March 4, 2016 to March 10, 2016

Dear Sunnyside Resident:

Every effort is made to schedule work for the East Side Access project (ESA) during daytime hours. However, due to track outage limitations, it is sometimes necessary to perform work during weekends and overnight.

Please be advised of the following East Side Access work:

Friday, March 4th to Saturday, March 5th
East Side Access contractors will continue to deliver and place equipment and materials along the track in proximity to the 48th Street Bridge between the hours of 10 p.m. Friday, March 4th and 5 a.m. Saturday, March 5th.

Monday, March 7th to Thursday, March 10th
There will be overnight work between 10 p.m. and 5 a.m. each night at the track level adjacent to the 48th Street Bridge. The work will include the placement of equipment at the track level and on the bridge, followed by work to install steel supports as part of the operation to replace the existing bridge.

The work to install steel supports will likely continue overnight on Friday, March 11th and overnight on Saturday, March 12th. An updated notification regarding that work schedule will be provided.

Residents in proximity to this location may see lights in use and hear noise from this construction activity. The contractor has been directed to aim the lights away from residential areas as long as it does not impact the safe execution of this work or operation of trains as they travel past. All work is being performed in

conformance with the established safety standards and current regulations for noise, dust and surface vibration.

ESA Community Outreach aims to provide the most up to date information on work activities; **however the schedule of work is subject to change**.

We apologize in advance for the potential disruptions you may experience from the ongoing work. For questions or concerns about the work, please contact the East Side Access Community Outreach team:
