Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	e2mis no 157411While Sinclair was Flushing N-50208 with Vehicle # 60533,he sprang a Hydraulic leak from the Vactor system and approx 20 gallons of Hydraulic fluid spilled into the adjacent M-50206 along with approx 50 gallons of water. The truck was temporarily repaired and the cleanup of the truck was started at 18:35 and completed at 18:45.. The truck can be driven into the W.28 St yard without an other Environmental impact and will be permently repaired there either by the driver or Transportation. No sewer/waterway affected. The spill was in the Mankole, nomovement on the standing water, no sumps verified, no cracks. Environmentag Tag # 38687was hung. Two samples for PCB and ID will be taken. Cleanup for the M-50206 will be pending Sample results.2/28 @ 19:50According to Conduit plate E 26 - I - 1, there is no sewer connection.Update 3-1-05 @ 06:07Lab Sequence Number: 05-01745-001 - PCBs < 1 ppmLab Sequence Number: 05-01747-001 - Analysis indicates the presence of a substance similar to a lubricating oil.Update: 3/1/05 @ 17:21 hrs.Manhattan Environmental Desk added manhole M50206 to the "Description" and "Location" fields in order to track the completion of the cleanup in this structure. This was discussed with ERT, Paul Walsh and he agreed with this change. In addition, the Responsible Operation was changed from "Flush Operations" to "Underground South" since they are responsible for the cleanup in the manhole.Based on the results of the sample analysis the oil in the manhole is the lubricating or hydraulic fluid spilled by the Vactor truck. The cleanup of the vehicle was completed but the cleanup of the manhole is pending scheduling of UG crews and Tanker or Vactor truck.Update 3-25-05 @ 05:25A Munro # 13615 reports that the cleanup is complete as of 05:25. 2 bags of ppe. 650 gallons

CONSOLIDATED EDISON (Continued) **S106866896**

of oil and water mixed removed by tanker. Double washed with slix and flushed. Tag # 38687 removed. Source of spill was a vactor truck that was on location previously. Cleanup crew and supervisor are listed in the event involved person screen.

Remarks: sprang leak on hydraulic hose. leak from vehicle recovered. manhole affected 60533

THESE 4 VAULTS HAVE SHEENS.... CLEANUP WITH ORIGINAL SPILL(V4090) ... ERT(PEREZ) ON LOCATION AND OKAYED SAME.8/28/99 I&A OS J. Gnall #19045 reports all vault floors were drained in total of approximately 1,000 gallons of water from Vaults 2917, 5481, 2852, and 4107 and oil-water mixture in V4090 by Astoria >49PPM tanker. Also, drained transformer in V4090 of approximately 200 gallons of oil by Astoria >49PPM tanker. Maximum capacity of transformer is 355 gallons in accordance with its nameplate data. Disconnected transformer for removal. Partial cleanup was completed using oil absorbant, oil aborbant pads, and oil absorbant pigs. All drains at the location were clogged upon arrival. Also put drain plug in drain of V4090. No sump pumps at location. Final cleanup pending transformer removal.From: Shah, DanSent: Sunday, August 29, 1999 22:16To: Radtke, Edward Jr.; Jones, Paula E.; First, Louis W. Jr.Cc: dl - Environmental Response Team; Cohen, Barry; Barry, MartinSubject: E2MIS 127463Good morning: We had a spill in Vault 4090, @ 279-93 Madison Avenue over the weekend. Number 9 received a call that the unit was smoking. Crews responded and found approximately 350 gallons of oil thought to be possibly cooking oil. The unit had a historical of 10 PPM PCBs. A sample was taken from the spilled oil and results came up as 432 PPM PCBs making this a 'one pound' release inside the vault. The clean up requirements are same as a >500 ppm spill because of the >1 lb. Release. This was confirmed with Barry Cohen. Please

