Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRA NonGen / NLR:
Date form received by agency: 01/01/2007
Facility name: CROMWELL CLEANERS
Facility address: 2 E 167TH ST
BRONX, NY 10452
EPA ID: NYD981132335
Mailing address: E 167TH ST
BRONX, NY 10452
Contact: Not reported
Contact address: E 167TH ST
BRONX, NY 10452
Contact country: US
Contact telephone: Not reported
Contact email: Not reported
EPA Region: 02
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Owner/Operator Summary:
Owner/operator name: CHOI KWANG
Owner/operator address: 2 E 167TH ST
BRONX, NY 10452
Owner/operator country: US
Owner/operator telephone: (212) 992-0500
Legal status: Private
Owner/Operator Type: Operator
Owner/Op start date: Not reported
Owner/Op end date: Not reported

Owner/operator name: CHOI KWANG

Map ID	Site	Database(s)	EPA ID Number

CROMWELL CLEANERS (Continued) **1000303716**

Owner/operator address: 2 E 167TH ST
BRONX, NY 10452
Owner/operator country: US
Owner/operator telephone: (212) 992-0500
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: Not reported
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 01/01/2006
Site name: CROMWELL CLEANERS
Classification: Not a generator, verified

Date form received by agency: 04/17/1995
Site name: CROMWELL CLEANERS
Classification: Not a generator, verified

. Waste code: NONE
. Waste name: None

Date form received by agency: 12/08/1992
Site name: CROMWELL CLEANERS
Classification: Conditionally Exempt Small Quantity Generator

. Waste code: D000
. Waste name: Not Defined

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"161876. 11-Nov-2005 09:35hrs. Emergency #9 troubleshooter J. Aponte 15244 reports while inspecting dropped VS1538 for low voltage in the area he opened the network protector door which spilled approx. 1 gal of dielectric fluid from the main body into the structure. No smoke or fire is/was involved. No sewers, waterways or private property affected. Unit network door reclosed and unit left off line and stop tagged for I&A to follow up. Unit found on banks off system for replacement. Env. tag and sampling taking place. Location is sure access in front of a fire hydrant at 1172 Anderson Ave near 167th street). Env. tag 47762 placed in structure and chain of custody EE12223 tracking a pcb sample. C. Blaich 87348 11-Nov-2005 10:59hrs. Spill changed to reportable, feeder 2x21 will need to be taken out of service and transformer to be replaced. I&A investigated and reports oil leaking through secondary bushing and will go below min. Emergency #9 J. Aponte placed stop tag on unit. C. Blaich 87348 Dec. 9, 2005 A Basement Suction Line Failure letter was sent to Mr. Serajul Kahn 3128 Hull Ave Bronx, NY 10467 There appears to have been a leak from the oil suction line under the cement floor. An investigation (borings) is required to determine how large the spill under the floor is. The letter suggests the homeowner should call their homeowner’s insurance company. Closed. 12-23-05. see eDocs. GB "

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Reopened because A File Exists. 9/8/06 B.F. takes over as lead. 10/27/09 On 10/5/09, received tank closure report from Thomas H. Bosshard of Envirotrac on behalf of Verizon. Tank only failed test. Piping was reconfigured to an 8700 gallon AST. Samples taken around tank with some limitation due to the tank's location, which is a small courtyard. There isd also a drain on one side active product piping on the other. Four samples taken. Bedrock reached at aprroximately 6 feet. No water detected. No staining from petroleum observed. Some SVOC's exceeded RSCO's in Sample B-3: benzo(a)anthracene @ 520 ug/l (224 ug/l), benzo(a)pyrene @ 400 ug/l (61 ug/l), benzo(b)fluoranthene @ 570 ug/l (220 ug/l), and chrysene @ 510 ug/l (400 ug/l). bf"
- Remarks: "2K PETROTITE; -.077 TANK ONLY. TANK IN COURTYARD, MAY BE ABANDONED."

DEC Memo:	"1/2/08 Called Milie Lopez of Castle Oil. Spill caused by overfill at vent pipe. Verizon is scheduled to receive daily deliveries. Little fuel is used each day. They will change the delivery cycle from now on. Approximately 32 gallons was spilled from vent onto sidewalk. Spill is contained and being cleaned up by Castle Oil. Product is prevented from going into sewer drain. I requested to speak to somebody doing the clean up. She will have one of the crew members call me back. Antonio called me back (914)760-5766. There are approx. 4 - 5 gallons in the basement. Clean up is underway. Nothing went to sewer. H. Patel is on the way there. bf 01/03/08-Hiralkumar Patel. visited site. met crew from Castle oil. oil found on concrete sidewalk and concrete basement floor. no soil/sewer affected. based on site visit observations, case closed."
Remarks:	"caller feels that there is an overfill occuring; company has a scheduled fuel delivery and are not using up all the oil prior to deliverys causing overfill; has been contained; clean up in progress"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PBS #: 2-362476. as per PBS record, the site has one (1) 6,000 gal #6 oil AST in contact with soil, in-service, installed in Jan. 1939. 85 McClellan Street Owners, Inc. **property owner** c/o Skyline NY Management Solutions LLC. 141 Halstead Avenue Mamaroneck, NY 10543 Attn.: Nancy Rodriquez **property manager** PH. (914) 813-1900 Ext. 1956 email: nancyr@skylinenymgmt.com 10:56 AM:- spoke with Rob at Riteway. as part of fuel grade conversion, they cleaned out the tank and tested it prior to refilling. the tank system failed a test. techinician believes hole in bottom of the tank. the tank is sitting on floor. Riteway installed two (2) 275 gal temporary tanks and will send work

Map ID	Site	Database(s)	EPA ID Number

APT COMPLEX (Continued) **S117395187**

proposal for tank removal. Riteway was sub-contracted by Altas Welding. 11:13 AM:- sent TTF letter to Ms. Rodriquez requiring report submission by the end of 02/27/15. letter emailed to Ms. Rodriquez. case assigned to DEC Zhune (off-hour secondary). 2/13/15-David Chan from Riteway sent the following email dated 2/13/15. The property was performing a conversion. We pumped out and cleaned the tank. After the tank cleaning we tested the tank and it failed. We cannot find any evidence of spill upon initial inspection. We suspect that during the cleaning process we dislodged some old sludge that may have been plugging a hole. We immediately set up temporary tanks for the buildings heat and hot water. We just sent a proposal to the client to lift and inspect the tank bottom for evidence of a leak and to make any necessary repairs and or remediation if required. Once we get the contract back and begin work on the tank, we can send you pictures of the tank bottom and area and give you an update. 5/1/15-David Chan sent the following email. For 85 McClellan, it failed the tank test on 1/13/2015. We evacuated the tank and installed temporary tanks on the same day. We did this for Atlas Welding 718-293-3300. We did not perform any follow up work. 5/1/15-Zhune spoke to Jean from Atlas Welding. he said he will find out about the repairs and he will call me back. 8/26/15-Zhune spoke to Jean. He said I have to contact the owner. Skyline Management 914-222-5350 Maribell. 8/26/15- Zhune poke to Marabell. Marabell is requesting an email from the Department to send the documentation to the DEC. maribellm@skylinenymgmt.com 3/24/16-Cardinal Tank Corp. sent spill closure letter. The letter stated that a tightness test was performed on 6000 gsllon #6 oil aboveground fuel oil tank and the tank failed wit a dry leak. The tank was being tested due to chsnge in grade of fuel. The tank was emptied and temporary tank was set up. The tank was resting on concrete saddles, There was no evidence of oil leak. All fuel oil lines were aboveground with no evidence of oil leak. Since the tank was going to store # 4 oil in future the owner asked us to investigate the failed tank test. The tank was disconnected and raised off concrete saddles and floor. The tank bottom was ultra -sounded and found to be in poor condition. A new steel bottom was welded on tank. All fuel oil lines tested tight. The tank was retested and placed on steel saddles. the tank was reconnected to fuel oil lines and repainted. The existing walls and floor in tank room were epoxy painted. Base on the above information this spill is closed. "

