 and OU-4 to process crude oil io the south and the East River to the west. Originally, the entire Site was part of the Hunter family farm in the early 1800s. The Devoe Manufacturing Company developed a petroleum processing facility in the 1860s, and utilized OU3 to process crudnto kerosene for lamps. In 1873, Standard Oil Company of New York (SOCONY) acquired Devoe and continued similar operations until the early 1900s, when SOCONY modified its petroleum distilling operations to produce gasoline and other oil products.e oil into kerosene for lamps. In 1873, Standard Oil Company of New York (SOCONY) acquired Devoe and the property, and continued similar operations until the early 1900s when SOCONY modified its petroleum distilling operations to produce gasoline aYork (SOCONY) occupied the northernmost end of OU2. SOCONY had steam stills for petroleum refining and a container factory on OU2. By 1915, the National Varnish Company replaced the Mastics Company. The varnish company contained several buildingsly farm in the early 1800s. Former industrial uses of the site include a varnish factory, a paint factory on the southern part of the site and an oil terminal on the northern part of the site. In the late 1880s, the N.Y. Mastics Company Works (the Mastics Company) occupied the south end of OU1 (i.e., south of existing 47th Avenue); the Standard Oil Company of New York (SOCONY) occupied the northernmost end of OU1 (i.e., north of the existing 47th Avenue). The SOCONY had a tin can factory, alabeled gum storage, oil storage, oil tank storage, oil tank shed, coke shed, alcohol storage, and benzene and turpentine tanks. SOCONY operations included a gasholder, iron tank, condenser tanks and aboveground oil tanks. By 1947, PepsiCo occupiend other oil products. The Historic Sanborn Map for 1898 shows steam stills and a coal shed on the eastern half of OU3 and a box factory on the western half of OU3. By 1936, the SOCONY operations had ceased on OU3. SOCONY sold the Site to PepsiCoThe Historic Sanborn Map for 1898 shows that aboveground oil storage

PEPSI COLA PLANT (Continued) **S102149658**

tanks occupied the eastern end of OU4, and a structure used for oil filling and packaging occupied the remainder of OU4. The 1915 Historic Sanborn Map indicates similar petroleumd buildings in OU2 to the north of 47th Avenue. The remainder of OU2 was occupied by a manufacturer of machine products, Buchmann Sparkwheel Corporation, and a manufacturer of industrial sanitary and maintenance chemical products. Surrounding lastorage building and a boat slip on OU1. By 1947, PepsiCo occupied buildings in OU1 to the north of 47th Avenue. All former structures have been demolished except for the Pepsi Cola sign which is placed along the East River. Surrounding land usein 1936. By 1947, PepsiCo occupied buildings on the Site. Surrounding land use consists primarily of a mixture of light industrial warehouses, commercial buildings, parks, schools and residential properties. There are high-rise residential buildrefining operations on the Site. By 1936, the SOCONY operations had ceased on OU4, as evident by the disappearance of oil refinery systems (aboveground oil tanks, etc.). SOCONY sold the Site to PepsiCo in 1936. By 1947, PepsiCo occupied buildingsings south of the Site and various warehouses and private homes to the east and to the north. Several investigations have been done on the property since 1985, and additional investigation was done in 2004 to supplement previous investigations.nd use consists primarily of a mixture of light industrial warehouses, commercial buildings, parks, schools and residential properties. There are high-rise residential buildings south of the Site and various warehouses and private homes to the east and ton the Site. Sanborn maps for subsequent years show no significant change in use. Surrounding land use consists primarily of a mixture of light industrial warehouses, commercial buildings, parks, schools and residential properties. There are higThe Operable Units Three and Four Remedial Investigation Work Plan was approved by the Department on January 5, 2006. The RIWP for OUs 3 and 4 describes the remedial investigation activities to be conducted The remedy, conducted (January - Mao the north. OU1 will be developed for residential high-rise buildings which will include commercial establishments on the ground floors, parks and roads, courtyards, and parking. The buildings will not have basement or subgrade levels. Several it and to the north. Several investigations conducted on the property from 1985 through 2004. Remedial Investigation indicated OU-2-wide soil contamination caused by historic fill, petroleum related impacts from historic subterranean oil refineryh-rise residential buildings south of the Site and various warehouses and private homes to the east and to the north. Several investigations have been done on the property since 1985. The Operable Units Three and Four Remedial Investigation Workrch 2005) as part of the IRM, included Soil remediation along the OU3 waterfront area through the excavation and off-site disposal of soil hot spots, subsurface sumps and pits and grossly contaminated soil above and below the water table. About 3,1systems, underground tanks and localized areas of elevated metals and tetrachloroethylene in soil. The remedy, primarily completed (2006), included excavation and off-site disposal of contaminated soil, removal of tanksa and historic piping systePlan was approved by the Department on January 5, 2006. The RIWP for OUs 3 and 4 describes the remedial investigation activities to be conducted Based on these investigations, remediation (IRM) was performed (January through March , 2005). Sonvestigations have been done on the property since 1985, and additional investigation was done in 2004 to supplement previous investigations. The results of the July 2005 RI with respect to OU1 indicated the presence of OU1-wide soil contaminatioil remediation in the OU4 waterfront area consisted of removal and off-site disposal of about 5,200 tons of historic fill and soil from within the waterfront area in OU4. Pre-remediation supplemental

PEPSI COLA PLANT (Continued) **S102149658**

investigation of both OU3 and OU4 waterfront ar00 tons of historic fill and soil from within the waterfront area in OU3 were excavated and disposed offsite. In-situ soil sampling was conducted for the purpose of characterizing soil for on-site reuse or off-site disposal along the proposed watems and in-situ soil oxidation. Groundwater remediation included removal of floating, free phase petroleum products. Remediation of OU2 has resulted in the excavation and off-site disposal of over 55,000 tons of material, removal of residual producn caused by historic filling (SVOCs and metals), petroleum-related impacts caused by historic oil refinery systems, limited impacts (metals) by historic paint and varnish operations at the southeast end of OU1 and impacts from likely off-site sourceas consisted of a geophysical survey over the entire area and the installation of 19 test pits and 6 direct push borings. In-situ soil sampling was conducted for the purpose of characterizing soil for on-site reuse or off-site disposal along the pes of SVOCs and VOCs at the south end of OU1 (47th Road area). Interim Remedial Measures (IRMs) conducted on the southern part of the site, mostly consisted of hot spot removals of soils and groundwater remediation. A remedial action Report has beirfront structure excavation area in OU3. Based on the results of the in-situ disposal and reuse sampling, additional soil requiring remediation was identified. After the completion of the Remedial Investigation (RI), an Remedial Action Work Plant, decommissioning and removal of historic subterranean refinery systems, removal of underground storage tanks, and tetrachloroethylene-contaminated surface soil. Engineering and Institutional Controls involving deed restrictions are in place. Reroposed waterfront structure excavation area in OU4. Based on the results of the in-situ disposal and reuse sampling, additional soil requiring remediation was identified. After the completion of the Remedial Investigation (RI), a Remedial Actio(RAWP) has been prepared. The OU-3 will be developed for residential high-rise buildings which will include commercial establishments on the ground floors, parks and roads, the Pepsi sign, a possible school, courtyards and parking. Buildingsng prepared for the entire site. Remediation of OU1 has resulted in the excavation and off-site disposal of over 24,000 tons of material, installation of a subsurface barrier wall, removal of residual product, and decommissioning and removal of sudevelopment of OU-2 included new residential high rise buildings with commercial space on ground floor, roads, utilities, parks and landscaped areas. A vapor barriers and an active sub-slab depressurization system has been installed to minimize then Work Plan (RAWP) has been prepared for OU3. After remediation, OU4 will be developed for residential high-rise buildings which will include commercial establishments on the ground floors, parks and roads, courtyards and parking. The buildingswill be constructed with vapor barriers and an active sub-slab depressurization system to minimize the potential for soil vapor to enter the buildings. The buildings will not have basement or subgrade levels.bsurface structures of concern. Groundwater remediation consisted of source removal and enhanced biodegradation of dissolved phase contaminants. Development of OU-1 includes new buildings, roads, utilities, parks, landscaped areas, and new watepotential for soil vapor to enter the newly constructed buildings. Road and utility corridors have been backfilled with at least two feet of clean fill and/or paving. Parks and landscaped areas are constructed with an upper layer of at least two frfront bulkhead and platform structures. Buildings will be constructed with a vapor barrier and an active sub-slab depressurization systems to minimize the potential for soil vapor to enter the buildings.eet of clean fill.will not have basement or subgrade levels.

Site Description:	Manhattan Adhesives is currently an empty factory building that is located at the foot of the Greenpoint Ave., Bridge in Brooklyn. Besides the Manhattan Adhesives factory, about 10 feet from the northeast wall is a manhole (not a sewer of drain) into which liquid waste was allegedly discharged. This waste came from a condemned oil storage site located at the intersection of Rt. 280, and the NJ Turnpike in NJ. The manhole is suspected of being the opening to an underground tank; however, the quantity of the waste allegedly dumped exceeds the capacity of most tanks. This information was obtained from the State Senate Committee on Crime and the Brooklyn District Attorney's office. Phase I State Superfund has been completed. A partial phase IIinvestigation was completed during 1985 and recommended no further action. The Responsible Party has agreed to undertake an investigation in 1986. An investigation has not found hazardous waste on-site.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/31/2008
Date Data Arrived at EDR: 02/04/2008
Date Made Active in Reports: 03/17/2008

Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/31/2008
Date Data Arrived at EDR: 02/08/2008

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994

Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/09/2008
Date Data Arrived at EDR: 02/05/2008
Date Made Active in Reports: 02/20/2008
Number of Days to Update: 15

Last EDR Contact: 04/25/2008
Next Scheduled EDR Contact: 06/16/2008
Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007

Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/08/2008

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/06/2008

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2008

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/06/2008
Date Data Arrived at EDR: 03/06/2008

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2008

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 09/01/2007
Date Data Arrived at EDR: 12/03/2007

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 01/15/2008
Date Data Arrived at EDR: 01/22/2008
Date Made Active in Reports: 01/30/2008

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Next Scheduled EDR Contact: 06/30/2008
Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

STATE AND LOCAL RECORDS

SHWS: Inactive Hazardous Waste Disposal Sites in New York State

Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 02/05/2008
Date Data Arrived at EDR: 03/13/2008
Date Made Active in Reports: 04/09/2008
Number of Days to Update: 27

Source: Department of Environmental Conservation
Telephone: 518-402-9622
Last EDR Contact: 03/13/2008
Next Scheduled EDR Contact: 06/09/2008
Data Release Frequency: Annually

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

VCP: Voluntary Cleanup Agreements
New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

RES DECL: Restrictive Declarations Listing
A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

E DESIGNATION: E DESIGNATION SITE LISTING
The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2005

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: PennWell Corporation
Telephone: (800) 823-6277
This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

BLOCK 2494, LOT 1
14 DUPONT STREET
BROOKLYN, NY 11222

TARGET PROPERTY COORDINATES

Latitude (North):	40.73542 - 40˚ 44' 7.5''
Longitude (West):	73.95866 - 73˚ 57' 31.2''
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	587930.6
UTM Y (Meters):	4509697.0
Elevation:	12 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	40073-F8 BROOKLYN, NY
Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 12 ft.

0 1/2 1 Miles

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
KINGS, NY	Not Available

Flood Plain Panel at Target Property:	3604970047B
Additional Panels in search area:	3604970040B 3604970039B 3604970048B

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BROOKLYN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Paleozoic
System:	Ordovician
Series:	Middle Ordovician (Mohawkian)
Code:	O2 *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	URBAN LAND
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 10 inches
Depth to Bedrock Max:	> 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW[R] Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EDR Site Report™

EDR® Environmental Data Resources Inc

440 Wheelers Farms Road
Milford, CT 06461
Toll Free: 800.352.0050
www.edrnet.com

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of over 4 million government records from more than 600 federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary . . . . . Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports . . . . . Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases Searched and Update Information. . . . . Page 5

Name, source, update dates, contact phone number and description of each of the databases searched for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 1: FACILITY SUMMARY

FACILITY AREA	FACILITY 1 **CONSOLIDATED EDISON** MH64829-FRANKLIN ST / DUPONT BROOKLYN, NY EDR ID #1009243079
WASTE MANAGEMENT Facility generates hazardous waste (RCRA)	NO
Facility treats, stores, or disposes of hazardous waste on-site (RCRA/TSDF)	NO
Facility has received Notices of Violations (RCRA/VIOL)	NO
Facility has been subject to RCRA administrative actions (RAATS)	NO
Facility has been subject to corrective actions (CORRACTS)	NO
Facility handles PCBs (PADS)	NO
Facility uses radioactive materials (MLTS)	NO
Facility manages registered aboveground storage tanks (AST)	NO
Facility manages registered underground storage tanks (UST)	NO
Facility has reported leaking underground storage tank incidents (LUST)	NO
Facility has reported emergency releases to the soil (ERNS)	NO
Facility has reported hazardous material incidents to DOT (HMIRS)	NO
WASTE DISPOSAL Facility is a Superfund Site (NPL)	NO
Facility has a known or suspect abandoned, inactive or uncontrolled hazardous waste site (CERCLIS)	NO
Facility has a reported Superfund Lien on it (LIENS)	NO
Facility is listed as a state hazardous waste site (SHWS)	NO
Facility has disposed of solid waste on-site (SWF/LF)	NO
MULTIMEDIA Facility uses toxic chemicals and has notified EPA under SARA Title III, Section 313 (TRIS)	NO
Facility produces pesticides and has notified EPA under Section 7 of FIFRA (SSTS)	NO
Facility manufactures or imports toxic chemicals on the TSCA list (TSCA)	NO
Facility has inspections under FIFRA, TSCA or EPCRA (FTTS)	NO
Facility is listed in EPA's index system (FINDS)	NO
Facility is listed in a county/local unique database (LOCAL)	**YES - p4**
POTENTIAL SUPERFUND LIABILITY Facility has a list of potentially responsible parties PRP	NO
TOTAL (YES)	1

SECTION 2: FACILITY DETAIL REPORTS

MULTIMEDIA

Facility is listed in a county/local unique database

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

WASTE MANAGEMENT

RCRA-TSDF: RCRA - Transporters, Storage and Disposal
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 08/18/2008

RCRA-LQG: RCRA - Large Quantity Generators
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 08/18/2008

RCRA-SQG: RCRA - Small Quantity Generators
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 08/18/2008

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generator
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Varies — Date of Next Scheduled Update: 08/18/2008

RCRA-NonGen: RCRA - Non Generators
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Varies — Date of Next Scheduled Update: 08/18/2008

BRS: Biennial Reporting System
Source: EPA/NTIS
Telephone: 800-424-9346
The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2005 — Date of Last EDR Contact: 03/13/2008
Database Release Frequency: Biennially — Date of Next Scheduled Update: 06/09/2008

RAATS: RCRA Administrative Action Tracking System
Source: EPA
Telephone: 202-564-4104
RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 — Date of Last EDR Contact: 03/03/2008
Database Release Frequency: No Update Planned — Date of Next Scheduled Update: 06/02/2008

CORRACTS: Corrective Action Report
Source: EPA
Telephone: 800-424-9346
CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/26/2008 — Date of Last EDR Contact: 03/03/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 06/02/2008

PADS: PCB Activity Database System
Source: EPA
Telephone: 202-566-0500
PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 12/04/2007 — Date of Last EDR Contact: 05/09/2008
Database Release Frequency: Annually — Date of Next Scheduled Update: 08/04/2008

MLTS: Material Licensing Tracking System
Source: Nuclear Regulatory Commission
Telephone: 301-415-7169
MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 01/15/2008 — Date of Last EDR Contact: 03/31/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 06/30/2008

NY AST: Petroleum Bulk Storage
Source: Department of Environmental Conservation
Telephone: 518-402-9549
Registered Aboveground Storage Tanks.

Date of Government Version: 03/28/2008 — Date of Last EDR Contact: 04/23/2008
Database Release Frequency: No Update Planned — Date of Next Scheduled Update: 07/21/2008

NY UST: Petroleum Bulk Storage (PBS) Database
Source: Department of Environmental Conservation
Telephone: 518-402-9549
Facilities that have petroleum storage capacities in excess of 1,100 gallons and less than 400,000 gallons.

Date of Government Version: 03/28/2008 — Date of Last EDR Contact: 04/23/2008
Database Release Frequency: No Update Planned — Date of Next Scheduled Update: 07/21/2008

ERNS: Emergency Response Notification System
Source: National Response Center, United States Coast Guard
Telephone: 202-267-2180
Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2007
Database Release Frequency: Annually
Date of Last EDR Contact: 04/22/2008
Date of Next Scheduled Update: 07/21/2008

HMIRS: Hazardous Materials Information Reporting System
Source: U.S. Department of Transportation
Telephone: 202-366-4555
Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/31/2007
Database Release Frequency: Annually
Date of Last EDR Contact: 04/16/2008
Date of Next Scheduled Update: 07/14/2008

WASTE DISPOSAL

NPL: National Priority List
Source: EPA
Telephone: Not reported
National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/31/2008
Date Made Active at EDR: 03/17/2008
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 02/08/2008
Elapsed ASTM Days: 38
Date of Last EDR Contact: 04/28/2008

Proposed NPL: Proposed National Priority List Sites
Source: EPA
Telephone: Not reported
A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/31/2008
Date Made Active at EDR: 03/17/2008
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 02/04/2008
Elapsed ASTM Days: 42
Date of Last EDR Contact: 04/28/2008

DELISTED NPL: National Priority List Deletions
Source: EPA
Telephone: Not reported
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/31/2008
Date Made Active at EDR: 03/17/2008
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 02/08/2008
Elapsed ASTM Days: 38
Date of Last EDR Contact: 04/28/2008

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
Source: EPA
Telephone: 703-412-9810
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/08/2008
Date Made Active at EDR: 05/21/2008
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 04/25/2008
Elapsed ASTM Days: 26
Date of Last EDR Contact: 04/25/2008

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Source: EPA
Telephone: 703-412-9810
Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007
Database Release Frequency: Quarterly
Date of Last EDR Contact: 05/20/2008
Date of Next Scheduled Update: 06/16/2008

ROD: Records Of Decision
Source: EPA
Telephone: 703-416-0223
Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 01/14/2008
Database Release Frequency: Annually
Date of Last EDR Contact: 03/31/2008
Date of Next Scheduled Update: 06/30/2008

NPL LIENS: Federal Superfund Liens
Source: EPA
Telephone: 202-564-4267
Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Made Active at EDR: 03/30/1994
Database Release Frequency: No Update Planned
Date of Data Arrival at EDR: 02/02/1994

MULTIMEDIA

TRIS: Toxic Chemical Release Inventory System
Source: EPA
Telephone: 202-566-0250
Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2006
Database Release Frequency: Annually
Date of Last EDR Contact: 02/29/2008
Date of Next Scheduled Update: 06/16/2008

SSTS: Section 7 Tracking Systems
Source: EPA
Telephone: 202-564-4203
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2006 — Date of Last EDR Contact: 04/14/2008
Database Release Frequency: Annually — Date of Next Scheduled Update: 07/14/2008

TSCA: Toxic Substances Control Act
Source: EPA
Telephone: 202-260-5521
Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002 — Date of Last EDR Contact: 04/28/2008
Database Release Frequency: N/A — Date of Next Scheduled Update: 07/14/2008

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Telephone: 202-566-1667
FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/11/2008 — Date of Last EDR Contact: 03/17/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 06/16/2008

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
Source: EPA
Telephone: 202-566-1667
A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/11/2008 — Date of Last EDR Contact: 03/17/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 06/16/2008

FINDS: Facility Index System/Facility Registry System
Source: EPA
Telephone: Not reported
Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/03/2008 — Date of Last EDR Contact: 03/31/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 06/30/2008

RMP: Risk Management Plans
Source: Environmental Protection Agency
Telephone: 202-564-8600
When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 03/01/2008 — Date of Last EDR Contact: 05/19/2008
Database Release Frequency: Varies — Date of Next Scheduled Update: 08/18/2008

STORMWATER: Storm Water General Permits
Source: Environmental Protection Agency
Telephone: 202-564-0746
A listing of all facilities with Storm Water General Permits.

Date of Government Version: 06/02/2005
Database Release Frequency: Quarterly
Date of Last EDR Contact: 03/31/2008
Date of Next Scheduled Update: 06/30/2008

US ENG CONTROLS: Engineering Controls Sites List
Source: Environmental Protection Agency
Telephone: 703-603-0695
A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 04/04/2008
Database Release Frequency: Varies
Date of Last EDR Contact: 03/31/2008
Date of Next Scheduled Update: 06/30/2008

US INST CONTROL: Sites with Institutional Controls
Source: Environmental Protection Agency
Telephone: 703-603-0695
A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 04/04/2008

Date of Next Scheduled Update: 06/30/2008

INDIAN LUST R1: Leaking Underground Storage Tanks on Indian Land
Source: EPA Region 1
Telephone: 617-918-1313
A listing of leaking underground storage tank locations on Indian Land.

Date of Government Version: 03/12/2008
Database Release Frequency: Varies
Date of Last EDR Contact: 05/19/2008
Date of Next Scheduled Update: 08/18/2008

RADINFO: Radiation Information Database
Source: Environmental Protection Agency
Telephone: 202-343-9775
The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 04/29/2008
Database Release Frequency: Quarterly
Date of Last EDR Contact: 05/01/2008
Date of Next Scheduled Update: 07/28/2008

LUCIS: Land Use Control Information System
Source: Department of the Navy
Telephone: 843-820-7326
LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005
Database Release Frequency: Varies
Date of Last EDR Contact: 03/10/2008
Date of Next Scheduled Update: 06/09/2008

CDL: Clandestine Drug Labs
Source: Drug Enforcement Administration
Telephone: 202-307-1000
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Database Release Frequency: Quarterly
Date of Last EDR Contact: 03/28/2008
Date of Next Scheduled Update: 06/23/2008

NY HSWDS: Hazardous Substance Waste Disposal Site Inventory
Source: Department of Environmental Conservation
Telephone: 518-402-9564
The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

Date of Government Version: 01/01/2003
Database Release Frequency: No Update Planned
Date of Last EDR Contact: 05/27/2008
Date of Next Scheduled Update: 08/25/2008

EDR Site Report™

EDR® Environmental Data Resources Inc

440 Wheelers Farms Road
Milford, CT 06461
Toll Free: 800.352.0050
www.edrnet.com

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of over 4 million government records from more than 600 federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary . . . . . Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports . . . . . Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases Searched and Update Information. . . . . Page 7

Name, source, update dates, contact phone number and description of each of the databases searched for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 1: FACILITY SUMMARY

FACILITY AREA	FACILITY 1 **LOT 6,TAXBLOCK 2494** WEST STREET BROOKLYN, NY 11222 EDR ID #S108469859
WASTE MANAGEMENT Facility generates hazardous waste (RCRA)	NO
Facility treats, stores, or disposes of hazardous waste on-site (RCRA/TSDF)	NO
Facility has received Notices of Violations (RCRA/VIOL)	NO
Facility has been subject to RCRA administrative actions (RAATS)	NO
Facility has been subject to corrective actions (CORRACTS)	NO
Facility handles PCBs (PADS)	NO
Facility uses radioactive materials (MLTS)	NO
Facility manages registered aboveground storage tanks (AST)	NO
Facility manages registered underground storage tanks (UST)	NO
Facility has reported leaking underground storage tank incidents (LUST)	NO
Facility has reported emergency releases to the soil (ERNS)	NO
Facility has reported hazardous material incidents to DOT (HMIRS)	NO
WASTE DISPOSAL Facility is a Superfund Site (NPL)	NO
Facility has a known or suspect abandoned, inactive or uncontrolled hazardous waste site (CERCLIS)	NO
Facility has a reported Superfund Lien on it (LIENS)	NO
Facility is listed as a state hazardous waste site (SHWS)	NO
Facility has disposed of solid waste on-site (SWF/LF)	NO
MULTIMEDIA Facility uses toxic chemicals and has notified EPA under SARA Title III, Section 313 (TRIS)	NO
Facility produces pesticides and has notified EPA under Section 7 of FIFRA (SSTS)	NO
Facility manufactures or imports toxic chemicals on the TSCA list (TSCA)	NO
Facility has inspections under FIFRA, TSCA or EPCRA (FTTS)	NO
Facility is listed in EPA's index system (FINDS)	NO
Facility is listed in a county/local unique database (LOCAL)	**YES - p4**
POTENTIAL SUPERFUND LIABILITY Facility has a list of potentially responsible parties PRP	NO
TOTAL (YES)	1

SECTION 2: FACILITY DETAIL REPORTS

MULTIMEDIA

Facility is listed in a county/local unique database

DATABASE: State/County (LOCAL)

LOT 6,TAXBLOCK 2494
WEST STREET
BROOKLYN, NY 11222
EDR ID #S108469859

E DESIGNATION:

Tax Lot(s):	6
E-No:	E-138
Effective Date:	5/11/2005
Satisfaction Date:	Not reported
Ceqr Number:	04DCP003K
Ulurp Number:	050110 ZRK, 050111 ZMK, 050415 MMK, 040416 MMK, 040417 MMK, 040418 MMK, 050110 (A) ZRK, 050111 (A) ZMK

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

WASTE MANAGEMENT

RCRA-TSDF: RCRA - Transporters, Storage and Disposal
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 08/18/2008

RCRA-LQG: RCRA - Large Quantity Generators
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 08/18/2008

RCRA-SQG: RCRA - Small Quantity Generators
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 08/18/2008

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generator
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Varies — Date of Next Scheduled Update: 08/18/2008

RCRA-NonGen: RCRA - Non Generators
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Varies — Date of Next Scheduled Update: 08/18/2008

BRS: Biennial Reporting System
Source: EPA/NTIS
Telephone: 800-424-9346
The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2005 | Date of Last EDR Contact: 03/13/2008
Database Release Frequency: Biennially | Date of Next Scheduled Update: 06/09/2008

RAATS: RCRA Administrative Action Tracking System
Source: EPA
Telephone: 202-564-4104
RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 | Date of Last EDR Contact: 03/03/2008
Database Release Frequency: No Update Planned | Date of Next Scheduled Update: 06/02/2008

CORRACTS: Corrective Action Report
Source: EPA
Telephone: 800-424-9346
CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/26/2008 | Date of Last EDR Contact: 03/03/2008
Database Release Frequency: Quarterly | Date of Next Scheduled Update: 06/02/2008

PADS: PCB Activity Database System
Source: EPA
Telephone: 202-566-0500
PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 12/04/2007 | Date of Last EDR Contact: 05/09/2008
Database Release Frequency: Annually | Date of Next Scheduled Update: 08/04/2008

MLTS: Material Licensing Tracking System
Source: Nuclear Regulatory Commission
Telephone: 301-415-7169
MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 01/15/2008 | Date of Last EDR Contact: 03/31/2008
Database Release Frequency: Quarterly | Date of Next Scheduled Update: 06/30/2008

NY AST: Petroleum Bulk Storage
Source: Department of Environmental Conservation
Telephone: 518-402-9549
Registered Aboveground Storage Tanks.