VAULT 4090 (Continued) **S104507968**

check with Barry Cohen, EH&S if you need additional assistance.9/6/99 I&A OS L. Roman #27270 reports V4090 has cleanup complete. Powerwashed floor and walls twice with 760 bio-cleaner. Then completed powerwash twice more. Generated and removed 8 - 55gal >49PPM solid waste drums and 2 - 55gal >49PPM liguid waste drums. Waste was picked up by Astoria transportation from spill location. Cleanup was started at 08:30hrs and completed at 18:45hrs. Oil notification tag could not yet be removed due to the requirement of post cleaning grid samples. Final closeout of job is pending post cleanup grid samples. Also, I&A supervisor L. Roman reports there are no weep holes and therefore no migration of oil into nearby vaults. There was no oil in vaults 2917, 5481, 2852, 4107. This has also been confirmed by I&A OS J. Gnall who stated only water was in the nearby vaults and he drained sameon 8/28/99.9/12/99I&A OS L. Roman #27270 reports ERT representative Wendell Fenner has been informed that there was no oil migration from spill into nearby vaults 2917, 5481, 2852, and 4107. ERT representative Wendell Fenner will meet I&A crew on location at 08:00AM on 9/13/99 for grid samples in vault 4090.On 10/7/99 a 2nd clean up was completed in vault 4090 at 1430hours. Wipe sample taken and returned indicating wipe samples are acceptable and clean up is completed based on these results. LSN 99-10614 dated 10/10/99 wipe sample 18 < 1.00 ug/100cm-2 wipe sample 19 2. ug/100cm-2 wipe sample 14 1ug/100cm-2 wipe sample 17 <1.00 ug/100 cm-2
Not reported

Remarks: cooking oil mixed w/ 400 gallons of water contained in the manhole - believed a restaurant may have been dumping their cooking oil in the manhole - they will clean up assuming 50-499 ppm pcb as soon as they get a tank to pick it up - samples for id & pcb's

DEC Memo:	05/01/13- Zhune spoke to Robert Hil from Rightway 718-855-7272. He said they cleaned the tank then after they performed a tank test. The tank falied the test. They sent the proposal to the owner to do the isolate test. If the owner approved the proposal they will test the lines (vent. fill, suction and return separetly and the tank itself. Plumber checked the lines and found the vent and fill are very old.06/18/13- Zhune spoke to Robert. He said they isolated the lines and found fill line failed the test. Riteway is fixing the line.
Remarks:	6000G #6 Oil tank was empty and failed tank test.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D009
Waste name: MERCURY

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL

METRO NORTH RR GRAND CENTRAL TERMINAL (Continued) **1000308878**

ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: B007
Waste name: B007

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	Building was being demolished to create an air vent for the East side MTA project. At approx 42 ft depth in bedrock cracks, they found a heavy petroleum product. Unknown where the source is. Area was isolated. Need to check spills database for surrounding buildings to see if this is a known spill. Mr. Stalzer will call back to discuss the case with Ryan Piper.Unknown source. Cleaned as best by contractor within scope of their work. Spill closed.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "FOLEY"e2mis 139001On 8/17/2001 @ 12:20 T. Coghlan # 01215 reported to me that while placing grounds for Feeder 4m86 he found 1/2 pint of oil on the side of Transformer in V-0.There are no sewer / waterways affected, No private property is affected and no sewer connection as of Conduit plate # 25-i-1. The substance is an unknown oil and the source and cause of the spill is unknown. It was spilled on the concrete floor of the structure. No substantial cracks wereobserved in the structure. No initial cleanup action was taken and Environmental tag # 20732 was left in place.Update 8/18 @ 18:57B. Pettenato put a pressure test on unit and it failed @ 18:00. He put down Absorbent pads to ocntain the spill. The final cleanup will be pending Transformer removal. He took a new sample.Lab results for Lab sequence # 01-08346-001 that was taken from the side of the Unit before the Pressure test was taken.TOTAL PCB 88 PPM.Received lab results from from second sample taken, lab sequence # 01-08348-001. TOTAL PCB 10 ppm. Analysis indicates the presence of a substance similar to a dielectric fluid.For information purposes only -- this transformer was retrofilled on 12/15/98 and analyzed on 8/27/99 as containing 13 PPM PCBs.V0710 - UNIT WAS REPLACED ON 10/12/01 AND MADE AUTO 10/24/01.UPDATE: 9/09/02This manhole was cleaned as 50 to 499 ppm PCB’s. The signed over 50 cleanup checklist was received from Operating Supervisor, V. Mirance on 9/09/02.
Remarks:	CAUSE OF THE SPILL IS UNKNOWN.1/2 PINT WAS SPILLED