Remarks: "might rebuild it, don't know"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE YK talked to Harvey Rottenberg form Unitex Uniform on 10/31/01. Told him to install temp. tank and pumpout old leaking tanks A.S.A.P. 10/31/2001 TIPPLE DISCUSSED SITE WITH FRANK COVELESKY, THE SITE ENGINEER. THE CORPORATE PE WILL BE ON SITE THURSDAY, IF IT IS POSSIBLE THE TANKS WILL BE ISLOATED AND RETESTED. IF ONE TANK PROVES TO BE SOUND, THE SITE WILL RUN THE OPERATION ON ONE TANK EMPTYING THE OTHER WHILE CONVERTING THE ENTIRE OPERATION TO GAS. REMEDIATION OF THE SPILL WILL OCCUR CONCURRENTLY WITH THE CONVERSION TO GAS. FRANK WILL KEEP DEC UPDATED. SEE SPILL 0101513 04/02/2002 MERRITT ENGINEERING HAS TAKEN OVER CLEANU, A PROPOSAL IS TO FOLLOW 2/1/05 site visit ..soil in exc. appears to be clean. 2/8/05 a third tank was revealed when a ramp to backfill was constructed 10/02/2003 SUBMITTAL FROM TYREE TO CONTINUE INVESTIGATION. The last site visit by Tipple revealed a minimum of one foot of #6 oil below concrete slab. The closure request from c. Stewart//Harbor Environmental photos revealed the one foot of #6 oil still there, stockpile of contaminated debris still stockpiled in parking lot. 4/7/04 THE LAST SITE VISIT IS SCHEDULED////PHOTO DOCUMENTATION AND ANALYTICALS WILL BE REQUIRED FROM THIS POINT ON. 6/24/04 Tipple updating/// document from Langen Eng. Unitex to raize building and dig out any residual contaminants////. 3/7/05 report reviewed, minor some exceedances, asphalt and coal found in excavation which could have caused those exceedances.. The site was excavated to below the water table at that location....NFA....MT// //////////////////////"
Remarks:	"CALLER STATES HE DISCOVERED 2 5000 GALLON UNDERGROUND TANK SHOWING EVIDENCE OF FAILURES AND ARE LEAKING - AT THIS TIME IT IS AN UNKNOWN AMOUNT OF LEAKAGE - CLEANUP COMPANY CONTACTED FOR THE JOB. SEE ALSO SPILL # 0101513."