Date of Government Version: 03/28/2008 | Date of Last EDR Contact: 04/23/2008
Database Release Frequency: No Update Planned | Date of Next Scheduled Update: 07/21/2008

NY UST: Petroleum Bulk Storage (PBS) Database
Source: Department of Environmental Conservation
Telephone: 518-402-9549
Facilities that have petroleum storage capacities in excess of 1,100 gallons and less than 400,000 gallons.

Date of Government Version: 03/28/2008 | Date of Last EDR Contact: 04/23/2008
Database Release Frequency: No Update Planned | Date of Next Scheduled Update: 07/21/2008

ERNS: Emergency Response Notification System
Source: National Response Center, United States Coast Guard
Telephone: 202-267-2180
Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2007
Database Release Frequency: Annually
Date of Last EDR Contact: 04/22/2008
Date of Next Scheduled Update: 07/21/2008

HMIRS: Hazardous Materials Information Reporting System
Source: U.S. Department of Transportation
Telephone: 202-366-4555
Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/31/2007
Database Release Frequency: Annually
Date of Last EDR Contact: 04/16/2008
Date of Next Scheduled Update: 07/14/2008

WASTE DISPOSAL

NPL: National Priority List
Source: EPA
Telephone: Not reported
National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/31/2008
Date Made Active at EDR: 03/17/2008
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 02/08/2008
Elapsed ASTM Days: 38
Date of Last EDR Contact: 04/28/2008

Proposed NPL: Proposed National Priority List Sites
Source: EPA
Telephone: Not reported
A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/31/2008
Date Made Active at EDR: 03/17/2008
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 02/04/2008
Elapsed ASTM Days: 42
Date of Last EDR Contact: 04/28/2008

DELISTED NPL: National Priority List Deletions
Source: EPA
Telephone: Not reported
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/31/2008
Date Made Active at EDR: 03/17/2008
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 02/08/2008
Elapsed ASTM Days: 38
Date of Last EDR Contact: 04/28/2008

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
Source: EPA
Telephone: 703-412-9810
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/08/2008
Date Made Active at EDR: 05/21/2008
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 04/25/2008
Elapsed ASTM Days: 26
Date of Last EDR Contact: 04/25/2008

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Source: EPA
Telephone: 703-412-9810
Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007
Database Release Frequency: Quarterly
Date of Last EDR Contact: 05/20/2008
Date of Next Scheduled Update: 06/16/2008

ROD: Records Of Decision
Source: EPA
Telephone: 703-416-0223
Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 01/14/2008
Database Release Frequency: Annually
Date of Last EDR Contact: 03/31/2008
Date of Next Scheduled Update: 06/30/2008

NPL LIENS: Federal Superfund Liens
Source: EPA
Telephone: 202-564-4267
Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Made Active at EDR: 03/30/1994
Database Release Frequency: No Update Planned
Date of Data Arrival at EDR: 02/02/1994
Elapsed ASTM Days: 56
Date of Last EDR Contact: 05/19/2008

NY SHWS: Inactive Hazardous Waste Disposal Sites in New York State
Source: Department of Environmental Conservation
Telephone: 518-402-9622
Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 02/05/2008
Database Release Frequency: Annually
Date of Last EDR Contact: 03/13/2008
Date of Next Scheduled Update: 06/09/2008

NY SWF/LF: Facility Register
Source: Department of Environmental Conservation
Telephone: 518-457-2051
Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 05/02/2008
Database Release Frequency: Semi-Annually
Date of Last EDR Contact: 04/28/2008
Date of Next Scheduled Update: 07/28/2008

MULTIMEDIA

TRIS: Toxic Chemical Release Inventory System
Source: EPA
Telephone: 202-566-0250
Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2006
Database Release Frequency: Annually
Date of Last EDR Contact: 02/29/2008
Date of Next Scheduled Update: 06/16/2008

SSTS: Section 7 Tracking Systems
Source: EPA
Telephone: 202-564-4203
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2006 — Date of Last EDR Contact: 04/14/2008
Database Release Frequency: Annually — Date of Next Scheduled Update: 07/14/2008

TSCA: Toxic Substances Control Act
Source: EPA
Telephone: 202-260-5521
Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002 — Date of Last EDR Contact: 04/28/2008
Database Release Frequency: N/A — Date of Next Scheduled Update: 07/14/2008

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Telephone: 202-566-1667
FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/11/2008 — Date of Last EDR Contact: 03/17/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 06/16/2008

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
Source: EPA
Telephone: 202-566-1667
A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/11/2008 — Date of Last EDR Contact: 03/17/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 06/16/2008

FINDS: Facility Index System/Facility Registry System
Source: EPA
Telephone: Not reported
Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/03/2008 — Date of Last EDR Contact: 03/31/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 06/30/2008

RMP: Risk Management Plans
Source: Environmental Protection Agency
Telephone: 202-564-8600
When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 03/01/2008 — Date of Last EDR Contact: 05/19/2008
Database Release Frequency: Varies — Date of Next Scheduled Update: 08/18/2008

STORMWATER: Storm Water General Permits
Source: Environmental Protection Agency
Telephone: 202-564-0746
A listing of all facilities with Storm Water General Permits.

Date of Government Version: 06/02/2005
Database Release Frequency: Quarterly
Date of Last EDR Contact: 03/31/2008
Date of Next Scheduled Update: 06/30/2008

US ENG CONTROLS: Engineering Controls Sites List
Source: Environmental Protection Agency
Telephone: 703-603-0695
A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 04/04/2008
Database Release Frequency: Varies
Date of Last EDR Contact: 03/31/2008
Date of Next Scheduled Update: 06/30/2008

US INST CONTROL: Sites with Institutional Controls
Source: Environmental Protection Agency
Telephone: 703-603-0695
A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

CDL: Clandestine Drug Labs
Source: Drug Enforcement Administration
Telephone: 202-307-1000
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Database Release Frequency: Quarterly
Date of Last EDR Contact: 03/28/2008
Date of Next Scheduled Update: 06/23/2008

NY HSWDS: Hazardous Substance Waste Disposal Site Inventory
Source: Department of Environmental Conservation
Telephone: 518-402-9564
The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

Date of Government Version: 01/01/2003 — Date of Last EDR Contact: 05/27/2008
Database Release Frequency: No Update Planned — Date of Next Scheduled Update: 08/25/2008

NY DEL SHWS: Delisted Registry Sites
Source: Department of Environmental Conservation
Telephone: 518-402-9622
A database listing of sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites.

Date of Government Version: 02/05/2008 — Date of Last EDR Contact: 03/13/2008
Database Release Frequency: Annually — Date of Next Scheduled Update: 06/09/2008

NY SWRCY: Registered Recycling Facility List
Source: Department of Environmental Conservation
Telephone: 518-402-8705
A listing of recycling facilities.

Date of Government Version: 05/02/2008 — Date of Last EDR Contact: 04/28/2008
Database Release Frequency: Semi-Annually — Date of Next Scheduled Update: 07/28/2008

NY SWTIRE: Registered Waste Tire Storage & Facility List
Source: Department of Environmental Conservation
Telephone: 518-402-8694
A listing of facilities registered to accept waste tires.

Date of Government Version: 08/01/2006 — Date of Last EDR Contact: 05/16/2008
Database Release Frequency: Annually — Date of Next Scheduled Update: 08/11/2008

NY LTANKS: Spills Information Database
Source: Department of Environmental Conservation
Telephone: 518-402-9549
Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

Date of Government Version: 02/05/2008 — Date of Last EDR Contact: 03/13/2008
Database Release Frequency: Varies — Date of Next Scheduled Update: 06/09/2008

NY HIST LTANKS: Listing of Leaking Storage Tanks
Source: Department of Environmental Conservation
Telephone: 518-402-9549
A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database. Department of Environmental Conservation.

Date of Next Scheduled Update: 06/09/2008

NY VCP: Voluntary Cleanup Agreements
Source: Department of Environmental Conservation
Telephone: 518-402-9711
New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

Date of Government Version: 02/05/2008
Database Release Frequency: Semi-Annually
Date of Last EDR Contact: 03/13/2008

NY SPDES: State Pollutant Discharge Elimination System
Source: Department of Environmental Conservation
Telephone: 518-402-8233
New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

NY RES DECL: Restrictive Declarations Listing
Source: NYC Department of City Planning
Telephone: 212-720-3401
A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

NY E DESIGNATION: E DESIGNATION SITE LISTING
Source: New York City Department of City Planning
Telephone: 718-595-6658
The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

Milford, CT 06461
Toll Free: 800.352.0050
www.edrnet.com

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of over 4 million government records from more than 600 federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary . . . . . Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports . . . . . Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases Searched and Update Information. . . . . Page 7

Name, source, update dates, contact phone number and description of each of the databases searched for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

WASTE MANAGEMENT

RCRA-TSDF: RCRA - Transporters, Storage and Disposal
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 08/18/2008

RCRA-LQG: RCRA - Large Quantity Generators
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 08/18/2008

RCRA-SQG: RCRA - Small Quantity Generators
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 08/18/2008

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generator
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Varies — Date of Next Scheduled Update: 08/18/2008

RCRA-NonGen: RCRA - Non Generators
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Varies — Date of Next Scheduled Update: 08/18/2008

BRS: Biennial Reporting System
Source: EPA/NTIS
Telephone: 800-424-9346
The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2005 | Date of Last EDR Contact: 03/13/2008
Database Release Frequency: Biennially | Date of Next Scheduled Update: 06/09/2008

RAATS: RCRA Administrative Action Tracking System
Source: EPA
Telephone: 202-564-4104
RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 | Date of Last EDR Contact: 03/03/2008
Database Release Frequency: No Update Planned | Date of Next Scheduled Update: 06/02/2008

CORRACTS: Corrective Action Report
Source: EPA
Telephone: 800-424-9346
CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/26/2008 | Date of Last EDR Contact: 03/03/2008
Database Release Frequency: Quarterly | Date of Next Scheduled Update: 06/02/2008

PADS: PCB Activity Database System
Source: EPA
Telephone: 202-566-0500
PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 12/04/2007 | Date of Last EDR Contact: 05/09/2008
Database Release Frequency: Annually | Date of Next Scheduled Update: 08/04/2008

MLTS: Material Licensing Tracking System
Source: Nuclear Regulatory Commission
Telephone: 301-415-7169
MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 01/15/2008 | Date of Last EDR Contact: 03/31/2008
Database Release Frequency: Quarterly | Date of Next Scheduled Update: 06/30/2008

NY AST: Petroleum Bulk Storage
Source: Department of Environmental Conservation
Telephone: 518-402-9549
Registered Aboveground Storage Tanks.

Date of Government Version: 03/28/2008 | Date of Last EDR Contact: 04/23/2008
Database Release Frequency: No Update Planned | Date of Next Scheduled Update: 07/21/2008

NY UST: Petroleum Bulk Storage (PBS) Database
Source: Department of Environmental Conservation
Telephone: 518-402-9549
Facilities that have petroleum storage capacities in excess of 1,100 gallons and less than 400,000 gallons.

Date of Government Version: 03/28/2008 | Date of Last EDR Contact: 04/23/2008
Database Release Frequency: No Update Planned | Date of Next Scheduled Update: 07/21/2008

ERNS: Emergency Response Notification System
Source: National Response Center, United States Coast Guard
Telephone: 202-267-2180
Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2007
Database Release Frequency: Annually
Date of Last EDR Contact: 04/22/2008
Date of Next Scheduled Update: 07/21/2008

HMIRS: Hazardous Materials Information Reporting System
Source: U.S. Department of Transportation
Telephone: 202-366-4555
Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Last EDR Contact: 04/16/2008
Date of Next Scheduled Update: 07/14/2008

WASTE DISPOSAL

NPL: National Priority List
Source: EPA
Telephone: Not reported
National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/31/2008
Date Made Active at EDR: 03/17/2008
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 02/08/2008
Elapsed ASTM Days: 38
Date of Last EDR Contact: 04/28/2008

Proposed NPL: Proposed National Priority List Sites
Source: EPA
Telephone: Not reported
A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/31/2008
Date Made Active at EDR: 03/17/2008
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 02/04/2008
Elapsed ASTM Days: 42
Date of Last EDR Contact: 04/28/2008

DELISTED NPL: National Priority List Deletions
Source: EPA
Telephone: Not reported
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/31/2008
Date Made Active at EDR: 03/17/2008
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 02/08/2008
Elapsed ASTM Days: 38
Date of Last EDR Contact: 04/28/2008

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
Source: EPA
Telephone: 703-412-9810
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/08/2008
Date Made Active at EDR: 05/21/2008
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 04/25/2008
Elapsed ASTM Days: 26
Date of Last EDR Contact: 04/25/2008

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Source: EPA
Telephone: 703-412-9810
Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007
Database Release Frequency: Quarterly
Date of Last EDR Contact: 05/20/2008
Date of Next Scheduled Update: 06/16/2008

ROD: Records Of Decision
Source: EPA
Telephone: 703-416-0223
Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 01/14/2008
Database Release Frequency: Annually
Date of Last EDR Contact: 03/31/2008
Date of Next Scheduled Update: 06/30/2008

NPL LIENS: Federal Superfund Liens
Source: EPA
Telephone: 202-564-4267
Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Made Active at EDR: 03/30/1994
Database Release Frequency: No Update Planned
Date of Data Arrival at EDR: 02/02/1994
Elapsed ASTM Days: 56
Date of Last EDR Contact: 05/19/2008

NY SHWS: Inactive Hazardous Waste Disposal Sites in New York State
Source: Department of Environmental Conservation
Telephone: 518-402-9622
Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 02/05/2008
Database Release Frequency: Annually
Date of Last EDR Contact: 03/13/2008
Date of Next Scheduled Update: 06/09/2008

NY SWF/LF: Facility Register
Source: Department of Environmental Conservation
Telephone: 518-457-2051
Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 05/02/2008
Database Release Frequency: Semi-Annually
Date of Last EDR Contact: 04/28/2008
Date of Next Scheduled Update: 07/28/2008

MULTIMEDIA

TRIS: Toxic Chemical Release Inventory System
Source: EPA
Telephone: 202-566-0250
Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2006
Database Release Frequency: Annually
Date of Last EDR Contact: 02/29/2008
Date of Next Scheduled Update: 06/16/2008

SSTS: Section 7 Tracking Systems
Source: EPA
Telephone: 202-564-4203
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2006 — Date of Last EDR Contact: 04/14/2008
Database Release Frequency: Annually — Date of Next Scheduled Update: 07/14/2008

TSCA: Toxic Substances Control Act
Source: EPA
Telephone: 202-260-5521
Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002 — Date of Last EDR Contact: 04/28/2008
Database Release Frequency: N/A — Date of Next Scheduled Update: 07/14/2008

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Telephone: 202-566-1667
FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/11/2008 — Date of Last EDR Contact: 03/17/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 06/16/2008

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
Source: EPA
Telephone: 202-566-1667
A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/11/2008 — Date of Last EDR Contact: 03/17/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 06/16/2008

FINDS: Facility Index System/Facility Registry System
Source: EPA
Telephone: Not reported
Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/03/2008 — Date of Last EDR Contact: 03/31/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 06/30/2008

RMP: Risk Management Plans
Source: Environmental Protection Agency
Telephone: 202-564-8600
When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 03/01/2008 — Date of Last EDR Contact: 05/19/2008
Database Release Frequency: Varies — Date of Next Scheduled Update: 08/18/2008

STORMWATER: Storm Water General Permits
Source: Environmental Protection Agency
Telephone: 202-564-0746
A listing of all facilities with Storm Water General Permits.

Date of Government Version: 06/02/2005
Database Release Frequency: Quarterly
Date of Last EDR Contact: 03/31/2008

Date of Last EDR Contact: 03/28/2008
Date of Next Scheduled Update: 06/23/2008

NY HSWDS: Hazardous Substance Waste Disposal Site Inventory
Source: Department of Environmental Conservation
Telephone: 518-402-9564
The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

Date of Government Version: 01/01/2003 — Date of Last EDR Contact: 05/27/2008
Database Release Frequency: No Update Planned — Date of Next Scheduled Update: 08/25/2008

NY DEL SHWS: Delisted Registry Sites
Source: Department of Environmental Conservation
Telephone: 518-402-9622
A database listing of sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites.

NY ENG CONTROLS: Registry of Engineering Controls
Source: Department of Environmental Conservation
Telephone: 518-402-9553
Environmental Remediation sites that have engineering controls in place.

Date of Government Version: 02/05/2008
Database Release Frequency: Quarterly
Date of Last EDR Contact: 03/13/2008
Date of Next Scheduled Update: 06/09/2008

NY INST CONTROL: Registry of Institutional Controls
Source: Department of Environmental Conservation
Telephone: 518-402-9553
Environmental Remediation sites that have institutional controls in place.

Date of Government Version: 02/05/2008
Database Release Frequency: Quarterly
Date of Last EDR Contact: 03/13/2008
Date of Next Scheduled Update: 06/09/2008

NY VCP: Voluntary Cleanup Agreements
Source: Department of Environmental Conservation
Telephone: 518-402-9711
New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

Date of Government Version: 02/05/2008
Database Release Frequency: Semi-Annually
Date of Last EDR Contact: 03/13/2008

Database Release Frequency: Varies
Date of Last EDR Contact: 05/21/2004
Date of Next Scheduled Update: Not reported

NY BROWNFIELDS: Brownfields Site List
Source: Department of Environmental Conservation
Telephone: 518-402-9764
A Brownfield is any real property where redevelopment or re-use may be complicated by the presence or potential presence of a hazardous waste, petroleum, pollutant, or contaminant.

Date of Government Version: 02/05/2008
Database Release Frequency: Semi-Annually
Date of Last EDR Contact: 03/13/2008
Date of Next Scheduled Update: 06/09/2008

NY SPDES: State Pollutant Discharge Elimination System
Source: Department of Environmental Conservation
Telephone: 518-402-8233
New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

Database Release Frequency: Annually
Date of Last EDR Contact: 05/19/2008
Date of Next Scheduled Update: 08/18/2008

NY CBS: Chemical Bulk Storage Site Listing
Source: Department of Environmental Conservation
Telephone: 518-402-9549
These facilities store regulated hazardous substances in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size

Date of Government Version: 03/28/2008
Database Release Frequency: Quarterly
Date of Last EDR Contact: 04/23/2008
Date of Next Scheduled Update: 07/21/2008

NY RES DECL: Restrictive Declarations Listing
Source: NYC Department of City Planning
Telephone: 212-720-3401
A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

NY E DESIGNATION: E DESIGNATION SITE LISTING
Source: New York City Department of City Planning
Telephone: 718-595-6658
The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of over 4 million government records from more than 600 federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary . . . . . Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports . . . . . Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases Searched and Update Information. . . . . Page 7

Name, source, update dates, contact phone number and description of each of the databases searched for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 1: FACILITY SUMMARY

FACILITY AREA	FACILITY 1 **LOT 425,TAXBLOCK 2472** 65 REAR COMMERCIAL STREET BROOKLYN, NY 11222 EDR ID #S108076612
WASTE MANAGEMENT Facility generates hazardous waste (RCRA)	NO
Facility treats, stores, or disposes of hazardous waste on-site (RCRA/TSDF)	NO
Facility has received Notices of Violations (RCRA/VIOL)	NO
Facility has been subject to RCRA administrative actions (RAATS)	NO
Facility has been subject to corrective actions (CORRACTS)	NO
Facility handles PCBs (PADS)	NO
Facility uses radioactive materials (MLTS)	NO
Facility manages registered aboveground storage tanks (AST)	NO
Facility manages registered underground storage tanks (UST)	NO
Facility has reported leaking underground storage tank incidents (LUST)	NO
Facility has reported emergency releases to the soil (ERNS)	NO
Facility has reported hazardous material incidents to DOT (HMIRS)	NO
WASTE DISPOSAL Facility is a Superfund Site (NPL)	NO
Facility has a known or suspect abandoned, inactive or uncontrolled hazardous waste site (CERCLIS)	NO
Facility has a reported Superfund Lien on it (LIENS)	NO
Facility is listed as a state hazardous waste site (SHWS)	NO
Facility has disposed of solid waste on-site (SWF/LF)	NO
MULTIMEDIA Facility uses toxic chemicals and has notified EPA under SARA Title III, Section 313 (TRIS)	NO
Facility produces pesticides and has notified EPA under Section 7 of FIFRA (SSTS)	NO
Facility manufactures or imports toxic chemicals on the TSCA list (TSCA)	NO
Facility has inspections under FIFRA, TSCA or EPCRA (FTTS)	NO
Facility is listed in EPA's index system (FINDS)	NO
Facility is listed in a county/local unique database (LOCAL)	**YES - p4**
POTENTIAL SUPERFUND LIABILITY Facility has a list of potentially responsible parties PRP	NO
TOTAL (YES)	1

MULTIMEDIA

Facility is listed in a county/local unique database

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

WASTE MANAGEMENT

RCRA-TSDF: RCRA - Transporters, Storage and Disposal
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 08/18/2008

RCRA-LQG: RCRA - Large Quantity Generators
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 08/18/2008

RCRA-SQG: RCRA - Small Quantity Generators
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 08/18/2008

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generator
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Varies — Date of Next Scheduled Update: 08/18/2008

RCRA-NonGen: RCRA - Non Generators
Source: Environmental Protection Agency
Telephone: 703-308-0035
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 03/06/2008 — Date of Last EDR Contact: 05/21/2008
Database Release Frequency: Varies — Date of Next Scheduled Update: 08/18/2008

BRS: Biennial Reporting System
Source: EPA/NTIS
Telephone: 800-424-9346
The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2005 — Date of Last EDR Contact: 03/13/2008
Database Release Frequency: Biennially — Date of Next Scheduled Update: 06/09/2008

RAATS: RCRA Administrative Action Tracking System
Source: EPA
Telephone: 202-564-4104
RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 — Date of Last EDR Contact: 03/03/2008
Database Release Frequency: No Update Planned — Date of Next Scheduled Update: 06/02/2008

CORRACTS: Corrective Action Report
Source: EPA
Telephone: 800-424-9346
CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/26/2008 — Date of Last EDR Contact: 06/02/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 09/01/2008

PADS: PCB Activity Database System
Source: EPA
Telephone: 202-566-0500
PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 12/04/2007 — Date of Last EDR Contact: 05/30/2008
Database Release Frequency: Annually — Date of Next Scheduled Update: 08/04/2008

MLTS: Material Licensing Tracking System
Source: Nuclear Regulatory Commission
Telephone: 301-415-7169
MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 01/15/2008 — Date of Last EDR Contact: 03/31/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 06/30/2008

NY AST: Petroleum Bulk Storage
Source: Department of Environmental Conservation
Telephone: 518-402-9549
Registered Aboveground Storage Tanks.

Date of Government Version: 03/28/2008 — Date of Last EDR Contact: 04/23/2008
Database Release Frequency: No Update Planned — Date of Next Scheduled Update: 07/21/2008

NY UST: Petroleum Bulk Storage (PBS) Database
Source: Department of Environmental Conservation
Telephone: 518-402-9549
Facilities that have petroleum storage capacities in excess of 1,100 gallons and less than 400,000 gallons.

Date of Government Version: 03/28/2008 — Date of Last EDR Contact: 04/23/2008
Database Release Frequency: No Update Planned — Date of Next Scheduled Update: 07/21/2008

ERNS: Emergency Response Notification System
Source: National Response Center, United States Coast Guard
Telephone: 202-267-2180
Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2007
Database Release Frequency: Annually
Date of Last EDR Contact: 04/22/2008
Date of Next Scheduled Update: 07/21/2008

HMIRS: Hazardous Materials Information Reporting System
Source: U.S. Department of Transportation
Telephone: 202-366-4555
Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/31/2007
Database Release Frequency: Annually
Date of Last EDR Contact: 04/16/2008
Date of Next Scheduled Update: 07/14/2008

WASTE DISPOSAL

NPL: National Priority List
Source: EPA
Telephone: Not reported
National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/31/2008
Date Made Active at EDR: 03/17/2008
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 02/08/2008
Elapsed ASTM Days: 38
Date of Last EDR Contact: 04/28/2008

Proposed NPL: Proposed National Priority List Sites
Source: EPA
Telephone: Not reported
A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/31/2008
Date Made Active at EDR: 03/17/2008
Database Release Frequency: Quarterly

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
Source: EPA
Telephone: 703-412-9810
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/08/2008
Date Made Active at EDR: 05/21/2008
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 04/25/2008
Elapsed ASTM Days: 26
Date of Last EDR Contact: 04/25/2008

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Source: EPA
Telephone: 703-412-9810
Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007
Database Release Frequency: Quarterly
Date of Last EDR Contact: 05/20/2008
Date of Next Scheduled Update: 06/16/2008

ROD: Records Of Decision
Source: EPA
Telephone: 703-416-0223
Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 01/14/2008
Database Release Frequency: Annually
Date of Last EDR Contact: 03/31/2008
Date of Next Scheduled Update: 06/30/2008

NPL LIENS: Federal Superfund Liens
Source: EPA
Telephone: 202-564-4267
Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Made Active at EDR: 03/30/1994

MULTIMEDIA

TRIS: Toxic Chemical Release Inventory System
Source: EPA
Telephone: 202-566-0250
Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2006
Database Release Frequency: Annually
Date of Last EDR Contact: 02/29/2008
Date of Next Scheduled Update: 06/16/2008

SSTS: Section 7 Tracking Systems
Source: EPA
Telephone: 202-564-4203
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2006 — Date of Last EDR Contact: 04/14/2008
Database Release Frequency: Annually — Date of Next Scheduled Update: 07/14/2008

TSCA: Toxic Substances Control Act
Source: EPA
Telephone: 202-260-5521
Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002 — Date of Last EDR Contact: 04/28/2008
Database Release Frequency: N/A — Date of Next Scheduled Update: 07/14/2008

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Telephone: 202-566-1667
FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/11/2008 — Date of Last EDR Contact: 03/17/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 06/16/2008

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
Source: EPA
Telephone: 202-566-1667
A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/11/2008 — Date of Last EDR Contact: 03/17/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 06/16/2008

FINDS: Facility Index System/Facility Registry System
Source: EPA
Telephone: Not reported
Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/03/2008 — Date of Last EDR Contact: 03/31/2008
Database Release Frequency: Quarterly — Date of Next Scheduled Update: 06/30/2008

RMP: Risk Management Plans
Source: Environmental Protection Agency
Telephone: 202-564-8600
When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 03/01/2008 — Date of Last EDR Contact: 05/19/2008
Database Release Frequency: Varies — Date of Next Scheduled Update: 08/18/2008

STORMWATER: Storm Water General Permits
Source: Environmental Protection Agency
Telephone: 202-564-0746
A listing of all facilities with Storm Water General Permits.