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in

MTA METRO NORTH RAILROAD (Continued) **1000366197**

regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Classification:	Conditionally Exempt Small Quantity Generator
Description:	Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Violation Status: No violations found

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Equipment Records:

G00 - Tank Secondary Containment - None
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
J02 - Dispenser - Suction Dispenser
L09 - Piping Leak Detection - Exempt Suction Piping
B00 - Tank External Protection - None
C01 - Pipe Location - Aboveground
H00 - Tank Leak Detection - None
F00 - Pipe External Protection - None
I04 - Overfill - Product Level Gauge (A/G)

Tank Location:	1
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/31/1952
Capacity Gallons:	4500
Tightness Test Method:	NN
Date Test:	Not reported
Next Test Date:	Not reported
Date Tank Closed:	Not reported
Register:	True
Modified By:	BVCAMPBE
Last Modified:	10/19/2011

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to

CROWLEY TAR PRODUCTS CO INC (Continued) **1000437089**

replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

GUARDIAN R E - 201 PARK AVENUE SOUTH (Continued) **1004759977**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "HINTON/SANGESLAND"9/18/2001 Sangesland spoke to Jim Simori (212-867-2120) He has a contractor who completed a "Closure Report" for the spill and he wanted to know what the correct process was to close the spill out. Sangesland told him to submit the report, color photos of the clean site along with a coverletter requesting that the spill be closed out.Overfill onto basement floor and vent line to sidewalk.10/26/2001 - Spill was reviewed and closed out by Michael Hinton (DEC region #9) while he spent 1 week in NYC helping after WTC incident.According to a copy of a work report prepared by Eastmond & Sons Boiler Repair Inc., on 1/4/01 Eastmond was called to the site by Stuyvesant Fuel. Tank had been overfilled. 30 to 40 gallons spilled on the sidewalk. Speedie Dry was laid on the sidewalk and then it was pressure washed. Water/oil was vaccumed up. Eastmond provided a waste manifest for everything removed. Eastmond also provided color photos of the sidewalk and basement to confirm the cleanup.
Remarks:	SUPERINTENDANT GAVE INACCURATE READING TO DRIVER. SUPER CLAIMED TANK WAS EMPTY AND TANK WAS NOT. EASTMAN ENROUTE TO CLEAN UP SPILL. PHOTOS AND CLEAN-UP REPORT SUBMITTED - SPILL CLEANED AND CLOSED - R. AUSTIN

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D011
Waste name: SILVER

Waste code: P001
Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste code: P042
Waste name: 1,2-BENZENEDIOL, 4-[1-HYDROXY-2-(METHYLAMINO)ETHYL]-, (R)-

Waste code: P075
Waste name: NICOTINE, & SALTS

Waste code: P081

CVS PHARMACY #7019 (Continued) **1000129701**

Waste name: NITROGLYCERINE (R)

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Tank Info:

Tank Number:	001
Tank Id:	23299
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

	A00 - Tank Internal Protection - None
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	J02 - Dispenser - Suction Dispenser
	L09 - Piping Leak Detection - Exempt Suction Piping
	C00 - Pipe Location - No Piping
	F00 - Pipe External Protection - None
	I04 - Overfill - Product Level Gauge (A/G)
	H00 - Tank Leak Detection - None
	B00 - Tank External Protection - None
	G03 - Tank Secondary Containment - Vault (w/o access)
Tank Location:	1
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

40TH ASSOC (Continued) **1000237481**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No

NEW YORK PUBLIC LIBRARY THE (Continued) **1010566583**

Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Historical Generators:
Date form received by agency: 11/06/2007
Facility name: NEW YORK PUBLIC LIBRARY THE
Classification: Small Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Description: Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

CON EDISON SERVICE BOX: 33781 (Continued) **1016143798**

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Not a generator, verified

Date form received by agency: 12/12/2002
Facility name: KOBRAND CORP
Classification: Small Quantity Generator

Violation Status: No violations found

FINDS:

Registry ID: 110014358701

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

HINES INTERESTS LTD PARTNERSHIP (Continued) **1004760529**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Description:	Handler: generates 100 kg or less of hazardous waste per calendar month, and accumulates 1000 kg or less of hazardous waste at any time; or generates 1 kg or less of acutely hazardous waste per calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates at any time: 1 kg or less of acutely hazardous waste; or 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Violation Status: No violations found

