Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "HINTON/SANGESLAND"9/18/2001 Sangesland spoke to Jim Simori (212-867-2120) He has a contractor who completed a "Closure Report" for the spill and he wanted to know what the correct process was to close the spill out. Sangesland told him to submit the report, color photos of the clean site along with a coverletter requesting that the spill be closed out.Overfill onto basement floor and vent line to sidewalk.10/26/2001 - Spill was reviewed and closed out by Michael Hinton (DEC region #9) while he spent 1 week in NYC helping after WTC

MACKLOWE MANAGEMENT (Continued) **S104877543**

incident.According to a copy of a work report prepared by Eastmond & Sons Boiler Repair Inc., on 1/4/01 Eastmond was called to the site by Stuyvesant Fuel. Tank had been overfilled. 30 to 40 gallons spilled on the sidewalk. Speedie Dry was laid on the sidewalk and then it was pressure washed. Water/oil was vaccumed up. Eastmond provided a waste manifest for everything removed. Eastmond also provided color photos of the sidewalk and basement to confirm the cleanup.

Remarks: SUPERINTENDANT GAVE INACCURATE READING TO DRIVER. SUPER CLAIMED TANK WAS EMPTY AND TANK WAS NOT. EASTMAN ENROUTE TO CLEAN UP SPILL. PHOTOS AND CLEAN-UP REPORT SUBMITTED - SPILL CLEANED AND CLOSED - R. AUSTIN

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D011
Waste name: SILVER

Waste code: P001
Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste code: P042
Waste name: 1,2-BENZENEDIOL, 4-[1-HYDROXY-2-(METHYLAMINO)ETHYL]-, (R)-

Waste code: P075
Waste name: NICOTINE, & SALTS

Waste code: P081
Waste name: NITROGLYCERINE (R)

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

MANHATTAN PACIFIC MGMT CO (Continued) **1001460237**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Conditionally Exempt Small Quantity Generator
Description: Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number:	001
Tank Id:	208124
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
G02 - Tank Secondary Containment - Vault (w/access)
J02 - Dispenser - Suction Dispenser
F00 - Pipe External Protection - None
K01 - Spill Prevention - Catch Basin
L01 - Piping Leak Detection - Interstitial - Electronic Monitoring
B00 - Tank External Protection - None
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring
I02 - Overfill - High Level Alarm
C01 - Pipe Location - Aboveground
E02 - Piping Secondary Containment - Vault (with Access)

Tank Location:	2
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/01/1994
Capacity Gallons:	2000
Tightness Test Method:	NN
Date Test:	Not reported

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

DEC Memo:	02/08/06. Feroze, PBS case is #2-603524. TTF letter is sent to.Albert RosenbergRose & Berg Realty.131 west 35th Street, 7th FloorNew York, NY 10001.03/07/06 Feroze. Called Mr. Albert (212-981-6501), he informed that Eastman & sons 718-378-3000 is going to replace the fill line. They will test the tank after the replace work is done and will submit the documents to DEC soon.03/15/06. Spill is transferred from Feroze to Kumer Patel.03/29/06-Hiralkumar Patel. Spoke with Ms. Diania at Petroleum and she told me that petroleum tank did isolation test on Feb. 17 and found problems with fill line and vent line. they haven't done anything after that. REceived copy of tank test results from Alber Rosenberg from Rosenberg Realty, who is managing property. test results shows the system passed in test. Eastmond has replaced fill pipe and vent line. Spoke with Mr. Rosenberg and asked him to send me copy of previous tank test results. Spoke with Issac at Eastmond and he told me that the fill line was leaking at flange as it was passing through solid concrete into the building. eastmond has replaced the fill line from this flange to curb and also replacecd the vent line. as per Isaac it was very little leak and there was no cotaminated soil. all cleaned up. no further action required.03/31/06-Hiralkumar Patel. REceived clear copies of work invoices from Albert. based on available information from owner and from Isaac from EAstmond, case is closed. NFA letter sent out to owner. faxed to owner and Eastmond.Albert RosenbergPh. (212) 981-6517FAX (212) 465-8122

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "DEMEO"12/22/2005 - Haggerty - Spoke with Albert Rosenberg from 32 West 39th Midtown Properties LLC (212-981-6517), current property manager, who would look for any records and call back01/04/2006 - Haggerty - spoke with Phil Fazon from Crown Leak Detection (516-375-5890) who originally called in spill due to a tank test failure. I inquired as to wether Crown Leak did follow up testing. Crown Leak never returned to re-test. He gave me the # for ABC Tank who tested tank after Crown Leak01/05/2006 - Haggerty - spoke with Robert form ABC Tank (718-272-2800), ABC was hired simply for a second opinion which again failed. 01/06/2006 - Haggerty - Tom Valentine from Albert Rosenberg's office called to tell me no retesting and no clean-up was ever performed. He will call (Sally Dewes) back when they contract an environmental companyPreviously assigned to M. Haggerty in Albany office.10/11/06 - Austin -

32 W. 39TH MIDTOWN PROPERTIES LLC (Continued) **U003312898**

Reassigned from Central Office staff to Piper, for follow up and closure - end10/17/06- DEC Piper left message at Rosenberg realty requesting callback. Refer to legal if no response. DEC Piper received call from Rosenberg. As per him there was a second sp[ill # at the property Sp# 0512893. It was also a tank test failure. Notes from DEC Patel "03/31/06-Hiralkumar Patel. REceived clear copies of work invoices from Albert. based on available information from owner and from Isaac from EAstmond, case is closed. NFA letter sent out to owner. faxed to owner and Eastmond."In light of this info, this spill is also closed.

DEC Memo:	CSL sent to:John WittyThe Durst Organization1155 Ave of AmericasNY NY 10036They have found an 800 gal ast behind a wall. they are going to overexcavated and collect samples. will send report at later time.9/25/07- DEC Piper recieved tan kclosure report. The 800 gal tankwas rmeoved along with500 gal of fuel in tank. Additionally 23 tons of soil was removed of and disposed of. Endpoint sampling of excavation revealed no VOC's over TAGM and slight exceedances in SVOC's, which may be related to fill material since construction debris was encountered in excavation. Based on efforts to date, this spill is closed. See e-docs if warranted.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: 04/25/95: CALLED HOWARD GREENBERG ON 04/25/95 TO FIND OUT IF ANY ACTION HAS BEEN TAKEN. HE WAS NOT AVAILABLE WILL CALL BACK. 10/10/95: This is additional information about material spilled from the translation of the old spill file: TANK TAKING ON WATER.ON JULY 8, 1996, Spoke to Carl Westerman, Properties & Facilities - Budget Rent-A -Car (708)955-7203There are two 4,000 gallon UST gasoline in service at the facility. Tanks were steel installed in 1985. Tanks were laid into a bedrock foundation and had apoured concrete incasement. The problem involved one of the tanks. One tank began taking on water (12") over a rainy envent. Upon cleaning and inspecting the tank they found a hole in the bottom of the tank the size of a quarter. The tank was repaired with a steel plate and was fiberglass coated. The piping systems were repalced with fiberglass due to potential corrosion problems. The tanks were then cathodically protected by upgrading, and a leak detection system was added. According to Mr. Westerman, there was no loss of product from the system, and the only source of problems was water entering the tank. There have apparenetly been no other indications of further leakage, or seepage into adjoining buildings. Mr. Westerman has photographs of the tank installation and documentaion on the cleanup which indicated that no product migrated back into the tank when it was emptied. See also Spill #9408906.On May 22, 2002, DEC Sigona received a call from Eric Meyn, Project Manager, American Environmental Assesment Corp, 188 LOng Island Avenue, Wyandanch, N.Y. 11798 (631)586-2000 called to request the abandon the tanks in-place. They have not filed an application to abandon the tanks in-place. Eric Meyn was not aware that there is a spill history or additional spill reports which have been reported. DEC Sigona requested a complete site investigation plan along with documentation on previous remedial actions to be forwarded to DEC Sigona for review. DEC Sigona will consult with DEC Tipple regarding See Spill Nos. 9914694 and 9408906.Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL"This spill case was reassigned from DEC (Sigona) to Rommel on3/28/05 - spill closed, refer to spill # 9914694 for additional info. - KST

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL"3/28/00 +- 25 GAL. GAS FOUND IN OVERFILL. GAS PUMPED INTO DRUM FOR OFFSITE DISPOSAL. GAS ODOR ENTERED THE SCHOOL THROUGH THE ELEVATOR SHAFT THAT EXTENDS INTO THE GARAGE BELOW THE SCHOOL.A COMPLETE SYSTEM TEST IS SCHEDULED ON 3/29/2000 , THE SCHOOL WILL BE CLOSED FOR THE DAY. See Spill Nos. 9403751 and 9408906.12/10/03 mt/// Transferred from Tipple to Rommel10/19/05. J.Krimgold got a call from TRC (Dave Glass). He stated that his co. was hired to do the tank closure. They check GW wells at the site and found elevated VOC and MTBE (27,000 ppb) in GW. Want to talk to DEC's PM regarding further action. The site owner Budget Rent A Car (contact Michael Feeley @ 973-496-3467). Case reassigned to BURB (Lauren MacDonald @ (518)402 - 9768.)DURNIN, 5/1/2006:October 2005:TRC was hired by Budget Rent-A-Car to address Spill No. 9914694. November 16, 2005:TRC Tank Closure Plan Submitted to NYSDEC.December 1, 2005:NYSDEC Approval of Tank Closure Plan.December 6, 2005:Tanks closed in-place, piping removed.January 20, 2006:TRC ordering well socks for remediation of groundwater. January 25, 2006:TRC schedules ORC socks to be installed in a few weeks.March 20, 2006:The ORC socks were installed in the monitoring wells around the abandoned tanks. As per approved Work Plan, the ORC socks will be checked September 2006.August 23, 2006:TRC was emailed a request to schedule the 6 month replacement of ORC socks and the groundwater sampling event.September 5, 2006:The NYSDEC Project Manager visited the site and witnessed the removal and condition of the ORC socks from the 5 monitoring wells. MW-3 sock was

225 EAST 43RD STREET (Continued) **S104275704**

the only discolored ORC sock.September 19, 2006:Groundwater samples were collected. October 19, 2006:TRC submitted a Letter Report on the results of the ORC application for the past 6 months.November 10, 2006: TRC proposed to conduct another round of ORC applications.November 13, 2006:NYSDEC approved the Letter Report and the next round of ORC applications.November 14, 2006:The ORC socks were installed by TRC. The socks are to be in until May 2007.May 23, 2007:The Project Manager visited the site. The socks were removed and inspected.May 30, 2007:Groundwater samples were collected.July 16, 2007:TRC submitted the Letter Report on the results of the ORC application for the past 6 months and proposed to conduct another round of ORC applications. July 20, 2007:NYSDEC approved the Letter Report and the next round of ORC applications.September 5, 2007:The next round of socks were installed. The socks will be removed after 6 months (March 2008) and the groundwater will be sampled.March 2008:The socks were removed. April 11, 2008:TRC submitted a Letter Report on the results of the ORC application for the past 6 months. TRC proposes to conduct two more 6-month rounds of ORC applications.May 9, 2008: NYSDEC approved the Letter Report and two 6-month rounds of ORC applications. June 16, 2008:TRC installed ORC socks in monitoring wells MW-2, MW-3 and MW-5.December 18, 2008:The ORC socks were removed. The DEC Project Manager was on-site for the removal event. February 24, 2009:The Letter Report was received and reviewed.March 5, 2009:NYSDEC approved the proposed plan to continue using ORC socks for the next 12 months.March 2009:The next round of ORC socks installed in wells MW-2, MW-3 and MW-5.August 31, 2009:TRC FOILs NYSDEC September 30, 2009:The ORC socks were removed.December 2009:TRC provides the results of the latest groundwater sampling.January 2010:TRC will submit an Exposure Assessment based on a DEC approved outline with the recommendation to close the spill.February 16, 2010:TRC submits the Final Report and the Exposure Assessment Report requesting to close the Spill.April 2010:NYSDEC reviews the Report.February 16, 2010:TRC submits the Final Report and the Exposure Assessment Report requesting to close the Spill.March 2010:NYSDEC reviewed The Letter Report.April 20, 2010:NYSDEC approved the Letter Report (no further action). A well commissioning work Plan is required.April 21, 2010:The Spill files are prepared for edoc filingJune 23, 2010, J. Durnin: PM is waiting for TRC to submit a well decommssioning plan.July 14, 2010, J. Durnin: TRC submitted the Groundwater Monitoring Well Decommissioning Plan on July 13, 2010. The Plan was reviewed and approved on July 14, 2010. Well decommissioning is scheduled for the week of August 9, 2010. A Well Decommissioning Report will be submitted following the field work.August 24, 2010, J. Durnin: Well decommissioning took place on August 17, 2010. A Well Decommissioning Report will be submitted.September 24, 2010, J. Durnin: The Well Decommissioning Report was submitted by TRC on September 24, 2010 and is under review. An Inactivation Letter is being drafted in anticipation of closing this spill.October 5, 2010, J. Durnin: The Well Decommissioning Report was reviewed and comments (1) emailed to TRC on October 5, 2010. An Inactivation Letter will be sent to Budget once the comment is addressed.October 22, 2010, J. Durnin: The Well Decommissioning Report dated September 13, 2010 (revised), was approved in an Inactivation Letter sent to Budget Rent-A-Car on October 8, 2010. This Spill No. 9914694 is closed as of October 8, 2010.

He said he noticed an oil smell this afternoon and looked in the containment room. There was a small spill of oil (about 2 gallons) coming out of a small hole near the bottom of the tank. Mr. Kaub

MARRIOT EAST HOTEL (Continued) **S105994931**

called Petroleum Tank Cleaners.PTC responded and cleaned the 2 gallon spill and laid out speedie dry to absorb the continued drip. Marriot management is working out hiring someone to drain the tank ASAP and then they will determine if they repair or replace the tank.According to DEC PBS records, the tank holds #2 oil, is 15,000 gallons and was installed in 1978.

DEC Memo:	12/13/05 - Raphael Ketani. Spoke to Vinny Lovari of Island Tank. He said his crew is sqeegeeing the floor, vacuuming the oil out of the tank, and found a hole in the tank. He said there are cracks in the floor and about 300 gals. spilled. I spoke to Nick who is managing the renovation of the closed hotel. He said that the owner is David Adelipour, O&O Properties, 120 West 44 Street, NY, 10036. Need to send new spill contaminated soil letter.12/21/05. CSL has been send to:Pete AvisionIntegrated Services245 5th Avenue, Suite 2102New York, NY 10016YK.J.Krimgold spoke to Vinny (Island Pump & Tank) @ 718-967-9424. He stated that in the process of switching from #6 to #2 oil the tank was cleaned and 3000 gal was delivered the day before.They pumped out 1100 gal from tank and recovered about 100 gal from floor. He thinks that 1800 gal have been lost. He will install a soil boring to determine the vertical and lateral spill extent.12/28/05. Levent Eskicakit of Nova Env. Serv. 347-556-7787 called and stated that they are a consultant hired by the owner to work on this case. I suggest him to obtain our CSL letter form the RP.08/08/2006. J.Krimgold reviewed the Remedial Action Report submitted by SAI Envir Consult. dated July 28, 2006. Based on the reportleaking 5000 gal AST was removed together with 35 cu yards of contamonated soil. During excavation bedrock was exposed on the east

120 WEST 44TH STREET (Continued) **S107784808**

and west sidewalls as well as the bottom of the excavation. Following excavation no evidance of pertol contamination was found. NFA letter.

DER Facility ID:	89833
DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND"2/26/2002 - Aprox 60 gal of gasoline was pushed out the top of a tank during a delivery. Delivery port is on the sidewalk, but the overfill spill occurred inside the building basement. Site has 6 - 550 gal steel tanks installed under the basement garage floor. Gasoline came up through the stick "Dip Ports" on 2 of the tanks. This gasoline flowed into a puddle on the garage floor, moved approx 30 ft into a floor drain. This floor drain system eventually deposited into a 2ft x 2ft drain "Trap" in the car wash room. Contactor says they don't believe the gasoline went any further.Fire Dept on scene, area was vacuumed and drysol cleaned. Basement area was closed off from use. Concern is gasoline vapors. on 2/26, Contractor vacuumed out sump, flushed all drain lines and vacuumed out again.Hertz called Cura Emergency Services (Matt Dupont - 972-488-2222 ext 233) Cura Emergency hired Castleton Environmental (Bill Jacobson - 973-652-7752) to handle cleanup.2/27/2002 Sangesland met NYFD Rep. Mike Reardon (718-999-2493) at the site and inspected the whole system.Hertz Branch Manager - Maxine Lawson-Adams 212-486-5060Hertz Regional Environmental Rep: Jim Weingardner 201-307-2421Apparently today the clean up is being organized by Tom Moritz of HMHTTC 908-558-0156 (cell 201-602-0306) Sangesland noted that the 6 tanks were installed in 1963, had been upgraded in 1998, but the Cathotic Protection system does not seem to have been operating. NYFD is requiring the tanks to be tested (last tested by Tanknology in Dec 2001 -Kenneth Gelor - 800-964-7311) -copy of this report is in the file. Apparently the leak detection (Veeder-Root) system was located in a back room where is was not normally visible.Sangesland spoke to Matt Dupont again from Cura Emergency. Cura will be providing the close out report documentation for this project. DEC requested:1) Detail & Photos of spill cleanup (drains/sump pit) and soil samples where appropriate (8270/8021)2) Discussion on changes to poor practices (not dipping a tank before filling, leaving the dip stick caps open on the tanks)3)Fix/Test mechanical systems(overfill alarm/cathotic protection)Move alarms into an area where they can been seen/heard4)Tank test results (tank was tested in Dec 2001, but may have been damaged during this event)4)Plan to remediate any soil contamination around and under the buried tanks. (This is probably the major portion of the work.)2/28/2002 - Matt Dupont requested written guidance, so Sangesland faxed/e-mailed a copy of this report with the notes listed above.Sangesland will be out of the office from March 3 thru March

HERTZ RENT A CAR (Continued) **U003390357**

19. Any questions during that time should be directed to DEC Spills Rep. Tim DeMeo (718-482-4634) - Remember to state the spill number (0111214). 3/21/2002 - Sangesland received a copy of an "Incident Report" from Matt Dupont at Cura Emergency Services. The report outlines all of the basic facts listed above. One new item is the fact that Cura and it's subcontactor tried to dig out the contaminated soil near the buried tanks and were not able to get very much out because of underground piping and potential tank damage. The report does say that Cura will propose some method of addressing the contaminated soil issue.7/1/2002 - Sangesland received a report from Cura titled "Corrective Action Final Report". It once again repeats the information provided earlier, but does not address the size or scope of the problem in the soil around the tanks. This letter does request closure, but the DEC still requires information on the contamination around the tanks.7/8/2002 - Sangesland called Cura to find that Matt Dupont no longer works there. The project will be reassigned and someone from Cura should call back within the next few days to get more details about what additional work the DEC needs.7/8/2002 - "Ted" from Cura called back to say the contact for future work at this site will be: Sue Pinera 201-307-2547 at Hertz.7/9/2002 - Roland Costanzo of Hertz (673-465-6942) called to say that Dave Winslow of ATC had been hired to conduct an investigation of the soil around the buried tanks and would be forwarding a report on that subject to the DEC later this week.7/10/2002 - Sangesland reviewed a report submitted by Dave Winslow of ATC Associates (212-353-8280). The report shows that four GeoProbe soil borings were taken on May 9, 2002 within 2 to 3 feet of the subject petroleum tanks. Borings were advanced to a depth of 16 ft (10 ft below the bottom of the tanks). All soil samples came back Non Detect for VOC's and SVOC's. No water samples were taken because of the inability to get a larger drill rig in the garage space. DEC is satisfied with the investigation and the results.Spill Closed.

DEC Memo:	Tank Test Failure - small spill - 4 gal out of tank wrap.Tank is being drained now, cleanup will be done today (5/28)8/9/10 - Sangesland spoke to Rene at Eastmond. He said the tank was not wrapped. It was in a vault structure with a cement lid. Tank was corroded on the bottom and leaked to the vault floor. Vault was tight with no cracks. Oil was absorbed into about 1 yard of sand in vault floor. Tank was cut out and removed. Oil sand was removed. Vault was cleaned. No leak beyond the vault structure.
Remarks:	3000 gal wrapped in concrete - approx 600 remains in the tank - spill of approx 4 gal outside tank. cleanup in progress

DEC Memo:	Petroleum Tank Cleaners was called to the site to conduct a tank test. On arrival, the PTC Rep saw drysol on the floor with fresh oil leaking from the tank. No test was done, it was clear that the tank was leaking. PTC was hired by Lawrence Environmental (718-237-5125)TTF Letter was sent to:Stonehenge Mgt LLCJames Bush -Director Building OperationsRitz Plaza 235 West 48th st New York, NY 10036Phone 212 977 5000jbush@stonehengeny.com11/21/2005 A fax submittal was made by Lawrence Environmental Group ((718) 237-5125) on behalf of the property owner. The fax was sent to Steve Sangesland, but was forwarded on to Raphael Ketani, the case manager on this site.11/21/05 - Raphael Ketani. I received a FAX from Lawrence Environmental Group, LLC, regarding the site. The letter was dated 11/18/05 and stated that the manhole cover on the empty tank was replaced and that the tank and lines passed the pressure test. The letter also said that COMCO (the remediation company) could not conduct its work until the asbestos removal project in the boiler room was finished. Lawrence Environmental is waiting for an NYCDEP variance approval before it starts the investigation/cleanup work.12/21/05 - Raphael Ketani. I spoke to Peter Ellams, General Manager of Lawrence Environmental, regarding progress on the spill cleanup. He said that they got the variance for the asbestos from DEP and began the cleanup. He said a cleanup company, IER, cleaned out the #6 oil tank (about 3,000 gal. tank) and cleaned up the oil contaminated material on the tank room floor. The work ended last week. He said he will get me the cleanup report soon. 1/3/06 - Raphael Ketani. I talked to Mr. Ellams and asked him when I would receive the cleanup report. He said that the transit strike messed things up and they are still cleaning the site. I was told I will get the report within a week.6/20/06 - Raphael Ketani. I received a package of documentation regarding the removal of the 1500 gal. tank and the cleaning, testing and putting back into service of the 6000 gal. tank. Everything looked alright, except PBS case #2-601407 doesn't show the existence and then removal of the 1500 gal. tank. I called up Mr. Ellams of Lawrence Environmental Group, LLC (718)

APARTMENT BUILDING (Continued) **S107417032**

237-5125 and told him to submit a revised PBS application as this was the last item I needed to close the case. He said he would.7/20/06 - Raphael Ketani. I talked to Mr. Ellams. He said he sent the owner the PBS application to sign. I told him I hadn't received anything. He said he would look into the matter and get me the form.8/11/06 - Raphael Ketani. I contacted Mr. Ellams regarding the revised PBS registration form. He said he thought this had been sent out some weeks ago. I told him I hadn't received it. He said he will get on it. 8/30/06 - Raphael Ketani. I tried to contact Mr. Ellams regarding the unregistered and removed1500 gal. tank (I checked the PBS today), but could only leave a message.9/8/06 - Raphael Ketani. Nick Lombardo of the PBS Unit brought me a copy of the revised PBS registration form and indicated via a Post-It that he is processing the change.Based upon receipt of the revised PBS registration form, the 11/18/05 letter from Lawrence Environmental Group stating that the tank passed after the repairs, and the package of documentation received on 6/20/06, I am closing the spill case.

Remarks: TANK HAD BEEN LEAKING. CLEAN UP IN PROCESS.

Contact Name:	VINNY LOVARI
Contact Phone:	(718) 708-3425
DEC Memo:	8/28/2006 Sangesland spoke to Vinny at Island Tank. He said they've been digging at the site for several days. Originally they thought it was just an isolated spill, but then they found an old #6 oil return line which had rotted under the garage floor. This line is now being removed. Work is moving slowly because they have to juggle cars being parked in the garage to make room to dig. So far they have removed 18 drums of #6 oil contaminated soil. By the end of this week they expect to be finished and to take end point samples.Vinny says they will send in a closure report with photos as soon as the endpoint sample results come back.9/19/06 - Raphael Ketani. I tried to contact Vincent Lovari of Island Tank (718) 967-9424, but could only leave a message. 10/16/06 - Raphael Ketani. I tried to contact Mr. Lovari, but got his assistant. I left a message requesting a copy of the analyticals for the soil. His assistant said that they were still laying pipe at the site.11/7/06 - Raphael Ketani. Mr. Lovari returned my call with a voice message. He said that they will move the drums on this thursday or friday and then take end-point samples on friday. He said they have to do things this way as the site is very tight.3/7/07 - Raphael Ketani. I tried to reach Vinny or his assistant, but could only leave a voice mail. 3/8/07 - Raphael Ketani. I spoke to Vinny of Island Tank (718) 708-3425. He said that 40 drums of soil have been removed so far from around the fill line and the return line. He said that it looks like the lines had been leaking for many years. Someone had even put a bucket with a pump under one leak in the fill line many years. He said that there still is some more soil to remove. Soil samples will start to be taken this friday. He said that it's a big mess at the site. 3/27/07 - Raphael Ketani. I received the update of work report for the site from Mr. Lovari. The report stated that the tank was relined, the 3 inch fill line was replaced, the 2 inch vent line was replaced, the suction/return line was replaced, a new vent alarm was installed, an overfill alarm was ordered, and a leak detection system will be installed.The report has soil manifests and sets of pictures of the work. End-point samples will be taken. The work is 75% completed, according to the report. A full report will be sent once all of the

APRT BUILDING (Continued) **S106972442**

work is completed and the analyticals are received.5/9/07 - Raphael Ketani. I spoke to Vinny. He said that he is now doing the fill line. He said that he will replace the line and then do soil samples.7/25/07 - Raphael Ketani. I spoke to Vinny. He said the project is still ongoing. He said that the fill line is very long under the garage and they couldn't do the job in "one shot." He said they did part of it and now have to wait for a truck to come with gravel. Then they will back fill and cement and then move over to do the other part. He said that the geologist and geoprobe are coming this friday to do the end-point samples. He doesn't think there is more soil to remove as he has already shipped out 40 drums of soil. He said they are also in the boiler room doing work. 10/17/07 - Raphael Ketani. I tried to reach Vinny, but could only leave a message. Vinny's wife called me back and said that there is a health emergency with Vinny's parents. She said that he will get back to me sometime later. 10/18/07 - Raphael Ketani. Vinny called me back. He said that the job is almost done. All he needs to do is take sidewall and bottom end point samples.12/3/07 - Raphael Ketani. I spoke to Vinny. He said that he finished installing the fill line. He believes the job will finish soon.1/31/08 - Raphael Ketani. I spoke to Vinny. He said that he is basically done. He said that DEC will get the paperwork next week.3/31/08 - Raphael Ketani. I tried to contact Vinny (cell (718) 708-3425/(718) 967-9424), but could only leave a message.4/4/08 - Raphael Ketani. Vinny called me back. He said that he had been out for awhile because he had family issues to deal with. He said that he had essentially completed the remediation report and that DEC should get it very soon. I told him that the DEC has been waiting for a long time for this report and that we're very anxious to get it. He said we'll get it soon.6/10/08 - Raphael Ketani. Sharif Rahman of the DEC Region 2 Spills Unit approached me and told me that he is working on a case for the same tank and fill line as concerns this case. He said his case is #0505707. Vinny never informed us that there were two Spills people involved in the same case. As Mr. Rahman has the older case, I am closing this spill case and referring it back to his case of #0505707.

DEC Memo:	06/13/05-SR// Sharif sent a TTF letter to:JRD Management, 875 Mamaroneck Avenue, Mamaroneck, NY 1054310/24/05 - Raphael Ketani. The PBS case is #2-147249; 15,000 gal./#6 oil. There is no paperwork or tank test failure report for this spill. I will send an "old tank test failure letter" to the management company (Midboro, 148 West 37 Street, NY, 10018; ((212) 877-8500)and the apartment building company (132 East 35 Street, Inc., 132 East 35 Street, NY, 10016). 10/25/05 - Raphael Ketani. I received a call from Robert Grant, Director of Midboro, called me up to say that he has the repair report for the tank and the passing tank test report. I asked him to FAX it to me. He said he would. Mr. Grant FAXed me the passing tank test report. I am therefore, closing the case.
Remarks:	DRY PORTION LEAK THAT NEEDS TO BE REPAIRED.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND"5/28/2004 PTC submitted a report for this site which outlines excavation work done in Oct 2001. According to PTC, 24 drums of contaminated soil was removed from the basement area. Bedrock was hit at about 3 ft depth and no further digging could be done. There was still some minor contamination left, but the majority of the problem was removed.Spill Closed - No further action
Remarks:	THEY REMOVED A TANK BACK IN JULY & DISCOVERED IT HAD BEEN LEAKING - CLEAN UP HAS BEEN IN PROGRESS

DEC Region:	2
DER Facility ID:	238294
DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "GOERTZ/TIPPLE/VOUGHT"10/3/01: On this date, K.Goertz inspected the site. Goertz met with the super; Dave Pilchuk, who described what had happenned, what was done, and what was going to be done. The oil which leaked from the tank, spilled onto the concrete floow, but this floor contained several drains which led to a sump pit which discharges to the sewer. Fortunately, there has been no precipitation over the last few days, so the sump pump did not discharge any oil to the sewer. The sump pump has been deactivated until the cleanup has reched its conclusion. Emteque was hired to supervise the cleanup. John Raguso (212-631-9000) arrived on site immediately after Goertz's inspection. They will continue to vacuum up remaining oil in the sump, and steam clean impacted areas. Mr.Raguso will take pictures at various staged of the cleanup and will forward a report to M. Tipple at the conclusion of the remediation. As of today, there does not seem to be any environmental impact as a result of this spill. (KG)10/5/01: K.Goertz phoned John Reguso. He said cleanup is complete, and the basement looks better than it did before the spill occurred. He has taken several photos and will be sending a report to Michelle Tibble next week. (KG)01/21/2002-VOUGHT-Received report from Emteque on 11/9/02. Eastmond & Sons did cleanup via vacuum truck by removing 100 gallons of product from the sump pit and 1000 gallons from the containment room floor and tank room. Room cleaned via degreaser. 11,000 gallon AST rusted beyond repair and was replaced with 7500 gallon AST. PBS application received 1/6/2002. Spill closed 1/21/2002.
Remarks:	caller notified of spill in basment from leak in tank. caller is supervising cleanup.

DEC Region:	2
DER Facility ID:	334741
DEC Memo:	8/3/07 - Raphael Ketani. I called up Joe Ostrowski at PTC (718) 624-4842 regarding the spill. He said that his crew is there now and they are emptying the tank. He said no drains or sumps are affected and that all of the 150 gals. spilled in the tank room. He said the tank is 10,000 gal. and it just gave way.The block and lot are 890 and 1. The site is 7 Park Avenue, NY, 10016. The management contact is Ellen Kornfeld, Lovett Co., 450 7 Avenue, rm. 1106, NY, 10123. The PBS case is #2-289213 with a 10,000 gal. tank containing #6 oil.I sent a CSL.9/25/07 - Raphael Ketani. I received a call today from Eric Menjoya (718) 367-9800, ext 201 of Controlled Combustion. He said that the old tank has been removed and the site has been cleaned up. I told him to send me pictures and manifests for the work that was done and to update the PBS registration to show that the old tank was removed. He said he will do this.9/28/07 - Raphael Ketani. I received a set of pictures by e-mail from Mr. Menjoya. The pictures showed the cleaned former tank room. I chose those pictures that weren't duplicates and that were clear and attached them to the e-Docs. I e-mailed Mr. Menjoya that DEC still needed a cover letter explaining what the situation was, how it was cleaned up and what the end result was. I also wrote that manifests were needed and that the PBS registration needed to be updated to reflect the changed status of the tank.Mr. Bendjouya e-mailed me that he had sent the manifest to Jeffrey Vought of Region 2 Spills.10/1/07 - Raphael Ketani. I talked to Mr. Vought about the manifests. He found them and gave them to me. I checked the PBS registration. The tank is listed as closed and removed.Based upon the pictures that were sent that show a clean tank room with no cracks in the floor, and the manifests for the contaminated materials removed, I am closing the spill case.

DEC Memo:	4/29/05 Tipple responded, Response off the case and Ambrose Env overseeing cleanup. PTC arrived with a vac truck, oil spread to thin and too many under many things be effective, Tristate began cleanup, PTC to continue.4/30/05 Ambrose off case, Response back, PTC off, Tristate back conducting cleanup.5/2/05 Tipple got conflicting descriptions of site status, re-visited site.Oil in tank appears to remain in tank, + - 1/16 inch wide cut from prior tank work visable, apparently the tank was opened, the cut steel was re-attatched with a few screws and glue. Over time minor the glue let loose and the "patch" reveals a cut line around it. Ultimately the vent line is not effective, the hole atop of the tank is the primary acting vent, although oil also shot out the sidewalk vent onto the walk. Upon

7017 PROPERTY OWNER LLZ (Continued) **S106869316**

further inspection, the steel at the bottom end of the tank closest to the boiler room appears to show signs of a serious corrosion problem.Tipple sent a letter requiring the cleanup be completed and the tank system pass a tank test prior to receiving future deliveries, and the tank registration be updated/corrected. T&S - delivery Company, Castle Oil - fuel supplier.The tank surround must be removed and replaced due to the saturated cinder block, at that time it was suggested that the tank be replaced/repaired.1/5/06 - Raphael Ketani. The party in charge of managing the building is Ernest Faraci at Vimar Realty (212) 696-7127. The PBS case is #2-600047 for the 1500 gal. tank. About 400 gals. of #4 oil were spilled. I called Tri-State Environmental ((888) 938-2658) to try to find out if they knew anything about the cleanup. The person who answered the phone said he wasn't sure, but would get back to me.1/6/06 - Raphael Ketani. Joanne Peretti of Tri-State called to ask what documentation I needed to close the case. I described what I needed and she said she would get it to me next week.Ms. Peretti called back and said that Response Env. would have the documentation as they were the subcontractor. She told me to call Glen Goral at (508) 795-0110, ext. 202. 1/24/06 - Raphael Ketani. I received the cleanup report from Resonse Env. However, they mentioned a broken epoxy seal on the tank as the source of the leak. I called up Anthony Lara of PTC (718) 624-4842 and asked him whether the tank was repaired or removed. He said that the patch was welded onto the tank. I asked him for a letter describing this. He said he would send it.1/27/06 - Raphael Ketani. A new oil spill #0512449 was called in yesterday night. Castle Oil (718) 579-3413 made a delivery of 300 gals. and discovered oil in a deep sump. There were 20 gals. of oil in the sump. The newer spill case is being closed and referred back to this one. PTC is going to the site to investigate. Super's phone: (646) 764-0511/(212) 869-1290. Super is Carrie Tucker. PTC (718) 624-4842 will be on site at between 12 and 2 today. I spoke to Ms. Tucker at 12:13PM today and she said that PTC is on sight. She said that the oil is black (same color as in tank). I told her to have PTC come over to suck out the sump as needed and to keep track of the thickness of the oil layer, and let me know what's happening. She said she would. I asked her whether the system lines were in the ground or concrete floor. She said they were not.Ms. Tucker called me back. She said PTC will do a full system test next week to try and find out where the oil is coming from.1/31/06 - Raphael Ketani. Ms. Tucker called me back and said that PTC tested the tank and the pipes. She said that only the return line failed. They told her, she said, that the leak in the return line was a slow drip and that they will repair the line. I told Ms. Tucker that I needed a report of the testing and the repair. She said she would get it for me. She added that there is still some very slow seepage into the 4'X6' sump. She said that after awhile it might measure one cup. I told her to keep an eye on the seepage and to let me know how it does. She said she would. She said that, right now, the sump is clean. 2/8/06 - Raphael Ketani. Ms. Tucker called to say that she had Robert J. Keaney, Jr. of John Anderson & Associates, and Rich Gilbert of Westfair Restoration Services on site to inspect the damage from the two previous oil spills. He said that Mr. Keaney is an insurance adjuster. Ms. Tucker said that he was trying to get money to rebuild the tank vault, replace the oil damaged cinder block wall behind the tank, replace the damaged sump pump, and to clean up the oil seeping into the sump. She said that they agreed that Castle Oil was

7017 PROPERTY OWNER LLZ (Continued) **S106869316**

responsible for the spills, and she said that they admitted responsiblity. Ms. Tucker asked me to send a letter to Castle to get them to clean up the seeping oil. I told her I would only address the seepage in the letter, not order them to do construction/replacement work. She said that was alright.2/24/06 - Raphael Ketani. Ms. Tucker called to ask what DEC wanted to get to close the spill case. I told her that we wanted the system test results, and statements regarding the fixing of the return line leak, the cleanup of the sump, removal of staining, revaulting of the tank, and welding of the patch on the tank. Ms. Tucker said he would have PTC send me such a letter.3/22/06 - Raphael Ketani. I contacted Carrie Tucker. She said that all of the work has been done. I asked her to call PTC and get me a closure report. She said he would contact the building's owner and he will contact PTC. 4/6/06 - Raphael Ketani. I spoke to Mark at PTC. He said they haven't been paid and so they are not sending any documentation to the management company or to the DEC. I called up the management company, Walter and Samuels (646) 764-0511, and spoke to a woman [Ernest Faraci, Director, Walter & Samuels, 419 Park Avenue South, NY, 10016]. She said to send a letter regarding all of the documentation that DEC needs to close the case. I told her I would. I sent the letter today. 4/21/06 - Raphael Ketani. I spoke to Ms. Tucker. She said that she is still getting the paperwork together for the report regarding the spill. She said that, partly, the delay is because she's waiting for manifests and such from the contractor. She asked that I give her another week or 10 days to get the report sent to DEC. I told her this would be alright.5/15/06 - Raphael Ketani. I received a FAXed letter from Castle Oil on 5/4/06. The letter had an invoice attached for cleanup work that was done on 4/29/05. THIS IS NOT THE CLOSURE REPORT I NEEDED!5/16/06 - Raphael Ketani. I received a letter with attached documentation from Walter & Samuels. It still doesn't have documentation of the patch repair, repair of the return line, removal of the oil contaminated cinder blocks, system test results from 2/06, and sump cleanup.5/17/06 - Raphael Ketani. I sent Walter & Samuels a letter stating that I still haven't received the necessary documentation describing the above issues and other issues mentioned in the April 6 DEC letter to them.6/30/06 - Raphael Ketani. Yesterday I received a package of doucmentation from Ernest Faraci, Director of Management at the management company Walter and Samuels. The package included: the cover letter dated 6/27; failing tank system results; passing tank only results; passing tank system results; a letter from Ms. Tucker stating that everything has beem cleaned up; and repair work documents from Castle Oil and PTC.Based upon the above documentation which was received on June 29, the May 10, 2006 package of documents that were submitted by Walter and Samuels and received on May 16, and other documents in the file, I am closing the case.