Date of Government Version: 06/02/2005
Database Release Frequency: Quarterly
Date of Last EDR Contact: 03/31/2008
Date of Next Scheduled Update: 06/30/2008

US ENG CONTROLS: Engineering Controls Sites List
Source: Environmental Protection Agency
Telephone: 703-603-0695
A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 04/04/2008
Database Release Frequency: Varies
Date of Last EDR Contact: 03/31/2008
Date of Next Scheduled Update: 06/30/2008

US INST CONTROL: Sites with Institutional Controls
Source: Environmental Protection Agency
Telephone: 703-603-0695
A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 04/04/2008

Date of Last EDR Contact: 03/31/2008
Date of Next Scheduled Update: 06/30/2008

INDIAN LUST R1: Leaking Underground Storage Tanks on Indian Land
Source: EPA Region 1
Telephone: 617-918-1313
A listing of leaking underground storage tank locations on Indian Land.

Date of Government Version: 03/12/2008
Database Release Frequency: Varies
Date of Last EDR Contact: 05/19/2008
Date of Next Scheduled Update: 08/18/2008

RADINFO: Radiation Information Database
Source: Environmental Protection Agency
Telephone: 202-343-9775
The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 04/29/2008
Database Release Frequency: Quarterly
Date of Last EDR Contact: 05/01/2008
Date of Next Scheduled Update: 07/28/2008

LUCIS: Land Use Control Information System
Source: Department of the Navy
Telephone: 843-820-7326
LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005
Database Release Frequency: Varies
Date of Last EDR Contact: 03/10/2008
Date of Next Scheduled Update: 06/09/2008

CDL: Clandestine Drug Labs
Source: Drug Enforcement Administration
Telephone: 202-307-1000
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 09/01/2007

Date of Last EDR Contact: 03/28/2008
Date of Next Scheduled Update: 06/23/2008

NY HSWDS: Hazardous Substance Waste Disposal Site Inventory
Source: Department of Environmental Conservation
Telephone: 518-402-9564
The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

Date of Government Version: 01/01/2003 — Date of Last EDR Contact: 05/27/2008
Database Release Frequency: No Update Planned — Date of Next Scheduled Update: 08/25/2008

NY DEL SHWS: Delisted Registry Sites
Source: Department of Environmental Conservation
Telephone: 518-402-9622

EDR City Directory Abstract

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening report designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SUMMARY

- ***City Directories:***

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2005. (These years are not necessarily inclusive.) A summary of the information obtained is provided in the text of this report.

This report compiles information by geocoding the subject properties (that is, plotting the latitude and longitude for such subject properties and obtaining data concerning properties within 100.32 Feet of the subject properties). There is no warranty or guarantee that geocoding will report or list all properties within the specified radius of the subject properties and any such warranty or guarantee is expressly disclaimed. Accordingly, some properties within the aforementioned radius and the information concerning those properties may not be referenced in this report.

The EDR Environmental LienSearch™ Report

Environmental Data Resources Inc

440 Wheelers Farms Road
Milford, CT 06461
800.352.0050
www.edrnet.com

The EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

BARGAIN AND SALE DEED
WITH COVENANT AGAINST GRANTOR'S ACTS

THIS INDENTURE, made the 31ST day of October, 2005, between LUMBER EXCHANGE TERMINAL, INC., a New York corporation as successor by merger to Green Street Terminal Corp., Oceania Tracking & Shipping Corporation, and East River Shipping & Warehouse Corp., having an address at 171 West Street, Brooklyn, New York, 11222, party of the first part, and GREENPOINT LANDING ASSOCIATES, L.L.C., a New York limited liability company, having an address at c/o Park Tower Group, Ltd., 499 Park Avenue, New York, New York 10022, party of the second part,

WITNESSETH, that the party of the first part, in consideration of Ten and No/100ths dollars and other valuable consideration, in lawful money of the United States, paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs, successors and assigns of the party of the second part forever.

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situated, lying and being in the

CITY OF NEW YORK
COUNTY OF KINGS
STATE OF NEW YORK, AS MORE PARTICULARLY
DESCRIBED ON EXHIBIT A ATTACHED HERETO
AND MADE A PART HEREOF.

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof;

TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises;

TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been incumbered in any way whatever, except as set forth on Exhibit B attached hereto.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

IN PRESENCE OF

SELLER

LUMBER EXCHANGE TERMINAL, INC.

By: _____
Name: Stephen Stulman
Title: President.

EXHIBIT A

Legal Description

Parcel I

ALL that certain lot, piece or parcel of land, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, bounded and described as follows:

Bounded on the north by Freeman Street and the westerly prolongation thereof, bounded on the east by West Street, bounded on the south by the center line of the block between Green Street as formerly laid on the Map of the City of Brooklyn and Huron Street and the westerly prolongation thereof, and bounded on the west by the East River.

Together with all right title and interest in and to the lands under the waters of the East River in front of and adjoining said premises, to the pierhead line as established in 1957.

Parcel II

ALL that certain lot, piece or parcel of land, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, bounded and described as follows:

BEGINNING at the intersection of the center line of Freeman Street with the westerly side of West Street;

RUNNING THENCE northerly along the westerly side of West Street, 290 feet to the northerly side of Eagle Street;

THENCE easterly along the northerly side of Eagle Street, 255 feet;

THENCE northerly parallel with Franklin Street, 100 feet;

THENCE easterly parallel with Eagle Street, 200 feet to the westerly side of Franklin Street;

THENCE northerly along the westerly side of Franklin Street, 100 feet to the southerly side of Dupont Street;

THENCE westerly along the southerly side of Dupont Street, 295 feet;

THENCE southerly and parallel with the aforementioned westerly side of Franklin Street, 90 feet;

THENCE westerly and parallel with the aforementioned southerly side of Dupont Street, 130 feet to a point in the center line of West Street, as projected northerly from Eagle Street;

THENCE southerly along the center line of West Street, as projected 5 feet;

THENCE westerly along the southerly line of land taken for the State Barge Canal Terminal to the pierhead line approved by The Secretary of War on November 20, 1940;

THENCE generally in a southerly direction along the said pierhead line and along the pier line established by Chapter 628 of the Laws of 1886 to a point where the northerly line of Freeman Street, if extended westerly, would intersect the said pierhead line;

THENCE easterly along the northerly side of Freeman Street so as extended, 420 feet to the exterior bulkhead line;

THENCE southwesterly along the said bulkhead line, 30 feet 1 3/8 inches to the center line of Freeman Street as proposed; and

THENCE easterly along said center line of Freeman Street, 637 feet 7 1/2 inches to the point or place of BEGINNING.

Parcel III

ALL that certain lot, piece or parcel of land, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, bounded and described as follows:

BEGINNING at a point on the northwesterly side of Commercial Street distant 663 feet 3 inches southwesterly from the westerly side of Manhattan Avenue measured along the northwesterly side of Commercial Street which point of beginning is where the southwesterly side of the land now or formerly of B & Q Service Company Inc. intersects the northwesterly side of Commercial Street;

RUNNING THENCE southwesterly along the northwesterly side of Commercial Street 652.50 feet to the northeasterly side of land appropriated by the State of New York on or about July 3, 1912 for a Barge Canal Terminal (being the center line of old Blue Street now closed);

THENCE northwesterly along the northeasterly side of said land and along the center line of old Blue Street now closed 511.49 feet to the pierhead line as approved by the Secretary of War July 22, 1916;

THENCE northeasterly along said pierhead line 290.27 feet to an angle therein;

THENCE still northeasterly along said pierhead line 360.24 feet to the land now or formerly of B & Q Service Company Inc.;

THENCE southeasterly along said land now or formerly of B & Q Service Company Inc. 510.73 feet to the northwesterly side of Commercial Street at the point or place of BEGINNING.

EXHIBIT B

Permitted Encumbrances

1. Rights of persons or parties in possession as tenants only, without purchase options or rights of first refusal.

2. Declaration of Single Development Parcels recorded September 21, 2005 as CRFN 2005000528002

3. Notice of Sidewalk Violation Lien docketed on July 11, 2005, Reference No. HWK693W (filed against Parcel II-Block 2494 Lot 1)

As to Parcel I:

1. Survey prepared by Bartlett, Ludlam & Dill Associates dated October 12, 2001, covering premises and more, and shown thereon as Parcel I, shows the following:

   a. Fence located 8 inches south of southerly record line.

   b. Rip rap crosses southerly and northerly record lines.

   c. Permanent sewer easement, 30 feet in width, crosses portion of premises.

   d. Fence extends up to 1 foot 10 inches onto West Street.

   e. Variations between line of fence and line of West Street.

As to Parcel II:

1. Survey made by Bartlett, Ludlam & Dell Associates dated October 12, 2001, covering premises and more, the premises herein being shown and designated thereon as Parcel II, shows the following:

   a) Fences cross premises in various locations.

   b) Rip rap crosses premises in vicinity of mean high water line.

   c) Variations between fences and walls with record lines of title.

   d) Permanent Sewer Easement twenty feet in width crosses northerly portion of premises.

   e) Windows in walls of one-story and three-story buildings on premises adjoining to the southeast are located along property line.

   f) Window guards from three story building on premises adjoining on the southeast project 2 feet 11 inches onto premises herein.

   g) Vent from building on premises adjoining on the southeast projects 1 foot 1 inch onto premises herein.

   h) Phone box from building on premises adjoining on the southeast projects 6 inches onto premises herein.

   i) Light from building on premises adjoining on the southeast projects 8 inches onto premises herein.

j) Wall of 1 story brick building on premises adjoining on the southeast encroaches 1/2 inch onto premises herein.

2. Permanent and Temporary Easements acquired by the City of New York by Condemnation Proceeding filed under Index No. 9908/58 in the Kings County Supreme Court for the acquisition of temporary and permanent easements in the vicinity of Huron, Quay, Green, Eagle and West Streets. (Kent Avenue Intercepting Sewer).

3. Easement Grant to Consolidated Edison Company of New York, Inc., recorded December 1, 1947 in Liber 7227 Page 95.

As to Parcel III:

1. Survey made by Bartlett, Ludlam & Dill Associates dated October 12, 2001 covering premises and more, and the premises herein being shown and designated thereon as Parcel III, shows the following:

    a. Variations between lines of fences and walls and record lines of title.

    b. Rip rap crosses northerly portion of premises.

    c. Frame deck extends outshore of the bulkhead line by as much as 15 feet, 5-1/2 inches.

DECLARATION OF SINGLE DEVELOPMENT PARCEL PURSUANT TO ZONING RESOLUTION SECTION 62-831 AND 62-353 OF THE NEW YORK CITY ZONING RESOLUTION

Greenpoint Landing Associates, L.L.C., a New York Limited Liability Company having an address c/o Park Tower Group, 499 Park Avenue, New York, New York 10022 ("Greenpoint") and the City of New York, having an address at City Hall, New York, New York 10007 (the "City"), acting by and through the Office of the Mayor (the City and Greenpoint hereinafter sometimes collectively referred to as the "Parties"), constituting the sole parties in interest (excepting those parties waiving their respective rights to join therein) as defined in subdivision (f)(4) of Section 12-10, definition of "zoning lot," under the Zoning Resolution of the City of New York, effective December 15, 1961, as amended (the "Zoning Resolution"), with respect to the lands known as Tax Lots 2, 32, and 100 of Block 2472, Tax Lots 1 and 6 of Block 2494, Tax Lot 1 of Block 2502, Tax Lot 1 of Block 2510, and Tax Lot 57 of Block 2520 on the tax map of the City of New York, Borough of Brooklyn, do hereby declare that the contiguous parcels of land identified as "Parcel 5A", "Parcel 5B" and "Parcel 5C" in the Greenpoint-Williamsburg Waterfront Access Plan as set forth in Section 62-831 of the Zoning Resolution (Parcel 5A, Parcel 5B, and Parcel 5C collectively, the "Property," and each individually, a "Parcel"), which Property is described more particularly in Exhibit A annexed hereto, are to be developed as a single parcel pursuant to Section 62-353 of the Zoning Resolution.

The Parties hereto further covenant and agree as follows:

1. All capitalized terms not otherwise specifically defined herein shall have the meaning set forth in Section 12-10 of the Zoning Resolution.

2. Greenpoint hereby covenants and agrees that no Floor Area that would be attributable to Parcel 5A were Parcel 5A considered a separate development parcel

shall be transferred to or used on Parcel 5C, and no Floor Area that would be attributable to Parcel 5C were Parcel 5C a separate development parcel shall be transferred to or used on Parcel 5A.

3. The Parties hereby reserve and retain all development rights attributable to their respective Parcels, including without limitation the rights to use and develop all Floor Area that would be attributable to each Parcel were such Parcel a separate and distinct parcel under Section 62-353 of the Zoning Resolution, including without limitation the right to obtain certain Floor Area bonuses under Section 62-352(b) of the Zoning Resolution for the provision of on-site or off-site housing for "lower income households" (as such term is defined in Section 62-352(a) of the Zoning Resolution), and the Parties shall have the further right to apply for and obtain extended tax benefits for such housing pursuant to Section 421-a of the New York State Real Property Tax Law, Section 11-245.1 of the New York City Administrative Code, and Chapter 6 of Title 28 of the Rules of the City of New York.

4. The parties hereby covenant and agree that the provisions of the Zoning Resolution governing waterfront public access and visual corridors and waterfront access plans shall apply to each Parcel as if such Parcel were a separate and distinct development parcel under the Zoning Resolution.

5. This Declaration and the covenants and agreements contained herein may not be modified except by written agreement executed by all Parties, such agreement to be in writing and in recordable form, provided that in the event that Greenpoint or an affiliate of Greenpoint acquires title to Parcel 5B, the provisions of Paragraph 2, Paragraph 3 and Paragraph 4 hereof shall automatically terminate and be of no further force or effect, and Greenpoint shall have the right without the consent of any other party, to unilaterally record an instrument in the Office of the

City Register against the Property, providing notice that such provisions of this Declaration have been terminated and are of no further force or effect.

6. The covenants and agreements contained in this Declaration shall run with the land and shall be binding upon and shall benefit the successors and assigns of the Parties. Any reference to any of the Parties in this Declaration shall be deemed to include any successors and assigns of such Party with respect to all or any portion of the Property, for such period of time as such successor or assign holds any interest in the Property. This Declaration shall be binding on the Parties upon its execution by both Parties.

IN WITNESS WHEREOF, the Parties hereto have executed this instrument as of this 27 day of May 2005.

EXHIBIT A

Description of Property

PARCEL A

SCHEDULE A

ALL that certain lot, piece or parcel of land, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, bounded and described as follows:

BEGINNING at a point on the northwesterly side of Commercial Street distant 663 feet 3 inches southwesterly from the westerly side of Manhattan Avenue measured along the northwesterly side of Commercial Street which point of beginning is where the southwesterly side of the land now or formerly of B & Q Service Company Inc. intersects the northwesterly side of Commercial Street;

RUNNING THENCE southwesterly along the northwesterly side of Commercial Street 652.50 feet to the northeasterly side of land appropriated by the State of New York on or about July 3, 1912 for a Barge Canal Terminal (being the center line of old Blue Street now closed);

THENCE northwesterly along the northeasterly side of said land and along the center line of old Blue Street now closed 511.49 feet to the pierhead line as approved by the Secretary of War July 22, 1916;

THENCE northeasterly along said pierhead line 290.27 feet to an angle therein;

THENCE still northeasterly along said pierhead line 360.24 feet to the land now or formerly of B & Q Service Company Inc.;

THENCE southeasterly along said land now or formerly of B & Q Service Company Inc. 510.73 feet to the northwesterly side of Commercial Street at the point or place of BEGINNING.

SCHEDULE A
AMENDED MAY 17, 2001

ALL that certain lot, piece or parcel of land, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, bounded and described as follows:

BEGINNING at a point formed by the intersection of the center line of Commercial Street as established at the time of the acquistion of the property herein described by the state of New York between Franklin and West streets and the center line of West street, as established at the time of the acquistion of the property herein described by the state of New York between Dupont and Eagle streets;

THENCE from said point of beginning, southerly and south-easterly along the aforesaid center line of West street, one hundred eighteen and fifty-six hundredths feet to a point formed by the intersection of said center line of West street an a line parallel to the southerly side of Dupont street as laid out west of West street and distant ninety-five feet southerly therefrom;

THENCE along said line eight hundred fifty-five and seventy-five hundredths feet to a point in the pierhead line as established at the time of the acquistion of the property herein described by the state of New York by law;

THENCE northerly, northeasterly and easterly along said pierhead line, one thousand sixty-nine and thirty-two hundredths feet more or less to a point where the center line of Blue street as established at the time of the acquistion of the property herein described by the state of New York, if extended, would intersect the aforesaid pierhead line;

THENCE southerly and southeasterly along said center line of Blue street two hundred thirty-seven and twelve hundredths feet to a point in the westerly line of lands conveyed by the state of New York to the city of New York by letters-patent dated February thirteen, nineteen hundred forty-two;

THENCE south thirty-seven degrees, four minutes, seventeen seconds west, along said westerly line of lands conveyed as aforesaid, one hundred fifty-three and thirty-two hundredths feet;

THENCE continuing along said line of lands conveyed as aforesaid, the following several courses to said center line of Commercial street aforesaid, south seven degrees, eight minutes, forty-three seconds east, thirty-two and thrity-seven hundredths feet;

THENCE north eighty-two degrees, fifty-one minutes, seventeen seconds east, forty-three feet;

THENCE south seven degrees, eight minutes, forty-three seconds east, seventy feet;

THENCE south eighty-two degrees, fifty-one minutes, seventeen seconds west, forty-three feet;

THENCE south seven degrees, eight minutes, forty-three seconds east, seventy-seven feet;

THENCE south fifty degrees, thirteen minutes, forty-eight seconds east, seventy-three and four hundredths feet;

SCHEDULE A
AMENDED MAY 17, 2001

THENCE north eighty-two degrees, fifty-one minutes, seventeen seconds east, seventy-three and fifty-three hundredts feet to a point in said center line of Commercial street as aforesaid;

THENCE south fifty-four degrees, twenty-five minutes, forty-seven seconds west, along said center line of Commercial street, seventy-five and seventy-eight hundredths feet to the point of BEGINNING.

PARCEL C

Title No.: TS-4000441-B

SCHEDULE A

ALL that parcel of land in the Seventeenth Ward of the Borough of Brooklyn, County of Kings, City and State of New York, bounded and described as follows:

BEGINNING at the point of intersection of the center line of Commercial Street with the northerly line of Dupont Street;

THENCE South eighty-two degrees, fifty-one minutes, seventeen seconds West, seventy-three and fifty-three one-hundredths feet;

THENCE North fifty degrees, thirteen minutes, forty-eight seconds West, seventy-three and four one-hundredths feet;

THENCE North seven degrees, eight minutes, forty-three seconds West, seventy-seven feet;

THENCE North eighty-two degrees, fifty-one minutes, seventeen seconds East, forty-three feet;

THENCE North seven degrees, eight minutes, forty-three seconds West, seventy feet;

THENCE South eighty-two degrees, fifty-one minutes, seventeen seconds West, forty-three feet;

THENCE North seven degrees, eight minutes, forty-three seconds West, thirty-two and thirty-seven one hundredths feet;

THENCE North thirty-seven degrees, four minutes, seventeen seconds East, one hundred fifty-three and thrity-two one-hundredths feet to an intersection with the center line of Blue Street;

THENCE along said center line South thirty-five degrees, thirty-four minutes, thriteen seconds East, three hundred nine and nine one-hundredths feet to an intersection with the center line of Commerical Street;

THENCE along said center line South fifty-four degrees, twenty-five minutes, forty-seven seconds West, one hundred forty-eight and fifty-three one-hundredths feet to the point of BEGINNING.

PARCEL C (cont)

SCHEDULE A
AMENDED 10/26/01

ALL that certain lot, piece or parcel of land, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, bounded and described as follows:

BEGINNING at the intersection of the center line of Freeman Street with the westerly side of West Street;

RUNNING THENCE northerly along the westerly side of West Street, 290 feet to the northerly side of Eagle Street;

THENCE easterly along the northerly side of Eagle Street, 255 feet;

THENCE northerly parallel with Franklin Street, 100 feet;

THENCE easterly parallel with Eagle Street, 200 feet to the westerly side of Franklin Street;

THENCE northerly along the westerly side of Franklin Street, 100 feet to the southerly side of Dupont Street;

THENCE westerly along the southerly side of Dupont Street, 295 feet;

THENCE southerly and parallel with the aforementioned westerly side of Franklin Street, 90 feet;

THENCE westerly and parallel with the aforementioned southerly side of Dupont Street, 130 feet to a point in the center line of West Street, as projected northerly from Eagle Street;

THENCE southerly along the center line of West Street, as projected 5 feet;

THENCE westerly along the southerly line of land taken for the State Barge Canal Terminal to the pierhead line approved by The Secretary of War on November 20, 1940;

THENCE generally in a southerly direction along the said pierhead line and along the pier line established by Chapter 628 of the Laws of 1886 to a point where the northerly line of Freeman Street, if extended westerly, would intersect the said pierhead line;

THENCE easterly along the northerly side of Freeman Street so as extended, 420 feet to the exterior bulkhead line;

THENCE southwesterly along the said bulkhead line, 30 feet 1 3/8 inches to the center line of Freeman Street as proposed; and

THENCE easterly along said center line of Freeman Street, 637 feet 7 1/2 inches to the point or place of BEGINNING.

SCHEDULE A
AMENDED 10/25/01

ALL that certain lot, piece or parcel of land, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, bounded and described as follows:

Bounded on the north by Freeman Street and the westerly prolongation thereof, bounded on the east by West Street, bounded on the south by the center line of the block between Green Street as formerly laid on the Map of the City of Brooklyn and Huron Street and the westerly prolongation thereof, and bounded on the west by the East River.

Together with all right title and interest in and to the lands under the waters of the East River in front of and adjoining said premises, to the pierhead line as established in 1957.

ASTM E1527-05
X3. USER QUESTIONNAIRE

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments")*, the *user* must provide the following information (if available) to the *environmental professional* completing the Phase I. Failure to provide this information could result in a determination that *"all appropriate inquiry"* is not complete.

Site Name and Location:: **Block 2494, Lot 1**
Brooklyn, NY 11222

(1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).
Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?

Answer: None known.

(2) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).
Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

Answer: None known.

(3) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).
As the *user* of the *ESA* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Answer: None known.

***(4)* Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).**
Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property?*

Answer: Not applicable at this time.

(5) Commonly know or reasonably *ascertainable* information about the *property* (40 CFR 312.30).
Are you aware of commonly known or *reasonably acertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*,
(a) Do you know the past uses of the *property?*
(b) Do you know the specific chemicals that are present or once were present at the *property?*
(c) Do you know of spills or other chemical releases that have taken place at the *property?*
(d) Do you know of any environmental cleanups that have taken place at the *property?*

Answer: None known.

(6) The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).
As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence of likely presence of contamination at the *property?*

Answer: None known.

Re: Freedom of Information Request
Block 2494 Lot 1,
Brooklyn, New York 11222

Sir/Madam:

Under the provision of the New York Freedom of Information Law (Article 6, Public Officers Law) to request access to certain information available from your agency. I would like to receive information regarding the known or potential environmental and public health hazards posed by the site located at the following addresses:

Block, Lot	Address(s)
Block 2494, Lot 1	• 14-20 Dupont Street, Brooklyn, New York 11222 • 235-241 Franklin Street, Brooklyn, New York 11222

Specifically, I would like to obtain:

- A summary of any record of decision regarding the investigation or clean up of the site;
- Notification of the lead agency that is primarily responsible for investigating and cleaning up the site;
- Notification of any legal action involving the site;
- Detailed reports, monitoring data, regulatory non-compliance notices, documents or studies regarding any pollution problems at this site, and how I may obtain copies of them or review them in person.

If there are any fees imposed for searching or copying the materials I have requested, please inform me of that fact before filling this request. I would appreciate your handling this request as quickly as possible. Thank you for your attention. I await your reply.

Sincerely,

TRC Engineers, Inc.

Processing may take time, please choose one option below:
I will wait for it ☐ I will it pick-up ☐ Mail it to my address ☑

Note: Please make sure you complete this form and attach all required documents. Enclose a check or money order (made payable to the NYC Fire Department) and a self-addressed envelope (with postal stamp). Mail checks or money orders directly to the address and unit listed above. DO NOT MAIL CASH. Cash payments can only be made in person and accepted by our Cashiers Office (9am –3pm).

SECTION B **PLEASE PRINT THE ADDRESS TO BE SEARCHED.**

1420 Dupont Street (AKA 235-241 Franklin Street) Brooklyn
House Number Street Name Borough

CUSTOMER – PLEASE READ THE INFORMATION BELOW.

A CERTIFIED REPORT WILL BE MAILED TO THE ADDRESS YOU HAVE PROVIDED WITHIN TEN (10) BUSINESS DAYS AFTER DATE SUBMITTED. COMPUTER PRINTOUTS WILL BE PROVIDED ONLY UPON REQUEST.

After you have received the certified report, you may request a certified computer printouts and/or a copy of any related record for an additional fee of $0.25 (cents) / per page. The fee for individual copies can only be determined after this search has been completed and you have received the related report. All payments are non-refundable.