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of

ANDIN INTERNATIONAL (Continued) **1000255277**

Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN

CVS PHARMACY #7186 (Continued) **1015747287**

OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: P001
Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste code: P042
Waste name: 1,2-BENZENEDIOL, 4-[1-HYDROXY-2-(METHYLAMINO)ETHYL]-, (R)-

Waste code: P075
Waste name: NICOTINE, & SALTS

Waste code: P081
Waste name: NITROGLYCERINE (R)

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	02/08/06. Feroze, PBS case is #2-603524. TTF letter is sent to.Albert RosenbergRose & Berg Realty.131 west 35th Street, 7th FloorNew York, NY 10001.03/07/06 Feroze. Called Mr. Albert (212-981-6501), he informed that Eastman & sons 718-378-3000 is going to replace the fill line. They will test the tank after the replace work is done and will submit the documents to DEC soon.03/15/06. Spill is transferred from Feroze to Kumer Patel.03/29/06-Hiralkumar Patel. Spoke with Ms. Diania at Petroleum and she told me that petroleum tank did isolation test on Feb. 17 and found problems with fill line and vent line. they haven't done anything after that. REceived copy of tank test results from Alber Rosenberg from Rosenberg Realty, who is managing property.

32 WEST 39TH STREET (Continued) **S107523584**

test results shows the system passed in test. Eastmond has replaced fill pipe and vent line. Spoke with Mr. Rosenberg and asked him to send me copy of previous tank test results. Spoke with Issac at Eastmond and he told me that the fill line was leaking at flange as it was passing through solid concrete into the building. eastmond has replaced the fill line from this flange to curb and also replacecd the vent line. as per Isaac it was very little leak and there was no cotaminated soil. all cleaned up. no further action required.03/31/06-Hiralkumar Patel. REceived clear copies of work invoices from Albert. based on available information from owner and from Isaac from EAstmond, case is closed. NFA letter sent out to owner. faxed to owner and Eastmond.Albert RosenbergPh. (212) 981-6517FAX (212) 465-8122

Remarks: ABOVE LIQUID LEAK.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "DEMEO"12/22/2005 - Haggerty - Spoke with Albert Rosenberg from 32 West 39th Midtown Properties LLC (212-981-6517), current property manager, who would look for any records and call back01/04/2006 - Haggerty - spoke with Phil Fazon from Crown Leak Detection (516-375-5890) who originally called in spill due to a tank test failure. I inquired as to wether Crown Leak did follow up testing. Crown Leak never returned to re-test. He gave me the # for ABC Tank who tested tank after Crown Leak01/05/2006 - Haggerty - spoke with Robert form ABC Tank (718-272-2800), ABC was hired simply for a second opinion which again failed. 01/06/2006 - Haggerty - Tom Valentine from Albert Rosenberg's office called to tell me no retesting and no clean-up was ever performed. He will call (Sally Dewes) back when they contract an environmental companyPreviously assigned to M. Haggerty in Albany office.10/11/06 - Austin - Reassigned from Central Office staff to Piper, for follow up and closure - end10/17/06- DEC Piper left message at Rosenberg realty requesting callback. Refer to legal if no response. DEC Piper received call from Rosenberg. As per him there was a second sp[ill # at the property Sp# 0512893. It was also a tank test failure. Notes from DEC Patel "03/31/06-Hiralkumar Patel. REceived clear copies of work invoices from Albert. based on available information from owner and from Isaac from EAstmond, case is closed. NFA letter sent out to owner. faxed to owner and Eastmond."In light of this info, this spill is also closed.