Remarks: Confined in the basement of the commercial building. Clean up is in process.

DEC Memo:	ConEd Manhole impacted - See Emis #23230812/21/12-Zhune responded to this spill. The fill line was cut from the fill port from where they hooked the hoze and not sealed. They installed a new fill port and fill line few feets from the one that they made the wrong delivery. Approximately 800 gallons spilled. Most of oil went under the sidewalk into Con-ED structures. Some through the basement wall enter the basement and went into two sumps. one of this sumps ended up in the sewer. The pumps were disconected. Petroleum tank cleaner is doing the cleanup. DEP was notified. Company Name: Waltert Samuels 419 Park Ave South 15FlOwner information: Norman Silver 217-646-7134 Super information: Vate Pepushy 347-992-647402/07/13- Zhune spoke to Mark from PTC. He said they Pumped out the oil from the tank room.the

DEC Memo:	12/19/05 - As noted below, a request was made to Silverstein Properties to provide:1) Copies of all receipts for cleanup work done in Sept 19902) Color photos of the tank room 3) Letter from Silverstein saying what happened to the tank to cause the spill, what was done to fix it, how it was cleaned - Request closure.That information was included in the April 14, 2005 letter from Mr. Angelo Provvido. Relative to point #3, there was not a lot of detail provided relative to how it was cleaned up. I asked Mr. Provvido about that during a telephone conversation; he indicated that current personnel (building manager) was not there in 1990 at the time of the spill. However, the information provided meets the intent of the 4/14/05 request - SPILL CLOSED. (Jim Moras)4/14/2005 Rep from

570 7TH AVE (Continued) **S106703468**

Silverstein Properties called to say the property is being refinanced and needs a closure letter.Sangesland requested:1) Copies of all receipts for cleanup work done in Sept 19902) Color photos of the tank room 3) Letter from Silverstein saying what happened to the tank to cause the spill, what was done to fix it, how it was cleaned - Request closure.

Remarks: PETROLEUM TANK CLEANERS TO DO CLEAN UP, CONTAINED IN TANK ROOM.

DER Facility ID:	231931
DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"2/26/99: On site with Joe Floryshak, Jerry Mele and Ken Toumey (Con Ed). Con Ed may want to remove all contaminated woil for slae of property. Joe Floryshak says that soil is still contaminated at least on south wall of excavation. Con Ed checked old blueprints - property used to be owned by UPS. It was a service station but pumps were west of where Con Ed's pumps were. POssible contamination may have come from UPS system. Unkown where their tanks were.Con Ed is to talk to their real estate people and see if they are willing/prepared to excavate entire site becuase entire site may be contaminated. Told them that whoever disposes of soil must do it according to contamination levels. I explained that DEC could not determine what would be needed to inactivate/close spill until we see analytical data. Con Ed may want to do Geoprobes throughout the site to get an idea of what they are dealing with and what quantity of material they would have to dispose of if they are going to remove all contaminated woil. (CAE)8/2/99: Con Ed submits Subsurface Investigation Rpeort for the site. Results indicate that contaminated soils (above STARS guidance values) remain in southeast portion of the site. Con Ed's plan is to continue soil removal in this area.12/10/99: Plan is to install 3 wells on the property and one on sidewalk. Wells will be monitored for one year. For product, start weekly - if none found move to monthly then quarterly. For dissolved, do initial analysis then quarterly. If excavation for property development occurs before annual monitoring is completed, DEC will want to monitor the excavation. Free product or odors may start entering the excavation. If so, some type of vapor barrier may be necessary for new building. Alos, orinetation of fractures may provide info on where further investigation should take place. (CAE)12/16/99:letter to Con Ed outlining requirements for additional investigation:1) Conduct sensitive receptor survey (1/4 mile radius).2) Determine extent of contamination beyond southeast corner of property.3) Investigate bedrock fracture contamination (see plan above - wells are to be installed into bedrock).1/1/00: Transferred from Engelhardt to O'Connell.1/13/00: Con Ed submits work plan based on above requirements.2/22/00: E-mail to Joe Floryshak approving worplan with following comments:"1. Will the core be a fixed core or rotating core? Care should be taken to maintain the orientation of the core during removal. 2. The single core should be taken in the source area (i.e., where the tanks were previously removed). 3. Since all of the overburden was removed previously and the current overburden consists of clean fill, it is not necessary to collect soil samples during the installation of these 3 wells." (JHO)3/29/00: Met with Jaques Whitford Co. (consultant) on site - they are installing bedrock wells. One core was taken in source area - approx 6" to 8" of

E 39TH ST PARKING LOT (Continued) **S104506403**

decomposed bedrock with slight odor, low PID hit. Competant (but fractured) bedrock to bottom of core. No evidence of contamination. Fractures don't appear to be water bearing. Core is to be shipped to White PLains office for further analysis. They installed a well in this location.They are in process of installing air-rotary boring/well at first downgradient location. Thus far no evidence of contamination. There is perched water above the bedrock - no odor or PID hits. (JHO)4/20/00: call from Joe Floryshak - deep well (MW-3R, downgradient) along 39th St. checked today - found free product (gasoline). He will discuss with consultant and put together proposal for further delineation and remediation. (JHO)7/18/00: Con Ed submits Site Investigation Report (SIR). Includes results of Sensitive Receptor Survey (possible vapor migration into subsurface sturtures, i.e., basements manholes, etc.); results of bailing and monitoring efforts on well MW-3R (decrease of product thickness with time, also baildown tests reveal low hydraulic conductivity of bedrock fractures); and resutls of soil and groundwater monitoring (residual soil and groundwater contamination extend off-site to the southeast). The SIR did not contain any recommendations for further remedial actions. (JHO)Mid-2000: Con Edison transfers "ownership" of the property to TRC Environmental for the purposes of entering the Voluntary Cleanup Program. TRC continues remedial activities, including additional soil/source removal and free product recovery (minimal), as well as application of Oxygen Releasing Compound (ORC) to speed remediation of impacted groundwater. This effort was overseen by Albany DER staff (Tom Gibbons).3/12/03: Tom Gibbons issues letter to TRC indicating that remedial objectives for the property under the VCA have been met. Close out.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/26/2013

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

VCP: Voluntary Cleanup Agreements
New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

State and tribal Brownfields sites

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Data Release Frequency: Biennially

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

E DESIGNATION: E DESIGNATION SITE LISTING
The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Day Care Providers
Source: Department of Health
Telephone: 212-676-2444

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

South Map:	40073-F8 BROOKLYN, NY
Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

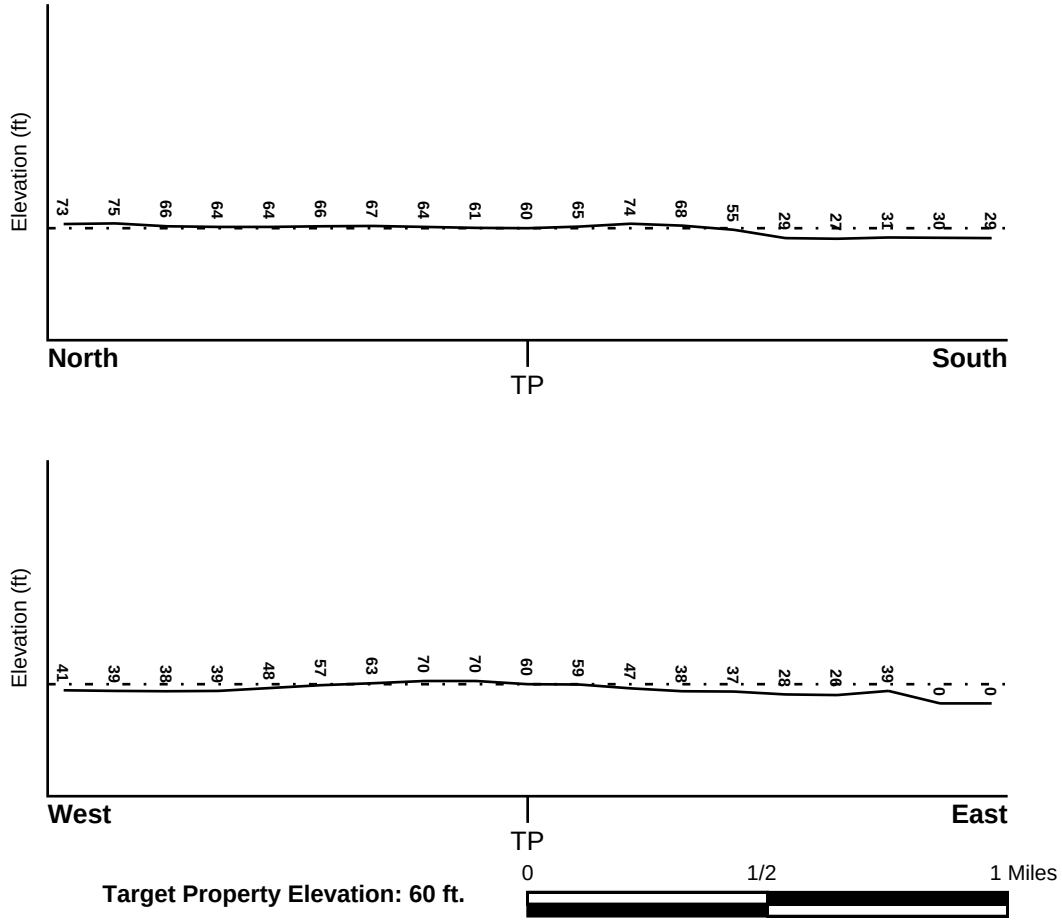
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
NEW YORK, NY	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 360497 - FEMA DFIRM Flood data

Additional Panels in search area: 3604970031B - FEMA Q3 Flood data
3604970039B - FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CENTRAL PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles WSW
Site Name:	MANHATTAN GENERAL MAIL FACILITY
Site EPA ID Number:	NY6180000352
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	not available. Saturated layers impacted by salt water intrusion are present in the overburden. It is generally inferred that the depth to the uppermost 'aquifer' is greater than 70 feet at the surface of the bedrock/sediment interface.
Hydraulic Connection:	Detailed hydraulic connection information is not available. Glacial till and outwash deposit sediments overlie the Manhattan Schist, the uppermost bedrock unit at the site. The surface elevation of bedrock decreases to the southwest of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovician		
Series:	Middle Ordovician (Mohawkian)		
Code:	O2 *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	URBAN LAND
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 10 inches
Depth to Bedrock Max:	> 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

State Database: NY Radon
Source: Department of Health
Telephone: 518-402-7556
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Sanborn® Library search results
Certification # FA12-401A-AD06

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

EMTEQUE Corporation (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. Compliance Status (Open/Resolved) relates to whether a violation has been corrected/uncorrected. Dismissed violations do not require filing a Certificate of Correction.

ECB Hearing Status and the **ECB Penalty Due** are separate from **Compliance Status** (i.e. a penalty is still due in many cases even when the violating condition has been fixed).

Severity Class	
Class 1 - Immediately Hazardous	HAZ - Hazardous - 1968 Building Code
Class 2 - Major	NON-HAZ - Non-hazardous - 1968 Building Code
Class 3 - Lesser	

Violation Status Descriptions	**ECB Hearing Status**
OPEN - No Compliance Recorded	CURED/IN-VIO - In Violation/no hearing required
OPEN - Certificate Pending (Certificate of Correction submitted and under review)	STIPULATION/IN-VIO - No hearing required/in violation
OPEN - Certificate Disapproved (Certificate of Correction disapproved/not in compliance)	IN VIOLATION - Hearing decision completed
RESOLVED - N/A-Dismissed (at ECB - no Certificate of Correction required)	DISMISSED - Hearing decision completed
RESOLVED - Certificate Accepted (Certification of Correction Accepted/in compliance)	DEFAULT - Respondent failed to appear at hearing
RESOLVED - Cure Accepted (early correction accepted - in violation/no penalty or hearing)	PUBLICLY-OWNED - No hearing required
RESOLVED - Compliance Insp/Doc (condition verified by Inspector or by Dept. documentation)	PENDING - Awaiting ECB hearing or decision
	ADMIT/IN-VIO - In Violation/no hearing required
	WRITTEN OFF - Imposed penalty legally uncollectable

Compliance Status (Open/Resolved) relates to whether a violation has been corrected/uncorrected. Dismissed violations do not require filing a Certificate of Correction.

ECB Hearing Status and the **ECB Penalty Due** are separate from **Compliance Status** (i.e. a penalty is still due in many cases even when the violating condition has been fixed).

Severity Class	
Class 1 - Immediately Hazardous	HAZ - Hazardous - 1968 Building Code
Class 2 - Major	NON-HAZ - Non-hazardous - 1968 Building Code
Class 3 - Lesser	

Violation Status Descriptions	**ECB Hearing Status**
OPEN - No Compliance Recorded	CURED/IN-VIO - In Violation/no hearing required
OPEN - Certificate Pending (Certificate of Correction submitted and under review)	STIPULATION/IN-VIO - No hearing required/in violation
OPEN - Certificate Disapproved (Certificate of Correction disapproved/not in compliance)	IN VIOLATION - Hearing decision completed
RESOLVED - N/A-Dismissed (at ECB - no Certificate of Correction required)	DISMISSED - Hearing decision completed
RESOLVED - Certificate Accepted (Certification of Correction Accepted/in compliance)	DEFAULT - Respondent failed to appear at hearing
RESOLVED - Cure Accepted (early correction accepted - in violation/no penalty or hearing)	PUBLICLY-OWNED - No hearing required
RESOLVED - Compliance Insp/Doc (condition verified by Inspector or by Dept. documentation)	PENDING - Awaiting ECB hearing or decision
	ADMIT/IN-VIO - In Violation/no hearing required
	WRITTEN OFF - Imposed penalty legally uncollectable

FOIL Request No. 13-3587
11/26/2013

Ms. Lynelle Cardone
Emteque LLC
1350 Broadway Suite 1901
New York, NY 10018-

Dear Ms. Cardone:

This is to acknowledge receipt of your Freedom of Information Law request seeking records regarding: **317 & 331 Madison Avenue; 48 E. 43rd Street; 51 E. 42nd Street, New York, NY 10017.**

I have referred your request to the following Records Custodian(s) / Freedom of Information Law Coordinator(s) who may possess the records you are requesting:

Dr. Fawzy Abdelsadek - Region 2
2 Hunters Point Plaza 4740 21st Street
Long Island City, NY 11101-5407 (718) 482-4507

You may expect a response to your request by **12/27/2013.**

If I can be of further assistance, please contact me at (518) 402-9522 . Refer to request number **13-3587** , if you write or call.

Sincerely,

Ruth L. Earl
Records Access Officer

APPENDIX H

QUALIFICATIONS OF THE ENVIRONMENTAL PROFESSIONAL

WES LINDEMUTH, CHMM, ASP

Professional Experience

Emteque, LLC, NYC, NY—Senior Project Scientist (2012 – present)

Dock Street, Brooklyn, NY—Project Manager responsible for the oversight of excavation activities on this OER site during the development of a 46,000 square foot site for mixed use. Work involves the removal of historic fill and other contaminants from the site. The site is currently participating in the NYC Voluntary Clean-up Program, and the excavation is in process. Work will involve the removal of approximately 33,000 cubic yards of contaminated soils and the execution of endpoint sampling and foundation vapor intrusion barrier installation to achieve Track 1 SCOs.

310 West 118th Street, Harlem, NY—Project Manager responsible for spill closure and the closure of the OER reporting for this site in Harlem which involved the removal of and underground storage tanks and the removal of historic fill materials associated with the basement slab and elevator pit installation.

Brooklyn Botanical Garden, Brooklyn, NY—Project Manger currently involved with site soils investigation as they relate to NYCDEP CEQR review process. Has completed the management of a limited Phase II subsurface investigation and currently engaged in conversations with DEP regarding a more extensive Phase II subsurface investigation to meet the NYCDEP requirements under CEQR.

TRC Engineers, Inc., New York, NY—Senior Project Scientist (2006 – 2012)

NYC School Construction Authority, New York City, NY (Associate Project Manager: 2006 – 2012)
Served as Associate Project Manager in connection with proposed new construction, alteration, and leasing of New York City Public Schools including 25 Phase I ESA Environmental Site Assessments, 15 Phase II Environmental Site Investigations, five Vapor Intrusion and Indoor Air Quality Investigations, three UST Closures, four Petroleum Spill Investigations, six PCB Remediation projects, four Product Safety reviews, review of two excavated material disposal plans (EMDPs), preparation of state pollution discharge elimination system (SPDES) permits, Long Island well permits, chemical bulk storage tank closure plan, and New York City Department of Environmental Protection (NYCDEP) sewer use permits. Responsibilities have included all aspects of scope of work and cost estimate preparation, client meetings, subcontractor supervision and work plan implementation, emergency response, report writing including development of conclusions and recommendations.