Note: All listed tank information come from records, which exist in the FDNY District Office Folders and computer files. Also, please be advised that this search will not include records manually kept by Fire or Engine Companies, unless a summons for "Failure to Comply" was issued.

SECTION C **FUEL (HEATING) OIL TANKS - FEE $10.00 / PER REPORT**

If you would like to obtain a certified report, please complete this section by checking one or more boxes from the selection below.

☑ ITEM 1 – THE TOTAL AMOUNT AND SIZE OF EXISTING FUEL OIL / HEATING TANKS (includes installation date)

☑ ITEM 2 – THE TOTAL AMOUNT AND SIZE OF REMOVED OR SEALED FUEL OIL / HEATING TANKS

☐ ITEM 3 – OTHER: _____

For Office Use Only – Do not write in this section.

Searched By: _____ Date: ___/___/___

(PLEASE SEE OTHER SIDE OF FORM)

SECTION D **BURIED MOTOR VEHICLE TANKS - FEE $10.00 / PER REPORT**

If you would like to obtain a certified report, please complete this section by checking one or more boxes from the selection below.

- [x] ITEM 1 – THE TOTAL AMOUNT AND SIZE OF EXISTING BURIED MOTOR VEHICLE TANKS
- [x] ITEM 2 – THE TOTAL AMOUNT AND SIZE OF REMOVED OR SEALED BURIED MOTOR VEHICLE TANKS
- [ ] ITEM 3 – MOST RECENT TANK / PIPING TEST RESULTS (includes type of test performed)
- [ ] ITEM 4 – HISTORY OF BURIED MOTOR VEHICLE TANKS LEAKS
- [ ] ITEM 5 – OTHER: _____

For Office Use Only – Do not write in this section.

Searched By: _____ Date: ___/___/___

SECTION E **PLEASE READ STATEMENT AND SIGN BELOW.**

I have read all of the instructions and clearly understand all of the information listed in each completed section.

QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

CHARLES N. GUDER

EDUCATION
B.S., Chemical Engineering, Manhattan College, 1991

AREAS OF EXPERTISE
Mr. Charles N. Guder has program management and technical e□perience in the □ollowing general areas:

- Pro□ect Management
- E□it Strategies
- Remedial Investigation Work Plan Preparation and Implementation
- Remedial Activity Oversight and Management
- Remedial Design
- Brown□ields Initiatives
- Environmental Assessments and Audits
- Industrial Hygiene
- Regulatory Compliance
- Permitting
- E□uipment Decommissioning
- Structure Demolition

REPRESENTATIVE EXPERIENCE
Mr. Guder has over 15 years o□e□perience and progressive responsibility in environmental consulting. His □uali□ications include pro□ect scoping, budgeting, management, implementation, reporting, health and sa□ety and close-out o□large scale, multi-□aceted environmental pro□ects. Mr. Guder□s background includes e□tensive service to public and private-sector clientele including the NYCSCA, AIMCO, Consolidated Edison, NYCDOT, Nestle USA, and CS□ Transportation. He currently serves in the capacity o□Senior Pro□ect Manager in the Hazardous Materials Services Division with responsibility □or pro□ect management and implementation o□diverse environmental pro□ects.

Consolidated Edison Company of New York, First Avenue Properties – New York, NY (Site Manager: 2001 – 2006)
Mr. Guder served as the □ull time Site Manager overseeing and managing the decommissioning, demolition, and site remediation o□the 7-acre Waterside Steam Generating Station site located in Midtown Manhattan. □ey components o□the work directly managed by Mr. Guder included the asbestos abatement o□ two circa-1900 steam and electric generating station, the removal o□a 255,000 gallon □uel oil underground storage tank, decommissioning and removal o□acid and caustic tanks, demolition o□three steel and brick smokestacks, demolition o□ si□eight-story high boilers, sealing o□twelve-□oot diameter cooling water tunnels, remedial investigations, e□cavation and disposal o□20,000 tons o□contaminated soil, and sheeting and shoring o□the sites to protect ad□acent roadways and

public right-of-ways. Mr. Guder oversaw a peak work force of two hundred trades-people, enforced health and safety provisions and plans, participated in public meetings and outreach initiatives, developed work plans, and interacted and negotiated with regulatory agencies overseeing the work.

New York City School Construction Authority, Environmental Consulting Services – New York, NY (Project Manager: 1997 – 1999 and 2006)
Mr. Guder serves as the Project Manager of a comprehensive environmental services multi-year, task order contract providing environmental site assessments and site investigations to determine the suitability of sites in New York City for use as public school facilities. Mr. Guder also performs petroleum bulk storage tank management, hazardous material investigations, and indoor air quality assessments for existing schools as part of this contract.

AIMCO, Environmental Due Diligence of West Harlem Portfolio – New York, NY (Project Manager: 2006)
Mr. Guder serves as the Project Manager for environmental due diligence performed for the proposed acquisition of 85 apartment buildings located throughout West Harlem, New York. Due diligence activities performed in each of the buildings included an asbestos survey, a Phase I Environmental Site Assessment, and radon sampling. Mr. Guder oversaw a multi-disciplined inspection team and generated reports for each of the properties within an expedited two-month time frame.

HOK Sport, Pre-Demolition Survey of Shea Stadium – Flushing, New York (Project Manager: 2006)
Mr. Guder serves at the Project Manager for pre-demolition survey activities for Shea Stadium, the home of the New York Mets, in preparation for the upcoming new stadium construction. Pre-demolition survey activities consisted of asbestos surveys and hazardous materials inventory preparation and the preparation of biddable plans and specifications for asbestos abatement and hazardous materials removal.

Nestle USA, Inc., **Environmental Site Assessments at Manufacturing Facilities, –Various Locations (Project Manager: 1998)**
Mr. Guder served as the Project Manager responsible for assisting the Nestle USA environmental department in performing Pre-Divestiture and Pre-Acquisition environmental assessments for various properties in the United States. Mr. Guder provided consulting on regulatory implications and environmental liabilities based on current and historical property usage. Mr. Guder also completed subsurface investigations to define potential environmental conditions.

Metro-North Railroad, Metro-North Croton-Harmon Maintenance Facility Rehabilitation Design – Croton, New York (Environmental Engineer: 1998-1999)

Mr. Guder □unctioned as the environmental task leader □or a multi-disciplinary design team in the design o□the reconstruction o□Metro-North Railroad□s largest maintenance and repair □acility. Mr. Guder was responsible □or the oversight and design review o□□our environmental subconsultant team members. Design work included oil-water separator design, petroleum bulk storage tank decommissioning and □abrication design, and development o□a GIS/□ey database. Additionally, Mr. Guder negotiated with regulatory agencies on client□s behal□to obtain dewatering discharge approvals and the reuse o□soils on site.

Consolidated Edison Company of New York, Industrial Hygiene Services – New York, NY (Project Manager: 1997 – 1999)
Mr. Guder served as the Pro□ect Manager □or a multi-year task order contract providing comprehensive industrial hygiene services including indoor air □uality and employee e□posure assessments. Mr. Guder was responsible □or budgeting, health and sa□ety, implementation, report preparation, invoicing, and pro□ect closeouts.

New York City Department of Environmental Protection, Underground Storage Tank Program, Various Water Pollution Control Plants – New York City, NY (Project Manager: 1998)
Mr. Guder managed a remedial design program □or underground storage tanks at various wastewater treatment plants throughout New York City. Mr. Guder developed sampling plans, per□ormed soil and groundwater investigations, reported and interpreted results, inter□aced and negotiated with NYSDEC, and presented a remedial strategy based on the □indings.

AMP Circuits, Facility Decommissioning – Riverhead, NY (Site Manager: 1995 –1996)
Mr. Guder □unctioned as the □ull-time Site Manager □or the decommissioning and dismantling o□a 100,000 s□uare □oot printed circuit board manu□acturing □acility. As part o□the planning process, Mr. Guder developed speci□ications and bid documents □or the complete □acility decommissioning. Mr. Guder managed the eight month duration □acility decommissioning two months ahead o□schedule and on budget.

Perini Contracting/NYCDOT, Environmental Oversight, Williamsburg Bridge Reconstruction – New York, NY (Environmental Engineer: 1995 – 1997)
Mr. Guder □unctioned as contract-re□uired environmental engineer □or the □120 M reconstruction o□Williamsburg Bridge south and transit roadways. Mr. Guder supervised the e□cavation, management, transportation, and disposal o□ appro□imately 10,000 tons o□lead and petroleum contaminated soils. Mr. Guder was also responsible □or the supervision o□dewatering operations, contractor health and sa□ety, building decommissioning, and underground storage tank removal.

SPECIALIZED TRAINING

- Forty-Hour OSHA Health and Safety Training, 1993
- Supervisory OSHA Health and Safety Training, 1995

Angela P. Hernandez

EDUCATION
M.S., Environmental Studies, Adelphi University, 2007
B.A., Anthropology, Adelphi University, 2006

AREAS OF EXPERTISE
Ms. Hernandez has experience in the following general areas:

- Environment Site Assessments and Audits
- Site Inspections and Remediation
- Forensic Anthropology
- Archaeology

REPRESENTATIVE EXPERIENCE
Ms. Hernandez's background includes four years of experience in forensic anthropology and archaeology and two years of experience in the field of environmental science. She has experience working as a forensic technician with the New York City Office of Emergency Management and New York Office of Chief Medical Examiner for the World Trade Center Recovery Project for Human Remains and Human Effects. She has served the New York City Urban Parks Department where she taught young children in the field of environmental science in such areas as ecology, conservation, and energy use. Ms. Hernandez's background also includes service to public and private-sector clients including the New York City School Construction Authority. She currently serves as an Environmental Scientist for TRC.

<u>Ferry Point Partners, Ferry Point Park – Bronx, NY (Environmental Scientist: 2007-2008)</u>
Ms. Hernandez serves as a scientist in support of the methane monitoring program occurring as part of the construction of a golf course on the site. Responsibilities include conducting biweekly methane monitoring sampling events in which more than sixty monitoring wells are analyzed for methane and oxygen concentrations using a portable gas detection meter.

<u>New York City School Construction Authority, New York City, NY (Environmental Scientist: 2007-2008)</u>
Ms. Hernandez served as an environmental scientist for the site assessments for new construction and alteration of New York City Public Schools. Responsibilities included the performance of Phase I Environmental Site Assessments and groundwater sampling.

SPECIALIZED TRAINING

- 40-hour OSHA Health and Safety Training (29 CFR 1910.120), 2007, University of Medicine and Dentistry New Jersey
- 10-hour OSHA Health and Safety Training, 2005, Adelphi University

PROFESSIONAL AFFILIATIONS

- Lambda Alpha National Anthropology Honor Society

EXECUTIVE SUMMARY

At the request of the New York City School Construction Authority (NYCSCA), TRC Engineers, Inc. (TRC) conducted a Phase II Environmental Site Investigation (ESI) at the proposed school site located at 235-241 Franklin Street, Brooklyn, New York (hereafter referred to as the "Site"). The Site is improved with a one-story automobile repair facility, office trailer, and paved parking areas. The Site encompasses approximately 20,000-square feet in area. The Site building occupies an approximately 1,250 square foot footprint. TRC understands that the Site may be donated to New York City for development as a New York City public school.

TRC has concurrently performed a Phase I Environmental Site Assessment (ESA) of the Site for the NYCSCA. The Phase I ESA Report, dated June 2008, identified recognized environmental conditions (RECs) associated with the historic and current use of the Site as an automobile repair facility and garage; an "E"-designation for "underground storage tanks testing protocol" for the Site; the presence of oil staining on the Site; the presence of a possible underground storage tank (UST) and an aboveground storage tank (AST) on-Site; the historic presence of a dry cleaning facility, lumber yards, chemical facilities, commercial laundries, and automobile repair facilities in close proximity to the Site; the current presence of industrial facilities and an automobile repair facility in close proximity to the Site; one (1) New York State Spills Information Database (NY Spills)/Leaking Underground Storage Tanks (LTANKs) site with three (3) spill cases, including one (1) open case, adjacent to the Site; and the presence of an adjacent property with an "E"-designation for "underground storage tanks testing protocol".

The purpose of the Phase II ESI was to determine if the RECs identified in the Phase I ESA Report have affected the suitability of the Site for use as a school and to characterize the soil anticipated to be excavated during construction of the school. Phase II ESI field activities consisted of a geophysical survey, advancement of soil borings, installation of temporary well points, and the collection of subsurface soil, groundwater, ambient air, and soil vapor samples for laboratory analyses. Phase II ESI field activities were performed on May 27, 2008.

The geophysical survey did not reveal evidence of buried utilities or structures in the vicinity of the soil borings. However, major geophysical anomalies were encountered north of the existing Site building and west of the trailer. According to the geophysical surveyor, the anomalies could not be characterized due to excessive "geophysical noise" (i.e., parked cars, metallic surrounding objects). It is possible that one or more of the geophysical anomalies is representative of a UST(s). The "geophysical noise" also prevented the geophysical surveyor from clearing soil boring locations in the areas where the anomalies were encountered.

A total of five (5) soil borings were advanced on the Site and a total of nine (9) soil samples (at least one from each boring) were selected for laboratory analysis. The soil samples were analyzed for Target Compound List (TCL) and Spill Technology and Remediation Series (STARS) volatile organic compounds (VOCs), TCL and STARS semi-volatile organic compounds (SVOCs), and Resource Conservation and Recovery Act (RCRA) metals. Additionally, three soil samples, for pre-design waste classification purposes, were analyzed for TCL pesticides, TCL polychlorinated biphenyls (PCBs), cyanide, hexavalent chromium, and total petroleum hydrocarbons (TPH).

There were no PID readings recorded above 0.0 parts per million (ppm), and no visual or olfactory indications of contamination were observed in any of the soil samples collected. Fill material consisting

of ash, brick fragments, and silty sand, underlain by fill material consisting of light brown silty sand to a depth of at least 15 feet below ground surface (bgs) was encountered in the soil borings.

The results of the analyses of soil samples revealed detectable concentrations of naphthalene, SVOCs, and metals. The SVOCs benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, chrysene, dibenz(a,h)anthracene, fluoranthene, indeno(1,2,3-cd)pyrene, and phenanthrene and the metals arsenic, barium, cadmium, chromium, lead, and mercury were detected at concentrations above Unrestricted Use Soil Cleanup Objectives (SCOs) in one or more samples. The concentrations of SVOCs and metals detected are attributed to the characteristics of fill material at the Site. Since elevated concentrations of lead were detected in two (2) soil samples, the samples were additionally analyzed via Toxicity Characteristic Leachate Procedure (TCLP). The results of the TCLP lead analyses are below the regulatory limit. A total of five (5) groundwater samples (one from each soil boring) were collected for laboratory analysis. The five (5) groundwater samples were analyzed for TCL and STARS VOCs, TCL and STARS SVOCs, and RCRA metals (lab filtered). In addition, one (1) groundwater sample was analyzed for New York City Department of Environmental Protection (NYCDEP) Sewer Use Discharge Parameters.

Methyl tert-butyl ether (MTBE) was detected in one groundwater sample at a concentration exceeding the corresponding Class GA Guidance Value. The MTBE detected could be attributable to the historic on-Site use of gasoline tanks or to an off-site source since MTBE was not detected in any of the soil samples analyzed. Lead was detected in one groundwater sample at a concentration exceeding the corresponding Class GA Guidance Value. The presence of lead in groundwater at the Site can be attributed to the elevated concentrations of lead detected in fill material at the Site. The specific compounds detected in soil vapor above comparison levels were not detected at elevated levels (above standards or guidance values) in soil and groundwater samples collected at the Site. Therefore, the compounds detected in soil vapor are attributed to an off-site source in the surrounding area. Additionally, comparison of concentrations of VOCs detected with the New York State Department of Health (NYSDOH) Soil Vapor Guidance matrices indicates that monitoring and/or mitigation is not required. Finally, the laboratory analysis of the ambient air sample indicates that VOCs in ambient air are within the range of NYSDOH published background outdoor air values.

Based on the results of the Phase II ESI, implementing the remediation and environmental control measures listed below is required to make the Site suitable for use as a public school facility.

- USTs and any associated petroleum impacted soil, if encountered, should be excavated and disposed of in accordance with all federal, state, and local regulations.

- As a safeguard, to prevent potential VOCs in soil vapor from entering the new school building, a soil vapor barrier should be integrated into the new school design, including integration with any proposed water vapor barrier or waterproofing components of the new school design.

- If soils at the Site are excavated during construction activities, TRC recommends properly characterizing the material to identify material handling requirements and requirements for material reuse and/or waste disposal in accordance with all applicable federal, state, and local regulations.

- If excavation will be performed below the observed groundwater level, dewatering should be minimized to prevent the drawing in of potentially contaminated groundwater from the surrounding area.

- After the proposed new building and grounds are constructed, it is anticipated that there will be no exposed soil at the Site; however, if landscaped areas are incorporated into the development of the Site, a minimum 2-foot thick layer of environmentally clean fill should be placed over existing soil in those areas.

1.0 INTRODUCTION

1.1 Purpose

At the request of the New York City School Construction Authority (NYCSCA), TRC conducted a Phase II Environmental Site Investigation (ESI) for the proposed Public School, located at 235-241 Franklin Street, Brooklyn, New York 11222 (hereafter referred to as the "Site"). The Site is improved with a one-story automobile repair facility, office trailer, and paved parking areas. The Site encompasses approximately 20,000-square feet in area. The Site building occupies an approximately 1,250 square foot footprint. Historically, the Site was occupied by low-rise residential and commercial buildings (from at least 1887 to 1905), commercial buildings including a garage and automobile repair facility with pump house and gasoline underground storage tank (circa 1916), and lumber storage (from approximately 1942 to at least 1996). The current improvements (i.e., automobile repair facility, office trailer, and paved parking areas) have been in existence since at least 2001. *Figure 1* presents a Site Location Map.

This Phase II ESI was performed to determine if the Recognized Environmental Conditions (RECs) identified in the Phase I Environmental Site Assessment (ESA) Report have affected the suitability of the Site for use as a public school facility and to characterize the soil anticipated to be excavated for construction of the school facility. To accomplish this objective, a total of five (5) soil borings were advanced on the Site and a total of nine (9) soil samples (at least one from each boring) were submitted for laboratory analysis. Also, a temporary well point was installed in each boring and a groundwater sample was collected from each well point for laboratory analysis. Additionally, a soil vapor sample was collected at each soil boring location and submitted for laboratory analysis along with one ambient air sample.

1.2 Recognized Environmental Conditions

A Phase I ESA was performed by TRC concurrently with the Phase II ESI, due to site access constraints. The Phase I ESA Report, dated June 2008, identified RECs associated with the historic and current use of the Site as an automobile repair facility and garage; an "E"-designation for "underground storage tanks testing protocol" for the Site; the presence of oil staining on the Site; the presence of a possible underground storage tank (UST) and aboveground storage tank (AST) on-Site; the historic presence of a dry cleaning facility, lumber yards, chemical facilities, commercial laundries, and automobile repair facilities in close proximity to the Site; the current presence of industrial facilities and an automobile repair facility in close proximity to the Site; one (1) New York State Spills Information Database (NY Spills)/Leaking Underground Storage Tanks (LTANKs) site with three (3) spill cases, including one (1) open case, adjacent to the Site; and the presence of an adjacent property with an "E"-designation for "underground storage tanks testing protocol".

Based on the results of the Phase I ESA, TRC recommended a Phase II ESI to determine if the identified RECs have affected the suitability of the Site for use as a school.

2.0 DESCRIPTION OF PHASE II ESI FIELD ACTIVITIES

Phase II ESI field activities were performed on May 27, 2008 and consisted of the following:

- A geophysical survey to identify potential USTs and to verify that the proposed boring locations were clear of subsurface utilities and structures;
- Advancement of five (5) soil borings and continuous soil sampling to a depth of 15 feet below ground surface (bgs), and selection for laboratory analysis of at least one discrete soil sample from each boring;
- Installation of five (5) temporary well points, each terminating at a depth of approximately 17 feet bgs, in the five soil borings, and collection and analysis of a groundwater sample from each well point;
- Advancement of five (5) soil vapor probes, each to a depth of 5 feet bgs, and collection and analysis of a soil vapor sample from each vapor probe.
- Collection and analysis of one (1) ambient air sample.

The Phase II ESI was conducted in general accordance with TRC's Phase II ESI Scope of Work dated April 15, 2008. The scope of the field activities and methods are described below.

2.1 Geophysical Survey

A geophysical survey was performed on May 27, 2008 by NOVA Geophysical Services of Douglaston, New York to identify potential USTs and to verify that the proposed sample locations were clear of subsurface structures and utilities. The geophysical survey equipment included ground penetrating radar and a magnetometer. Surveyed areas included the areas surrounding the sample locations shown on *Figure 2* and all accessible areas of the Site. Sample locations were established in areas that did not conflict with subsurface structures or utilities.

2.2 Soil Vapor Survey

A soil vapor survey was conducted as part of the Phase II ESI. Soil vapor samples were collected to determine the concentration of volatile organic compounds (VOCs) in soil vapor. *Figure 2* shows the locations of the soil vapor survey points installed at the Site as part of the Phase II ESI. A total of five soil vapor samples (TRC-SG1, TRC-SG2, TRC-SG3, TRC-SG4, and TRC-SG5) were collected for laboratory analysis.

The soil vapor sampling program was completed on May 27, 2008. Aquifer Drilling and Testing, Inc. (ADT) of New Hyde Park, New York, was retained as a subcontractor by TRC for drilling services. A track mounted direct drive rig was used to install soil vapor sampling points. Soil vapor points were installed by advancing a 0.75-inch diameter hollow probe rod fitted with an expendable 6-inch diameter stainless steel screened drive point. Once the desired depth is reached, dedicated Teflon tubing with threaded fittings is connected to the probe. The hollow probe rod is then removed from the boring and an air tight seal is created at the surface using hydrated bentonite.

The adequacy of each seal was tested in accordance with the New York State Department of Health (NYSDOH)-approved method for sub-slab vapor sampling. A 5-gallon bucket was placed over the borehole and sealed from ambient air using bentonite. Helium tracer gas was then pumped into the bucket. The above-grade end of the tubing, which is the sample collection point, was then attached to a helium gas detector. The concept is that, if the seal is not tight, helium tracer gas could travel down the borehole and up the tubing to the sample collection point. Direct readings of helium of less than 10 percent were considered sufficient to verify a tight seal. The soil vapor points passed the seal integrity tests.

Each of the temporary soil vapor probes was purged of three volumes of air using a photoionization detector (PID). There were no detectable PID readings measured in any of the soil vapor probes. The Teflon tubing was connected to a laboratory-supplied individually certified SUMMA canister with a 0.1 liter per minute flow regulator for an approximately 60-minute sampling period. Upon completion each soil vapor point was backfilled to near grade surface with drill cuttings and/or well sand and the ground surface was restored with asphalt cold patch.

The five (5) soil vapor samples were analyzed for petroleum and solvent-related VOCs by United States Environmental Protection Agency (USEPA) Method TO-15 (low level sensitivity). The canisters were properly labeled and transported via courier to Contest Laboratories of East Longmeadow, MA utilizing standard chain-of-custody procedures. Contest Laboratories is a NYSDOH Environmental Laboratory Approval Program (ELAP)-certified laboratory. A summary of the analytical results is provided in Table 10 and a copy of the laboratory analytical results is attached in Appendix C.

2.3 Ambient Air Sampling

As part of this Phase II ESI, ambient air sampling was completed on May 27, 2008. Figure 2 presents the ambient air sampling location. One (1) ambient air sample was collected for laboratory analysis of VOCs. The ambient air sampling was completed to determine outdoor air background concentrations. At the time of the sampling, winds were from the west at approximately 5 miles per hour (mph).

The ambient air sample was collected from a height of 2.0 to 2.5 feet above grade surface utilizing an individually certified clean 6-liter stainless steel SUMMA canister fitted with a laboratory calibrated 0.1 liter per minute flow regulator for an approximately 60-minute sampling period. A reporting limit of less than 0.25 micrograms per cubic meter ($\mu g/m^3$) was achieved for carbon tetrachloride, trichloroethene, and vinyl chloride.

The ambient air sample was analyzed for petroleum and solvent-related VOCs by USEPA Method TO-15 (low level sensitivity). The canister was properly labeled and transported via courier to Contest Laboratories of East Longmeadow, MA utilizing standard chain-of-custody procedures. Contest Laboratories is a NYSDOH ELAP-certified laboratory. A summary of the analytical results is provided in Table 11 and a copy of the laboratory analytical results is attached in Appendix C.

2.4 Subsurface Soil Investigation

A soil sampling program was conducted as part of the Phase II ESI. Soil samples were collected to assess the current environmental conditions and to characterize subsurface soil at the Site. *Figure 2* shows the locations of the soil borings advanced at the Site as part of the Phase II ESI. A total of five (5) soil borings were completed and a total of nine (9) soil samples were selected for laboratory analysis.

The subsurface soil sampling program was completed on May 27, 2008. ADT was retained as a subcontractor by TRC for drilling services. Direct push drilling methods, utilizing a track mounted direct drive rig, were used to retrieve soil samples from the five (5) boring locations. Soil samples were collected continuously from the ground surface to approximately 15 feet bgs in 5-foot long, 2-inch diameter macro-core samplers lined with acetate sleeves. A description of the soils retained in each sample core was logged by TRC's on-site environmental scientist and the soils were screened in the field for the presence of VOCs with a PID. The soil boring logs are presented in *Appendix B.* Upon completion of each boring and collection of groundwater samples (refer to Section 2.8 below), each borehole was backfilled to near ground surface with the drill cuttings and then the ground surface was restored with asphalt cold patch. A description of each boring location is presented below.

- Soil boring TRC-SB1 was advanced west of the trailer at the northeast corner of the Site to approximately 15 ft bgs, representing the anticipated depth of excavation, for characterization of the soils. Discrete soil samples collected from 1 to 4 ft bgs and 4 to 8 ft bgs were selected for laboratory analysis.

- Soil boring TRC-SB2 was advanced near the northwest corner of the Site, to approximately 15 ft bgs, representing the anticipated depth of excavation, for characterization of the soils. Discrete soil samples collected from 1 to 4 ft bgs and 5 to 9 ft bgs were selected for laboratory analysis.

- Soil boring TRC-SB3 was advanced near the southwest corner of the Site, to approximately 15 ft bgs, representing the anticipated depth of excavation, for characterization of the soils. Discrete soil samples collected from 1 to 4 ft bgs and 4 to 8 ft bgs were selected for laboratory analysis.

- Soil boring TRC-SB4 was advanced west of the Site building near the southeast corner of the Site, to approximately 15 ft bgs, representing the anticipated depth of excavation, for characterization of the soils. A discrete soil sample collected from 1 to 4 ft bgs was selected for laboratory analysis.

- Soil boring TRC-SB5 was advanced near the center of the Site, to approximately 15 ft bgs, representing the anticipated depth of excavation, for characterization of the soils. Discrete soil samples collected from 1 to 4 ft bgs and 4 to 8 ft bgs were selected for laboratory analysis.

The nine (9) discrete soil samples selected for laboratory analysis were analyzed for Target Compound List (TCL) and Spill Technology and Remediation Series (STARS) VOCs, TCL and STARS semi-volatile organic compounds (SVOCs), and Resource Conservation and Recovery Act (RCRA) metals. In addition, in support of pre-design waste characterization objectives, three (3) discrete soil samples were additionally analyzed for TCL pesticides, polychlorinated biphenyls (PCBs), hexavalent chromium, cyanide, and total petroleum hydrocarbons (TPH). Also, two soil samples which exhibited elevated concentrations of lead (as discussed further below) were analyzed via the Toxicity Characteristic Leaching Procedure (TCLP) for lead.

There were no PID readings recorded above 0.0 parts per million (ppm), and no visual or olfactory indications of contamination were observed in any of the soil samples collected. Fill material consisting of ash, brick fragments, and silty sand, underlain by fill material consisting of light brown silty sand to a depth of at least 15 feet bgs was encountered in the soil borings.

PID responses throughout the depth of each boring and the laboratory analyses performed on the soil samples are summarized in Table 1, below.

Table 1
Summary of PID Screening Results and Soil Sample Analytical Plan

Soil Boring Identification Number	Boring Depth (ft bgs)	Depth of Sample Interval Selected for Analysis (ft bgs)	PID Reading (ppm)	TCL/STARS VOCs	TCL/STARS SVOCs	TCL Pesticides	TCL PCBs	RCRA Metals	TCLP Lead	Hexavalent Chromium	TPH	Cyanide
TRC-SB1	15.0	1 - 4	0.0	X	X			X				
		4 – 8	0.0	X	X	X	X	X		X	X	X
TRC-SB2	15.0	1 – 4	0.0	X	X			X				
		5 – 9	0.0	X	X			X	X			
TRC-SB3	15.0	1 – 4	0.0	X	X			X				
		4 – 8	0.0	X	X	X	X	X	X	X	X	X
TRC-SB4	15.0	1 - 4	0.0	X	X			X				
TRC-SB5	15.0	1 – 4	0.0	X	X			X				
		4 - 8	0.0	X	X	X	X	X		X	X	X

X - Sample analysis performed.

The samples were collected and containerized in accordance with New York State Department of Environmental Conservation (NYSDEC)/USEPA protocols. Each container was properly labeled, preserved, and placed in a cooler for transport via courier to Chemtech of Mountainside, New Jersey. Chemtech is a NYSDOH ELAP-certified analytical laboratory. Standard chain-of-custody procedures were followed.

2.5 Groundwater Investigation

A groundwater sampling program was conducted as part of the Phase II ESI. Groundwater samples were collected to assess the current environmental quality of groundwater at the Site. *Figure 2* shows the locations of the temporary well points (TWPs) installed at the Site as part of the Phase II ESI.

The groundwater sampling program was completed on May 27, 2008. ADT was retained as a subcontractor by TRC for drilling services. Five (5) TWPs were constructed by installing dedicated 1-inch diameter polyvinyl chloride (PVC) slotted screen in the 2-inch diameter 15-foot deep boreholes created during soil sampling. Groundwater samples were collected using a low flow peristaltic pump and dedicated Teflon-lined polyethylene tubing. Prior to the collection of groundwater samples, the head space was screened with a PID and then the TWPs were purged of a minimum of three well volumes. A groundwater sample was collected from each of the five (5) TWPs (TRC-GW1, TRC-GW2, TRC-GW3, TRC-GW4, and TRC-GW5).

PID readings were 0.0 ppm in each well head space, and no visual or olfactory indications of contamination were observed in any of the groundwater samples collected. The pH was monitored using a Horiba™ water quality meter during purging. The measured pH in the TWPs ranged from 6.8 to 7.4.

A summary of groundwater field screening results and the groundwater sample analytical plan is presented in the table below.

Table 2
Summary of Well Head Space PID Screening Results and Groundwater Sample Analytical Plan

TWP Identification Number	Depth to Water (ft bgs)	TWP Depth (ft bgs)	Well Head Space PID Reading (ppm)	TCL/STARS VOCs	TCL/STARS SVOCs	RCRA Metals (filtered)	NYCDEP Sewer Use Discharge Parameters
TRC-GW1	12.0	17	0.0	X	X	X	
TRC-GW2	12.5	17	0.0	X	X	X	
TRC-GW3	12.6	17	0.0	X	X	X	
TRC-GW4	11.7	17	0.0	X	X	X	
TRC-GW5	12.5	17	0.0	X	X	X	X

X - Sample analysis performed

The five (5) groundwater samples were analyzed for TCL and STARS VOCs, TCL and STARS SVOCs, and RCRA metals (lab filtered). In addition, one (1) groundwater sample (TRC-GW5) was analyzed for New York City Department of Environmental Protection (NYCDEP) Sewer Use Discharge Parameters. A trip blank sample was also submitted for analysis.

The samples were collected and containerized in accordance with NYSDEC/USEPA protocols. Each container was properly labeled, preserved, and placed in a cooler for transport via courier to Chemtech of Mountainside, New Jersey. Chemtech is a NYSDOH ELAP-certified analytical laboratory. Standard chain-of-custody procedures were followed. Upon completion each TWP was removed from the borehole, the borehole was backfilled to near grade surface with the drill cuttings and/or well sand, and then the ground surface was restored with asphalt cold patch.

3.0 SITE DESCRIPTION AND PHYSICAL CHARACTERISTICS

The Site is located at 235-241 Franklin Street, Brooklyn, New York 11222. The Site is improved with a one-story automobile repair facility, office trailer, and paved parking areas. The Site encompasses approximately 20,000-square feet in area. The Site building occupies an approximately 1,250 square foot footprint. The Site is bounded to the north by Dupont Street followed by a playground, to the south by a three-story residential building followed by Eagle Street, to the west by paved parking areas and the NYCDEP Newtown Creek Plant Sludge Storage facility, and to the east by Franklin Street followed by low-rise residential and commercial buildings. The Site is identified as Block 2494, Lot 1 on the New York Tax Assessor's map. Historically, the Site was occupied by low-rise residential and commercial buildings (from at least 1887 to 1905), commercial buildings including a garage and automobile repair facility with pump house and gasoline underground storage tank (circa 1916), and lumber storage (from approximately 1942 to at least 1996). The current improvements (i.e., automobile repair facility, office trailer, and paved parking areas) have been in existence since at least 2001. A site location map is shown on *Figure 1* and a sampling location plan is shown on *Figure 2*.

3.1 Topography

Based on field observations, the topography of the Site is generally flat. The topography of the surrounding area generally slopes downward to the west and downward to the north, towards the East River. According to the United States Geological Survey (USGS) 7.5-Minute Quadrangle Map (Brooklyn, NY 1995) and information contained in the regulatory agency database search report, the elevation of the Site property is approximately 12 feet above mean sea level (amsl).

3.2 Geology

The geology of Kings County consists of unconsolidated glacial deposits overlying crystalline bedrock. Based on available literature (Buxton, Soren, Posner, and Shernoff, 1981), the subsurface geology of the Site likely includes the following formations: Pleistocene upper glacial deposits, Gardiners Clay, Jameco Gravel, Cretaceous Raritan Formation consisting of sands and clays, and crystalline bedrock. The depth to crystalline bedrock for the area is estimated to be approximately 80 feet bgs.

According to "Geology of Staten Island and Western Long Island, Kings and Queens Counties, New York," by Geneva R. Roberts-Dolgin, the Site is underlain by glacial till that consists of a mixture of clay, silt, sand, gravel, and boulders. It is also likely that the soil underlying the Site consists of urban land due to New York City's long history of urban development. Urban land can be defined as soil that has been altered by human activities, thus making the soil unidentifiable.

There were no PID readings recorded above 0.0 ppm, and no visual or olfactory indications of contamination were observed in any of the soil samples collected. Fill material consisting of ash, brick fragments, and silty sand, underlain by fill material consisting of light brown silty sand to a depth of at least 15 feet bgs was encountered in the soil borings.

3.3 Hydrology

According to "United States Geologic Service (USGS) Fact Sheet FS134-97", the upper glacial aquifer is the uppermost hydrogeologic unit on Long Island and it consists of till deposits (clay, silt, sand, gravel, and boulders) along the north shore and outwash deposits (mostly sand, gravel, and clay) to the south.

The outwash deposits are highly permeable – horizontal hydraulic conductivity is estimated to be 270 feet per day (Franke and Cohen, 1972); till deposits are typically less than half as permeable (Smolensky and others, 1989; Buxton and Shernoff, 1995).

The Site is located approximately 500 feet east of the East River. Based on topography, the presence of the nearest surface water body, and information provided in the USGS Fact Sheet, the regulatory agency database report, and review of prior reports, the assumed hydraulic gradient direction is northwest towards the East River and groundwater is expected to be approximately twelve (12) feet bgs. The actual depth of groundwater observed during the Phase II ESI ranged from 11.7 to 12.6 ft bgs.

4.0 DISCUSSION OF FINDINGS

This section presents a discussion of the findings of the Phase II ESI. Tabulated results of laboratory analyses are presented in the Tables section of this report. The complete laboratory analytical data packages are included in *Appendix C*.

4.1 Applicable Regulatory Standards

This subsection identifies the USEPA, NYSDEC, NYSDOH and/or NYCDEP regulatory standards and guidelines used to evaluate the results of the soil vapor, ambient air, subsurface soil, and groundwater sampling. The standards and guidelines used to evaluate the specific data are described individually below.

4.1.1 Soil Vapor Guidelines

Analytical results for soil vapor samples were compared to the NYSDOH Air Guideline Values (AGVs) and to background levels of VOCs in indoor air presented in the Final Guidance for Evaluating Soil Vapor Intrusion in the State of New York, dated October 2006 ("NYSDOH Vapor Intrusion Guidance Document"), including Upper Fence Limit indoor air values from "Table C-1. NYSDOH 2003: Study of Volatile Organic Chemicals in Air of Fuel Oil Heated Homes," 90th Percentile indoor and outdoor air values from "Table C-2. EPA 2001: Building Assessment and Survey Evaluation (BASE) Database, SUMMA canister method" and 95th Percentile indoor air values from "Table C5. Health Effects Institute 2005: Relationship of Indoor, Outdoor and Personal Air". The results of the analyses of the soil vapor samples were also compared to Matrices 1 and 2 in the NYSDOH Vapor Intrusion Guidance Document. It should be noted that the matrices rely in part on indoor air data and indoor air samples were not collected as part of the Phase II ESI since the existing Site building construction would not be expected to be representative of the new school construction.

4.1.2 Ambient Air Quality

The results of the analysis of the ambient air sample were compared to the NYSDOH AGVs and to background levels of VOCs in outdoor air measured at the nearest NYSDEC ambient air monitoring station (located at PS 274, Site No. 7095-98), which is approximately 3.25 miles southeast of the Site, and to Upper Fence Limit outdoor air values from "Table C-1. NYSDOH 2003: Study of Volatile Organic Chemicals in Air of Fuel Oil Heated Homes," 90th Percentile outdoor air values from "Table C-2. EPA 2001: Building Assessment and Survey Evaluation (BASE) Database, SUMMA canister method", and 95th Percentile outdoor air values from "Table C5. Health Effects Institute 2005: Relationship of Indoor, Outdoor and Personal Air", as published in the NYSDOH Vapor Intrusion Guidance Document.

4.1.3 Soil Cleanup Objectives (SCOs)

The Unrestricted Use SCOs found in 6 NYCRR 375-6, Remedial Program Soil Cleanup Objectives, are the appropriate standards for use in evaluating the results of the analyses of the Phase II ESI soil samples. Soil which is free of contaminants above these standards is suitable for "unrestricted use" which is the land use category without imposed restrictions, such as environmental easements or other land use controls.

4.1.4 Groundwater Quality Standards and Guidance Values

Analytical results for groundwater were compared to New York State Class GA groundwater standards and guidance values, in the NYSDEC Division of Water Technical and Operational Guidance Series (TOGS) 1.1.1, "Ambient Water Quality Standards and Guidance Values and Groundwater Effluent Limitations." Ambient water quality standards are enforceable regulatory limits. Where ambient water quality standards do not exist, ambient water quality guidance values were used to evaluate the results of the analyses of the groundwater samples.

Groundwater data was also compared to the daily limits set forth in the NYCDEP Bureau of Wastewater Treatment "Limitations for Effluent to Sanitary or Combined Sewers".

4.2 Geophysical Survey Findings

The results of the geophysical survey revealed evidence of major anomalies north of the existing garage building and west of the trailer. According to the geophysical surveyor, the anomalies could not be characterized due to excessive "geophysical noise" (i.e., parked cars, metallic surrounding objects). It is possible that the major geophysical anomalies represent the presence of a UST. Underground piping, consistent with the floor drain system, was identified in the Site building. In addition, multiple minor anomalies, consistent with concrete blocks or small metal plates, were identified at the Site.

There was no evidence of utilities or subsurface structures, which would interfere with the boring locations, identified during the geophysical survey. The geophysical survey report is presented as *Appendix A*.

4.3 Soil Vapor Sampling Findings

A review of the soil vapor sample analytical results indicates that 17 of the 26 petroleum and chlorinated solvent compounds analyzed for were detected in one or more samples. A summary of the results of the analyses of the soil vapor samples is presented in Table 10. The complete analytical data report is presented in *Appendix C*. A summary of the compounds detected at concentrations greater than anticipated background levels or AGVs is provided below:

Table 3
Summary of VOCs in Soil Vapor Detected at Concentrations Greater than AGVs or Background Concentrations

Sample ID Date Sample Collected Units	TRC-SG1 5/27/08 (µg/m^3)	TRC-SG2 5/27/08 (µg/m^3)	TRC-SG3 5/27/08 (µg/m^3)	TRC-SG4 5/27/08 (µg/m^3)	TRC-SG5 5/27/08 (µg/m^3)	NYSDOH Air Guideline Value (µg/m^3)	NYSDOH Fuel Oil 2003 Upper Fence Limit Indoor Air (µg/m^3)	USEPA BASE 90th Percentile Value Indoor Air (µg/m^3)	Health Effects Institute 2005 95th Percentile Value Indoor Air (µg/m^3)
Benzene	4.2	6.3	0.22	24	44	--	13	9.4	10
Naphthalene	5.8	3.2	ND	1.9	1.2	--	--	5.1	--
Tetrachloroethene (PCE)	0.7	9	27	2.5	1.7	100	2.5	15.9	6.01

Notes:
µg/m^3 = micrograms per cubic meter
ND = Not Detected
-- = Not Available
= Result exceeds NYSDOH AGV

Concentrations of benzene (24 µg/m^3 in TRC-SG4 and 44 µg/m^3 in TRC-SG5), naphthalene (5.8 µg/m^3 in TRC-SG1), and PCE (27 µg/m^3 in TRC-SG3) were detected at concentrations greater than the range of published background concentrations.

The NYSDOH has established AGVs for three (3) of the VOCs analyzed (methylene chloride, PCE, and trichloroethene [TCE]). Methylene chloride, TCE and PCE were either not detected or were detected at concentrations less than the corresponding AGVs.

Soil vapor sampling results for TCE and carbon tetrachloride were compared to Matrix 1 of the NYSDOH Vapor Intrusion Guidance Document. The concentrations of TCE detected range from 0.83 to 1.8 µg/m^3. The concentrations of carbon tetrachloride detected ranged from not detected to 0.36 µg/m$^{3.}$ Based on Matrix 1, for sub-slab vapor, the recommended action for a TCE or carbon tetrachloride concentration of less than 5 µg/m^3 is either no further action, or, if indoor air concentrations are 0.25 µg/m^3 or greater, implementing reasonable and practical actions to identify the source(s) and reduce exposures.

Soil vapor sampling results for 1,1,1-trichloroethane (1,1,1-TCA) and PCE were compared to Matrix 2 of the NYSDOH Vapor Intrusion Guidance Document. The concentrations of PCE detected in soil vapor range from 0.7 to 27 µg/m^3 and the concentrations of 1,1,1-TCA detected range from 1.2 to 2.5 µg/m^3. Based on Matrix 2, sub-slab vapor concentrations of PCE and 1,1,1-TCA of less than 100 µg/m^3 require either no further action, or, if indoor air concentrations are greater than 3 µg/m^3, implementing reasonable and practical actions to identify the source(s) and reduce exposures.

The compounds detected in the soil vapor samples exceeding comparison levels are petroleum and chlorinated solvent related compounds. The specific compounds detected in soil vapor above comparison levels were not detected at elevated levels (above standards or guidance values) in soil and groundwater samples collected at the Site. Therefore, the compounds detected in soil vapor are attributed to an off-site source in the surrounding area.

4.4 Ambient Air Sampling Findings

A review of the ambient air sample analytical results indicates that 11 of the 26 petroleum and chlorinated solvent compounds analyzed for were detected in one or more samples. A summary of the results of the analysis of the ambient air sample is presented in Table 11. The complete analytical data report is presented in *Appendix C*. A summary of the compounds detected at concentrations greater than anticipated background levels or AGVs is provided below:

Table 4
Summary of VOCs in Ambient Air Detected at Concentrations Greater than AGVs or Background Concentrations

Sample ID Date Sample Collected Units	TRC-A1 5/27/08 ($\mu g/m^3$)	NYSDEC Monitoring Station Maximum Ambient VOCs ($\mu g/m^3$)	NYSDOH Air Guideline Value ($\mu g/m^3$)	NYSDOH Fuel Oil 2003 Upper Fence Limit Outdoor Air ($\mu g/m^3$)	USEPA BASE 90th Percentile Value Outdoor Air ($\mu g/m^3$)	Health Effects Institute 2005 95th Percentile Value Outdoor Air ($\mu g/m^3$)
1,2,4-Trimethylbenzene	0.63	0.608	--	1.9	5.8	--
Carbon tetrachloride	0.43	0.151	--	1.2	0.7	--
Chloromethane	1	0.884	--	4.3	3.7	--
Ethylbenzene	0.44	0.352	--	1.0	3.5	3.04
PCE	0.87	0.389	100	0.7	6.5	3.17

Notes:
$\mu g/m^3$ = micrograms per cubic meter
ND = Not Detected
-- = Not Available
= Concentration exceeds the maximum 2003 concentration recorded at the nearest NYSDEC ambient air monitoring station (at PS274, 800 Bushwick Avenue)

As shown in the table above, the VOCs 1,2,4-trimethylbenzene, carbon tetrachloride, chloromethane, ethylbenzene, and PCE were detected at concentrations marginally greater than the maximum VOCs detected at the closest NYSDEC ambient air monitoring station (at PS 274) in 2003. However, since no VOCs were detected at concentrations greater than the range of NYSDOH published background concentrations, these marginal exceedences are not considered of concern.

The NYSDOH has established AGVs for three (3) of the VOCs analyzed (methylene chloride, PCE, and TCE). TCE, PCE, and methylene chloride were either not detected or were detected at concentrations less than the corresponding AGVs.

4.5 Subsurface Soil Sampling Findings

4.5.1 Volatile Organic Compounds (VOCs) in Soil

A review of the soil sampling analytical results indicates that only one VOC (naphthalene) was detected above the laboratory reporting limit. Naphthalene was detected at an estimated concentration in one

sample (TRC-SB1 (1'-4')). There were no VOCs detected above the Unrestricted Use SCOs. The analytical data is summarized in Table 12. The analytical data package is presented as *Appendix C*.

4.5.2 Semi-Volatile Organic Compounds (SVOCs) in Soil

A review of the subsurface soil sampling analytical results indicates that 21 of the 64 SVOCs analyzed for were detected in one or more samples. A summary of the SVOCs detected above the Unrestricted Use SCOs is provided below:

Table 5
SVOCs Detected in Soil at Concentrations Above Unrestricted Use SCOs

Sample ID Date Sample Collected Sample Depth Units	TRC-SB1(1'-4') 5/27/08 1-4 feet (mg/kg)	TRC-SB1(4'-8') 5/27/08 4-8 feet (mg/kg)	TRC-SB2(1'-4') 5/27/08 1-4 feet (mg/kg)	TRC-SB2(5'-9') 5/27/08 5-9 feet (mg/kg)	TRC-SB3(1'-4') 5/27/08 1-4 feet (mg/kg)	TRC-SB4(1'-4') 5/27/08 1-4 feet (mg/kg)	Unrestricted Use Soil Cleanup Objective (mg/kg)
Benzo(a)anthracene	40	0.86	1.8 J	2.6 D	4.7	1.5	1
Benzo(a)pyrene	43	0.91	1.8 J	2..3	4.7	1.5	1
Benzo(b)fluoranthene	75 D	1.3	2.4 J	2.6 D	6.8	2.7 D	1
Benzo(k)fluoranthene	15	0.4	0.85 J	0.99	2	0.6	0.8
Chrysene	44 D	0.9	2 J	2.5 D	4.7	1.8	1
Dibenz(a,h)anthracene	1.5 J	0.13 J	ND	0.3 J	0.21 J	0.22 J	0.33
Fluoranthene	110 D	1.8 D	3.9 J	5.7 D	11	4.7 D	100
Indeno(1,2,3-cd)pyrene	15	0.49	0.81 J	0.83	2	0.64	0.5
Phenanthrene	130 D	1.9	3.1 J	7.1 D	5.8	4.7 D	100

Notes:
mg/kg = milligrams per kilogram
ND = Not Detected
= Result exceeds Unrestricted Use Soil Cleanup Objective
D = Sample Diluted
J = Estimated Value

As the table indicates, SVOCs consisting of polycyclic aromatic hydrocarbons were detected in six soil samples above Unrestricted Use SCOs. The highest concentrations of SVOCs were detected in sample TRC-SB1(1'-4').

TRC attributes the SVOC concentrations in the six soil samples to the characteristics of fill material at the Site, since there was no evidence of contamination in the soil samples (i.e., elevated PID reading or visual indications).

The analytical data is summarized in Table 13. The analytical data package is presented as *Appendix C*.

4.5.3 Metals and Cyanide in Soil

A review of the subsurface soil sampling analytical results indicates that 6 of the 10 metals analyzed for were detected in one or more samples. Arsenic, barium, cadmium, chromium, lead, and mercury were

detected. The metals detected at concentrations exceeding the Unrestricted Use SCOs in soil samples are tabulated below.

Table 6
Metals Detected in Soil at Concentrations Exceeding Unrestricted Use SCOs

Sample ID Date Sample Collected Sample Depth Units	TRC-SB1(1'-4') 5/27/08 1-4 feet (mg/kg)	TRC-SB1(4'-8') 5/27/08 4-8 feet (mg/kg)	TRC-SB2(1'-4') 5/27/08 1-4 feet (mg/kg)	TRC-SB2(5'-9') 5/27/08 5-9 feet (mg/kg)	TRC-SB3(1'-4') 5/27/08 4-8 feet (mg/kg)	TRC-SB4(1'-4') 5/27/08 1-4 feet (mg/kg)	TRC-SB5(1'-4') 5/27/08 1-4 feet (mg/kg)	TRC-SB5(4'-8') 5/27/08 4-8 feet (mg/kg)	Unrestricted Use Soil Cleanup Objective (mg/kg)
Arsenic	14.20	1.52	16.60	7.86	22.1	3.61	2.12	0.16 J	13
Barium	159	131	265	1720	289	85	141	124	350
Cadmium	2.66	2.2	2.42	1.53	6.03	3.12	2.48	2	2.5
Chromium	30.6	44.5	26.8	20.4	20.6	17.8	44.6	40.6	30
Lead	322	28	473	3440	1300	66.5	15.3	9.39	63
Mercury	0.289	0.047	0.574	0.317	0.51	0.081	0.016	0.008 U	0.18

Notes:
= Result exceeds Unrestricted Use Soil Cleanup Objective
U = Sample not detected above the laboratory reporting limit
J = Estimated Value
mg/kg = milligrams per kilogram

The analytical data is summarized in Table 14 and the analytical data package is presented in *Appendix C.* As shown in the table above, the metals arsenic, barium, cadmium, chromium, lead, and mercury were detected at concentrations exceeding the Unrestricted Use SCOs. The lead concentrations in soil samples TRC-SB2(5'-9') and TRC-SB3(1'-4') are 3,440 mg/kg and 1,300 mg/kg, respectively. These samples were additionally analyzed via TCLP. The TCLP lead concentrations detected for soil samples TRC-SB2(5'-9') and TRC-SB3(1'-4') are 2.17 milligrams per liter (mg/L) and 1.17 mg/L, respectively, which are below the regulatory limit of 5.0 mg/L for the hazardous waste characteristic of toxicity. TRC attributes the detected metal concentrations to the characteristics of fill material at the Site since there is no evidence to indicate a potential source in the vicinity of the sample locations.