DEC Memo:	04/25/95: CALLED HOWARD GREENBERG ON 04/25/95 TO FIND OUT IF ANY ACTION HAS BEEN TAKEN. HE WAS NOT AVAILABLE WILL CALL BACK. 10/10/95: This is additional information about material spilled from the translation of the old spill file: TANK TAKING ON WATER.ON JULY 8, 1996, Spoke to Carl Westerman, Properties & Facilities - Budget Rent-A -Car (708)955-7203There are two 4,000 gallon UST gasoline in service at the facility. Tanks were steel installed in 1985. Tanks were laid into a bedrock foundation and had apoured concrete incasement. The problem involved one of the tanks. One tank began taking on water (12") over a rainy envent. Upon cleaning and inspecting the tank they found a hole in the bottom of the tank the size of a quarter. The tank was repaired with a steel plate and was fiberglass coated. The piping systems were repalced with fiberglass due to potential corrosion problems. The tanks were then cathodically protected by upgrading, and a leak detection system was added. According to Mr. Westerman, there was no loss of product from the system, and the only source of problems was water entering the tank. There have apparenetly been no other indications of further leakage, or seepage into adjoining buildings. Mr. Westerman has photographs of the tank installation and documentaion on the cleanup which indicated that no product migrated back into the tank when it was emptied. See also Spill #9408906.On May 22, 2002, DEC Sigona received a call from Eric Meyn, Project Manager, American Environmental Assesment Corp, 188 LOng Island Avenue, Wyandanch, N.Y. 11798 (631)586-2000 called to request the abandon the tanks in-place. They have not filed an application to abandon the tanks in-place. Eric Meyn was not aware that there is a spill history or additional spill reports which have been reported. DEC Sigona requested a complete site investigation plan along with documentation on previous remedial actions to be forwarded to DEC Sigona for review. DEC Sigona will consult with DEC Tipple regarding See Spill Nos. 9914694 and 9408906.Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL"This spill case was reassigned from DEC (Sigona) to Rommel on3/28/05 - spill closed, refer to spill # 9914694 for additional info. - KST

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TANG"Received a letter from Daniel Gedal of Aqua Terra. Mr. Gedal has conducted a site inspection at 123 East 37th Street, New York, NY for the clean-up of the oil spill. According to Mr. Gedal's account, the oil has been cleaned up and the tank has been repaired. The spill appeared to be contained in the tank vault, and has been cleaned up. The inspection was done on April 1, 1996. Letter and pictures on file of KST.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND"2/26/2002 - Aprox 60 gal of gasoline was pushed out the top of a tank during a delivery. Delivery port is on the sidewalk, but the overfill spill occurred inside the building basement. Site has 6 - 550 gal steel tanks installed under the basement garage floor. Gasoline came up through the stick "Dip Ports" on 2 of the tanks. This gasoline flowed into a puddle on the garage floor, moved approx 30 ft into a floor drain. This floor drain system eventually deposited into a 2ft x 2ft drain "Trap" in the car wash room. Contactor says they don’t believe the gasoline went any further.Fire

HERTZ RENT A CAR (Continued) **U003390357**

Dept on scene, area was vacuumed and drysol cleaned. Basement area was closed off from use. Concern is gasoline vapors. on 2/26, Contractor vacuumed out sump, flushed all drain lines and vacuumed out again.Hertz called Cura Emergency Services (Matt Dupont - 972-488-2222 ext 233) Cura Emergency hired Castleton Environmental (Bill Jacobson - 973-652-7752) to handle cleanup.2/27/2002 Sangesland met NYFD Rep. Mike Reardon (718-999-2493) at the site and inspected the whole system.Hertz Branch Manager - Maxine Lawson-Adams 212-486-5060Hertz Regional Environmental Rep: Jim Weingardner 201-307-2421Apparently today the clean up is being organized by Tom Moritz of HMHTTC 908-558-0156 (cell 201-602-0306) Sangesland noted that the 6 tanks were installed in 1963, had been upgraded in 1998, but the Cathotic Protection system does not seem to have been operating. NYFD is requiring the tanks to be tested (last tested by Tanknology in Dec 2001 -Kenneth Gelor - 800-964-7311) -copy of this report is in the file. Apparently the leak detection (Veeder-Root) system was located in a back room where is was not normally visible.Sangesland spoke to Matt Dupont again from Cura Emergency. Cura will be providing the close out report documentation for this project. DEC requested:1) Detail & Photos of spill cleanup (drains/sump pit) and soil samples where appropriate (8270/8021)2) Discussion on changes to poor practices (not dipping a tank before filling, leaving the dip stick caps open on the tanks)3)Fix/Test mechanical systems(overfill alarm/cathotic protection)Move alarms into an area where they can been seen/heard4)Tank test results (tank was tested in Dec 2001, but may have been damaged during this event)4)Plan to remediate any soil contamination around and under the buried tanks. (This is probably the major portion of the work.)2/28/2002 - Matt Dupont requested written guidance, so Sangesland faxed/e-mailed a copy of this report with the notes listed above.Sangesland will be out of the office from March 3 thru March 19. Any questions during that time should be directed to DEC Spills Rep. Tim DeMeo (718-482-4634) - Remember to state the spill number (0111214). 3/21/2002 - Sangesland received a copy of an "Incident Report" from Matt Dupont at Cura Emergency Services. The report outlines all of the basic facts listed above. One new item is the fact that Cura and it’s subcontactor tried to dig out the contaminated soil near the buried tanks and were not able to get very much out because of underground piping and potential tank damage. The report does say that Cura will propose some method of addressing the contaminated soil issue.7/1/2002 - Sangesland received a report from Cura titled "Corrective Action Final Report". It once again repeats the information provided earlier, but does not address the size or scope of the problem in the soil around the tanks. This letter does request closure, but the DEC still requires information on the contamination around the tanks.7/8/2002 - Sangesland called Cura to find that Matt Dupont no longer works there. The project will be reassigned and someone from Cura should call back within the next few days to get more details about what additional work the DEC needs.7/8/2002 - "Ted" from Cura called back to say the contact for future work at this site will be: Sue Pinera 201-307-2547 at Hertz.7/9/2002 - Roland Costanzo of Hertz (673-465-6942) called to say that Dave Winslow of ATC had been hired to conduct an investigation of the soil around the buried tanks and would be forwarding a report on that subject to the DEC later this week.7/10/2002 - Sangesland reviewed a report submitted by Dave Winslow of ATC Associates (212-353-8280). The report shows that four