Spectra Energy, NY/NJ Expansion (Associate Project Manager: 2011 – 2012)
Served as Associate Project Manager during the construction of a natural gas pipeline from New Jersey to New York. The project consisted of the construction of approximately 20.3 miles of multi-diameter pipeline, associated pipeline support facilities, and six new metering and regulating stations. Supervised a team of 10 environmental inspectors performing oversight of construction activities including excavation and off-site disposal of non-hazardous and hazardous soil, treatment of groundwater prior to discharge to the ground surface or surface water body, spill reporting and cleanup, stormwater erosion and control inspection, worker health and safety oversight, and compliance with the Federal Energy Regulatory Commission (FERC) approved work plans. Responsibilities include team supervision, team health and safety oversight, review and distribution of daily reports, soil disposal management and tracking, responding to client requests regarding construction operations.

Professional Experience (cont.)

New York Families for Autistic Children, Queens, NY (Associate Project Manager: 2011 - 2012)
Served as Associate Project Manager providing environmental consulting services to the New York Families for Autistic Children (NYFAC) in connection with acquisition of a city environmental quality review (CEQR) property located in Queens, New York. Services included the review of prior reports and regulatory correspondence (i.e., conditional negative declaration), performance of an Indoor Air Quality Survey, cleanout of two drywells, and vapor intrusion sampling. Responsibilities included all client coordination, proposal preparation, report preparation, and invoicing.

AIMCO, West Harlem Portfolio, Manhattan, NY (Senior Project Scientist: 2006 – 2012)
Performed pre-acquisition due diligence surveys for 95 apartment buildings located throughout Harlem, New York for AIMCO, a real estate investment trust company. Responsibilities included preparation of Phase I Environmental Site Assessments reports for each property as well as radon sampling and implementing several Phase II ESIs. Performed construction oversight for remediation projects including oversight of the removal of an underground storage tank system and oversight of in-situ chemical oxidation for groundwater remediation for AIMCO.

Queens West Development Corporation, Queens, NY (Site Construction Manager: 2008–2010)
Served as the Site Construction Manager during the remediation of a 9-acre designated Brownfield (NYSDEC BCP Site Nos. C241095 and C241096) site in Long Island City, Queens, NY. Supervised the excavation of approximately 100,000 tons of soil under negative-pressure enclosures (tents), removal of LNAPL via high-vacuum extraction and implementation of an in-situ chemical oxidation pilot test using direct injection methods and a 5-foot diameter soil mixing/injection tool, post-excavation (end point) soil sampling, post-remediation groundwater well construction and sampling and soil gas sampling. Supervised supplemental remediation activities including excavation of approximately 10,000 yards of "grossly contaminated" soil below a lower permeability "peat" layer and the water table. Responsibilities included the daily reporting to NYSDEC Region 2, oversight of excavation, dewatering, management of separate phase product, off-site transportation and disposal of excavated material, post-excavation sampling, procurement of clean soil backfill, backfilling of excavations and implementation of the site stormwater pollution prevention plan, community air monitoring program, and health and safety oversight. TRC received a certificate of completion from the NYSDEC in December 2010.

NYC Economic Development Corporation, NY (Assistant Project Manager: 2006 – 2012)
Served as Assistant Project Manager in connection with seven Phase I Site Assessments, four Phase II Environmental Site Investigations, one hazardous material building inspection, an underground storage tank closure and two in-situ soil characterizations. Responsibilities included all aspects of preparation of Phase I ESA reports, all elements of Phase II ESI field investigations, confined space entry during inspection of an underground storage tank vault, and preparation of two winning proposals for in-situ soil characterization. Additionally, responsible for the field inspection services during initial preparation of the Bush Terminal Landfill for development into a park. Responsibilities included inspection of dynamic compaction activities on the landfill, storm water management, soil gas sampling, and installation of groundwater monitoring well network.

National Grid, Rockaway Park Former MGP Site, Queens, NY (Site Health & Safety Manager: 2009 – 2012)
Served periodically as the Site Health and Safety Manager during the remediation of the National Grid Rockaway Park Former Manufactured Gas Plant (MGP) Site located in Queens, NY. TRC served as a subcontractor to Posillico for National Grid during the remediation of the 9.8-acre Rockaway Park Former MGP Site. The remedial activities performed included the excavation of over 150,000 tons of contaminated soil under negative-pressure enclosures (tents) for off-site disposal. Responsible for providing daily health and safety briefings (tool box talks), performing real-time air monitoring in the exclusion zone, implementing the necessary PPE level, performing daily and weekly Health and Safety Inspections, and ensuring all site workers were in full compliance with the approved Site-Specific Health and Safety Plan (HASP).

Professional Experience (cont.)

GDF SUEZ, Astoria Energy Power Plant, Queens, NY (Article X Environmental Inspector: 2010 – 2011)
Served as an Article X Environmental Inspector working on behalf of Suez Energy (owner) during the construction phase of a state-of-the-art Power Generating Facility in Astoria, NY. Article X Environmental Inspector responsibilities included verifying all construction activities and environmental measures were performed in compliance with the certificate conditions, as well as all federal, state and local statutes, ordinances, rules and regulations. Responsibilities included client coordination, oversight of hazardous and non-hazardous waste tracking and disposal, stormwater pollution prevention plan inspection, and health and safety compliance.

Stewart EFI, Yonkers, NY (Senior Project Scientist: 2011)
Served as a Senior Project Scientist and field team leader during the Site Investigation, Remedial Investigation and Remedial Alternative Analysis of NYSDEC Voluntary Clean-up Program (VCP) Site No. V00691-3, and Voluntary Clean-up Agreement (VCA) Index No. W3-1005-04-06 located in Yonkers, New York. The Site consisted of over four acres developed with two parking lots, a residential structure, and a 200,000 square foot industrial building formerly utilized for metal parts manufacturing from 1942 until 2008 when manufacturing operations ceased. Field team leader responsibilities included mapping of on-site floor drains and piping, oversight of a geophysical survey, and implementation of a soil and groundwater investigation program. Responsible for report preparation including formulating conclusions and recommendations, subcontractor coordination, laboratory analytical results review and comparison to applicable regulatory criteria, and coordination with the client and NYSDEC. TRC received a release and covenant not to sue letter from the NYSDEC in October 2011.

Con Edison Inc., New York City, NY (Senior Project Scientist: 2006 – 2010)
Served as Senior Project Scientist for several subsurface investigations and hazardous materials building inspections at Consolidated Edison properties in New York. Served as Project Scientist in connection with six hazardous material building inspections and two Phase II Environmental Site Investigations for Consolidated Edison properties. Responsibilities included implementation of Phase II Environmental Site Investigation field programs and inspections of former substations to identify hazardous materials and characterize building materials prior to planned demolitions.

Atlantic Environmental Solutions, Inc., Hoboken, NJ (Project Scientist: 2005)
Supervised residential and light commercial projects involving: underground storage tank compliance (NJ); soil and groundwater remediation (NJ); Phase I ESAs, Phase II ESI; ISRA, BUST applicability (NJDEP), UST tightness testing (NY), Indoor Air Quality (NY and NJ); and managed asbestos surveys in several states. Project responsibilities included project coordination and implementation, proposal writing, client and subcontractor coordination, NJDEP case manager coordination, report preparation, and budgeting.

Education

B.S., Environmental Science, Kutztown University, 2004

Registrations/Certifications

IHMM—Certified Hazardous Materials Manager—CHMM (No. 15661), May 2011
BCSP—Associate Safety Professional—ASP (No. A16730), August 2012
NYSDOL—Certified Asbestos Air Technician (No. 06-04502), October 2011
NYSDEC—Erosion and Sediment Control Training (No. 8492), April 2010

Registrations/Certifications (cont.)

Additional Specialized Training

- 4-Hour NYSDEC Erosion and Sediment Control Training, April 2010
- 8-Hour OSHA HAZWOPER Supervisor, April 2012
- 8-Hour OSHA HAZWOPER Refresher, April 2012
- 10-Hour OSHA Construction Safety Training, May 2009
- 30-Hour OSHA Construction Safety Training, September 2010
- 40-Hour OSHA HAZWOPER, August 2004
- Transportation Worker Identification Credential (TWIC)

Pennsylvania Department of Environmental Protection—Internships (2002 – 2004)

- Summer 2004—Engineering, Scientific & Technical Intern, Pennsylvania DEP, Wilkes-Barre, PA
- Summer 2003—Engineering, Scientific & Technical Intern, Pennsylvania DEP, Harrisburg, PA
- Summer 2002—Engineering, Scientific & Technical Intern, Pennsylvania DEP, Williamsport, PA

EMILY SPOKOWSKI
SENIOR SCIENTIST

Professional Background

Ms. Spokowski came to WCD Group with a background in IAQ, having performed over 500 water intrusion/mold inspections consisting of site visits, data analysis, reporting, and recommendations. Other experiences include: VOC, dust, water, and comfort parameters testing; asbestos, lead and remediation project oversight; HVAC system inspections; providing peer review and legal consult; client management; and training . At WCD Group she functions in the capacity of Senior Scientist and is currently supporting our staff Certified Industrial Hygienists, Mr. R. Christopher Spicer and Mr. D. Joshua Cupriks.

Professional Experience

Senior Scientist **03/2011 – Present**
WCD Group

Hurricane Sandy Phase I & Tier II Reports – GIS mapping, records review, Tier II, and Phase I preparation for applicants of government funded buy-back and remediation programs for homes damaged by Hurricane Sandy.

2 Broadway, New York NY – Performed a follow-up investigation to indoor air quality complaints at an MTA office space, including a thorough visual examination of the office, air sampling for VOCs, comfort parameters, and dust, and inspection of the building's HVAC system. A report and recommendations were prepared following the investigation.

220 East 9th Street, New York NY – Emteque was asked to investigate environmental conditions in the site's basement parking garage after receiving an OSHA complaint regarding potential exhaust fumes, ACM, and mold growth. Ms. Spokowski performed a visual inspection of the space for signs of mold growth/water damage and ACM, as well as performed bulk sampling for potential ACM. Additionally, she used a 5-gas monitor to record real-time data readings of gases that are common contributors to IAQ problems.

94 Union Street, Jersey City NJ – Prepared 19 computer-generated diagrams to indicate the sampling locations of potential ACM bulk samples.

747 Madison Avenue/30 East 65th Street, New York NY – Renovation activities at two retail stores on Madison Avenue caused health and safety concerns at the adjacent residential cooperative building in which the three properties share a basement. Ms. Spokowski provided on-site air monitoring for the total dust concentration and liaised with site contractors and management to implement measures to reduce the airborne concentration of construction dust.

60 Water Street, New York NY. – Oversaw soil removal from the site. This included managing the chain of custody, visibly inspecting the site for excess amounts of dust, setting up equipment for data-logging air monitoring, and photographing/detailing the general work conditions and events.

625 Madison Avenue – Performed a visual water intrusion and mold investigation of a corporate office space. This included a thorough examination of the space and moisture testing. Recommendations were provided and implemented on site.

919 Third Avenue, New York NY – Performed airborne mold spore sampling at a corporate law firm. Following the inspection she performed data analysis of the results to verify their statistical significance.

William Bailey
SL Green
331 Madison Avenue
New York, NY

Dear Sir:

Ambient Group, Inc. conducted a subsurface soil investigation in response to concerns about an historical Aboveground Storage Tank at the above property.

Historical database research and inquires to the Fire Department database did not reveal any documented evidence of the presence or removal activities of any tanks at this property.

A soil sample was collected from the suspected site in the Northeast room of the sub-basement, adjacent to the sump pump room on the side of the building fronting West 43rd Street. After drilling through approximately two feet of concrete, we encountered asphalt paper material overlaying coarse brown soil. The soil layer was about 1' deep and then there was bedrock.

There was no evidence of oil spills, though the asphalt paper had a heavy odor. Laboratory analysis of a soil sample showed no Volatile Organic Compounds indicative of fuel products. Semi-Volatile Organic Compounds were present but may be attributed to the use of asphalt paper. The results are compared to New York State guidance limits as given in TAGM 4046 memo for the disposition and remediation of hydrocarbon contaminated soil.

TAGM 4046 are guidelines only and the lack of evidence of an actual oil spill means that no remediation should be necessary.

Please do not hesitate to contact us if you any further questions.

Sincerely,

Sean Wallace

Sean Wallace, MS
Director of Environmental Investigations

Excavation to soil in Northeast room of sub-basement at 331 Madison. Concrete layers for Approx 2', then layer of asphalt paper then brown coarse soil, then bedrock.

TAGM 4046 Guidelines
Allowable and Groundwater Protective Levels (mg/kg or ppm) No Individual over 50ppm
Semi-Volatile Organic Contaminants No Total SVOC over 500ppm

Fuel Oil Contaminated Soil

Contaminant	Allowable soil conc., Cs (ppm)	Soil Cleanup objectives to protect GW quality (ppm)	Soil Sample	
			Detph Below Concrete Sfc.	3'
			To Just above Bedrock	Approx 33' from Sidewalk Elevation

INORGANIC METHOD QUALIFIERS

B - Entered if the reported value was obtained from a reading that was less than the Contract Required Detection Limit (CRDL) but greater than or equal to the Instrument Detection Limit (IDL).

D - This flag indicates a system monitoring compound diluted out.

E - Reported value is estimated because of the presence of interferences.

U - Entered when the analyte was analyzed for, but not detected above the Method Detection Limit (MDL) which is less than the lowest calibration standard concentration.

ORGANIC METHOD QUALIFIERS

B - The analyte was found in the associated method blank as well as the sample. It indicates possible/probable blank contamination and warns the data user to take appropriate action.

E - The concentration of the analyte exceeded the calibration range of the instrument.

J - Indicates an estimated value. The concentration reported was detected below Practical Quantitation Limit and the Method Detection Limit (MDL).

U - The analytical result is not detected above the Method Detection Limit (MDL). All MDL's are lower than the lowest calibration standard concentration.

OTHER QUALIFIERS

ND - Not Detected

NA - Not Applicable

WCD Project No. 13-6684.01

January 6, 2014

EXECUTIVE SUMMARY

Under Contract with Hines (the "Client"), WCD Group ("WCD") conducted a Phase I Environmental Site Assessment ("ESA") of a property located at 317 Madison Avenue, New York, NY 10017 (Tax Block 1277, Lot 20) (hereafter referred to as the "Site"). WCD understands that the Client has requested this Phase I ESA in order to identify recognized environmental conditions (RECs) and environmental concerns that may affect the suitability of the Site for redevelopment.

The Phase I ESA was conducted in accordance with the scope and limitations of the ASTM International Standard E 1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and the "due diligence" regulations of the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") and Section 9601 (35)(b) of the Superfund Amendments and Reauthorization Act. In addition, this Phase I ESA included an assessment of vapor encroachment conditions (VECs) as per ASTM E 2600-10. The Phase I ESA also includes a preliminary evaluation of specific potential environmental issues or conditions that are, according to ASTM E 1527-13, considered non-scope considerations. These issues include assessments of potential radon, asbestos-containing material (ACM), polychlorinated biphenyl (PCB)–containing light ballasts and caulking materials, lead-containing paint (LCP), chemical storage, wetlands, regulatory compliance issues, mold, biological agents, and methane.

The Site is located at 317 Madison Avenue, New York, New York 10017. An alternative address for the Site is 33 East 42nd Street, New York, New York 10017. The Site is defined as Tax Block 1277, Lot 20 in the Borough of Manhattan. The Site consists of a 23-story office/retail building with a basement and sub-basement, owned by SL Green. The Site's 23-story building occupies approximately the entire 23,025 square foot L-shaped lot. The building is currently occupied by various commercial tenants leasing office space, as well as a first floor "Destination A Store Factory Outlet" retail shop, "Bread & Co." delicatessen, "TD Bank", "T.G.I. Fridays" restaurant, "KFC" fast-food restaurant, and "D'Espresso" coffee shop. Based on review of Sanborn® fire insurance rate maps, the existing building was constructed in 1920. The New York City Department of City Planning (NYCDCP) zoning map indicates the Site is designated as zone C5-3, which is designated for commercial/office use.

Summary of RECs, VECs and Environmental Concerns

RECs/VECs

This Phase I ESA has identified the following RECs/VECs associated with the Site:

- A spill was reported to the NYSDEC on September 6, 2013 when approximately six (6) inches of oil covered the floor of the basement tank room during the removal of 7,500 gallons of No. 2 fuel oil from the 7,500-gallon AST. The spill was reportedly contained to the tank room and reportedly did not result in an environmental release. The NYSDEC assigned the incident spill number 1305985. The spill does not have a closure date. The onsite NYSDEC spill is considered a REC.

Environmental Concerns

The Phase I ESA has revealed the following environmental concerns associated with the Site:

- Based on the age of the Site building, suspect ACM may be present and is considered an environmental concern;

- Based on the age of the Site building, the painted surfaces may contain lead and LCP is considered an environmental concern;

- Fluorescent light fixtures and caulking materials were observed during the Site inspection. Based on the age of the building, the fluorescent light fixtures and caulking materials may contain PCBs. The potential presence of PCB-containing lighting ballasts and caulking materials is considered an environmental concern; and

- The 7,500-gallon on-site AST should be registered with the NYSDEC and if no longer in use delisted.

Recommendations

Based on the findings of this Phase I ESA, WCD believes that additional investigation should be performed to determine if the identified RECs/VECs have affected the Site. WCD recommends that any ACM, Lead Containing Paint, and PCB-containing components affected by future renovations, repairs or demolition at the Site be identified and properly managed during such activities. In addition, stored chemicals and petroleum products should be managed in accordance with applicable federal, state and local regulations. The open NYSDEC spill should be investigated and closed.

1.0 INTRODUCTION

This report presents the findings of the Phase I Environmental Site Assessment ("ESA") prepared by WCD Group ("WCD") at the request of Hines (the "Client"), for the property located at 317 Madison Avenue, New York, New York 10017. The legal description for the Site is Block 1277, Lot 20 in the Borough of Manhattan. WCD understands that Hines is considering the Site for potential redevelopment as a commercial office space. Figure 1 shows the Site location.

1.1 PURPOSE

The purpose of this survey is to identify the presence of any Recognized Environmental Conditions ("RECs")[1], Historical Recognized Environmental Conditions ("HRECs")[2] and/or Controlled Recognized Environmental Conditions ("CRECS")[3] as defined by ASTM International ("ASTM") Standard Practice E 1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process,* with respect to the Site. In addition, the standard included an assessment for Vapor Encroachment Conditions (VECs)[4] at the Site per ASTM Standard E 2600-10. This report has been prepared for and at the request of the Client within the context of ASTM E 1527-13.

The application of ASTM Standard Practice E 1527-13 in the preparation of this report is intended to permit the designated User of this report to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser (collectively, "landowner liability protections") limitations on liability with respect to the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"). This report, therefore, intends to represent "all appropriate inquiry" into the previous ownership and uses of the Site, consistent with good commercial or customary practice, as defined by CERCLA in 42 U.S.C. §9601(35)(B).