4.5.4 Pesticides and PCBs in Soil

A review of the subsurface soil sampling analytical results indicates that pesticides and PCBs were not detected in any of the soil samples collected. A summary of the analytical results for pesticides and PCBs is presented in Table 15 and the analytical data package is presented as *Appendix C.*

4.5.5 Total Petroleum Hydrocarbons (TPH) in Soil

A review of the subsurface soil sampling analytical results indicates that total petroleum hydrocarbons (TPH) were detected in two (2) of the three (3) samples collected. A summary of the detected concentrations is provided below:

Table 7
Concentration of TPH Detected in Soil

Sample ID Date Sample Collected Sample Depth Units	TRC-SB1(4'-8') 5/27/08 4-8 feet (mg/kg)	TRC-SB3(4'-8') 5/27/08 4-8 feet (mg/kg)	TRC-SB5(4'-8') 5/27/08 4-8 feet (mg/kg)	Unrestricted Use Soil Cleanup Objective (mg/kg)
Total Petroleum Hydrocarbons	42	958	ND	--

Notes:
-- = Not Available, no criteria exists.
ND = Not Detected

The concentrations of TPH in soil ranged from not detected to 958 mg/kg. There are no applicable regulatory comparison criteria for TPH. TPH results provide information on soil disposal options for soil excavated for new school construction, since disposal facilities in the New York City metropolitan area typically require TPH analyses prior to accepting soil for disposal. The TPH concentrations detected in the samples are unlikely to limit disposal options for soil excavated for new school construction. A summary of the analytical results for TPH in soil is presented in Table 16 and the analytical data package is presented as *Appendix C.*

4.6 Groundwater Sampling Findings

Groundwater was encountered at a depth ranging from 11.7 to 12.6 feet bgs. Groundwater is presumed to flow in a northwesterly direction at the Site. The depth to groundwater was measured on May 27, 2008 using temporary well points. A review of the field parameters indicates that no elevated PID readings or visual evidence of contamination were observed. The results of the analyses of the groundwater samples are presented in Tables 17 through 19. The complete analytical data report is presented in *Appendix C*. A review of the groundwater analytical results is presented below.

4.6.1 Volatile Organic Compounds (VOCs) in Groundwater

A review of the results of the analyses of the groundwater samples for VOCs indicates that 1 of the 57 compounds analyzed for was detected. MTBE was detected in two samples, TRC-GW3 and TRC-GW5. A summary of the concentrations of MTBE detected in the groundwater samples is provided below:

Table 8
VOCs Detected in Groundwater at Concentrations Above State Criteria

Sample ID Date Sample Collected Units	TRC-GW3 5/27/08 (µg/L)	TRC-GW5 5/27/08 (µg/L)	Class GA Standard/Guidance Value (µg/L)
MTBE	0.87 J	17	10

Notes:
ND = Not Detected
= Result exceeds Class GA Standard/Guidance Value
J = Estimated Value

As indicated in the table above, MTBE was detected in sample TRC-GW5 at a concentration above the Class GA Guidance Value. The MTBE detected may be attributable to the historic on-Site use of gasoline tanks or an off-site source since MTBE was not detected in any of the soil samples analyzed.

The analytical data is summarized in Table 17 and the analytical data package is presented as Appendix C.

4.6.2 Semi-Volatile Organic Compounds (SVOCs) in Groundwater

A review of the results of the analyses of the groundwater samples for SVOCs indicates that 2 of the 65 compounds analyzed for were detected in one or more samples. The SVOCs 3,3-dichlorobenzidine and 4-chloroaniline were detected. All detected concentrations are below the corresponding Class GA Guidance Values. The analytical data is summarized in Table 18 and the analytical data package is presented as Appendix C.

4.6.3 Metals in Groundwater

A review of the results of the analyses of the groundwater samples for metals indicates that 5 of the 8 metals analyzed for were detected in one or more samples. Barium, chromium, lead, selenium, and silver were detected in groundwater. As presented below, only one (1) analyte (lead) was detected at a concentration greater than the corresponding State Groundwater Standard.

Table 9
Metals Detected in Groundwater at Concentrations Above State Criteria

Sample ID Date Sample Collected Units	TRC-GW2 5/27/08 (µg/L)	Class GA Standard (µg/L)
Lead	47.4	25

Notes:
= Result exceeds Class GA Standard

As indicated in the table above, lead was detected in only one sample (TRC-GW2) at a concentration greater than the Class GA Guidance Value. Lead was detected in Site soil (in sample TRC-SB2(5'-9')) at 3,440 mg/kg) at a concentration greater than the corresponding protection of groundwater SCO of 450 mg/kg found in Table 375-6.8(b). Therefore, the lead detected in groundwater sample TRC-GW2 can be attributed to the characteristics of the fill at this location.

The analytical results are summarized in Table 19 and the analytical data package is presented as Appendix C.

4.6.4 NYCDEP Discharge Parameters in Groundwater

NYCDEP discharge parameters were either not detected or were detected below their respective effluent limits in groundwater sample TRC-GW5. A detailed summary of the analytical results for NYCDEP discharge parameters is presented in Table 20 and the analytical data package is presented as Appendix C.

4.7 Summary of Findings

TRC performed a Phase II ESI consisting of a geophysical survey, the advancement of soil borings, installation of temporary well points, and collection and analysis of soil vapor, ambient air, soil and groundwater samples. The results of the Phase II ESI indicate the following:

- The geophysical survey did not reveal evidence of utilities or structures in the vicinity of the soil borings. However, major anomalies were encountered north of the existing Site building and west of the trailer. According to the geophysical surveyor, the anomalies could not be characterized due to excessive "geophysical noise" (i.e., parked cars, metallic surrounding objects). It is possible that one or more of the geophysical anomalies is representative of a UST. The "geophysical noise" also prevented the geophysical surveyor from clearing soil boring locations in the areas where the anomalies were encountered.

- Field observations and screening during soil sampling did not reveal the presence of petroleum-impacts or other physical evidence of contamination in any of the sample locations. Fill material consisting of ash, brick fragments, and silty sand, underlain by fill material consisting of light brown silty sand to a depth of at least 15 feet bgs was encountered in the soil borings.

- Groundwater was encountered at approximately 12 feet bgs. The estimated groundwater flow direction is towards the northwest. Field evidence of contamination was not observed in groundwater.

- The results of the analysis of the ambient air sample revealed the presence of several VOCs at concentrations marginally exceeding the maximum VOC concentrations recorded at the nearest NYSDEC monitoring station (at PS 274). However, the concentrations of VOCs detected in the ambient air sample are below the range of NYSDOH published background concentrations and therefore, these marginal exceedences are not of concern.

- The results of the analysis of soil vapor samples revealed the presence of two petroleum and one chlorinated solvent related VOCs at concentrations exceeding published indoor air VOC concentrations. Comparison with the NYSDOH Soil Vapor Guidance matrices indicates that for the concentrations of TCE, 1,1,1-TCA, PCE, and carbon tetrachloride detected in the soil vapor samples, monitoring and/or mitigation is not required.

- The results of the analyses of soil samples revealed detectable concentrations of VOCs, SVOCs, and metals. The SVOCs benzo(a)anthracene, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, chrysene, dibenz(a,h)anthracene, fluoranthene, indeno(1,2,3-cd)pyrene, and phenanthrene, and the metals arsenic, barium, cadmium, chromium, lead, and mercury were detected at concentrations above Unrestricted Use SCOs. The concentrations of SVOCs and metals detected can be attributed to the characteristics of fill material at the Site.

- The results of the analyses of the groundwater samples revealed detectable concentrations of VOCs, SVOCs, and RCRA metals. MTBE was detected in one sample (TRC-GW5) at a concentration exceeding the corresponding Class GA Guidance Value. The MTBE detected in TRC-GW5 may be attributable to the historic on-Site use of gasoline tanks or to an off-site source since MTBE was not detected in any of the soil samples analyzed. Lead was detected in one sample (TRC-GW2) at a concentration exceeding the corresponding Class GA Groundwater Standard. The presence of lead in groundwater at the Site can be attributed to the elevated concentrations of lead detected in fill material at the Site.

- There were no exceedences of NYCDEP Sewer Use Guidelines detected in groundwater.

5.0 CONCLUSIONS AND RECOMMENDATIONS

Based on the results of TRC's Phase II ESI, TRC concludes the following:

- The geophysical survey did not conclusively identify the presence or absence of a UST on Site, possibly due to excessive geophysical "noise" (i.e., parked cars, nearby metallic objects). It is possible that a UST is present on Site. The "geophysical noise" also prevented the geophysical surveyor from clearing soil boring locations in the areas where the anomalies were encountered.

- The specific compounds detected in soil vapor above comparison levels were not detected at elevated levels (above standards or guidance values) in soil and groundwater samples collected at the Site. Therefore, the compounds detected in soil vapor are attributed to an off-site source in the surrounding area.

- Soil at the Site consists primarily of fill material. Field observations and screening during soil sampling did not reveal evidence of the presence of petroleum-impacts or other physical evidence of contamination in any of the sample locations. The concentrations of SVOCs and metals detected in Site soil are therefore attributable to the characteristics of the fill material at the Site.

- Groundwater was encountered at approximately 12 feet bgs and field observations did not reveal the presence of contamination during sampling. MTBE was detected in one sample at a concentration exceeding the corresponding Class GA Guidance Value. The MTBE detected in groundwater may be attributable to the historic on-Site use of gasoline tanks or to an off-site source since MTBE was not detected in any of the soil samples analyzed. Lead was detected in one sample at a concentration exceeding the corresponding Class GA Groundwater Standard. The presence of lead in groundwater at the Site is attributed to the elevated concentrations of lead detected in fill material at the Site.

Based on the results of the Phase II ESI, implementing the remediation and environmental control measures listed below is required to make the Site suitable for use as a public school facility.

- USTs and any associated petroleum impacted soil, if encountered, should be excavated and disposed of in accordance with all federal, state, and local regulations.

- As a safeguard, to prevent potential VOCs in soil vapor from entering the new school building, a soil vapor barrier should be integrated into the new school design, including integration with any proposed water vapor barrier or waterproofing components of the new school design.

- If soils at the Site are excavated during construction activities, TRC recommends properly characterizing the material to identify material handling requirements and requirements for material reuse and/or waste disposal in accordance with all applicable federal, state, and local regulations.

- If excavation will be performed below the observed groundwater level, dewatering should be minimized to prevent the drawing in of potentially contaminated groundwater from the surrounding area.

- After the proposed new building and grounds are constructed, it is anticipated that there will be no exposed soil at the Site; however, if landscaped areas are incorporated into the development of the Site, a minimum 2-foot thick layer of environmentally clean fill should be placed over existing soil in those areas.

A detailed description of the recommended engineering controls including a remediation cost estimate is included in Appendix D.

6.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

TRC Engineers, Inc. (TRC) has performed a Phase II Environmental Site Investigation of the Proposed School Site located at 235-241 Franklin Street, Brooklyn, New York 11222. The Phase II ESI was performed generally in accordance with the scope of work dated April 15, 2008.

Re: Geophysical Survey Report
Commercial Property – NYC SCA PPS
235 Franklin Street & 20 Dupont Street
Brooklyn, New York 11208

Dear Mr. Lindemuth:

Nova Geophysical Services (NOVA) is pleased to provide findings of our geophysical survey at the above referenced project location located at 235 Franklin Street and 20 Dupont Street, New York, New York (the "Site"). Please see attached Geophysical Survey Site Plan for the Site configuration.

INTRODUCTION TO GEOPHYSICAL SURVEY

NOVA performed a Geophysical survey consist of a Ground Penetrating Radar (GPR), Concrete Imaging and electromagnetic surveys at the Site to locate and identify underground storage tanks (UST), underground utilities, cables and other anomalies that maybe located at the project Site, in May 27th, 2008. The purpose of this survey was to determine the location of USTs (if any), underground utilities, cables and other anomalies maybe located at the Site. Additionally, NOVA cleared and marked all proposed environmental soil boring locations at the Site. The equipment selected for this investigation included a Geonics EM-61 Pipe and Cable Locator (an electromagnetic (EM) metal detector), Ditch-witch utility locator, and MALA 250 kHz and 500 kHz ground-penetrating radar (GPR) units.

A GPR system consists of a radar control unit, control cable and a transducer (antenna). The control unit transmits a trigger pulse at a normal repetition rate of 250 KHz to 500 KHz. The trigger pulse is sent to the transmitter electronics in the transducer via the control cable. The transmitter electronics amplify the trigger pulses into bipolar pulses that are radiated to the surface. The transformed pulses vary in shape and frequency according to the transducer used. In the subsurface, variations of the signal occur at boundaries where there is a dielectric contrast

(void, steel, soil type, etc.). Signal reflections travel back to the control unit and are represented as color graphic images for interpolation.

GEOPHYSICAL METHODS

The project Site was first investigated using the Geonics EM-61 metal detector. The metal detector was used in a reconnaissance investigation for evidence of metallic objects that could represent USTs. The instrument was carried along bi-directional traverses spaced approximately 4 feet apart across the project Site. The metal detector was also carried along 5-foot traverses over the Site. Metal detector anomalies were marked on the ground for further investigation with GPR.

The Ditch-witch was used to investigate utilities associated with the anomalies. Radio frequency signals were conducted onto anomalies that resembled USTs. This allowed the geophysicist using a specialized receiver to delineate lines running from the tanks by tracing the signals at the surface.

GPR data profiles were collected over each metal-detector anomaly with a large enough areal extent to represent a UST. These profiles were inspected for reflections that are indicative of USTs

RESULTS

The results of the geophysical survey identified following anomalies located at the project Site:

- Anomalies were located underneath the asphalt paved parking lot along the north side of the existing garage building and along the west side of the trailer, along the Dupont Street of the Site. Due to excessive amount of Geophysical noise activities (such as, parked cars, metallic surrounding objects) at the time of the survey, these anomalies could not be confirmed.

- Nova identified anomalies consisted with underground piping were located within the one-story building. The geophysical survey confirmed that this piping was belong to a floor drain and is connected to the public sewer system located along the Franklin Street.

- Multiple scattered/minor anomalies identified throughout the project Site were appeared to be a metal plate or reflection of concrete blocks. None of these anomalies were consistent with any size of USTs.

- Nova cleared and marked a total of five (5) proposed environmental boring locations located throughout of the Site.

- No other USTs or subsurface anomalies were identified during this survey. Geophysical Survey Plan portrays the areas investigated during the geophysical survey.

If you have any questions please do not hesitate to contact the undersigned.

Sincerely,

NOVA Geophysical Services

Levent Eskicakit, P.G., E.P.
Senior Environmental Engineer

CASE NARRATIVE

In method TO-15, method blank-118477 associated with samples 08B19295-08B19300 contained methylene chloride at 0.16 ppbv = 0.55 ug/m3.

In method TO- 15 , reduced precision is anticipated for reported result for chloroethane in sample 08B19299 based on sample duplicate RPD outside of control limits.

In method TO-15, any reported result for naphthalene is estimated and likely to be biased on the high side based on continuing calibration bias.

The CON-TEST Environmental Laboratory operates under the following certifications and accreditations. AIHA accreditations only apply to NIOSH methods and Environmental Lead Analyses.

AIHA 100033	AIHA ELLAP (LEAD) 100033	NORTH CAROLINA CERT. #652
MASSACHUSETTS MA0100	NEW HAMPSHIRE NELAP 2516	NEW JERSEY NELAP NJ MA007 (AIR)
CONNECTICUT PH-0567	VERMONT DOH (LEAD) No. LL015036	FLORIDA DOH E871027 (AIR)
NEW YORK ELAP/NELAP 10899	RHODE ISLAND (LIC. No. 112)	

I certify that the analyses listed above, unless specifically listed as subcontracted, if any, were performed under my direction according to the approved methodologies listed in this document, and that based upon my inquiry of those individuals immediately responsible for obtaining the information, the material contained in this report is, to the best of my knowledge and belief, accurate and complete.

QUALITY CONTROL DEFINITIONS AND ABBREVIATIONS

QC BATCH NUMBER	This is the number assigned to all samples analyzed together that would be subject to comparison with a particular set of Quality Control Data.
LIMITS	Upper and Lower Control Limits for the QC ANALYSIS Reported. All values normally would fall within these statistically determined limits, unless there is an unusual circumstance that would be documented in a NOTE appearing on the last page of the QC SUMMARY REPORT. Not all QC results will have Limits defined.
Sample Amount	Amount of analyte found in a sample.
Blank	Method Blank that has been taken though all the steps of the analysis.
LFBLANK	Laboratory Fortified Blank (a control sample)
STDADD	Standard Added (a laboratory control sample)
Matrix Spk Amt Added	Amount of analyte spiked into a sample
MS Amt Measured	Amount of analyte found including amount that was spiked
Matrix Spike % Rec.	% Recovery of spiked amount in sample.
Duplicate Value	The result from the Duplicate analysis of the sample.
Duplicate RPD	The Relative Percent Difference between two Duplicate Analyses.
Surrogate Recovery	The % Recovery for non-environmental compounds (surrogates) spiked into samples to determine the performance of the analytical methods.
Sur. Recovery (ELCD)	Surrogate Recovery on the Electrolytic Conductivity Detector.
Sur. Recovery (PID)	Surrogate Recovery on the Photoionization Detector.
Standard Measured	Amount measured for a laboratory control sample
Standard Amt Added	Known value for a laboratory control sample
Standard % Recovery	% recovered for a laboratory control sample with a known value.
Lab Fort Blank Amt	Laboratory Fortified Blank Amount Added
Lab Fort Blk. Found	Laboratory Fortified Blank Amount Found
Lab Fort Blk % Rec	Laboratory Fortified Blank % Recovered
Dup Lab Fort Bl Amt	Duplicate Laboratory Fortified Blank Amount Added
Dup Lab Fort Bl Fnd	Duplicate Laboratory Fortified Blank Amount Found
Dup Lab Fort Bl % Rec	Duplicate Laboratory Fortified Blank % Recovery
Lab Fort Blank Range	Laboratory Fortified Blank Range (Absolute value of difference between recoveries for Lab Fortified Blank and Lab Fortified Blank Duplicate).
Lab Fort Bl. Av. Rec.	Laboratory Fortified Blank Average Recovery
Duplicate Sample Amt	Sample Value for Duplicate used with Matrix Spike Duplicate
MSD Amount Added	Matrix Spike Duplicate Amount Added (Spiked)
MSD Amt Measured	Matrix Spike Duplicate Amount Measured
MSD % Recovery	Matrix Spike Duplicate % Recovery
MSD Range	Absolute difference between Matrix Spike and Matrix Spike Duplicate Recoveries

TRC PARAMETER LIST

Method TO-15 with SIM will provide detection limits of 0.25 micrograms per cubic meter for vinyl chloride, trichloroethene (TCE), and carbon tetrachloride, allowing for comparison with the lowest action levels for these compounds in the NYSDOH Guidance. The soil gas and ambient air samples will be analyzed for the compounds listed below and results will be reported by the laboratory within a 5-day turn-around time (TAT).

- Benzene;
- Carbon Tetrachloride;
- Chlorobenzene;
- Chloroethane;
- Chloromethane;
- 1,2-Dichlorobenzene;
- 1,3-Dichlorobenzene;
- 1,1-Dichloroethane;
- 1,2-Dichloroethane;
- 1,1-Dichloroethene;
- *Cis*-1,2-Dichloroethene;
- *Trans*-1,2-Dichloroethene;
- 1,2-Dichloropropane;
- Ethyl benzene;
- Methyl *tert*-butyl ether;
- Methylene Chloride;
- Naphthalene;
- Tetrachloroethene (PCE);
- Toluene;
- 1,1,1 – Trichloroethane;
- Trichloroethene (TCE);
- 1,2,4 -Trimethylbenzene;
- 1,3,5-Trimethylbenzene;
- Vinyl Chloride;
- m,p-Xylenes; and
- o-Xylene

QA/QC DELIVERABLES CHECKLIST

Project Number: 23012

THIS FORM HAS BEEN COMPLETED BY CHEMTECH LABORATORY AND ACCOMPANIES ALL DATA DELIVERABLES PACKAGES.

The following laboratory deliverables are included in this analytical report. Any deviations from the accepted methodology and procedures, or performance values outside acceptable ranges are summarized in the Non-Conformance Summary.

		Yes	NA
I.	Report Cover Page, Laboratory Certification and Field Sample To Lab Sample ID Cross Reference	✓	
II.	Table of Contents	✓	
III.	Chain of Custody Documents	✓	
IV.	Methodology Summaries	✓	
V.	Laboratory Chronicle and Hold Time Checks	✓	
VI.	Non-Conformance Summary	✓	
VII.	Tabulated Analytical Results	✓	
VIII.	Initial and Continuing Calibration Information	X	✓
IX.	Tune and Internal Standard Area Summaries (GC/MS)	X	✓
X.	Quality Control Summary Reports	✓	
XI.	Surrogate Recovery Summary	✓	
XII.	Raw Data Chromatogram, Blank Samples and QC when applicable		✓
XIII.	Subcontract Data		✓

Zubair Ali

From: James Bell
Sent: Thursday, May 29, 2008 3:51 PM
To: Zubair Ali; Snehal Mehta
Cc: Joe Dockery
Subject: TRC Aqueous COC
Importance: High

PER Charles Guder, please filter and analyze non preserved bottles for dissolved metals only. No totals needed. Also, please run TCL voa list for all voa compounds including stars and NYCDEP sewer use parameters.

Joe,

You may have to put a new group in the quote for these voa's. We only received two vials and Charlie said to run it once for all compounds.

DATA REPORTING QUALIFIERS- ORGANIC

For reporting results, the following " Results Qualifiers" are used:

Value	If the result is a value greater than or equal to the detection limit, report the value
U	Indicates the compound was analyzed for but was not detected. Report the minimum detection limit for the sample with the U, i.e. "10 U". This is not necessarily the instrument detection limit attainable for this particular sample based on any concentration or dilution that may have been required.
J	Indicates an estimated value**.** This flag is used: (1) When estimating a concentration for a tentatively identified compound (library search hits, where a 1:1 response is assumed.) (2) When the mass spectral data indicated the identification, however the result was less than the specified detection limit greater than zero. If the detection limit was 10ug/L and a concentration of 3 ug/L was calculated report as 3 J. This is flag is used when similar situation arise on any organic parameter i.e. Pest, PCB and others.
B	Indicates the analyte was found in the blank as well as the sample report as "12 B".
E	Indicates the analyte 's concentration exceeds the calibrated range of the instrument for that specific analysis.
D	This flag identifies all compounds identified in an analysis at a secondary dilution factor.
P	This flag is used for Pesticide/PCB target analyte when there is >25% difference for detected concentrations between the two GC columns. The lower of the two values is reported on Form 1 and flagged with a "P".
N	This flag indicates presumptive evidence of a compound. This is only used for tentatively identified compounds (TICs), where the identification is based on a mass spectral library search. It applies to all TIC results. For generic characterization of a TIC, such as chlorinated hydrocarbon, the flag is not used.
A	This flag indicates that a Tentatively Identified Compound is a suspected aldol-condensation product.

Tel. 908-789-8900 Fax: 908-789-8922

DATA REPORTING QUALIFIERS- INORGANIC

For reporting results, the following " Results Qualifiers" are used:

J	If the reported value was obtained from a reading that was less than the Contract Required Detection Limit (CRDL), but greater than or equal to the Instrument Detection Limit (IDL).
U	If the analyte was analyzed for, but not detected.
E	The reported value is estimated because of the presence of interference
M	Duplicate injection precision not met.
N	Spiked sample recovery not within control limits.
S	The reported value was determined by the Method of Standard Addition (MSA).
W	Post-digestion spike for Furnace AA analysis is out of control limits (85-115%), while absorbance is less that 50% of spike absorbance.
*	Duplicate analysis not within control limits.
+	Correlation coefficient for the MSA is less than 0.995.
***	Entering "S", "W " or " +" is mutually exclusive. NO combination of these qualifiers can appear in the same field for an analyte.
D	The reported value is from a secondary analysis with a dilution factor. The original analysis exceeded the calibration range.
M	Method qualifiers **"P"** for ICP instrument **"A"** for Flame AA **"PM"** for ICP when Microwave Digestion is used **"AM"** for flame AA when Microwave Digestion is used **"FM"** for furnace AA when Microwave Digestion is used **"CV"** for Manual Cold Vapor AA **"AV"** for automated Cold Vapor AA **"CA"** for MIDI-Distillation Spectrophotometric **"AS"** for Semi –Automated Spectrophotometric **"C"** for Manual Spectrophotometric **"T"** for Titrimetric **"NR"** for analyte not required to be analyzed
OR	Indicates the analyte's concentration exceeds the calibrated range of the instrument for that specific analysis.

APPENDIX A

QA REVIEW GENERAL DOCUMENTATION

Project #: 23012

	Completed
For thorough review, the report must have the following:	
GENERAL:	
Are all original paperwork present (chain of custody, record of communication, airbill, sample management lab chronicle, login page)	✓
Check chain-of-custody for proper relinquish/return of samples	✓
Is the chain of custody signed and complete	✓
Check internal chain-of-custody for proper relinquish/return of samples /sample extracts	✓
Collect information for each project id from server. Were all requirements followed	✓
COVER PAGE:	
Do numbers of samples correspond to the number of samples in the Chain of Custody and on login page	✓
Do lab numbers and client Ids on cover page agree with the Chain of Custody	✓
CHAIN OF CUSTODY:	
Do requested analyses on Chain of Custody agree with form I results	✓
Do requested analyses on Chain of Custody agree with the log-in page	✓
Were the correct method log-in for analysis according to the Analytical Request and Chain of Custody	✓
Were the samples received within hold time	✓
Were any problems found with the samples at arrival recorded in the Sample Management Laboratory Chronicle	✓
ANALYTICAL:	
Was method requirement followed?	✓
Was client requirement followed?	✓
Does the case narrative summarize all QC failure?	
All runlogs reviewed for manual integration requirements

CONFORMANCE/ NON-CONFORMANCE SUMMARY

CHEMTECH 284 Sheffield Street, Mountainside New Jersey 07092

NEW JERSEY LAB ID#: 20012: NEW YORK LAB ID#: 11376

GC/MS VOA CONFORMANCE/NON-CONFORMANCE SUMMARY

CHEMTECH PROJECT NUMBER: Z3012 MATRIX: Water & Soil

METHOD: 8260

		NA	NO	YES
1.	Chromatograms Labeled/Compounds Identified. (Field samples and Method Blanks)			✓
2.	GC/MS Tuning Specifications BFB Meet Criteria (NOTE THAT THERE ARE DIFFERENT CRITERIA FOR NY ASP CLP, CLP AND NJ)			✓
3.	GC/MS Tuning Frequency - Performed every 24 hours for 600 series and 12 hours for 8000 Series.			✓
4.	GC/MS Calibration - Initial Calibration performed before sample analysis and continuing calibration performed within 24 hours of sample analysis for 600 series and 12 hours for 8000 series.			✓
5.	GC/MS Calibration Requirements.			✓
a.	Calibration Check Compounds for 8260 and CLP.			
b.	System Performance Check Compounds for 8260 and CLP			

8260 CALIBRATION CRITERIA

SPCC Compounds	MIN RF	CCC Compounds
Chloromethane	0.1	1,1-Dichloroethene
1,1-Dichloroethane	0.1	Chloroform
Bromoform	0.1	1,2-Dichloropropane
Chlorobenzene	0.3	Toluene
1,1,2,2-Tetrachloroethane	0.3	Ethylbenzene
Vinyl chloride		

For CCC compounds Initial Calibration Criteria – RSD less than or equal to 30%
For CCC compounds Continuing Calibration Criteria - %D less than or equal to 20%

6.	Blank Contamination - If yes, list compounds and concentrations in each blank:		✓	
7.	Surrogate Recoveries Meet Criteria			✓

If not met, list those compounds and their recoveries which fall outside the acceptable ranges.