HERTZ RENT A CAR (Continued) **U003390357**

GeoProbe soil borings were taken on May 9, 2002 within 2 to 3 feet of the subject petroleum tanks. Borings were advanced to a depth of 16 ft (10 ft below the bottom of the tanks). All soil samples came back Non Detect for VOC's and SVOC's. No water samples were taken because of the inability to get a larger drill rig in the garage space. DEC is satisfied with the investigation and the results.Spill Closed.

DEC Region: 2
DER Facility ID: 301699
DEC Memo: Petroleum Tank Cleaners was called to the site to conduct a tank test. On arrival, the PTC Rep saw drysol on the floor with fresh oil leaking from the tank. No test was done, it was clear that the tank was leaking. PTC was hired by Lawrence Environmental (718-237-5125)TTF Letter was sent to:Stonehenge Mgt LLCJames Bush -Director Building OperationsRitz Plaza 235 West 48th st New York, NY 10036Phone 212 977 5000jbush@stonehengeny.com11/21/2005 A fax submittal was made by Lawrence Environmental Group ((718) 237-5125) on behalf of the property owner. The fax was sent to Steve Sangesland, but was forwarded on to Raphael Ketani, the case manager on this site.11/21/05 - Raphael Ketani. I received a FAX from Lawrence Environmental Group, LLC, regarding the site. The letter was dated 11/18/05 and stated that the manhole cover on the empty tank was replaced and that the tank and lines passed the pressure test. The letter also said that COMCO (the remediation company) could not conduct its work until the asbestos removal project in the boiler room was finished. Lawrence Environmental is waiting for an NYCDEP variance approval before it starts the investigation/cleanup work.12/21/05 - Raphael Ketani. I spoke to Peter Ellams, General Manager of Lawrence Environmental, regarding progress on the spill cleanup. He said that they got the variance for the asbestos from DEP and began the cleanup. He said a cleanup company, IER, cleaned out the #6 oil tank (about 3,000 gal. tank) and cleaned up the oil contaminated material on the tank room floor. The work ended last week. He said he will get me the cleanup report soon. 1/3/06 - Raphael Ketani. I talked to Mr. Ellams and asked him when I would receive the cleanup report. He said that the transit strike messed things up and they are still cleaning the site. I was told I will get the report within a week.6/20/06 - Raphael Ketani. I received a package of documentation regarding the removal of the 1500 gal. tank and the cleaning, testing and putting back into service of the 6000 gal. tank. Everything looked alright, except PBS case #2-601407 doesn't show the existence and then removal of the 1500 gal. tank. I called up Mr. Ellams of Lawrence Environmental Group, LLC (718) 237-5125 and told him to submit a revised PBS application as this was the last item I needed to close the case. He said he would.7/20/06 - Raphael Ketani. I talked to Mr. Ellams. He said he sent the owner the PBS application to sign. I told him I hadn't received anything. He said he would look into the matter and get me the form.8/11/06 - Raphael Ketani. I contacted Mr. Ellams regarding the revised PBS registration form. He said he thought this had been sent out some weeks ago. I told him I hadn't received it. He said he will get on it. 8/30/06 - Raphael Ketani. I tried to contact Mr. Ellams regarding the unregistered and removed1500 gal. tank (I checked the PBS today), but could only leave a message.9/8/06 - Raphael Ketani. Nick Lombardo of the PBS Unit brought me a copy of the revised PBS registration form and indicated via a Post-It that he is processing the change.Based upon receipt of the revised PBS registration form, the 11/18/05 letter from Lawrence Environmental Group stating that the tank passed after the repairs, and the package of documentation received on 6/20/06, I am closing the spill case.
Remarks: TANK HAD BEEN LEAKING. CLEAN UP IN PROCESS.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND"1/16/2002 - Sangesland spoke with John Kaub (212-715-4277) who is a facilities person at the Marriot Hotel. He said he noticed an oil smell this afternoon and looked in the containment room. There was a small spill of oil (about 2 gallons) coming out of a small hole near the bottom of the tank. Mr. Kaub called Petroleum Tank Cleaners.PTC responded and cleaned the 2 gallon spill and laid out speedie dry to absorb the continued drip. Marriot management is working out hiring someone to drain the tank ASAP and then they will determine if they repair or replace the tank.According to DEC PBS records, the tank holds #2 oil, is 15,000 gallons and was installed in 1978.