1.2 SCOPE OF SERVICES

WCD's scope of services for this Phase I ESA consisted of the following components, as further detailed in subsequent sections of this report:

- Regulatory records review;
- Review of prior reports;
- Site visit and reconnaissance;
- Interviews with present and past owner, operators, and occupants of the property; and
- Evaluation of information and preparation of a Phase I ESA report.

The User's responsibilities, as set forth in Section 6 of ASTM Standard Practice E 1527-13, with respect to the identification of RECs in connection with the Site, comprise an additional scope of inquiry. These responsibilities consist of the following tasks and information sources, as further discussed in Section 3 of this Phase I ESA:

[1] ASTM Standard E 1527-13 defines "Recognized Environmental Conditions" as follows: "The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."
[2] ASTM Standard E 1527-13 defines "Historical Recognized Environmental Condition" as follows: "A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."
[3] ASTM Standard E 1527-13 defines "Controlled Recognized Environmental Condition" as follows: "A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."
[4] ASTM Standard E 2600-10 defines "Vapor Encroachment Condition" as follows: "The presence or likely presence of Chemical(s) of Concern (COC) vapors in the subsurface of the Target Property caused by the release of vapors from contaminated soil or groundwater or both either on or near the Target Property."

- Review of Title and Judicial Records for Environmental Liens or Activity and Use Limitations ("AULs");
- Specialized Knowledge or Experience of the User;
- Actual Knowledge of the User;
- Reason for Significantly Lower Purchase Price;
- Commonly Known or Reasonably Ascertainable Information; and
- Reason for Requesting a Phase I ESA.

1.3 SIGNIFICANT ASSUMPTIONS

In general, WCD has assumed in the conduct of this Phase I ESA, that respondents to our inquiries offered information in good faith and that through our research we obtained reasonably correct and accurate information from the sources consulted.

1.4 LIMITATIONS AND EXCEPTIONS

This investigation was limited to the review of available records, interviews with local officials and persons familiar with the Site, and an on-site visual inspection. The site inspection was limited to observation of surficial conditions only. Such an inspection cannot be expected to reveal all oil or hazardous materials or situations that might be present on-site; some hazardous materials or conditions may exist and not be detected because they are beyond the scope of this study. The investigation was conducted in a manner consistent with that level of care and skill exercised by environmental professionals currently practicing under similar conditions and was based on information made available to the representatives of WCD. All documents prepared by or furnished by WCD pursuant to this project are to be used in the context of the scope of services contracted. This document is not intended or represented to be suitable for reuse by the client or others on modifications of the project scope. Reuse or release to third parties without the expressed written permission of the consultant is prohibited.

1.5 SPECIAL TERMS AND CONDITIONS

Terms and Conditions of the contract for this Phase I ESA are set forth in the WCD proposal to Hines.

1.6 USER RELIANCE

This Phase I ESA was conducted in a manner consistent with the level of care and skill exercised by environmental professionals currently practicing under similar conditions and was based on information made available to WCD representatives. WCD conducted interviews and file and data reviews to obtain information that could reveal the past or present use, storage and/or disposal of hazardous substances or petroleum products on or near the Site. WCD performed a visual reconnaissance of the Site to identify evidence of potential sources of contamination. The Phase I ESA conforms to the general content requirements of ASTM Standard E-1527-13, to address the due diligence provisions of CERCLA. This report was prepared in accordance with Section 9601 (35)(b) of the Superfund Amendments and Reauthorization Act, to satisfy the provision that "all appropriate inquiry" be made into the presence or potential presence of hazardous substances or petroleum products on the Site.

Additional information which was not available at the time of this report's preparation may result in the modification of the information present herein. The scope of work for this Phase I ESA did not include evaluation of radon gas.

2.0 SITE DESCRIPTION

2.1 LOCATION AND LEGAL DESCRIPTION

The Site is located at 317 Madison Avenue, New York, New York 10017. An alternative address for the Site is 33 East 42nd Street, New York, New York 10017. The Site is defined as Tax Block 1277, Lot 20 in the Borough of Manhattan. The Site consists of a 23-story office/retail building with a basement and sub-basement, owned by SL Green. The Site's 23-story building occupies approximately the entire 23,025 square foot L-shaped lot. The building is currently occupied by various commercial tenants leasing office space, as well as a first floor "Destination A Store Factory Outlet" retail shop, "Bread & Co." delicatessen, "TD Bank", "T.G.I. Fridays" restaurant, "KFC" fast-food restaurant, and "D'Espresso" coffee shop. Based on review of Sanborn® fire insurance rate maps, the existing building was constructed in 1920. The New York City Department of City Planning (NYCDCP) zoning map indicates the Site is designated as zone C5-3, which is designated for commercial/office use.

A map showing the location of the Site is presented as Figure 1. A Site Plan showing the physical layout including adjacent land use is presented as Figure 2. A Site Plan indicating the physical layout of the sub-basement is presented as Figure 3. Photographs of the Site and surrounding areas are included as Appendix A.

2.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The Site is located in a heavily developed commercial, institutional, and residential neighborhood. The Site is located adjacent to and west of Grand Central Terminal, a major underground and aboveground railway station.

2.3 CURRENT USE OF THE SITE

The 2nd to 23rd stories of the 23-story structure are occupied by commercial office space tenants. All floors are currently occupied with the exception of the 20th floor. The first floor consists of various food purveyors and retail vendors including "TD Bank", "D'Espresso" coffee shop, "T.G.I. Fridays" restaurant, and "KFC" fast-food restaurant on 42nd Street, and "Destination A Store Factory Outlet" retail store, "Bread & Co." delicatessen, and "TD Bank" on Madison Avenue. The rear exit of the "T.G.I. Fridays" restaurant is located on 43rd Street. "TD Bank" occupies a portion of the building's Mezzanine level.

2.4 DESCRIPTIONS OF STRUCTURES, ROADS, OTHER IMPROVEMENTS ON THE SITE

The Site is occupied by a 23-story commercial structure currently occupied by offices/commercial tenants.

2.5 CURRENT USE OF THE ADJOINING PROPERTIES

The Site is located in the midtown area of New York City, which is mixed use, consisting of commercial, residential and institutional structures. The Site is bounded to the north by 43rd Street followed by mid- and high-rise commercial buildings with first floor retail space, to the east by Vanderbilt Avenue followed by Grand Central Terminal and mid- and high-rise commercial buildings, to the south by 42nd Street followed by mid- and high-rise commercial buildings with first floor retail space and to the west by Madison Avenue followed by mid- and high-rise commercial buildings with first floor retail space. The surrounding community is highly urbanized with mid- and high-rise commercial and institutional buildings.

3.0 USER PROVIDED INFORMATION

The "User" of the Phase I ESA Report, in accordance with ASTM Standard Practice E1527-13, is Hines. WCD's point of contact, Ms. Jan Hilgerman on behalf of Hines was provided a User Questionnaire for completion as part of this Phase I ESA on December 18, 2013, however the User Questionnaire was not completed.

3.1 TITLE RECORDS

The User did not provide information regarding title records.

3.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

The User did not provide information regarding environmental liens or activity and use limitations (AULs) relevant to the Site.

3.3 SPECIALIZED KNOWLEDGE

The User did not provide information regarding specialized knowledge with respect to the Site.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

The User did not provide pertinent commonly known or reasonably ascertainable information relevant to the Site.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

The User did not provide information regarding the purchase price of the Site.

3.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

Information provided by the Site owner, property manager, and/or occupant is provided in Section 6 and where otherwise stated.

3.7 REASON FOR PERFORMING PHASE I ESA

The Phase I ESA was performed by WCD at the request of Hines to identify recognized environmental conditions (RECs) and environmental concerns that may affect the suitability of the Site for use as commercial office space with first floor retail use.

4.0 RECORDS REVIEW

In order to supplement and cross-reference the information received from various sources, WCD commissioned a search of federal and state databases conducted by Environmental Data Resources, Inc. ("EDR") of Milford, Connecticut. A complete copy of the database report is contained in Appendix B.

The databases discussed in this section were reviewed for information regarding documented and/or suspected releases of regulated hazardous substances and/or petroleum products on or near the Site.

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

A summary of sites identified through the Federal and State regulatory agency databases review is provided in the following table:

Federal and State List	Last Updated (Date of Government Version)	Search Radius*	No. of Sites within Search Radius	Site Appears on List	RECs Identified
National Priorities List for Federal Superfund Cleanup (NPL)	04/26/2013	1 mile	0	No	No
Delisted NPL Site List	04/26/2013	1 mile	0	No	No
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS), including CERCLIS NFRAP Sites	04/26/2013 and 4/26/13	½ mile	1/1	No	No
Resource Conservation and Recovery Information System – Corrective Action Activity RCRIS CORRACTS and Non-CORRACTS Treatment, Storage, or Disposal Facilities (RCRA-TSD).	7/11/2013 and 7/11/2013	1 mile / ½ mile	0/0	No	No
Resource Conservation and Recovery Information System Generators/Transporters (RCRIS Gen/Trans)	7/11/2013	¼ mile	82**	No	No
Federal Institutional Control/Engineering Control Registries	06/17/2013	½ mile	0	No	No
Emergency Response Notification System (ERNS)	12/31/2012	Site	[1]NA	No	No
Toxic Release Inventory System (TRIS)	12/31/2011	Site	[1]NA	No	No
New York State Inactive Hazardous Waste Disposal Site (SHWS)	09/25/2013	1 mile	0	No	No
New York State Hazardous Substance Waste Disposal Site Inventory (HSWDS)	01/01/2003	½ mile	0	No	No
Solid Waste Facilities/Landfill Sites (SWF/LF)	10/08/2013	½ mile	0	No	No

Federal and State List	Last Updated (Date of Government Version)	Search Radius*	No. of Sites within Search Radius	Site Appears on List	RECs Identified
Vapor Reopened	01/01/2013	1 mile	0	No	No
New York State Spills Information (SPILLS)/Leaking Underground or Aboveground Storage Tanks (LTANKs)	08/19/2013	⅛ mile/ ½ mile	57/92	YES	YES
Petroleum Bulk Storage Tanks (USTs/ASTs)	10/01/2013	¼ mile	10/91	No	No
State Voluntary and Brownfield Cleanup Program Sites (VCP/BROWNFIELDS)	06/24/2013	½ mile	0/0	No	No
Registered Dry Cleaners (DRY CLEANERS)	10/17/2013	¼ mile	4	No	No
Manufactured Gas Plant Sites (Coal Gas)	NA	1 mile	3	No	No
E Designation Sites	09/17/2013	1/8 mile	0	No	No

* The surrounding area search radius indicates the radial area (measured from perimeter of the Site) for which the databases review was performed.
** The database search identified sixty-three (63) conditionally exempt small quantity generators (CESQGs), twelve (12) small quantity generators (SQG) and seven (7) large quantity generators (LQG) within one-quarter mile of the Site.
[1]NA – Not Applicable

The following subsections provide a discussion of the listings for the Site and surrounding properties, which have been identified within the search radius and listed in the table:

4.1.1 Federal NPL Site List

The EPA NPL (or "Superfund" List) is a federal listing of uncontrolled or abandoned hazardous waste sites that pose a potential risk to human health or the environment. The list is created from the CERCLIS database and is primarily based upon a score that each site or facility receives from the EPA's Hazard Ranking System ("HRS"). After a site or facility has been identified as a CERCLIS site, the EPA conducts an assessment of the property. The HRS score associated with the degree of environmental risk found is one of the determinations made as to whether the site is placed on the NPL. These sites are then prioritized for possible long-term remedial action and referred to the state for further action under state programs.

Neither the Site nor any other facilities within a one mile radius of the Site are listed in the in the NPL database.

4.1.2 Federal Delisted NPL Site List

The National Oil and Hazardous Substances Pollution Contingency Plan establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 Code of Federal Regulations 300.425.(e) sites may be deleted from the NPL where no further response is appropriate.

Neither the Site nor any other facilities within a one mile radius of the Site are listed in the Delisted NPL database.

4.1.3 Federal CERCLIS Site List

The CERCLIS List is a compilation of records from a nationwide database created to maintain and regulate those facilities or sites that the EPA has investigated or will investigate for suspected or uncontrolled releases of hazardous substances, contaminants or pollutants as reported by states, municipalities, private companies and private citizens under the CERCLA Program. Once a site is placed on the CERCLIS List, it may be subjected to several additional levels of evaluation, to determine the severity of the contamination from discovery and preliminary assessment to site inspection, and possibly the application of the HRS. Such a determination could ultimately place the site under consideration for inclusion on the NPL. Inclusion on the CERCLIS List does not confirm the presence of an environmental problem or a public health threat.

Former CERCLIS sites that have been granted the status of No Further Remedial Action Planned (NFRAP) are listed in this database.

The Site is not listed in the CERCLIS database. One (1) CERCLIS site was identified within a one-half mile search radius of the Site. Based on distance from the Site, assumed hydraulic relationship, and/or current regulatory status the facility identified within one-half mile of the Site in the CERCLIS database is not expected to impact the environmental integrity of the Site.

4.1.4 Federal CERCLIS NFRAP Site List

Former CERCLIS sites that have been granted the status of No Further Remedial Action Planned (NFRAP) are listed in this database.

The Site is not listed in the CERCLIS NFRAP database. One (1) CERCLIS-NFRAP site was identified within a one-half mile search radius of the Site. Based on distance from the Site, assumed hydraulic relationship, and/or current regulatory status the facility identified within one-half mile of the Site in the CERCLIS-NFRAP database is not expected to impact the environmental integrity of the Site.

4.1.5 Federal RCRA CORRACTS/RCRIS-TSD Facilities List

The Resource Conservation and Recovery Act (RCRA) program identifies and tracks hazardous wastes from the point of generation to the point of disposal. The RCRIS database tracks those facilities that treat, store and/or dispose of hazardous materials as defined by RCRA (referred to as TSD facilities). The RCRIS CORRACTS database identifies TSD facilities that have conducted, or are currently conducting, corrective action(s) as regulated under RCRA.

Neither the Site nor any other facilities within a one mile radius of the Site are listed in the RCRIS CORRACTS database and neither the Site nor any other facilities within a one-half mile radius of the Site are listed in the RCRIS-TSD database.

4.1.6 Federal RCRA Generators List

RCRA Info is the EPA's comprehensive information system, providing access to data supporting RCRA (the Resource Conservation and Recovery Act of 1976) and the Hazardous and Solid Waste Amendments of 1984. Inclusion on the list is not necessarily indicative of contamination; rather, it indicates the presence of potential sources of contamination. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. Conditionally exempt small quantity generators ("CESQGs") generate less than 100 kilograms ("kg") of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators generate over 1,000 kg of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. Treatment, Storage or Disposal Facilities ("TSDFs") treat, store, or dispose of the waste.

The Site is not listed in the RCRIS Gen/Trans database. The database search identified sixty-three (63) conditionally exempt small quantity generators (CESQGs), twelve (12) small quantity generators (SQG) and seven (7) large quantity generators (LQG) within one-quarter mile search radius of the Site.

Based on distance from the Site, assumed groundwater hydraulic relationship, lack of reported spills and/or current regulatory status, none of the facilities identified within one-quarter mile of the Site in the RCRIS Gen/Trans database are expected to impact the environmental integrity of the Site.

4.1.7 Federal Institutional Control/Engineering Control Registries

Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on-site. Deed restrictions are generally required as part of the institutional controls. Engineering controls include various forms of caps, building foundations, liners and treatment methods to eliminate pathways for regulated substances to enter environmental media or affect human health.

Neither the Site nor any facilities located within one-half mile from the Site are listed in the Federal Institutional Control/ Engineering Control Registries database.

4.1.8 Federal Emergency Response Notification System List

The ERNS List is a compilation of records from a national computer database and retrieval system created to store information on accidental releases of oil and hazardous substances. The information stored in this database is acquired through the National Response Center. Each reported incident is required to contain and provide the discharger name, date of release, amount released, and type of substance released.

The Site is not listed in the ERNS database.

4.1.9 Toxic Release Inventory System (TRIS)

TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

The Site is not listed in the TRIS database.

4.1.10 New York State Inactive Hazardous Waste Disposal Sites (SHWS)

The New York State Inactive Hazardous Waste Sites database, compiled by the NYSDEC, maintains information regarding the investigation and cleanup of suspected hazardous waste sites.

Neither the Site nor any other facilities within a one mile radius of the Site are listed in the SHWS database.

4.1.11 Hazardous Substance Waste Disposal Site Inventory (HSWDS)

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that USEPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites. The sites on the list will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry.

Neither the Site nor any other facilities within a one mile radius of the Site are listed in the HSWDS database.

4.1.12 Solid Waste Facilities/Landfill Sites (SWF/LF)

The State of New York maintains an inventory of the permitted solid waste facilities in the state. This inventory is a database that contains information from permitted solid waste disposal and management facilities including landfills, incinerators, and transfer stations.

Neither the Site nor any other facilities within a one-half mile radius of the Site are listed in the SWF/LF database.

4.1.13 Vapor Reopened

"Vapor Intrusion" refers to the process by which volatile chemicals move from a subsurface source into the indoor air of overlying or adjacent buildings. The subsurface source can either be contaminated groundwater or contaminated soil which releases vapors into the pore spaces in the soil. Improvements in analytical techniques and knowledge gained from site investigations in New York and other states has led to an increased awareness of soil vapor as a medium of concern and of the potential for exposures from the soil vapor intrusion pathway. Based on this additional information, New York State is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

Neither the Site nor any other facilities within a one mile radius of the Site are listed in the vapor reopened database.

4.1.14 New York State Spills Information Database (NY Spills)/Leaking Underground or Aboveground Storage Tanks (LTANKS)

The NY Spills database was researched to identify listings within one-eighth mile of the Site and the LTANKS database was researched to identify listings within one-half mile of the Site.

The NY Spills/LTANKS database identified one (1) documented spill at the Site. A spill was reported to the NYSDEC on September 6, 2013 when approximately six (6) inches of oil covered the floor of the basement tank room during the removal of 7,500 gallons of No. 2 fuel oil from the 7,500-gallon AST. The spill was reportedly contained to the tank room and reportedly did not result in an environmental release. The NYSDEC assigned the incident spill number 1305985. The spill does not have a closure date. The onsite NYSDEC spill is considered a REC.

Additionally, the database identified fifty-seven (57) reported NY Spills incidents within a one-eighth mile radius of the Site and ninety-two (92) LTANKS incidents within a one-half mile radius of the Site. Based on distance from the Site, assumed hydraulic relationship, and/or the nature of the incident/regulatory status, none of the facilities located within the search radius of the Site identified in the NY Spill/LTANKS database are expected to impact the environmental integrity of the Site.