GC/MS VOA CONFORMANCE/NON-CONFORMANCE SUMMARY (CONTINUED)

		NA	NO	YES
8.	Matrix Spike/Matrix Spike Duplicate Recoveries Meet Criteria		✓	
	If not met, list those compounds and their recoveries which fall outside the acceptable range. The MS recoveries met the requirements for all compounds except for 1,1,2,2-Tetrachloroethane and 1,2-Dibromo-3-Chloropropane. The MSD recoveries met the acceptable requirements except for 1,1,2,2-Tetrachloroethane and 1,2-Dibromo-3-Chloropropane.			
9.	Internal Standard Area/Retention Time Shift Meet Criteria		✓	
	Comments: The Internal Standards Areas met the acceptable requirements except for TRC-SB-3(4-8) and TRC-SB-3(4-8)RE.			
10.	Analysis Holding Time Met			✓
	If not met, list number of days exceeded for each sample:			

ADDITIONAL COMMENTS: The Continuing Calibration met the requirements except for Bromomethane and Trichlorofluoromethane.

GC/MS SEMI-VOLATILE ANALYSIS CONFORMANCE/NON-CONFORMANCE SUMMARY

CHEMTECH PROJECT NUMBER: Z3012 MATRIX: Water & Soil

METHOD: 3510/3541/8270

		NA	NO	YES
1.	Chromatograms Labeled/Compounds Identified. (Field samples and Method Blanks)			✓
2.	GC/MS Tuning Specifications. DFTPP Meet Criteria. (NOTE THAT THERE ARE DIFFERENT CRITERIA FOR NY ASP CLP, CLP AND NJ)			✓
3.	GC/MS Tuning Frequency - Performed every 24 hours for 600 series and 12 hours for 8000 Series.			✓
4.	GC/MS Calibration - Initial Calibration performed within 30 days before sample analysis and continuing calibration performed within 24 hours of sample analysis for 600 series and 12 hours for 8000 series.			✓
5.	GC/MS Calibration Requirements.		✓	
a.	Calibration Check Compounds for 8270 and CLP.			
b.	System Performance Check Compounds for 8270 and CLP			

8270 CALIBRATION CRITERIA

SPCC Compounds	MINRF	CCC Compounds Base/Neutral Fraction	CCC Compounds Acid Fraction
N-nitroso-di-n-propylamine	0.050	Acenaphthene	4-Chloro-3-methylphenol
Hexachlorocyclopentadiene	0.050	1,4-Dichlorobenzene	2,4-Dichlorophenol
2,4-Dinitrophenol	0.050	Hexachlorobutadiene	2-Nitrophenol
4-Nitrophenol	0.050	Diphenylamine	Phenol
		Di-n-octyl phthalate	Pentachlorophenol
		Fluoranthene	2,4,6-Trichlorophenol
		Benzo(a)pyrene	

For CCC compounds Initial Calibration Criteria – RSD less than or equal to 30%
For CCC compounds Continuing Calibration Criteria - %D less than or equal to 20%

6.	Blank Contamination - If yes, list compounds and concentrations in each blank:		✓

SEMIVOLATILE METHOD BLANK SUMMARY

EPA SAMPLE NO.

SBLK02

Lab Name: Chemtech Contract: TRCE03

Lab Code: CHEM Case No.: Z3012 SAS No.: Z3012 SDG NO.: Z3012

Lab File ID: BF020695.D Lab Sample ID: PB34316B

Instrument ID: BNAF Date Extracted: 5/29/2008

Matrix: (soil/water) WATER Date Analyzed: 6/3/2008

Level: (low/med) LOW Time Analyzed: 19:52

THIS METHOD BLANK APPLIES TO THE FOLLOWING SAMPLES, MS AND MSD:

	EPA SAMPLE NO.	LAB SAMPLE ID	LAB FILE ID	DATE ANALYZED
01	TRC-GW3	Z3012-12	BB044581.D	6/2/2008
02	SLCS02	PB34316BS	BF020696.D	6/3/2008

PESTICIDE METHOD BLANK SUMMARY

EPA SAMPLE NO.

PB34318B

Lab Name: Chemtech

Contract: TRC Environmental Corp., NY

Lab Code: CHEM

Case No.: Z3012

SAS No.: Z3012

SDG No.: Z3012

Lab Sample ID: PB34318B

Lab File ID: P5020075.D

Matrix: (soil/water) WATER

Extraction: (Type) SEPF

Sulfur Cleanup: (Y/N) N

Date Extracted: 5/30/2008

Date Analyzed (1): 6/2/2008

Date Analyzed (2): 6/2/2008

Time Analyzed (1): 16:40

Time Analyzed (2): 16:40

Instrument ID (1): ECD5

Instrument ID (2): ECD5

GC Column (1): RTX-CLPes ID: 0.32 (mm)

GC Column (2): RTX-CLPest ID: 0.32 (mm)

THIS METHOD BLANK APPLIES TO THE FOLLOWING SAMPLES, MS AND MSD:

EPA SAMPLE NO.	LAB SAMPLE ID	LAB FILE ID	DATE ANALYZED 1	DATE ANALYZED 2
PB34318BS	PB34318BS	P5020076.D	6/2/2008	6/2/2008
TRC-GW5 (NYCDEP)	Z3012-15	P5020096.D	6/3/2008	6/3/2008

END OF ANALYTICAL RESULTS

APPENDIX D

RECOMMENDED REMEDIATION AND COST ESTIMATES

For Site environmental conditions to be suitable for construction of a New York City Public School facility, TRC recommends the following:

- USTs and any associated petroleum impacted soil, if encountered, should be excavated and disposed of in accordance with all federal, state, and local regulations.
- To prevent chlorinated solvent and petroleum-related compounds present in soil vapor from entering the new school building, a soil vapor barrier should be incorporated into the new school design.
- If shallow soils at the Site are excavated during construction activities, TRC recommends that the soil be characterized to identify material handling requirements and for material reuse, handling and/or waste disposal requirements and be managed in accordance with federal, state, and local regulations.
- After the proposed new building and grounds are constructed, it is anticipated that there will be no exposed soil at the Site; however, if landscaped areas are incorporated into the development of the Site, a minimum 2-foot thick layer of environmentally clean fill should be placed over existing soil in those areas.

First Remediation Measure – UST and Associated Contaminated Soil Removal

The cost estimate for the first remediation measure uses the following assumptions:

- Two (2) 550-gallon gasoline USTs are present on Site and the USTs contain a combined total of 500 gallons of a gasoline/water mixture; and
- 200 tons of gasoline contaminated soil is present in the vicinity of the USTs.

Activity	Units	Rate	Total
Excavator with hoe-ram attachment and operator (local union)	5 days	$2,000/day	$10,000
Environmental labor technician (local union) – 3 men	5 days	$1,900/day	$9,500
Removal and disposal of gasoline contaminated water and product for recycling	500 gallons	$1.10/gallon	$550
Transportation and disposal of contaminated concrete	15 cubic yards	$60/cubic yard	$900
Transportation and disposal of petroleum contaminated soil at a permitted landfill	200 tons	$80/ton	$16,000
Laboratory analysis of endpoint samples for STARS list VOCs/SVOCs	5 samples	$200/sample	$1,000
Activity Total Cost (rounded)			**$38,000**
Engineering Design, Specifications, Drawings, Data Evaluation, and Reporting Labor Expenses (20%)			**$7,600**
Subtotal Project Costs (rounded)			**$45,600**
15% Contingency on all Costs (rounded)			**$6,840**
		Total System Cost (rounded):	**$52,500**

First Engineering Control – Soil Vapor Barrier

The cost estimate for the vapor barrier uses the following assumptions:

1. The area of the vapor barrier includes an assumed building footprint of 20,000 square feet with a 10 foot deep basement. Therefore, for cost estimating purposes, TRC has assumed that the total area to be covered by the vapor barrier is approximately 25,000 square feet.

Vapor Barrier Cost Estimate

Activity	Units	Rate	Total
Install Vapor Barrier (Building footprint and sub-grade walls)	25,000 sf	$5/sf	$125,000
Activity Total Cost			**$125,000**
Engineering Design, Specifications, Drawings, Data Evaluation, and Reporting Labor Expenses (20%)			**$25,000**
Subtotal Project Costs			**$150,000**
15% Contingency on all Costs (rounded)			**$22,500**
		Total System Cost (rounded):	**$172,500**

Total Engineering and Remediation Cost Estimate

Line Item Description	Cost
Vapor Barrier Cost Estimate	**$172,500**
UST and Associated Contaminated Soil Removal Cost Estimate	**$52,500**
Total	**$225,000**

APPENDIX B

SOIL VAPOR SAMPLING LOGS

SOIL VAPOR SAMPLING LOG SHEET

Sample Number: SV-19

PROJECT: Greenpoint Landing	**PROJECT NO.:** 170229002
LOCATION: Brooklyn, New York (PARCEL G1)	**SURFACE ELEVATION AND DATUM:** Approx.
DRILLING FIRM OR LANGAN INSTALLER: AARCO Environmental Services	**INSTALLATION DATE STARTED:** 8/21/2014 **DATE FINISHED:** 8/21/2014
INSTALLATION FOREMAN: Jon Sepe	**SAMPLE DATE STARTED:** 8/21/2014 **DATE FINISHED:** 8/21/2014
INSTALLATION EQUIPMENT: Geoprobe 75220 DT Rig	**TYPE OF SAMPLING DEVICE:** Summa Canister (2.7 liter)
INSPECTOR: Luke McCartney	**SAMPLER:** Luke McCartney
POTENTIAL SAMPLE INTERFERENCES: None	**WEATHER CONDITIONS (PRECIP., TEMP., PRESS., WIND SPEED AND DIR.):** Partly Cloudy, Mid- to High-70°s, Wind: W 5-10 mph, Pressure: 30.07 inHg

METHOD OF INSTALLATION AND PURGING:

Probe, filter pack and seal installed in open borehole advanced with Geoprobe 6610 DT Rig and purged with Multi RAE (0.2 L/min); integrity of seal was checked via a helium gas tracer test.

TUBING TYPE/DIAMETER: 1/4'' ID x 3/8'' OD	**TYPE OF MATERIAL ABOVE SEAL:** No.2 Sand and Cement/Bentonite

APPENDIX D

WELL CONSTRUCTION LOGS

LANGAN

WELL CONSTRUCTION SUMMARY

Well No. MW-33

PROJECT Greenpoint Landing	**PROJECT NO.** 170229002
LOCATION Greenpoint, Brooklyn, New York (PARCEL G1)	**ELEVATION AND DATUM** Top of Manhole: 8.11' Top of PVC Pipe: 7.92' (NAVD88)
DRILLING AGENCY AARCO Environmental Services	**DATE STARTED** 8/20/2014 **DATE FINISHED** 8/20/2014
DRILLING EQUIPMENT Geoprobe 7822DT	**DRILLER** Jon Sepe
SIZE AND TYPE OF BIT 6" ID Hollow-stem auger (HSA)	**LANGAN REP.** Luke McCartney

METHOD OF INSTALLATION

6" ID HSA's were advanced into the subsurface using a Geoprobe 7822DT drilling rig. Augers were advanced to 14' below surface grade. A 2" diameter monitoring well constructed of 10' of 10-slot PVC well screen and 4' of PVC solid riser pipe was inserted into the auger hole, and the annulus was filled to 3' below grade (BG) with #1 sand, to 2' BG with hydrated bentonite. The borehole was filled to about 0.5' BG with clean cuttings and finished at grade in a manhole.

METHOD OF WELL DEVELOPMENT

A 2" submersible pump fitted with 3/8" diameter tubing was used to purge water from the well into a 55-gallon drum until the water was clear, and a minimum of 5 well-casing volumes had been removed.

TYPE OF CASING SCH. 40 PVC	**DIAMETER** 2"	**TYPE OF BACKFILL MATERIAL** Clean cuttings	
TYPE OF SCREEN 10-slot SCH. 40 PVC	**DIAMETER** 2"	**TYPE OF SEAL MATERIAL** Bentonite (hydrated)	
BOREHOLE DIAMETER 6"		**TYPE OF FILTER MATERIAL** #1 sand

Project Name: GREENPOINT LANDING **Lab Number:** L1419089
Project Number: 170229002 **Report Date:** 08/28/14

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Performance criteria for CAM and RCP methods allow for some LCS compound failures to occur and still be within method compliance. In these instances, the specific failures are not narrated but are noted in the associated QC table. This information is also incorporated in the Data Usability format for our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY
For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Case Narrative (continued)

Volatile Organics in Air

Canisters were released from the laboratory on August 19, 2014. The canister certification results are provided as an addendum.

Samples L1419089-01, -03, -04, -05 and -06 have elevated detection limits due to the dilution required by the elevated concentrations of target compounds in the samples.

Samples L1419089-01 through -04, -06 and -07 results for Acetone should be considered estimated due to co-elution with a non-target peak.

Samples L1419089-01, -02, -06 and -07 The presence of 2,2,4-Trimethylpentane could not be determined in these samples due to a non-target compound interfering with the identification and quantification of this compound.

Samples L1419089-02 and -07 have elevated detection limits due to the dilution required by the elevated concentrations of non-target compounds in the samples.

Samples L1419089-03, -04 and -05 were diluted and re-analyzed to quantify the samples within the calibration range. The results should be considered estimated, and are qualified with an E flag, for any compound that exceeded the calibration range in the initial analysis. The re-analysis was performed only for the compound that exceeded the calibration range.

Samples L1419089-06 The presence of 4-Ethyltoluene could not be determined in this sample due to a non-target compound interfering with the identification and quantification of this compound.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Authorized Signature: Christopher J. Anderson

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

Footnotes

1	- The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

A	- Spectra identified as "Aldol Condensation Product".
B	- The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit.
C	- Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
D	- Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
E	- Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
G	- The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

Report Format: Data Usability Report

Project Name:	GREENPOINT LANDING	**Lab Number:**	L1419089
Project Number:	170229002	**Report Date:**	08/28/14

Data Qualifiers

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

J - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs).

ND - Not detected at the reporting limit (RL) for the sample.

Report Format: Data Usability Report

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

Last revised April 15, 2014

The following analytes are not included in our NELAP Scope of Accreditation:

Westborough Facility
EPA 524.2: Acetone, 2-Butanone (Methyl ethyl ketone (MEK), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.
EPA 8260C: 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.
EPA 8330A/B: PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT.
EPA 8270D: 1-Methylnaphthalene, Dimethylnaphthalene,1,4-Diphenylhydrazine.
EPA 625: 4-Chloroaniline, 4-Methylphenol.
SM4500: Soil: Total Phosphorus, TKN, NO2, NO3.
EPA 9071: Total Petroleum Hydrocarbons, Oil & Grease.

Mansfield Facility
EPA 8270D: Biphenyl.
EPA 2540D: TSS
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water
EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7**: Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;
EPA 300.0: Nitrate-N, Fluoride, Sulfate; **EPA 353.2**: Nitrate-N, Nitrite-N; **SM4500NO3-F**: Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500Cl-D, SM2320B, SM2540C, SM4500H-B**
EPA 332: Perchlorate.
Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Non-Potable Water
EPA 200.8: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;
EPA 200.7: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;
EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, **EPA 350.1**: Ammonia-N, **LACHAT 10-107-06-1-B**: Ammonia-N, **SM4500NO3-F,**
EPA 353.2: Nitrate-N**, SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**
EPA 624: Volatile Halocarbons & Aromatics,
EPA 608: Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs
EPA 625: SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045**: PCB-Oil.
Microbiology: **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF**.

Project Name: GREENPOINT LANDING **Lab Number:** L1418990
Project Number: 170229002 **Report Date:** 08/28/14

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Performance criteria for CAM and RCP methods allow for some LCS compound failures to occur and still be within method compliance. In these instances, the specific failures are not narrated but are noted in the associated QC table. This information is also incorporated in the Data Usability format for our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY
For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Project Name: GREENPOINT LANDING **Lab Number:** L1418990
Project Number: 170229002 **Report Date:** 08/28/14

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Volatile Organics

L1418990-11: The internal standard (IS) response for 1,4-Dichlorobenzene-d4 (22%) and the surrogate recoveries for toluene-d8 (135%) and 4-bromofluorobenzene (171%) were outside the acceptance criteria; however, re-analysis achieved similar results: Chlorobenzene-d5 (46%), and 1,4-Dichlorobenzene-d4 (13%) and toluene-d8 (144%) and 4-bromofluorobenzene (196%). The results of both analyses are reported; however, since the IS response was below method criteria, all associated compounds and surrogate recoveries are considered to have a potentially high bias.

The WG716806-4/-5 MS/MSD recoveries, performed on L1418990-08, are outside the acceptance criteria for vinyl acetate (MSD, 65%), 1,2-dibromo-3-chloropropane (64%/65%), hexachlorobutadiene (57%/45%), 1,2,3-trichlorobenzene (65%/62%), 1,2,4-trichlorobenzene (67%/63%), bromomethane (156%/149%), vinyl chloride (150%/142%), and chloroethane (176%/160%); however, the associated LCS/LCSD recoveries are within overall method allowances. No further action was required.

Semivolatile Organics

The WG715914-4/-5 MS/MSD recoveries, performed on L1418990-08, are below the acceptance criteria for 3,3'-dichlorobenzidine (MS, 0%), 2,4-dinitrophenol (MSD, 0%) and benzoic acid (0%/0%) due to the concentration of these compounds falling below the reported detection limit.

The WG715914-4/-5 MS/MSD recoveries, performed on L1418990-08, are outside the acceptance criteria for 2,4-dinitrotoluene (100%/100%), fluoranthene (150%/220%), benzo(a)anthracene (MSD, 180%), benzo(a)pyrene (MSD, 180%), benzo(b)fluoranthene (160%/200%), chrysene (MSD,180%), phenanthrene (MSD, 190%), indeno(1,2,3-cd)pyrene (160%) and pyrene (150%/220%).

PCBs

The WG716238-3 LCSD recoveries are outside the acceptance criteria for aroclor 1016 (32%) and aroclor

Case Narrative (continued)

1260 (24%). In addition, the surrogate recoveries are outside of acceptance criteria for decachlorobiphenyl (23%/25%).

Pesticides

L1418990-02 has elevated detection limits due to the dilution required by the sample matrix.

Metals

L1418990-01 through -11 have elevated detection limits for all elements, with the exception of mercury, due to the dilutions required by matrix interferences encountered during analysis.

L1418990-03 and -08 have elevated detection limits for calcium due to the dilution required to quantitate the result within the calibration range.

The WG715672-3 MS recovery, performed on L1418990-08, is outside the acceptance criteria for mercury (75%). A post digestion spike was performed and was within acceptance criteria.

The WG715937-3/-4 MS/MSD recoveries for calcium (7020%/0%), performed on L1418990-08, do not apply because the sample concentration is greater than four times the spike amount added.

The WG715937-3/-4 MS/MSD recoveries for aluminum (MS, 376%) and iron (2510%/6250%), performed on L1418990-08, do not apply because the sample concentration is greater than four times the spike amount added.

The WG715937-3/-4 MS/MSD recoveries, performed on L1418990-08, are outside the acceptance criteria for barium (63%/162%), copper (MSD, 190%), lead (0%/147%), magnesium (150%/137%), manganese (MSD, 475%), sodium (MS, 134%), and zinc (0%/250%). A post digestion spike was performed and yielded unacceptable recoveries for magnesium (78%), sodium (60%), lead (59%), and zinc (60%); all other compounds were within acceptance criteria. This has been attributed to sample matrix.

The WG715937-3/-4 MS/MSD RPDs, performed on L1418990-08, are above the acceptance criteria for barium (38%), calcium (55%), copper (24%), lead (40%), manganese (59%), and zinc (40%).

Cyanide, Total

The WG715773-2 LCS recovery, associated with L1418990-01 through -10, is above our in-house

Project Name: GREENPOINT LANDING **Lab Number:** L1418990
Project Number: 170229002 **Report Date:** 08/28/14

Case Narrative (continued)

acceptance criteria (127%), but within the vendor-certified acceptance limits. The results of the original analyses are reported; however, all positive detects are considered to have a potentially high bias for this analyte.
The WG715779-2/-3 LCS/LCSD recoveries, associated with L1418990-11, are outside our in-house acceptance criteria (127%/72%), but within the vendor-certified acceptance limits. The results of the original analyses are reported; however, all positive detects are considered to have a potentially high bias for this analyte.

Chromium, Hexavalent
The WG716452-7 Soluble MS recovery, performed on L1418996-03, is outside the acceptance criteria. A post analytical spike was performed and was within acceptance criteria.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

Footnotes

1	- The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

A	- Spectra identified as "Aldol Condensation Product".
B	- The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit.
C	- Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
D	- Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
E	- Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
G	- The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

Report Format: DU Report with 'J' Qualifiers

Project Name:	GREENPOINT LANDING	**Lab Number:**	L1418990
Project Number:	170229002	**Report Date:**	08/28/14

Data Qualifiers

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

Report Format: DU Report with 'J' Qualifiers

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

Last revised April 15, 2014

The following analytes are not included in our NELAP Scope of Accreditation:

Westborough Facility
EPA 524.2: Acetone, 2-Butanone (Methyl ethyl ketone (MEK), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.
EPA 8260C: 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.
EPA 8330A/B: PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT.
EPA 8270D: 1-Methylnaphthalene, Dimethylnaphthalene,1,4-Diphenylhydrazine.
EPA 625: 4-Chloroaniline, 4-Methylphenol.
SM4500: Soil: Total Phosphorus, TKN, NO2, NO3.
EPA 9071: Total Petroleum Hydrocarbons, Oil & Grease.

Mansfield Facility
EPA 8270D: Biphenyl.
EPA 2540D: TSS
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water
EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7**: Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;
EPA 300.0: Nitrate-N, Fluoride, Sulfate; **EPA 353.2**: Nitrate-N, Nitrite-N; **SM4500NO3-F**: Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500Cl-D, SM2320B, SM2540C, SM4500H-B**
EPA 332: Perchlorate.
Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Non-Potable Water
EPA 200.8: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;
EPA 200.7: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Performance criteria for CAM and RCP methods allow for some LCS compound failures to occur and still be within method compliance. In these instances, the specific failures are not narrated but are noted in the associated QC table. This information is also incorporated in the Data Usability format for our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY
For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Project Number: 170229002 **Report Date:** 09/03/14

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Semivolatile Organics

The WG717469-2/-3 LCS/LCSD recoveries, associated with L1419472-01 through -03, are below the acceptance criteria for benzoic acid (0%/0%); however, it has been identified as a "difficult" analyte. The results of the associated samples are reported.

Total Metals

The WG717237-1 Method Blank, associated with L1419472-01 through -03, has concentrations above the reporting limit for potassium and sodium. Since the associated sample concentrations are greater than 10x the blank concentration for these analytes, no qualification of the results was performed.

Dissolved Metals

The WG717623-1 Method Blank, associated with L1419472-01 through -03, has a concentration above the reporting limit for sodium. Since the associated sample concentrations are greater than 10x the blank concentration for this analyte, no qualification of the results was performed.

Chromium, Hexavalent

L1419472-01 has elevated detection limits due to the dilution required by the sample matrix.

The WG717104-4 MS recovery (30%), performed on L1419472-01, is outside the acceptance criteria; however, the associated LCS recovery was within criteria. No further action was taken.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Authorized Signature: Cristin Walker

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

Footnotes

1	- The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

A	- Spectra identified as "Aldol Condensation Product".
B	- The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit.
C	- Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
D	- Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
E	- Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
G	- The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

Report Format: DU Report with 'J' Qualifiers

Project Name:	GREENPOINT LANDING	**Lab Number:**	L1419472
Project Number:	170229002	**Report Date:**	09/03/14

Data Qualifiers

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

Report Format: DU Report with 'J' Qualifiers

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

Last revised April 15, 2014

The following analytes are not included in our NELAP Scope of Accreditation:

Westborough Facility
EPA 524.2: Acetone, 2-Butanone (Methyl ethyl ketone (ME□□), Tert-butyl alcohol, 2-He□anone, Tetrahydro□uran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIB□□), Carbon disul□ide, Diethyl ether.
EPA 8260C: 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.
EPA 8330A/B: PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT.
EPA 8270D: 1-Methylnaphthalene, Dimethylnaphthalene,1,4-Diphenylhydrazine.
EPA 625: 4-Chloroaniline, 4-Methylphenol.
SM4500: Soil: Total Phosphorus, T□N, NO2, NO3.
EPA 9071: Total Petroleum Hydrocarbons, Oil □ Grease.

Mansfield Facility
EPA 8270D: Biphenyl.
EPA 2540D: TSS
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water
EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl□ **EPA 200.7**: Ba,Be,Ca,Cd,Cr,Cu,Na□**EPA 245.1:** Mercury□
EPA 300.0: Nitrate-N, Fluoride, Sul□ate□**EPA 353.2**: Nitrate-N, Nitrite-N□**SM4500NO3-F**: Nitrate-N, Nitrite-N□**SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500Cl-D, SM2320B, SM2540C, SM4500H-B**
EPA 332: Perchlorate.
Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Non-Potable Water
EPA 200.8: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,□n□
EPA 200.7: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,□,Se,Ag,Na,Sr,Ti,Tl,V,□n□
EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, **EPA 350.1**: Ammonia-N, **LACHAT 10-107-06-1-B**: Ammonia-N, **SM4500NO3-F,**
EPA 353.2: Nitrate-N**, SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**
EPA 624: Volatile Halocarbons □ Aromatics,
EPA 608: Chlordane, To□aphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosul□an I, Endosul□an II, Endosul□an sul□ate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epo□ide, PCBs
EPA 625: SVOC (Acid/Base/Neutral E□tractables), **EPA 600/4-81-045**: PCB-Oil.
Microbiology: **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF**.

For a complete listing o□analytes and methods, please contact your Alpha Pro□ect Manager.