Spiller Company:	001
Contact Name:	VINNY LOVARI
Contact Phone:	(718) 708-3425
DEC Memo:	8/28/2006 Sangesland spoke to Vinny at Island Tank. He said they've been digging at the site for several days. Originally they thought it was just an isolated spill, but then they found an old #6 oil return line which had rotted under the garage floor. This line is now being removed. Work is moving slowly because they have to juggle cars being parked in the garage to make room to dig. So far they have removed 18 drums of #6 oil contaminated soil. By the end of this week they expect to be finished and to take end point samples.Vinny says they will send in a closure report with photos as soon as the endpoint sample results come back.9/19/06 - Raphael Ketani. I tried to contact Vincent Lovari of Island Tank (718) 967-9424, but could only leave a message. 10/16/06 - Raphael Ketani. I tried to contact Mr. Lovari, but got his assistant. I left a message requesting a copy of the analyticals for the soil. His assistant said that they were still laying pipe at the site.11/7/06 - Raphael Ketani. Mr. Lovari returned my call with a voice message. He said that they will move the drums on this thursday or friday and then take end-point samples on friday. He said they have to do things this way as the site is very tight.3/7/07 - Raphael Ketani. I tried to reach Vinny or his assistant, but could only leave a voice mail. 3/8/07 - Raphael Ketani. I spoke to Vinny of Island Tank (718) 708-3425. He said that 40 drums of soil have been removed so far from around the fill line and the return line. He said that it looks like the lines had been leaking for many years. Someone had even put a bucket with a pump under one leak in the fill line many years. He said that there still is some more soil to remove. Soil samples will start to be taken this friday. He said that it's a big mess at the site. 3/27/07 - Raphael Ketani. I received the update of work report for the site from Mr. Lovari. The report stated that the tank was relined, the 3 inch fill line was replaced, the 2 inch vent line was replaced, the suction/return line was replaced, a new vent alarm was installed, an overfill alarm was ordered, and a leak detection system will be installed.The report has soil manifests and sets of pictures of the work. End-point samples will be taken. The work is 75% completed, according to the report. A full report will be sent once all of the work is completed and the analyticals are received.5/9/07 - Raphael Ketani. I spoke to Vinny. He said that he is now doing the fill line.