4.1.15 Petroleum Bulk Storage Tanks (USTs/ASTs)

The NYSDEC petroleum bulk storage tank database was researched to identify listings for the Site and properties located within one-quarter mile from the Site.

The Site is not listed in the PBS database.

The databases identified the presence of ten (10) UST and ninety-two (92) AST petroleum bulk storage tank facilities located within one-quarter mile from the Site. Based on distance from the Site, assumed groundwater hydraulic relationship, the lack of known releases, and/or current regulatory status, none of the facilities identified within one-quarter mile of the Site identified in the PBS database are expected to impact the environmental integrity of the Site.

4.1.16 New York State Voluntary and Brownfields Cleanup Program (VCP/BCP)

The NYSDEC Voluntary and Brownfields Cleanup Programs database was researched to identify listings for the site and within a one-mile radius of the Site.

Neither the Site nor any other facilities within a one-half mile radius of the Site are listed in the VCP/BCP database.

4.1.17 Registered Dry Cleaners

The registered dry cleaners database was researched to identify listings within one-quarter mile of the Site.

The Site is not listed in the registered drycleaners database. The database identified four (4) registered dry cleaners within one-quarter mile radius of the Site. Based on distance from the Site, assumed groundwater hydraulic relationship, and/or current regulatory status, none of the facilities identified within a one-quarter mile radius of the Site in the registered drycleaners database are expected to impact the environmental integrity of the Site.

4.1.18 Manufactured Gas Plant Sites (Coal Gas)

The EDR manufactured gas plant database was researched to identify listings for the Site and within a one-mile radius of the Site.

The Site is not listed in the manufactured gas plants sites database.

The regulatory agency database search identified three (3) manufactured gas plants sites within a one-mile radius of the Site. Based on distance from the Site, assumed groundwater hydraulic relationship, and/or current regulatory status, none of the facilities identified within a one-mile radius of the Site in the manufactured gas plant database are expected to impact the environmental integrity of the Site.

4.1.19 E-Designation Site Listing (E-Designation)

The E (Environmental) Designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The E-designations require that the owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of city agencies.

Neither the Site nor any other facilities within a one-eighth mile radius of the Site are listed with an E-Designation.

4.2 FEDERAL AND STATE REGULATORY AGENCY DATABASE REVIEWS

Additional state and local records sources were investigated in an attempt to supplement information obtained through review of standard environmental record sources. The additional records and sources consulted in conjunction with this Phase I ESA are listed below. Copies of correspondence to and received from, any of these record sources are included in Appendix G.

4.2.1 United States Environmental Protection Agency (US EPA)

A Freedom of Information Act (FOIA) request was sent to the US EPA on November 14, 2013. WCD received a response from the department dated November 14, 2013 acknowledging receipt of the FOIA request. Upon receipt of additional information, WCD will review the response and, if conclusions contained within this report are affected, WCD will submit an addendum to Hines.

4.2.2 Fire Department of the City of New York

A FOIA request was sent to the Fire Department of the City of New York on November 20, 2013. WCD has not yet received a response to this request from the department. Upon receipt of this information, WCD will review the response and, if conclusions contained within this report are affected, WCD will submit an addendum to Hines.

4.2.3 New York State Department of Environmental Conservation (NYSDEC)

A FOIA request was sent to the NYSDEC on November 19, 2013. WCD received a response from the NYSDEC dated December 5, 2013 indicating a documented spill occurred at the Site. A spill was reported to the NYSDEC on September 6, 2013 when approximately six (6) inches of oil covered the floor of the basement tank room during the removal of 7,500 gallons of No. 2 fuel oil from the 7,500-gallon AST located in the basement. The spill was reportedly contained to the tank room and reportedly did not result in an environmental release. The NYSDEC assigned the incident spill number 1305985. The spill does not have a closure date. The onsite NYSDEC spill is considered a REC. Upon receipt of additional information, WCD will review the response and, if conclusions contained within this report are affected, WCD will submit an addendum to Hines.

4.2.4 New York State Department of Health (NYSDOH)

A FOIA request was sent to the NYSDOH on November 13, 2013. WCD has not yet received a response to this request from the department. Upon receipt of this information, WCD will review the response and, if conclusions contained within this report are affected, WCD will submit an addendum to Hines.

4.2.5 New York City Department of Environmental Protection (NYCDEP)

A FOIA request was sent to the NYCDEP on November 19, 2013. WCD has not yet received a response to this request from the department. Upon receipt of this information, WCD will review the response and, if conclusions contained within this report are affected, WCD will submit an addendum to Hines.

4.2.6 Prior Environmental Reports

No prior environmental investigations performed at the Site were available for review.

4.3 PHYSICAL SETTING SOURCE(S)

4.3.1 Topography and Drainage

The Site elevation is approximately 62 feet above mean sea level (amsl) sloping gently to the east by northeast (USGS, 1999). The nearest surface water features are the East River located approximately 3,600 feet east of the Site and the Hudson River, located approximately 7,250 feet west of the Site. Figure 1 is an annotated USGS 7.5-minute quadrangle showing the site location, local topography, surface water, and cultural features (USGS, 1999).

4.3.2 Geology and Soils

The unconsolidated surficial deposits in NYC consist almost entirely of Pleistocene till and stratified drifts. The till was deposited as a ground moraine, is typically discontinuous and less than 25 feet deep in most areas (Perlmutter, Arnow, 1953). The soil survey of New York City classifies site soils to be Pavement and Building. Underlying the unconsolidated Pleistocene deposits is the pre-Cambrian Manhattan Formation, also known as the Manhattan Schist. The schist is typically dark-gray to black micaceous rock composed of biotite, muscovite, quartz, feldspar and small amount of accessory minerals. Locally the formation contains dikes and veins of pegmatitic material. Bedrock has been mapped to contain some joints, irregular fractures, faults and in some places chemical weathering has filled these openings with clay (Perlmutter, Arnow, 1953).

4.3.3 Groundwater

Information obtained from EDR indicated that the groundwater moves through the joints, irregular fractures, and faults of the Manhattan Formation, but the schist does not generally yield enough water for industrial use. Hence, the formation is not considered to be an important source of groundwater in Manhattan. Locally, where bedrock is intensely fractured and is overlain by water bearing glacial deposits, generally higher yields may be observed. Groundwater beneath the Site is expected to be encountered greater than 50 feet below ground surface and is anticipated to flow southeast towards the East River and southwest towards the Hudson River, however, depth and direction of flow will be greatly affected by subsurface infrastructure such as buildings, subway tunnels, etc.

4.4 HISTORICAL USE INFORMATION

Information regarding the historic use of the Site and surrounding properties was obtained through review of the following historic records.

4.4.1 Aerial Photographs

WCD reviewed aerial photographs of the Site and surrounding areas provided by EDR in order to identify historical land use that may have involved hazardous substances and petroleum products. These photographs range from 1924 to 2011. The following table summarizes descriptions and interpretations from the aerial photograph reviews:

Year	Comments
1924 1”=500’	**Site:** The Site appears developed as it does today. No further information is discernable. **Surrounding Properties:** The surrounding properties are fully developed with what appear to be mid-rise and high-rise residential, commercial and institutional buildings. Bryant Park is located approximately 1,000 feet west of the Site. Grand Central station is adjacent to and east of the Site.
1945 1”=500’	**Site:** The Site is not discernable. **Surrounding Properties:** The surrounding area is not discernable.
1954 1”=500’	**Site:** No significant changes from the 1924 aerial photograph are noted. **Surrounding Properties:** No significant changes from the 1924 aerial photograph are noted.
1966 1”=500’	**Site:** No significant changes from the previous aerial photograph are noted. **Surrounding Properties:** The Pan-Am building (MetLife) is developed northeast of the Site.
1975 1”=500’	**Site:** No significant changes from the previous aerial photograph are noted. **Surrounding Properties:** Several additional high-rise buildings are visible to the northwest.
1984 1”=500’	**Site:** No significant changes from the previous aerial photograph are noted. **Surrounding Properties:** Several additional high-rise buildings are visible to the northeast.
1994 (1) 1”=500’	**Site:** The Site is not discernable. **Surrounding Properties:** The surrounding area is not discernable.
1994 (2) 1”=750’	**Site:** The Site is not discernable. **Surrounding Properties:** The surrounding area is not discernable.
2006 1”=500’	**Site:** No significant changes from the 1984 aerial photograph are noted. **Surrounding Properties:** No significant changes from the 1984 aerial photograph are noted.
2008 1”=500’	**Site:** No significant changes from the previous aerial photograph are noted. **Surrounding Properties:** No significant changes from the previous aerial photograph are noted.
2009 1”=500’	**Site:** No significant changes from the previous aerial photograph are noted. **Surrounding Properties:** No significant changes from the previous aerial photograph are noted.

Year	Comments
2010 1"=500'	**Site:** No significant changes from the previous aerial photograph are noted. **Surrounding Properties:** No significant changes from the previous aerial photograph are noted.
2011 1"=500'	**Site:** No significant changes from the previous aerial photograph are noted. **Surrounding Properties:** No significant changes from the previous aerial photograph are noted.

The review of aerial photographs did not indicate the presence of RECs at the Site and surrounding areas. The review of aerial photographs indicated the Site was occupied by the existing building since at least 1924. Copies of reproducible aerial photographs are included in Appendix C.

4.4.2 Fire Insurance Maps

WCD reviewed Sanborn® fire insurance rate maps of the Site and surrounding area, supplied by EDR between 1890 and 2005. The following table presents descriptions and interpretations from historical fire insurance map review.

Year	Comments
1890	**Site:** The Site appears developed with a school and the Church of the Holy Trinity Episcopal. **Surrounding Properties**: East 43rd Street appears north of the Site. Vanderbilt Avenue appears east of the Site. East 42nd Street appears south of the Site. Madison Avenue appears west of the Site. Surrounding properties are primarily developed with commercial, institutional, and residential properties. East of the Site is Grand Central station. The area to the north is undeveloped. Hotels are located south and west of the Site. A safety deposit box facility is located southeast of the Site.
1899	**Site:** The Site is redeveloped as a 2- and 4-story commercial structure. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1910	**Site:** The Site is identified as a commercial/office space. **Surrounding Properties**: Surrounding properties north of the Site are developed with commercial, institutional, and residential properties.
1929	**Site:** The Site is redeveloped as a 12-, 15-, 17-, and 22-story commercial office space. The Site is identified as the Leggett Building built in 1920 with a steel skeleton, reinforced concrete floor, and roof arches. It is noted that the Site contains a 12,000-gallon tank and a 7,500-gallon tank. The contents of the two tanks is not indicated. **Surrounding Properties**: Surrounding properties are further developed with commercial, institutional, and residential properties. The building located adjacent to and immediately east of the Site is identified as the Vanderbilt Avenue Building. The building located adjacent to and immediately north of the Site is identified as the Prudence Building. The property located west of the Site across Madison Avenue is now labeled as the National City Building. The property located south of the Site across East 42nd Street is redeveloped as the Lincoln Building and a commercial office space. The surrounding area is a highly developed commercial neighborhood.
1950	**Site:** The Site is identified as the Columbia Carbon Building. Additional stories are added to the Site building, making it 17-, 18-, 22-, and 25-stories. **Surrounding Properties**: The building located north of the Site across East 43rd Street is identified as the Biltmore Hotel.
1968	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1980	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: The building located west of the Site is identified as The Sperry & Hutchinson Building occupied by commercial office space and a bank.

Year	Comments
1983	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1985	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: The building located north of the Site across East 43rd Street is identified as the Bank of America Office Building.
1987	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1988	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1991	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: North of the Site, an alternative street name is designated to East 43rd Street; it is identified as David Ben-Gurion Place.
1992	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1993	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1994	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1995	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
1996	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
2001	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
2002	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
2003	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
2004	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.
2005	**Site:** No significant changes are noted from the previous Sanborn Map. **Surrounding Properties**: No significant changes are noted from the previous Sanborn Map.

A review of Historic Sanborn Maps indicated the Site was occupied from at least 1890 to 1910 by several low-rise structures that were demolished to allow construction of the existing structure in 1929 and 1950. A copy of the Historical Fire Insurance Map report is included in Appendix D.

4.4.3 Recorded Land Title Record

Recorded Land Title Records were not searched. Available records indicate the Site was purchased by Green 317 Madison LLC on May, 13, 2001.

4.4.4 USGS Topographic Maps

WCD reviewed available historical USGS Topographic Quadrangles for information regarding past uses of the Site. Copies of the historical USGS topographic maps are included in Appendix F.

Year	Comments
1897 Harlem 1:62,500	**Site:** Due to map scale, no information is discernable. **Surrounding Properties:** Central Park appears approximately 1 mile north of the Site. The East River appears approximately three-quarters of a mile east of the Site. Grand Central Terminal is located east of the Site. The Hudson River appears approximately one and one-half miles west of the Site. Bryant Park is located approximately one-eighth mile west of the Site. Due to map scale, no further information is discernable.
1947 Central Park 1:25,000	**Site:** The Site appears developed; however, no indications of occupants or use(s) are discernable. **Surrounding Properties:** Surrounding properties appear developed; however, due to the scale of the map, no indications of occupants or use(s) are discernable. "42nd Street" and the "public library" appear south of the Site. "Bryant Park" appears west of the Site. No other significant changes from the 1897 topographic map are noted.
1956 Central Park 1:24,000	**Site:** The Site appears developed; no further information is discernable. The Site is shown at the 50 to 60 foot elevation contour. No other significant changes from the 1947 topographic map are noted. **Surrounding Properties:** "Times Square" appears west of the Site. No other significant changes from the 1947 topographic map are noted.
1966 Central Park 1:24,000	**Site:** No significant changes from the 1956 topographic map are noted. **Surrounding Properties:** No significant changes from the 1956 topographic map are noted.
1979 Central Park 1:24,000	**Site:** No significant changes from the 1966 topographic map are noted. **Surrounding Properties:** No significant changes from the 1966 topographic map are noted.
1995 Central Park 1:24,000	**Site:** No significant changes from the 1979 topographic map are noted. **Surrounding Properties:** No significant changes from the 1979 topographic map are noted.

The review of the historical USGS topographic quadrangles did not indicate the presence of RECs or VECs at the Site and surrounding areas. The Site appears to have been developed since at least 1897, however, no indications of occupants or uses(s) were discernable due to lack of information provided on the map(s) and/or map scale. In addition, the review of the historical USGS topographic quadrangles did not reveal any indications of historic filling or significant changes in topography. Copies of the historical USGS topographic quadrangles are included in Appendix F.

4.4.5 Local Street Directories

A review of historical city directories was conducted by EDR. Telephone listings were available for the Site from 1920 to 2013. The review of city directories did not indicate RECs associated with the Site or surrounding properties. Copies of the historic City Directory Abstracts are included in Appendix E.

4.4.6 Other Historical Sources

NYCDOB records for the Site were reviewed to determine whether there were any references to buildings, tanks or other structures, property usage or inspection reports that may have indicated the presence, past use, or release of hazardous substances, wastes or petroleum products within the Site.

Review of the NYCDOB records indicated that there are twenty-nine (29) complaints, one hundred sixty-six (166) NYCDOB violations and seventy (70) Environmental Control Board (ECB) violations recorded for Block 1277, Lot 20.

The twenty-nine (29) complaints were resolved and are associated with malfunctioning/inoperable elevators, failure to obtain proper permits for exterior construction work, construction activities not conforming to approved plans for work, unsafe construction practices, and illegal signage.

One (1) of the one hundred sixty-six (166) DOB violations is listed as an active violation; violation No. 00128 issued on 8/30/2013 associated with the failure to the façade cycle 7B technical report. The remaining violations are listed as dismissed or resolved.

All seventy (70) ECB violations were resolved and are associated with the elevator or construction.

Based on the nature of the complaints and ECB/DOB violations, no RECs were identified from the records review. Copies of the NYCDOB records are included in Appendix G.

5.0 SITE RECONNAISSANCE

The Site reconnaissance was performed on December 4, 2013 by WCD representative Mr. James Wilson. Mr. Wilson was escorted on the Site reconnaissance by Mr. Benny Jakupi, a maintenance staff member, and Mr. Bill Bailey, the manager of the building. Both are employed by the building management company SL Green. The weather conditions during the Site visit were approximately 40 degrees Fahrenheit and sunny with light wind.

5.1 METHODOLOGY AND LIMITING CONDITIONS

WCD did not inspect all commercial spaces during the Site reconnaissance. Inspected areas include the basement, sub-basement, and the unoccupied office on the 20th floor. WCD was not provided access to occupied office spaces. The sub-basement tank room is labeled as a “confined space”; view of the tank was not possible from the room’s entrance.

5.2 GENERAL SITE SETTING

The Site is located at 317 Madison Avenue, New York, New York 10017. An alternative address for the Site is 33 East 42nd Street, New York, New York 10017. The Site is defined as Tax Block 1277, Lot 20 in the Borough of Manhattan. The Site consists of a 23-story office/retail building with a basement and sub-basement, owned by SL Green. The Site’s 23-story building occupies approximately the entire 23,025 square foot L-shaped lot. The building is currently occupied by various commercial tenants leasing office space, as well as a first floor “Destination A Store Factory Outlet” retail shop, “Bread & Co.” delicatessen, “TD Bank”, “T.G.I. Fridays” restaurant, “KFC” fast-food restaurant, and “D’Espresso” coffee shop. Based on review of Sanborn® fire insurance rate maps, the existing building was constructed in 1920. The New York City Department of City Planning (NYCDCP) zoning map indicates the Site is designated as zone C5-3, which is designated for commercial/office use.

The location of the Site and a Site Plan are shown on Figures 1 and 2, respectively. A Site Plan indicating the physical layout of the sub-basement is presented as Figure 3. Photographs of the Site are included in Appendix A.

Three (3) staircases and sixteen (16) elevators provide access throughout the building. The main entrance to the Site building is from 42nd Street.

The Site is located in the midtown area of New York City, which is mixed use consisting of commercial, residential, and institutional structures. The Site is bounded to the north by 43rd Street followed by mid- and high-rise commercial buildings with first floor retail space, to the east by Vanderbilt Avenue followed by Grand Central Terminal and mid- and high-rise commercial buildings, to the south by 42nd Street followed by mid- and high-rise commercial buildings with first floor retail space and to the west by Madison Avenue followed by mid- and high-rise commercial buildings with first floor retail space. The surrounding community is highly urbanized with mid- and high-rise commercial and institutional buildings.

The building was constructed using masonry load bearing walls, structural steel framing members, concrete slab floors, and masonry and concrete foundations. The exterior façade of the Site building consists of brick and concrete masonry with ornamental marble elements. The interior finishes of the office space and common areas consist of carpeting and tiled floors, painted gypsum, finished wood, suspended acoustical ceilings and fluorescent lighting.