Project Number: 170229002 **Report Date:** 09/02/14

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Performance criteria for CAM and RCP methods allow for some LCS compound failures to occur and still be within method compliance. In these instances, the specific failures are not narrated but are noted in the associated QC table. This information is also incorporated in the Data Usability format for our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY
For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Volatile Organics

The WG717031-4/-5 MS/MSD recoveries, performed on L1419360-01, are outside the acceptance criteria for 1,2-dichloroethane (MS at 132%), 1,1,1-trichloroethane (MS at 132%), bromomethane (MS at 34%), vinyl chloride (150%/148%), trans-1,2-dichloroethene (157%/154%), carbon disulfide (MSD at 131%), naphthalene (MS at 67%), and ethyl ether (MSD at 145%); however, the associated LCS/LCSD recoveries are within overall method allowances. No further action was required.

The WG717031-4/-5 MS/MSD RPDs, performed on L1419360-01, are above the acceptance criteria for bromomethane (26%), acrolein (27%), naphthalene (26%), and ethyl ether (24%).

Semivolatile Organics

The WG717000-4 MS recoveries, performed on L1419360-01, are outside the acceptance criteria for 3,3'-dichlorobenzidine (38%), 2,4-dimethylphenol (18%), and 2,4-dinitrophenol (140%).

The WG717000-4/-5 MS/MSD RPDs, performed on L1419360-01, are above the acceptance criteria for 3,3'-dichlorobenzidine (46%), 2,4-dimethylphenol (101%), and benzaldehyde (MSD at 38%).

Pesticides

The WG716998-4/-5 MS/MSD recoveries, performed on L1419360-01, are outside the acceptance criteria for lindane (158%/153%), endrin (166%/161%), dieldrin (160%/155%), and 4,4'-ddd (MS at 155%); however, the associated LCS/LCSD recoveries are within overall method allowances. No further action was required.

Total Metals

The WG716887-3/-4 MS/MSD recoveries for calcium (20%/23%) and sodium (0%/0%), performed on L1419360-01, do not apply because the sample concentrations are greater than four times the spike amount added.

Project Name: GREENPOINT LANDING **Lab Number:** L1419360
Project Number: 170229002 **Report Date:** 09/02/14

Case Narrative (continued)

The WG716887-3 MS recoveries, performed on L1419360-01, are outside the acceptance criteria for cadmium (MS at 128%), iron (37%/56%), magnesium (149%/160%), and potassium (130%/141%). A post digestion spike was performed and was within acceptance criteria.

Dissolved Metals

The WG717338-3 MS recoveries, performed on L1419360-01, are outside the acceptance criteria for magnesium (142%) and potassium (130%). A post digestion spike was performed and yielded an unacceptable recovery for magnesium (122%); all other compounds were within acceptance criteria. This has been attributed to sample matrix.

The WG717338-4 MSD recoveries for calcium (18%) and sodium (0%), performed on L1419360-01, do not apply because the sample concentrations are greater than four times the spike amount added.

The WG717338-4 MSD recoveries, performed on L1419360-01, are outside the acceptance criteria for iron (0%) and sodium (0%). A post digestion spike was performed and was within acceptance criteria.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

Footnotes

1	- The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

A	- Spectra identified as "Aldol Condensation Product".
B	- The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit.
C	- Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
D	- Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
E	- Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
G	- The concentration may be biased high due to matrix interferences (i.e, co-elution) with non-target compound(s). The result should be considered estimated.

Report Format: DU Report with 'J' Qualifiers

Project Name:	GREENPOINT LANDING	**Lab Number:**	L1419360
Project Number:	170229002	**Report Date:**	09/02/14

Data Qualifiers

H - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.

I - The lower value for the two columns has been reported due to obvious interference.

M - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.

NJ - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.

P - The RPD between the results for the two columns exceeds the method-specified criteria.

Q - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)

R - Analytical results are from sample re-analysis.

RE - Analytical results are from sample re-extraction.

S - Analytical results are from modified screening analysis.

J - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).

ND - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

Report Format: DU Report with 'J' Qualifiers

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

Last revised April 15, 2014

The following analytes are not included in our NELAP Scope of Accreditation:

Westborough Facility
EPA 524.2: Acetone, 2-Butanone (Methyl ethyl ketone (ME□□), Tert-butyl alcohol, 2-He□anone, Tetrahydro□uran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIB□□), Carbon disul□ide, Diethyl ether.
EPA 8260C: 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.
EPA 8330A/B: PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT.
EPA 8270D: 1-Methylnaphthalene, Dimethylnaphthalene,1,4-Diphenylhydrazine.
EPA 625: 4-Chloroaniline, 4-Methylphenol.
SM4500: Soil: Total Phosphorus, T□N, NO2, NO3.
EPA 9071: Total Petroleum Hydrocarbons, Oil □ Grease.

Mansfield Facility
EPA 8270D: Biphenyl.
EPA 2540D: TSS
EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water
EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl□ **EPA 200.7**: Ba,Be,Ca,Cd,Cr,Cu,Na□**EPA 245.1:** Mercury□
EPA 300.0: Nitrate-N, Fluoride, Sul□ate□**EPA 353.2**: Nitrate-N, Nitrite-N□**SM4500NO3-F**: Nitrate-N, Nitrite-N□**SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500Cl-D, SM2320B, SM2540C, SM4500H-B**
EPA 332: Perchlorate.
Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Non-Potable Water
EPA 200.8: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,□n□
EPA 200.7: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,□,Se,Ag,Na,Sr,Ti,Tl,V,□n□
EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, **EPA 350.1**: Ammonia-N, **LACHAT 10-107-06-1-B**: Ammonia-N, **SM4500NO3-F,**
EPA 353.2: Nitrate-N**, SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**
EPA 624: Volatile Halocarbons □ Aromatics,
EPA 608: Chlordane, To□aphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosul□an I, Endosul□an II, Endosul□an sul□ate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epo□ide, PCBs
EPA 625: SVOC (Acid/Base/Neutral E□tractables), **EPA 600/4-81-045**: PCB-Oil.
Microbiology: **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF**.

For a complete listing o□analytes and methods, please contact your Alpha Pro□ect Manager.

APPENDIX I

ANALYTICAL LABORATORY CERTIFICATION

COPY

NEW YORK STATE DEPARTMENT OF HEALTH
WADSWORTH CENTER

Expires 12:01 AM April 01, 2015
Issued April 01, 2014

CERTIFICATE OF APPROVAL FOR LABORATORY SERVICE

Issued in accordance with and pursuant to section 502 Public Health Law of New York State

MR. CHRISTOPHER WAKEFIELD
ALPHA ANALYTICAL
8 WALKUP DR
WESTBOROUGH, MA 01581-1019

NY Lab Id No: 11148

is hereby APPROVED as an Environmental Laboratory in conformance with the National Environmental Laboratory Accreditation Conference Standards (2003) for the category ENVIRONMENTAL ANALYSES POTABLE WATER
All approved analytes are listed below:

Drinking Water Bacteriology	
Coliform, Total / E. coli (Qualitative)	SM 18-22 9223B (-97) (Colilert)
Standard Plate Count	SM 18-22 9215B (-00)
Drinking Water Metals I	
Arsenic, Total	EPA 200.8 Rev. 5.4
Barium, Total	EPA 200.7 Rev. 4.4
	EPA 200.8 Rev. 5.4
Cadmium, Total	EPA 200.7 Rev. 4.4
	EPA 200.8 Rev. 5.4
Chromium, Total	EPA 200.7 Rev. 4.4
	EPA 200.8 Rev. 5.4
Copper, Total	EPA 200.7 Rev. 4.4
	EPA 200.8 Rev. 5.4
Iron, Total	EPA 200.7 Rev. 4.4
Lead, Total	EPA 200.8 Rev. 5.4
Manganese, Total	EPA 200.7 Rev. 4.4
Mercury, Total	EPA 245.1 Rev. 3.0
Selenium, Total	EPA 200.8 Rev. 5.4
Silver, Total	EPA 200.7 Rev. 4.4
	EPA 200.8 Rev. 5.4
Zinc, Total	EPA 200.7 Rev. 4.4
	EPA 200.8 Rev. 5.4
Drinking Water Metals II	
Aluminum, Total	EPA 200.7 Rev. 4.4
Antimony, Total	EPA 200.8 Rev. 5.4
Beryllium, Total	EPA 200.7 Rev. 4.4
Drinking Water Metals II	
Beryllium, Total	EPA 200.8 Rev. 5.4
Nickel, Total	EPA 200.7 Rev. 4.4
	EPA 200.8 Rev. 5.4
Thallium, Total	EPA 200.8 Rev. 5.4
Drinking Water Metals III	
Calcium, Total	EPA 200.7 Rev. 4.4
Magnesium, Total	EPA 200.7 Rev. 4.4
Sodium, Total	EPA 200.7 Rev. 4.4
Drinking Water Miscellaneous	
Organic Carbon, Total	SM 19-22 5310C (-00)
Perchlorate	EPA 332.0 Rev. 1
Turbidity	SM 18-22 2130 B (-01)
	EPA 180.1 Rev. 2.0
Drinking Water Non-Metals	
Alkalinity	SM 18-22 2320B (-97)
Calcium Hardness	EPA 200.7 Rev. 4.4
Chloride	EPA 300.0 Rev. 2.1
Color	SM 18-22 2120B (-01)
Cyanide	SM 18-22 4500-CN E (-99)
Fluoride, Total	EPA 300.0 Rev. 2.1
	SM 18-22 4500-F C (-97)
Nitrate (as N)	SM 18-22 4500-NO3 F (-00)
Nitrite (as N)	SM 18-22 4500-NO3 F (-00)
Solids, Total Dissolved	SM 18-22 2540C (-97)

Serial No.: 50510

Property of the New York State Department of Health. Certificates are valid only at the address shown, must be conspicuously posted, and are printed on secure paper. Continued accreditation depends on successful ongoing participation in the Program. Consumers are urged to call (518) 485-5570 to verify the laboratory's accreditation status.

NY Lab Id No: 11148

is hereby APPROVED as an Environmental Laboratory in conformance with the National Environmental Laboratory Accreditation Conference Standards (2003) for the category ENVIRONMENTAL ANALYSES POTABLE WATER All approved analytes are listed below:

Drinking Water Non-Metals

Specific Conductance	SM 18-22 2510B (-97)
Sulfate (as SO4)	EPA 300.0 Rev. 2.1

Drinking Water Trihalomethanes

Bromodichloromethane	EPA 524.2
Bromoform	EPA 524.2
Chloroform	EPA 524.2
Dibromochloromethane	EPA 524.2
Total Trihalomethanes	EPA 524.2

Fuel Additives

Methyl tert-butyl ether	EPA 524.2
Naphthalene	EPA 524.2

Microextractibles

1,2-Dibromo-3-chloropropane	EPA 504.1
1,2-Dibromoethane	EPA 504.1

Volatile Aromatics

1,2,3-Trichlorobenzene	EPA 524.2
1,2,4-Trichlorobenzene	EPA 524.2
1,2,4-Trimethylbenzene	EPA 524.2
1,2-Dichlorobenzene	EPA 524.2
1,3,5-Trimethylbenzene	EPA 524.2
1,3-Dichlorobenzene	EPA 524.2
1,4-Dichlorobenzene	EPA 524.2
2-Chlorotoluene	EPA 524.2
4-Chlorotoluene	EPA 524.2

Volatile Aromatics

Benzene	EPA 524.2
Bromobenzene	EPA 524.2
Chlorobenzene	EPA 524.2
Ethyl benzene	EPA 524.2
Hexachlorobutadiene	EPA 524.2
Isopropylbenzene	EPA 524.2
n-Butylbenzene	EPA 524.2
n-Propylbenzene	EPA 524.2
p-Isopropyltoluene (P-Cymene)	EPA 524.2
sec-Butylbenzene	EPA 524.2
Styrene	EPA 524.2
tert-Butylbenzene	EPA 524.2
Toluene	EPA 524.2
Total Xylenes	EPA 524.2

Volatile Halocarbons

1,1,1,2-Tetrachloroethane	EPA 524.2
1,1,1-Trichloroethane	EPA 524.2
1,1,2,2-Tetrachloroethane	EPA 524.2
1,1,2-Trichloroethane	EPA 524.2
1,1-Dichloroethane	EPA 524.2
1,1-Dichloroethene	EPA 524.2
1,1-Dichloropropene	EPA 524.2
1,2,3-Trichloropropane	EPA 524.2
1,2-Dichloroethane	EPA 524.2
1,2-Dichloropropane	EPA 524.2

Serial No.: 50510

Property of the New York State Department of Health. Certificates are valid only at the address shown, must be conspicuously posted, and are printed on secure paper. Issued April 01, 2014

CERTIFICATE OF APPROVAL FOR LABORATORY SERVICE

Issued in accordance with and pursuant to section 502 Public Health Law of New York State

MR. CHRISTOPHER WAKEFIELD
ALPHA ANALYTICAL
8 WALKUP DR
WESTBOROUGH, MA 01581-1019

NY Lab Id No. 11148

Is hereby APPROVED as an Environmental Laboratory in conformance with the National Environmental Laboratory Accreditation Conference Standards (2003) for the category ENVIRONMENTAL ANALYSES NON POTABLE WATER All approved analytes are listed below:

Polychlorinated Biphenyls

PCB-1232	EPA 8082A
	EPA 608
PCB-1242	EPA 8082A
	EPA 608
PCB-1248	EPA 8082A
	EPA 608
PCB-1254	EPA 8082A
	EPA 608
PCB-1260	EPA 8082A
	EPA 608
PCB-1262	EPA 8082A
PCB-1268	EPA 8082A

Polynuclear Aromatics

Acenaphthene	EPA 625
	EPA 8270D
Acenaphthylene	EPA 625
	EPA 8270D
Anthracene	EPA 625
	EPA 8270D
Benzo(a)anthracene	EPA 625
	EPA 8270D
Benzo(a)pyrene	EPA 625
	EPA 8270D
Benzo(b)fluoranthene	EPA 625
	EPA 8270D

Polynuclear Aromatics

Benzo(ghi)perylene	EPA 625
	EPA 8270D
Benzo(k)fluoranthene	EPA 625
	EPA 8270D
Chrysene	EPA 625
	EPA 8270D
Dibenzo(a,h)anthracene	EPA 625
	EPA 8270D
Fluoranthene	EPA 625
	EPA 8270D
Fluorene	EPA 625
	EPA 8270D
Indeno(1,2,3-cd)pyrene	EPA 625
	EPA 8270D
Naphthalene	EPA 625
	EPA 8270D

Fluorene Low Level	EPA 8270D SIM
Indeno(1,2,3-cd)pyrene Low Level	EPA 8270D SIM
Naphthalene Low Level	EPA 8270D SIM
Phenanthrene Low Level	EPA 8270D SIM
Pyrene Low Level	EPA 8270D SIM

Metals I

Barium, Total	EPA 6010C
	EPA 6020A
Cadmium, Total	EPA 6010C
	EPA 6020A
Calcium, Total	EPA 6010C
	EPA 6020A
Chromium, Total	EPA 6010C
	EPA 6020A
Copper, Total	EPA 6010C
	EPA 6020A
Iron, Total	EPA 6010C
	EPA 6020A
Lead, Total	EPA 6010C

Serial No.: 50512

Property of the New York State Department of Health. Certificates are valid only at the address shown, must be conspicuously posted, and are printed on secure paper. Continued accreditation depends on successful ongoing participation in the Program. Consumers are urged to call (518) 485-5570 to verify the laboratory's accreditation status.

Issued April 01, 2014

CERTIFICATE OF APPROVAL FOR LABORATORY SERVICE

Issued in accordance with and pursuant to section 502 Public Health Law of New York State

MR. CHRISTOPHER WAKEFIELD
ALPHA ANALYTICAL
8 WALKUP DR
WESTBOROUGH, MA 01581-1019

NY Lab Id No: 11148

is hereby APPROVED as an Environmental Laboratory in conformance with the National Environmental Laboratory Accreditation Conference Standards (2003) for the category ENVIRONMENTAL ANALYSES SOLID AND HAZARDOUS WASTE
All approved analytes are listed below:

Metals I

Lead, Total	EPA 6020A
Magnesium, Total	EPA 6010C
	EPA 6020A
Manganese, Total	EPA 6010C
	EPA 6020A
Nickel, Total	EPA 6010C
	EPA 6020A
Potassium, Total	EPA 6010C
	EPA 6020A
Silver, Total	EPA 6010C
	EPA 6020A
Sodium, Total	EPA 6010C
	EPA 6020A

Metals II

Aluminum, Total	EPA 6010C
	EPA 6020A
Antimony, Total	EPA 6010C
	EPA 6020A
Arsenic, Total	EPA 6010C
	EPA 6020A
Beryllium, Total	EPA 6010C
	EPA 6020A
Chromium VI	EPA 7196A
Mercury, Total	EPA 7471B
Selenium, Total	EPA 6010C

Metals II

Selenium, Total	EPA 6020A
Vanadium, Total	EPA 6010C
	EPA 6020A
Zinc, Total	EPA 6010C
	EPA 6020A

Metals III

Cobalt, Total	EPA 6010C
	EPA 6020A
Molybdenum, Total	EPA 6010C
	EPA 6020A
Thallium, Total	EPA 6010C
	EPA 6020A
Tin, Total	EPA 6010C

Minerals

Chloride	EPA 9251
Sulfate (as SO4)	EPA 9038

Miscellaneous

Boron, Total	EPA 6010C
Cyanide, Total	EPA 9014
	EPA 9012B
Phenols	EPA 9065
Specific Conductance	EPA 9050A

Nitroaromatics and Isophorone

2,4-Dinitrotoluene	EPA 8270D

Serial No.: 50512

Property of the New York State Department of Health. Certificates are valid only at the address shown, must be conspicuously posted, and are printed on secure paper. Continued accreditation depends on successful ongoing participation in the Program. Consumers are urged to call (518) 485-5570 to verify the laboratory's accreditation status.

Is hereby APPROVED as an Environmental Laboratory in conformance with the National Environmental Laboratory Accreditation Conference Standards (2003) for the category ENVIRONMENTAL ANALYSES SOLID AND HAZARDOUS WASTE
All approved analytes are listed below:

Nitroaromatics and Isophorone

2,4-Dinitrotoluene	EPA 8330A
2,6-Dinitrotoluene	EPA 8270D
Isophorone	EPA 8270D
Nitrobenzene	EPA 8270D
Pyridine	EPA 8270D

Nitrosoamines

N-Nitrosodimethylamine	EPA 8270D
N-Nitrosodi-n-propylamine	EPA 8270D
N-Nitrosodiphenylamine	EPA 8270D

Organophosphate Pesticides

Parathion ethyl	EPA 8270D

Petroleum Hydrocarbons

Diesel Range Organics	EPA 8015C
Gasoline Range Organics	EPA 8015C

Phthalate Esters

Benzyl butyl phthalate	EPA 8270D
Bis(2-ethylhexyl) phthalate	EPA 8270D
Diethyl phthalate	EPA 8270D
Dimethyl phthalate	EPA 8270D
Di-n-butyl phthalate	EPA 8270D
Di-n-octyl phthalate	EPA 8270D

Polychlorinated Biphenyls

PCB-1016	EPA 8082A

Polychlorinated Biphenyls

PCB-1221	EPA 8082A
PCB-1232	EPA 8082A
PCB-1242	EPA 8082A
PCB-1248	EPA 8082A
PCB-1254	EPA 8082A
PCB-1260	EPA 8082A
PCB-1262	EPA 8082A
PCB-1268	EPA 8082A

Polynuclear Aromatic Hydrocarbons

Acenaphthene	EPA 8270D
Acenaphthylene	EPA 8270D
Anthracene	EPA 8270D
Benzo(a)anthracene	EPA 8270D
Benzo(a)pyrene	EPA 8270D
Benzo(b)fluoranthene	EPA 8270D
Benzo(ghi)perylene	EPA 8270D
Benzo(k)fluoranthene	EPA 8270D
Chrysene	EPA 8270D
Dibenzo(a,h)anthracene	EPA 8270D
Fluoranthene	EPA 8270D
Fluorene	EPA 8270D
Indeno(1,2,3-cd)pyrene	EPA 8270D
Naphthalene	EPA 8270D
Phenanthrene	EPA 8270D
Pyrene	EPA 8270D

Serial No.: 50512

Property of the New York State Department of Health. Certificates are valid only at the address shown, must be conspicuously posted, and are printed on secure paper. is hereby APPROVED as an Environmental Laboratory in conformance with the National Environmental Laboratory Accreditation Conference Standards (2003) for the category ENVIRONMENTAL ANALYSES SOLID AND HAZARDOUS WASTE
All approved analytes are listed below:

Priority Pollutant Phenols

2,3,4,6 Tetrachlorophenol	EPA 8270D
2,4,5-Trichlorophenol	EPA 8270D
2,4,6-Trichlorophenol	EPA 8270D
2,4-Dichlorophenol	EPA 8270D
2,4-Dimethylphenol	EPA 8270D
2,4-Dinitrophenol	EPA 8270D
2-Chlorophenol	EPA 8270D
2-Methyl-4,6-dinitrophenol	EPA 8270D
2-Methylphenol	EPA 8270D
2-Nitrophenol	EPA 8270D
3-Methylphenol	EPA 8270D
4-Chloro-3-methylphenol	EPA 8270D
4-Methylphenol	EPA 8270D
4-Nitrophenol	EPA 8270D
Pentachlorophenol	EPA 8270D
Phenol	EPA 8270D

Semi-Volatile Organics

1,1'-Biphenyl	EPA 8270D
1,2-Dichlorobenzene, Semi-volatile	EPA 8270D
1,3-Dichlorobenzene, Semi-volatile	EPA 8270D
1,4-Dichlorobenzene, Semi-volatile	EPA 8270D
2-Methylnaphthalene	EPA 8270D
Acetophenone	EPA 8270D
Benzaldehyde	EPA 8270D
Benzoic Acid	EPA 8270D

Semi-Volatile Organics

Benzyl alcohol	EPA 8270D
Caprolactam	EPA 8270D
Dibenzofuran	EPA 8270D

Volatile Aromatics

1,2,4-Trichlorobenzene, Volatile	EPA 8260C
1,2,4-Trimethylbenzene	EPA 8260C
1,2-Dichlorobenzene	EPA 8260C
1,3,5-Trimethylbenzene	EPA 8260C
1,3-Dichlorobenzene	EPA 8260C
1,4-Dichlorobenzene	EPA 8260C
2-Chlorotoluene	EPA 8260C
4-Chlorotoluene	EPA 8260C
Benzene	EPA 8260C
Bromobenzene	EPA 8260C
Chlorobenzene	EPA 8260C
Ethyl benzene	EPA 8260C
Isopropylbenzene	EPA 8260C
m/p-Xylenes	EPA 8260C
Naphthalene, Volatile	EPA 8260C
n-Butylbenzene	EPA 8260C
n-Propylbenzene	EPA 8260C
o-Xylene	EPA 8260C
p-Isopropyltoluene (P-Cymene)	EPA 8260C
sec-Butylbenzene	EPA 8260C
Styrene	EPA 8260C

Serial No.: 50512

Property of the New York State Department of Health. Certificates are valid only at the address shown, must be conspicuously posted, and are printed on secure paper. Continued accreditation depends on successful ongoing participation in the Program. Consumers are urged to call (518) 485-5570 to verify the laboratory's accreditation status.

is hereby APPROVED as an Environmental Laboratory in conformance with the National Environmental Laboratory Accreditation Conference Standards (2003) for the category ENVIRONMENTAL ANALYSES SOLID AND HAZARDOUS WASTE
All approved analytes are listed below:

Volatile Aromatics

tert-Butylbenzene	EPA 8260C
Toluene	EPA 8260C
Total Xylenes	EPA 8260C

Volatile Halocarbons

1,1,1,2-Tetrachloroethane	EPA 8260C
1,1,1-Trichloroethane	EPA 8260C
1,1,2,2-Tetrachloroethane	EPA 8260C
1,1,2-Trichloro-1,2,2-Trifluoroethane	EPA 8260C
1,1,2-Trichloroethane	EPA 8260C
1,1-Dichloroethane	EPA 8260C
1,1-Dichloroethene	EPA 8260C
1,1-Dichloropropene	EPA 8260C
1,2,3-Trichloropropane	EPA 8260C
1,2-Dibromo-3-chloropropane	EPA 8260C
1,2-Dibromoethane	EPA 8260C
1,2-Dichloroethane	EPA 8260C
1,2-Dichloropropane	EPA 8260C
1,3-Dichloropropane	EPA 8260C
2,2-Dichloropropane	EPA 8260C
2-Chloroethylvinyl ether	EPA 8260C
Bromochloromethane	EPA 8260C
Bromodichloromethane	EPA 8260C
Bromoform	EPA 8260C
Bromomethane	EPA 8260C
Carbon tetrachloride	EPA 8260C

Volatile Halocarbons

Chloroethane	EPA 8260C
Chloroform	EPA 8260C
Chloromethane	EPA 8260C
cis-1,2-Dichloroethene	EPA 8260C
cis-1,3-Dichloropropene	EPA 8260C
Dibromochloromethane	EPA 8260C
Dibromomethane	EPA 8260C
Dichlorodifluoromethane	EPA 8260C
Hexachlorobutadiene, Volatile	EPA 8260C
Methylene chloride	EPA 8260C
Tetrachloroethene	EPA 8260C
trans-1,2-Dichloroethene	EPA 8260C
trans-1,3-Dichloropropene	EPA 8260C
trans-1,4-Dichloro-2-butene	EPA 8260C
Trichloroethene	EPA 8260C
Trichlorofluoromethane	EPA 8260C
Vinyl chloride	EPA 8260C

Volatile Organics

1,4-Dioxane	EPA 8260C
2-Butanone (Methylethyl ketone)	EPA 8260C
2-Hexanone	EPA 8260C
4-Methyl-2-Pentanone	EPA 8260C
Acetone	EPA 8260C
Carbon Disulfide	EPA 8260C
Cyclohexane	EPA 8260C

Serial No.: 50512

Property of the New York State Department of Health. Certificates are valid only at the address shown, must be conspicuously posted, and are printed on secure paper. Continued accreditation depends on successful ongoing participation in the Program. Consumers are urged to call (518) 485-5570 to verify the laboratory's accreditation status.