APRT BUILDING (Continued) **S106972442**

He said that he will replace the line and then do soil samples.7/25/07 - Raphael Ketani. I spoke to Vinny. He said the project is still ongoing. He said that the fill line is very long under the garage and they couldn't do the job in "one shot." He said they did part of it and now have to wait for a truck to come with gravel. Then they will back fill and cement and then move over to do the other part. He said that the geologist and geoprobe are coming this friday to do the end-point samples. He doesn't think there is more soil to remove as he has already shipped out 40 drums of soil. He said they are also in the boiler room doing work. 10/17/07 - Raphael Ketani. I tried to reach Vinny, but could only leave a message. Vinny's wife called me back and said that there is a health emergency with Vinny's parents. She said that he will get back to me sometime later. 10/18/07 - Raphael Ketani. Vinny called me back. He said that the job is almost done. All he needs to do is take sidewall and bottom end point samples.12/3/07 - Raphael Ketani. I spoke to Vinny. He said that he finished installing the fill line. He believes the job will finish soon.1/31/08 - Raphael Ketani. I spoke to Vinny. He said that he is basically done. He said that DEC will get the paperwork next week.3/31/08 - Raphael Ketani. I tried to contact Vinny (cell (718) 708-3425/(718) 967-9424), but could only leave a message.4/4/08 - Raphael Ketani. Vinny called me back. He said that he had been out for awhile because he had family issues to deal with. He said that he had essentially completed the remediation report and that DEC should get it very soon. I told him that the DEC has been waiting for a long time for this report and that we're very anxious to get it. He said we'll get it soon.6/10/08 - Raphael Ketani. Sharif Rahman of the DEC Region 2 Spills Unit approached me and told me that he is working on a case for the same tank and fill line as concerns this case. He said his case is #0505707. Vinny never informed us that there were two Spills people involved in the same case. As Mr. Rahman has the older case, I am closing this spill case and referring it back to his case of #0505707.

DEC Memo:	Tank Test Failure - small spill - 4 gal out of tank wrap.Tank is being drained now, cleanup will be done today (5/28)8/9/10 - Sangesland spoke to Rene at Eastmond. He said the tank was not wrapped. It was in a vault structure with a cement lid. Tank was corroded on the bottom and leaked to the vault floor. Vault was tight with no cracks. Oil was absorbed into about 1 yard of sand in vault floor. Tank was cut out and removed. Oil sand was removed. Vault was cleaned. No leak beyond the vault structure.
Remarks:	3000 gal wrapped in concrete - approx 600 remains in the tank - spill of approx 4 gal outside tank. cleanup in progress

DEC Memo:	06/13/05-SR// Sharif sent a TTF letter to:JRD Management, 875 Mamaroneck Avenue, Mamaroneck, NY 1054310/24/05 - Raphael Ketani. The PBS case is #2-147249; 15,000 gal./#6 oil. There is no paperwork or tank test failure report for this spill. I will send an "old tank test failure letter" to the management company (Midboro, 148 West 37 Street, NY, 10018; ((212) 877-8500)and the apartment building company

RESIENTIAL BUILDING (Continued) **S106972012**

(132 East 35 Street, Inc., 132 East 35 Street, NY, 10016). 10/25/05 - Raphael Ketani. I received a call from Robert Grant, Director of Midboro, called me up to say that he has the repair report for the tank and the passing tank test report. I asked him to FAX it to me. He said he would. Mr. Grant FAXed me the passing tank test report. I am therefore, closing the case.

Remarks: DRY PORTION LEAK THAT NEEDS TO BE REPAIRED.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIPPLE"9/18/03 tipple conducted a site visit// fire in basement effecting boiler room, tank room,and adjacent basement rooms. PTC did the initial cleanup once the fire was but out by FDNY. Tipple informed Wembbly Management co that the oil impacted debris must be disposed of properly. The tank must be properly registered for replacement if that is the plan, there are three 275 gal tanks n the continuous basement(241-243 east 38th and 709-711 second ave. a corner building complex.) that must also be reflected on the registration. Tipple requested the company contracted to do the cleanup to call, the extent of the contamonation cannot be determined until the fire impacted debris is removed and cleanup is well underway.///7/7/04 tipple sent request,,2 wks to get info to DEC7/20/04 tipple was contacted by bld. mgr., they are assembling documentation, cleanup has been completed.7/23/04 documentation and pbs update recieved and reviewed//no further action