The sub-basement consists of a tank room, storage room, boiler room, heater and fan room, elevator pit, pump room and electrical room.

The Site building previously utilized a No. 2 fuel oil-fired boiler located in the sub-basement. Fuel oil was supplied by a 7,500-gallon No. 2 fuel oil aboveground storage tank (AST) located in the tank room. The building converted to a natural gas-fueled heating system several years prior to inspection and no longer utilizes the AST. The tank room is labeled as a “confined space”; inspection of the AST was inaccessible from the room’s entry panel. The area within sight from the entrance appeared dusty although relatively clean and stain-free. A documented leak from the AST occurred in the tank room in September 2013 (see section 7.2 for further details).

A rusted 275-gallon AST was housed in the sub-basement storage room. It was unclear whether the AST is still in use, and what purpose it serves/served. Four (4) oil drums were stored in the sub-basement boiler room. One (1) drum was empty at the time of inspection, one (1) drum was approximately one-third filled and contained gear box oil, and two (2) drums were filled and contained drain cleaner. The oil drums appeared in good condition with no evidence of significant spills or staining at the time of inspection. PCB-containing ballasts and fluorescent light bulbs are stored in the sub-basement until they are removed and disposed of by a licensed contractor. The sub-basement contains two sump pumps and surface water discharge drains.

The basement level is used primarily for miscellaneous storage.

Electricity and natural gas are provided to the Site by Consolidated Edison Company of New York. Potable water and sanitary sewer are provided by the New York City Department of Environmental Protection (NYCDEP). Each floor level contains a HVAC unit which provides air conditioning.

The adjoining properties have not experienced significant changes since the most recent Sanborn Fire Insurance Map, dated 2005.

6.0 CURRENT AND HISTORICAL USE INTERVIEWS

The following knowledgeable persons were interviewed with regard to the Site pursuant to ASTM 1527-13 Section 10:

6.1 CURRENT PROPERTY OWNER

The current property owner was not available for interviews.

6.2 CURRENT SITE OPERATOR OR KEY SITE MANAGER

Name	Title/Company	Telephone #	Years Associated with Site
Mr. Bill Bailey	Building Manager/SL Green	212-557-0610	Approximately 8
Mr. Benny Jakupi	Maintenance/SL Green	212-557-0610	<1

Mr. Bill Bailey is the building manager for SL Green, the company that manages the building and represents the Site occupant. Mr. Benny Jakupi is a member of the maintenance team. Mr. Bailey and Mr. Jakupi indicated that they were not aware of any activity and use limitations associated with the Site. Mr. Bailey and Mr. Jakupi also indicated that they were not aware of any specific environmental issues associated with the Site.

Detailed information provided during the above-listed interviews is referenced in applicable sections of this report.

6.3 SITE OCCUPANTS

Name	Title/Company	Telephone #	Years Associated with Site
Mr. Bill Bailey	Building Manager/SL Green	212-557-0610	Approximately 8

Mr. Bill Bailey is the building manager for SL Green, the company that manages the building and represents the Site occupant. Mr. Bailey indicated that he was not aware of any activity and use limitations associated with the Site. Mr. Bailey also indicated that he was not aware of any specific environmental issues associated with the Site

Detailed information provided during the above-listed interviews is referenced in applicable sections of this report.

6.4 PAST OWNERS, OPERATORS AND OCCUPANTS

There were no prior owners or occupants available for interviews.

6.5 REPORT USER

Name	Title/Company	Telephone #	Years Associated with Site
Ms. Jan Hilgeman	Vice President-Construction/Hines	212-230-2300	<1

WCD was informed by Ms. Jan Hilgerman of Hines that Hines is considering purchasing the Site for redevelopment as a commercial office space. Detailed information provided during the above-listed interviews is referenced in applicable sections of this report. A User Questionnaire form was not completed by Ms. Hilgerman.

7.0 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS STORAGE AND HANDLING

7.1 HAZARDOUS SUBSTANCES

The facility contains various closets with janitorial commercial cleaning products. Additionally, the basement and sub-basement contain storage areas for small quantities of janitorial chemicals, cleaners, paints, and spackling paste. There was no evidence of staining or spillage associated with these areas at the time of inspection.

7.2 PETROLEUM PRODUCTS STORAGE AND HANDLING

During the Site reconnaissance, WCD noted the presence of the following:

- One (1) 7,500-gallon No. 2 fuel oil AST is located in a basement oil room. The AST is out of service following the building conversion from oil to a natural gas heating system. The AST was emptied and cleaned in September 2013. On September 6, 2013 approximately six (6) inches of oil covered the floor of the basement oil room during the removal of fuel oil from the AST. The spill was contained to the room and reportedly did not result in an environmental release. The NYSDEC assigned the incident spill number 1305985. The spill does not have a closure date. In addition, the AST should be registered with the NYSDEC in accordance with regulations and if no longer in use delisted.

- Four (4) oil drums were stored in the sub-basement boiler room. One (1) drum was empty at the time of inspection, one (1) drum was approximately one-third full and contained gear box oil, and two (2) drums contained drain cleaner. The drums appeared in good condition with no signs of staining or spillage at the time of inspection.

7.3 SOLID WASTE GENERATION, STORAGE AND DISPOSAL

There was no observed evidence of solid waste generation, storage, and disposal on the Site with the exception of refuse typical of an office or retail space. Solid waste is removed from the Site by the New York City Department of Sanitation (DSNY).

7.4 POLYCHLORINATED BIPHENYLS (PCBS)

Polychlorinated biphenyls (PCBs) are toxic components of dielectric and hydraulic fluids that were formerly used in electrical equipment such as transformers and hydraulic elevators/lifts and in construction materials such as exterior caulking. The manufacture and use of PCBs was banned in the United States in 1978.

Suspect PCB-containing caulking materials and fluorescent light ballasts were noted in the Site building during the Site inspection. Since the Site building was constructed before 1978, the potential for the presence of PCB-containing caulking materials and light ballasts is considered an environmental concern.

7.5 ASBESTOS-CONTAINING MATERIAL (ACM)

The suspect ACM identified at the Site is considered an environmental concern. Any suspect ACM affected by potential future renovation or demolition work should be identified prior to and properly managed during construction activities in accordance with federal and state procedures.

7.6 LEAD-CONTAINING PAINT (LCP)

During the Site inspection, a limited visual assessment of all accessible painted surfaces was performed. No sampling or intrusive work was performed, as this is outside the scope of this Phase I ESA. The interior painted surfaces were generally found to be in good condition with minor evidence of damage or disrepair. Due the buildings age, interior LCP is an environmental concern. Any interior paint that is damaged or in disrepair, or that may be disturbed in any way during construction activities, must be

handled in accordance with federal and state policies and procedures. Any construction work that may disturb these painted surfaces should be inspected, and tested as appropriate.

7.7 REGULATORY COMPLIANCE

There were no regulatory compliance issues noted during the Site reconnaissance.

7.8 OTHER ENVIRONMENTAL CONDITIONS (METHANE, MOLD, ETC.)

There was no evidence of water damage or active mold growth at the Site. Based on the review of historic sources, including Historic Sanborn Maps, topographic maps, and visual observations of the Site and surrounding area, there was no evidence of historic filling of wetlands or organic deposits on the Site. Therefore, methane is not considered an environmental concern at the Site.

8.0 FINDINGS

WCD has completed a Phase I ESA for the Site located at 317 Madison Avenue, New York, NY 10017 (Tax Block 1277, Lot 20) (the "Site"). The Phase I ESA was conducted in conformance with ASTM E 1527-13 Standards related to the Phase I ESA process. The Phase I ESA was based on a site inspection, interviews with personnel familiar with the Site, a review of available files and historical records, and the findings of an environmental database report. The purpose of the Phase I ESA was to satisfy the financial lenders requirements and identify recognized environmental conditions (RECs) and environmental concerns that may affect the suitability of the Site for use as commercial office space with first floor retail use.

8.1 RECOGNIZED ENVIRONMENTAL CONDITIONS (RECs)

The Phase I ESA has revealed the following evidence of RECs associated with the Site:

- A spill was reported to the NYSDEC on September 6, 2013 when approximately six (6) inches of oil covered the floor of the basement tank room during the removal of 7,500 gallons of No. 2 fuel oil from the 7,500-gallon AST. The spill was reportedly contained to the tank room and reportedly did not result in an environmental release. The NYSDEC assigned the incident spill number 1305985. The spill does not have a closure date. The onsite NYSDEC spill is considered a REC.

8.2 VAPOR ENCROACHMENT CONDITIONS (VECs)

The Phase I ESA has revealed VECs associated with the RECs identified at the Site.

8.3 ENVIRONMENTAL CONCERNS

The Phase I ESA has revealed the following environmental concerns associated with the Site:

- Based on the age of the Site building, suspect ACM may be present and is considered an environmental concern;

- Suspect Lead Containing Paint (LCP) on interior surfaces was observed in the Site building during the Site inspection. Based on the age of the Site building, the painted surfaces may contain lead and LCP is considered an environmental concern;

- Fluorescent light fixtures and caulking materials were observed during the Site inspection. Based on the age of the building, the fluorescent light fixtures and caulking materials may contain PCBs. The potential presence of PCB-containing ballasts and caulking materials is considered an environmental concern; and

- The 7,500-gallon on-site AST should be registered with the NYSDEC and if no longer in use delisted.

9.0 CONCLUSION AND RECOMMENDATIONS

Based on the findings of this Phase I ESA, WCD believes that additional investigation should be performed to determine if the identified RECs/VECs have affected the Site. WCD recommends that any ACM, Lead Containing Paint, and PCB-containing components affected by future renovations, repairs or demolition at the Site be identified and properly managed during such activities. In addition, stored chemicals and petroleum products should be managed in accordance with applicable federal, state and local regulations. The open NYSDEC spill should be investigated and closed.

10.0 DEVIATIONS

No deviations from ASTM Standard Practice E1527-13 were noted for this Phase I ESA with the exception of the following:

- WCD did not receive a completed User Questionnaire from the User;
- Not all commercial spaces were inspected; and
- The tank room was a “confined space” and was inaccessible for inspection.

11.0 ADDITIONAL SERVICES

The scope of work for this Phase I ESA did not include evaluation of potential radon gas, however, information related to radon gas was provided in the EDR Report (Appendix B), and is therefore conveyed here. According to the EDR Report, the EPA classifies New York County as located in radon zone 3 (indoor average <2 picocuries per liter [pCi/L]). The scope of work for this ESA did not address other non-scope considerations, including, but not limited to:

- Wetlands protection;
- Regulatory compliance;
- Cultural and historic resources;
- Industrial hygiene;
- Health and safety;
- Ecological resources;
- Air quality;
- Biological agents;
- Flood hazards;
- Electromagnetic fields;
- Seismic hazards;
- Stormwater management or drainage;
- Structural engineering or integrity;
- Geotechnical engineering;
- Public safety; or
- Dam safety.

12.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

WCD has performed a Phase I ESA of the property located at 317 Madison Avenue, New York, New York 10036 (the "Site"). The scope of the Phase I ESA was consistent with requirements of ASTM Standard Practice E 1527-13. Signatures of the Environmental Professionals who participated in conducting this Phase I ESA are provided below. Qualifications for these individuals are provided in Appendix H. WCD declares that, to the best of our knowledge and belief, WCD meets the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. WCD has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. WCD has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 04/26/2013 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

CON EDISON NYC STEAM EXPLOSION	***LEXINGTON AVENUE BETWEE***	***SE 1/8 - 1/4 (0.209 mi.)***	***BR466***	***937***

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 04/26/2013 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 07/11/2013 has revealed that there are 7 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 07/11/2013 has revealed that there are 12 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 07/11/2013 has revealed that there are 63 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 08/19/2013 has revealed that there are 92 NY LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

NY TANKS: This database contains records of facilities that are or have been regulated under Bulk Storage Program. Tank information for these facilities may not be releasable by the state agency.

A review of the NY TANKS list, as provided by EDR, and dated 08/07/2013 has revealed that there are 3 NY TANKS sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 08/19/2013 has revealed that there are 57 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/11/2013 has revealed that there are 160 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

NY MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the NY MANIFEST list, as provided by EDR, and dated 08/01/2013 has revealed that there are 274 NY MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 3 EDR MGP sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 38 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 12 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"e2mis no. 150-697:10/10/03 found at 10:15 hrs. approx. 1 gallon of transformer oil had leaked from the transformer down the side and onto dirt on the concrete floor in vault V5705. He found the dirt soaked with oil. The oil never migrated to the sump pit. The source of the spill is the transformer and the cause is a leak from the top of the transformer probably caused by corrosion. One liquid sample taken for PCB. Initial cleanup action taken byplacing absorbent pads down. This will not be classified as a 24 hr. spill since the transformer is being condemned and requested OOE Cat II. There is scaffolding over the vault, which needs to be removed in order to remove the transformer & perform the final cleanup.The transformer is a G.E. 1,000 kVA unit with Serial #F529854. The fluid capacity is 385 gallons. The transformer was pressure tested and it

VAULT #5705 (Continued) **S106018892**

failed. The transformer must be de-energized in order to perform a cleanup.10/10 @ 20:44Lab Sequence Number: 03-08409-001TOTAL PCB 18 ppmUpdate 01/07/04Transformer 5705 has been drain & disconnected wait for scaffold to be removed07/30/05 04:15E.Hulser#39723,Cable Supervisor, notified the control center on 07/30/05 at 03:40hrs. to report the cleanup in V5705 was completed, this was a final cleanup.There were no solids removed and no drums or barrels were used. There was liquids removed Via vactor truck from V5705. The method used to clean was double washed with simple green. The yellow environmental tag numbered #17505 was removed from V5705. The cleanup crew were; G.Rosario#11464 and A.D'ateno#20237. The source of the spill, a leking transformer, was removed and replaced with a new unit in V5705. The cleanup was completed on 07/30/05 at 03:30HRS.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	e2mis no 155131M. Tamarez found approx. 50 gallons of an unknown oil and approx. 100 gallons of water in V4012. There were three samples taken; one for PCBs, one for oil ID and one for flashpoint. There was no intial cleanup action taken, the cleanup is pending crews and a tanker.[Notify Michelle Tipple if oil ID shows #2 fuel oil - she's working on a spill a block away.]08/30/04 19:15M.Tamez#88368 of I&A notified the control center on 08/30/04 at 18:30hrs. to report that she found approx. 50 gallons of an unknown oil and approx. 100 gallons of water in V4012. The location of V4012 is F/O 301 Madison Ave.(the cross street is E. 41 st) M.Tamez#88368 was at V4012 because Feeder 4M65 had opened auto. M.Tamez#88368 was working under account number #H3282 at the time of the spill. There was no fire or smoke involved and no sewers or waterways were affected. There were no injuries related to this spill and the weather conditions did not contribute to the hazards of this spill. There was no private property affected.There is oil filled equipment in V4012, the transformer. A yellow environmental tag #35946 was hung in V4012. The water in V4012 is standing. There are no substantial cracks in V4012. M.Tamez#88368 could not see a sump or a sump pump at this time. There were three samples taken; one for PCB'S, one for oil ID and one for flashpoint. The samples are taken from the spill. The samples are marked priority E. The chain of custody form is # DD06641. There was no intial cleanup action taken, the cleanup is pending crews and a tanker.08/31/04 04:50Lab Sequence Number: 04-06913-001TOTAL PCB 13 ppm08/31/04 04:52Lab Sequence Number: 04-06914-001Analysis indicates the presence of a transformer oil.08/31/04 04:55A partial cleanup was

VAULT #4012 (Continued) **S106698757**

set up for 08/30/04 at 23:00hrs. The partial cleanup is still in progress at this time.Update 9-9-04 @ 16:25M Tamez # 88368 reports that a partial cleanup has been completed as of 9-4-04 @ 17:30. 268 gallons of transformer oil were removed by a tanker. Oil absorbent pads and speedy dry were applied. Cleanup crew and supervisor are listed in the event involved person screen. Final cleanup is pending transformer removal.Update 1-22-05 @ 06:09G Byrne # 81264 reports that the cleanup is complete as of 05:50. Double washed with slix and flushed. All liquid removed by vactor truck. Tag #35964 removed. Cleanup persons are listed in the event involved person screen. Transformer has been removed and a new transformer installed.

Remarks: 50 gal of unknown oil on 100 gal of water. Material contained to the vault. Clean up crew is already there. There is a transformer in the vault but they are unsure if it is actually involved with the spill.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "RODRIGUEZ"E2MIS 1486956-11-03 @ 16:35M Milano # 68073 reports he discovered 5 gallons of unknown oil mixed with 2 gallons of water and dirt had spilled onto the concrete floor of the structure. It is possibly transformer oil due to a hole in the unit. There was smoke and fire involved, there is now just light smoke. Verification of sewer or waterway is unverified at this time. There is a sump, sump pump was found disconnected upon arrival. Further investigation is pending safe access and an i&a crew.Update 6-11-03 @ 17:30P Arroyo #15642 states that he will dispatch an I & A crew to v8770 to investigate the trap for a release and do an initial cleanup. P Arroyo reported @ 18:50 hrs that there is no sign of release of oil into the trap in the structure. Also a partial cleanup and a drain and disconnect of the unit has been scheduled for 23:00 hours using an over 50 tanker which has been ordered.Lab Sequence Number: 03-04882-001 PCB 17 ppm.6/12/03 05:00 hrs the partial cleanup was complete. Approx 35 gallons of oil and water mix was removed from the floor of the vault and 80 gallons of oil was removed from the unit. The capacity of the unit is 295 gallons. I asked Mr Ligouri if he

V8770 (Continued) **S106014932**

checked the trap for oil and he stated the trap was clean of any oil. Absorbent was put down and final cleanup will be done after the unit is removed. The initial discovery was 5 gallons oil and 2 gallons water. During the partial cleanup 35 gallons of oil & water mix was removed and 80 gallons of oil was drained from the transformer. There is approx. 180 gallons of oil unaccounted for. According to Supervisors Arroyo & Liguori there was no evidence of oil in the trap and, therefore, no release to sewer.6/13/03 cleanup is complete as of 18:55. Double washed with slix and flushed.UPDATE: New transformer installed 6/23/2003.

Remarks: cleanup in progressfire involved in transformercon ed 148695

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIBBE"See also 0203738.11/12/10 - spill re-assigned from Tibbe to Joe O'Connell12/30/10 - Raphael Ketani. A new spill case was called into DEC on 12/22/10. It was assigned #1010077. The spill consisted of the seepage of several gallons of oil through the walls of the #7 subway line tubes. It is a reoccurrence of a historical spill that

GRAND CENTRAL STATION -NYCT (Continued) **S104881203**

has been going on for over 10 years and is being managed through active spill case #0010754.As there is an older active spill case for the site, I have closed spill case #1010077.1/4/11 - Raphael Ketani. Randy Austin, Chief of the Spills Unit, requested an update regarding the seepage. I tried to contact Haroon Aslam of the Environmental Protection Division (646) 252-5774 of the NYCTA, but I could only leave a message.Mr. Aslam returned my call and left a message. He said that workers are still going into the tunnels to "mop up" the seep with pads. Otherwise, noting else has changed.

Remarks: CALLER STATES THERE IS SEEPAGE OF PRODUCT INTO TRACK AREA UNKNOWN SOURCE - NO CLEAN UP

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	05/01/13- Zhune spoke to Robert Hil from Rightway 718-855-7272. He said they cleaned the tank then after they performed a tank test. The

APT BUILDING (Continued) **S113494308**

tank falied the test. They sent the proposal to the owner to do the isolate test. If the owner approved the proposal they will test the lines (vent. fill, suction and return separetly and the tank itself. Plumber checked the lines and found the vent and fill are very old.06/18/13- Zhune spoke to Robert. He said they isolated the lines and found fill line failed the test. Riteway is fixing the line.

Remarks: 6000G #6 Oil tank was empty and failed tank test.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"e2mis no. 148748:15 gallons of an unknown oil mixed with 100 gallons of water on the concrete floor of the structure. There is a drain in the floor but it is clogged. Sewer connection could not be verified, structure does not show up on conduit plate. Oil absorbent pads were placed on the spill as initial cleanup action. Cleanup to start as soon as resources are available.D Pontecorvo # 85413 reports that he re-calculated the amount of the oil spill to 5 gallons. He also stated that he is going to ask cig to request an ivestigation from the dep industrial waste hotline, due to the fact that the oil seems to have been dumped into the vault, (possibly from a nearby restaraunt). He also agrees with the initial report that the oil is possibly cooking oil.Lab Sequence Number: 03-04979-001 Insufficient amount of sample extracted to perform oil identification.Lab Sequence Number: 03-04980-001 PCB <1 ppm6/21/03 21:10 R. Bracco # 12609 of the I&A called to report that the cleanup was completed at 18:30. The structure was double washed with degreaser. The flush truck removed all debris & liquid.
Remarks:	15 gal of unk oil on 100 gal of water - clean up crew being

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"CON ED E2MIS NOTESApprox. 2 gals. of unknown fluid on approx. 60 gals. of water. Fluid is contained to the vault did not enter any sewers or waterways. Structure has a sump pump and sewer

VAULT 3686 (Continued) **S104506706**

connection, on arrival found pump disconnected. There are no cracks in structure. Two samples taken and sign #25438 hung.5-11-99 Final cleanup on 5-10-99 @18:00hrs.Used Astoria <50ppm tanker to remove liquid from vault. Used Flush truck to flush vault after Astoria tanker complete.In accordiane with I&A OS P. Renzulli, this job was completed using a hard copy dated in Feburary from E2MIS incident #123221. The hard copy showed the pill was <49ppm. However, final sample result were not yet received from this job at time of final cleanup. The I&A discovered this at 5-11-99. 5-11-99 09:15 While I & A planner A. Johnson #81226 was updaing spill that occured in V3686, it was discovered that PCB sample results were not yet recieved. This was verified with the I&A OS involved in the job. The identification sample results posted stated that there was not enough of a sample to identify.5-11-99 Chem Lab stated that the lab sequence number for the PCB analysis would be 99-04779, the results wer not yet posted and within a half an hour the Chem Lab could tell us when the sample would be posted.5-11-99 09:30 Astoria Transp., tanker might be on way to Bklyn, hw willtry to catch it before it gets there and put the tanker on hold.5-11-99 09:35 Flush advised us that the truck that flushed the spill location was #60533. The truck dumped it's load from last night this morning at approx. 08:30 in the W 28 St. WOL PCB pit. They will contact driver of the truck an put the truck on hold in W. 28th St. yard.5-11-99 09:40 Pump and waste treatment facility at W 28th St. WOL shut down.5-11-99 09:45 Called Chem Lab for status on ext.4123- was told that the chain of custody requests only a 4 day turn around, not an emergency turn-around. I&A Planner explained circumstances and requested an excalation to immediate results.5-11-99 09:50 Chem Lab supervisor, Lima Jones contacted and agreed to escalate sample results.09: 55 Astoria tanker is on hold in Astoria until sample results received.10:05 No further notification required at this time. We need to page him back as soon as sample results are recieved. He verified the waste treatment facility was shut down as soon as the lack of a official hard copy was discovered.14:00 Chem Lab results recieved.Lab Seq#99-04779Aroclor, nonePCB <1ppm5-11-99 14:10All involved departments and managers listed in this note were advised of sample results. Hold was taken off flush pit, waste treatment plant, flush truck, and Astoria tanker.

DEC Memo:	On 10/25 @ 13:17 J Rodriguez rorted to me that while working in V-8901 located @ 511-5 Fifth Av doing phase checks on Feeder 4M61 he discovered approx 6 gallons of an unknown oil in the structure. No sewer/waterway affected, no fire/smoke involved, no injuries, weather did not contribute, No private property was affected. The source and the cause of the spill is unknown at this time. The spill was on the concrete structure floor. There is no standing water. Upon inspection by the finder no piping was seen Environmental tag # 34588 was hung. Chain of Custody # CC 16683 will be used for the samples for PCB and ID. The courier has been called for pick-up. I@A will respond to location to make a determination as to whether the Transformer is the source .Logger R Pagano # 487010/25 @ 13:45Spoke to T Marcinek # 87549 of CIG @ 13:43Logger R Pagano # 4870310/25 @ 14:40After inspection by I&A it has been determined that there is a bottom leak

VAULT 8901 (Continued) **S106126118**

from the Transformer. On conduit plate # 26-H-4 there is no designation for V-8901. The partial cleanup will be scheduled as soon as possible. The vault will be contained byplugging up the weep-hole in the Vault and absorbent pads and granules will be placed to soak up existing leakage and prevent further leakage. The Unit cannot be drained until the Feeder is taken out of service and then the partial cleanup will be completed and crews will be available. Looger R Pagano # 48703NOTE:::: Spoke to Marcinek of CIG @ 16:20 and informed him of change of incident status. Logger R Pagano # 48703UPDATE 10/25/03 19:20R Hardin # 18320 reported to N Muldoon #18723 that a partial cleanup was completed at 19:05 hrs absorbent and pads were placed along with the weep holes were plug up and there was no release to any other structure. Final cleanup is pending removal of unit. Cleanup persons can be found in the Event Involved Screen.Lab Sequence Number: 03-08748-001TOTAL PCB 15 ppmUPDATE 10/25/03Lab Sequence Number: 03-08750-001Analysis indicates the presence of a substance similar to a dielectric fluid.10/25 @ 14:25Gilson # 17065 of I&A reported to me that the partiala cleanup hass been completed . The solid waste has benn appropriately bagged and disposed of. The Tanker removed 450 gallons of mixed liquid. The E nvironemtnal tag has been left in place.NOTE::: Transformer drained and disconnectedFinal cleanup pending Transfromer removal:02/15/05 04:15G.Byrne#81264, Cable supervisor, notified the control center on 02/15/05 at 03:30hrs. to report the clean up in V8901 was completed. This was final cleanup. There were no solids removed and no drums or barrels were used. G.Byrne#81264 states the only liquids removed were from the flush truck. The method used to clean was double washed with slix. A yellow envirnomental tag #34588, was removed from V8901. The clean up crew was G.Byrne#81264, as the cleanup supervisor and G.Rosario#11464 and W.Holder#85940 as the cleanup crew. The old transformer was removed and a new unit was installed in V8901. The clean up was on 02/15/05 atn 03:15hrs.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"Con ed e2mis notes:Approx 10 gals dielectric oil mixed w/65 gals water in V-2445, sump pump not working, pcb sample taken, as per cinde dielectric oil is 45ppm. Cleanup started, found spill leaking from waterbury fitting. Repairs were made. No other oil filled equipment in structure. Crews broke piping in trap and found no indication of oil.Drained water and oil mix in vault into 55 gallon drums. Double washed floors and walls with slix and water. Soaked up free standing oil with oil absorb and removed to solid waste drum. Transported 3 liquid and one solid waste drum to West 28th. PCB storage area as per CEP >50 ppm instructions.Lab Seq #99-08768AROCLOR #1260 PCB count 19 ppmFlushed and cleaned vault 2445 with Flush truck, removed oil tag, reclassified drums to 19ppm. Final cleanup complete.

DEC Memo:	e2mis 1492897/14/03Mike Reiter #27277, I&A South, reportedthat he found approx. 150 gallons of transformer oil in vault V0538 located at 38 West 43 Street between 5th and 6th Ave. The source of the spill is the transformer and the cause is a possible bottom leak due to very heavy rust. The oil was found in a concrete vault. Mr. Reiter stated that it appears to be all oil and no water. He is working under account no. 80484. The feeder associated with this vault is Feeder 5M80. There is no evidence at this time of any release to sewer or waterway. Once the vault is drained the drain connection

VAULT #0538 (Continued) **S106016078**

will be checked. Samples will be taken for PCB and Oil ID. No initial cleanup action was taken due to the amount of oil in the vault. Cleanup is pending an Over 50 Tanker and crews. Update: Lab Reasults,Mon 7/14/2003 20:27 hrsLab Sequence Number: 03-05802-001TOTAL PCB 17 ppmUpdate: 7/14/03 @ 21: 20 hrs.Joe Cumberbatch, I&A South Operating Supervisor, reported at 21:00 hrs. that 620 gallons of oil was removed from the transformer. The transformer is an Allis Charmers with a total capacity of 780 gallons. Therefore, 160 gallons of oil leaked into the vault. The floor drain was checked and found clogged. He reported no release to sewer. A second sample was taken from the transformer. The vault floor was double washed with Slix and rinsed with the Vactor truck. Oil absorbent granules were placed around the transformer. The drain was plugged with absorbent pigs. These pigs were also placed around the drain. The partial cleanup was completed at 21:00 hrs. Final cleanup is pending transformer removal. 7/15/03 @ 07:23 hrs.Lab Sequence Number: 03-05807-001TOTAL PCB 20 ppmLab Sequence Number: 03-05803-001 Analysis indicates the presence of a substance similar to a dielectric fluid.UPDATE 07/25/03 05:10 hrsV Mirance # 58484 Operating Supervisor Manhattan Cable reported to N Muldoon #18723 that the cleanup was completed 100% @ 04:00 hrs. The structure was double washed with slix and 55 gallons of wash water and all debri was removed by the flush truck.UPDATE: A new transformer was installed 8/1/2003.

Remarks: Above material discovered at above location. Samples have been taken and cleanup is pending crew response. Con Ed# 149289.

DEC Memo:	161498. 10/14/05 14:38. F.Simms#66618, Emergency Dept. Manager, notified the control center on 10/14/05 at 14:20hrs. to report a spill of 50 gallons of transformer oil and 200 gallons of water and foam in V4725, which is located in front of 118 - 132 Park Ave. between E. 41 ST & E. 42 ST. F.Simms#66618 was responding to a FireDept. report of a transformer fire when he found the spill. F.Simms#66618 reports that it is a possible broken bushing on the transformer. The account number is #F3503. There was fire and smoke. There was no sewers or waterways affected. There were no injuries related to this spill and the weather could have had an affect, it is

VAULT #4725 (Continued) **S107416034**

not known at this time. The Fire Dept. was/is on location. There was no private property affected. A yellow environmental tag numbered #01046 was hung in V4725. There will be 1 sample taken for PCB's. The Warhouse PCB History states 10 PPM, as of 09/09/1994. There was no initial cleanup action taken. The cleanup is pending a tanker and transformer removal. M.Schlagel#18276, of CIG, was notified on 10/11/05 at 14:29hrs. Logger : M.Casalta #12684

Remarks: NO SEWERS OR WATERWAYS 200 GALLONS OF WATER IN HOLE, TRANSFORMER DIEL; FLUID POSSIBLE; THERE WAS FIRE: CREWS ON LOCATION; HISTORICAL PPM OF 10: IN 1992: 161498

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "M TIBBE"6/1/06 - 3:50 PM - Spoke with representative from Petroleum Tank Cleaners concerning spill. A leaking fill line was reported in which Petroleum Tank Cleaners visited the residence to clean the site on the day of the spill. The spill was cleaned in its entirety and the tank was cleaned and repaired not long afterward. The representative reported the situation was not a big deal and there have been no further reports of problems since. Referred to Abramson Brothers, Inc. if additional information was required. Called Abramson Brothers in which there was no one in the office at the time that could give additional information. Awaiting return call concerning the case. - 6/1/06 Johnathan Antonizio, NYSDEC - HQ7/1/06 - 1:30 PM - Called Abramson Brothers, Inc. concerning spill site and spoke with a general representative. Based on the information that was gathered previously from Petroleum Tank, they had no additional information based on the particular case, but haven't had reports of further problems at the residence. Based on the spill case's age, they did not have any hard copy records on file. However, based on the information provided by Petroleum Tank, no further action is necessary at this time. - 7/5/06 Johnathan Antonizio, NYSDEC - HQ.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	e2mis no 157411While Sinclair was Flushing N-50208 with Vehicle #

CONSOLIDATED EDISON (Continued) **S106866896**

60533,he sprang a Hydraulic leak from the Vactor system and approx 20 gallons of Hydraulic fluid spilled into the adjacent M-50206 along with approx 50 gallons of water. The truck was temporarily repaired and the cleanup of the truck was started at 18:35 and completed at 18:45.. The truck can be driven into the W.28 St yard without an other Environmental impact and will be permently repaired there either by the driver or Transportation. No sewer/waterway affected. The spill was in the Mankole, nomovement on the standing water, no sumps verified, no cracks. Environmentag Tag # 38687was hung. Two samples for PCB and ID will be taken. Cleanup for the M-50206 will be pending Sample results.2/28 @ 19:50According to Conduit plate E 26 - I - 1, there is no sewer connection.Update 3-1-05 @ 06:07Lab Sequence Number: 05-01745-001 - PCBs < 1 ppmLab Sequence Number: 05-01747-001 - Analysis indicates the presence of a substance similar to a lubricating oil.Update: 3/1/05 @ 17:21 hrs.Manhattan Environmental Desk added manhole M50206 to the "Description" and "Location" fields in order to track the completion of the cleanup in this structure. This was discussed with ERT, Paul Walsh and he agreed with this change. In addition, the Responsible Operation was changed from "Flush Operations" to "Underground South" since they are responsible for the cleanup in the manhole.Based on the results of the sample analysis the oil in the manhole is the lubricating or hydraulic fluid spilled by the Vactor truck. The cleanup of the vehicle was completed but the cleanup of the manhole is pending scheduling of UG crews and Tanker or Vactor truck.Update 3-25-05 @ 05:25A Munro # 13615 reports that the cleanup is complete as of 05:25. 2 bags of ppe. 650 gallons of oil and water mixed removed by tanker. Double washed with slix and flushed. Tag # 38687 removed. Source of spill was a vactor truck that was on location previously. Cleanup crew and supervisor are listed in the event involved person screen.

Remarks: sprang leak on hydraulic hose. leak from vehicle recovered. manhole affected 60533

THESE 4 VAULTS HAVE SHEENS.... CLEANUP WITH ORIGINAL SPILL(V4090) ... ERT(PEREZ) ON LOCATION AND OKAYED SAME.8/28/99 I&A OS J. Gnall #19045 reports all vault floors were drained in total of approximately 1,000 gallons of water from Vaults 2917, 5481, 2852, and 4107 and oil-water mixture in V4090 by Astoria >49PPM tanker. Also, drained transformer in V4090 of approximately 200 gallons of oil by Astoria >49PPM tanker. Maximum capacity of transformer is 355 gallons in accordance with its nameplate data. Disconnected transformer for removal. Partial cleanup was completed using oil absorbant, oil aborbant pads, and oil absorbant pigs. All drains at the location were clogged upon arrival. Also put drain plug in drain of V4090. No sump pumps at location. Final cleanup pending transformer removal.From: Shah, DanSent: Sunday, August 29, 1999 22:16To: Radtke, Edward Jr.; Jones, Paula E.; First, Louis W. Jr.Cc: dl - Environmental Response Team; Cohen, Barry; Barry, MartinSubject: E2MIS 127463Good morning: We had a spill in Vault 4090, @ 279-93 Madison Avenue over the weekend. Number 9 received a call that the unit was smoking. Crews responded and found approximately 350 gallons of oil thought to be possibly cooking oil. The unit had a historical of 10 PPM PCBs. A sample was taken from the spilled oil and results came up as 432 PPM PCBs making this a 'one pound' release inside the vault. The clean up requirements are same as a >500 ppm spill because of the >1 lb. Release. This was confirmed with Barry Cohen. Please check with Barry Cohen, EH&S if you need additional assistance.9/6/99 I&A OS L. Roman #27270 reports V4090 has cleanup complete. Powerwashed floor and walls twice with 760 bio-cleaner. Then completed powerwash twice more. Generated and removed 8 - 55gal >49PPM solid waste drums and 2 - 55gal >49PPM liguid waste drums. Waste was picked up by Astoria transportation from spill location. Cleanup was started at 08:30hrs and completed at 18:45hrs. Oil notification tag could not yet be removed due to the requirement of post cleaning grid samples. Final closeout of job is pending post cleanup grid samples. Also, I&A supervisor L. Roman reports there are no weep holes and therefore no migration of oil into nearby vaults. There was no oil in vaults 2917, 5481, 2852, 4107. This has also been confirmed by I&A OS J. Gnall who stated only water was in the nearby vaults and he drained sameon 8/28/99.9/12/99I&A OS L. Roman #27270 reports ERT representative Wendell Fenner has been informed that there was no oil migration from spill into nearby vaults 2917, 5481, 2852, and 4107. ERT representative Wendell Fenner will meet I&A crew on location at 08:00AM on 9/13/99 for grid samples in vault 4090.On 10/7/99 a 2nd clean up was completed in vault 4090 at 1430hours. Wipe sample taken and returned indicating wipe samples are acceptable and clean up is completed based on these results. LSN 99-10614 dated 10/10/99 wipe sample 18 < 1.00 ug/100cm-2 wipe sample 19 2. ug/100cm-2 wipe sample 14 1ug/100cm-2 wipe sample 17 <1.00 ug/100 cm-2 Not reported

VAULT 4090 (Continued) **S104507968**

Remarks: cooking oil mixed w/ 400 gallons of water contained in the manhole - believed a restaurant may have been dumping their cooking oil in the manhole - they will clean up assuming 50-499 ppm pcb as soon as they get a tank to pick it up - samples for id & pcb's