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110008088470

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ENGELHARDT ECO Mike Bellow dispatched to site. ~~~~~~~~~~~~~~ E2MIS NOTES 121089 K SLEDGE BX I&A RPTS OIL/WATER MIX IN V1866 WYTH AV W/S 36' S/O E171 ST..APPROX 5 GAL OIL IN APPROX 15 GAL WATER..SPILL IS CONTAINED AND NO WATERWAYS/SEWERS AFFECTED...SAMPLE TAKEN..PENDING TAG...SUMP PUMP IS DISCONNECTED. CLEANUP PENDING SAMPLE RESULT AVAILABILITY. TAG NUMBER 20051 HUNG...DEP C HAAS ON LOCATION AT 1230 HRS..MEETING WITH R EATON...CONDUIT PLATE 19E4 INDICATES A SEWER CONNECTION. EATON ALSO STATES THAT HE NOTICED A HIGH WATER MARK ON THE WALL OF THE VAULT..INDICATING POSSIBLE LIQUID LOSS TO THE SEWER. 06-NOV-1998 15:35 HRS O.S. R.EATON REPORTED FROM THE LOCATION THAT NYS DEC INSPECTOR MIKE BELLO ARRIVED ON SITE AT 14:40 HRS. DEC BELLO INTERVIEWED EATON AND HIS CREW. HE INFORMED EATON THAT ADDITIONAL FORCES HAVE BEEN DISPATCHED TO THE SITE TO TAKE SAMPLES. AN OVER 50 TANKER IS IN ROUTE TO THE LOCATION FOR THE CLEANUP. CLEANUP WILL BE CONDUCTED AS 50-499 PPM. PLANS HAVE BEEN MADE TO REMOVE THE TRANSFORMER FROM THE STRUCTURE TOMORROW SO THAT A COMPLETE CLEANUP CAN BE PERFORMED. 15:39 HRS: EATON REPORTS THAT DEC ENVIRONMENTAL ENGR C.ENGELHARDT IS ON LOCATION. EH&S J.GRAHAM HAS BEEN NOTIFIED OF THIS INCIDENT. HE WILL REPORT TO THE LOCATION. 16:03 HRS: O.S. R.EATON REPORTED THAT UPON ADDITIONAL INVESTIGATION OF THE STRUCTURE, THEY FOUND THAT THE DISCHARGE PIPING FROM THE SUMP PUMP WAS NOT CONNECTED TO THE SEWER LINE. THIS INFORMATION WAS PASSED ONTO THE DEP AND DEC PERSONNEL ON LOCATION. DEC ENGELHARDT NOTED THAT THE WALLS/FLOOR OF THE STRUCTURE WILL HAVE TO BE INPSECTED ONCE THE CLEANUP IS DONE. 11/06/98 1813 HRS. RESULTS 1242 AROCLOR --- 5 PPM DEP C HASS REQUEST A SLUG SAMPLE TAKEN FROM STRUCTURE. ROY EDEN CALL TO LET US KNOW. DEP RECEIVED A HARD COPY OF TEST RESULTS 11/07/98 UPDATE BARRELS WERE PICK UP BUT TAG WAS LEFT IN PLACED. 09-NOV-1998 O.S. R.EATON CALLED WITH SOME ADDITIONAL DETAILS ASSOCIATED WITH THIS INCIDENT. EATON NOTED THAT THE DEP INSPECTOR BELLO EXPECTED A 1 TO 3

Map ID	Site	Database(s)	EPA ID Number

TRANFORMER VAULT #V1866 (Continued) **S103573992**

HR TURNAROUND ON THE SAMPLE RESULTS. DEC ENGELHARDT WANTED THE TOTAL NUMBER OF GALLONS LOST FROM THE TRANSFORMER. EATON CALCULATED THE TOTAL AMOUNT LOST TO BE 40 GALLONS. EATON LEFT A MESSAGE ON ENGELHARDT'S VOICE MAIL WITH THIS INFORMATION AT APPROX 10 AM THIS MORNING. ALSO, DEP BELLO WARNED EATON SEVERAL TIMES THAT HE WOULD ISSUE A COMMISIONER'S ORDER IF BELLO WASN'T SATISFIED WITH OUR RESPONSE EFFORTS. THIS ORDER CONSISTS OF FIVE ITEMS WHICH MUST BE COMPLIED WITH. EATON WILL SEND ME AN EMAIL ABOUT THE COMMISSIONER'S ORDER, AND WE'LL TRY TO GET MORE INFORMATION ON IT. 05-NOV-2004 10:47 From: Markert, Bruce Sent: Friday, October 22, 2004 7:41 AM To: Fischer, Lawrence Cc: McCabe, James; Hedeman, Walter Subject: RE: V-1866 (Wythe Place & E171 St) Larry, CINDE records indicate that V-1866 was replaced on 11/9/98. -----Original Message----- From: Fischer, Lawrence Sent: Friday, October 22, 2004 7:18 AM To: Markert, Bruce Cc: McCabe, James; Hedeman, Walter Subject: V-1866 (Wythe Place & E171 St) Bruce, This is an Oldie (06-Nov-1998) clean up that was sent to the DEC for closure but is missing a few items. Can you have your area look up in your files for the following information? 1- Was transformer removed/replaced on /or/about 11-Nov-1998 Just e-mail me your findings. Thanks, Larry Fischer 05-NOV-2004 10:54 Sample results Lab Sequence Number 98-12232 indicate 5 ppm PCB. 05-NOV-2004 10:55 EH&S Representative Chris Blaich inspected this structure and reports no oil present. The inspection indicates that the cleanup was correctly performed when this spill occured in 1998 and confirms that the transformer was replaced."

Remarks: "con ed ref #121089 - spill is contained"

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was SANGESLAND 5/2/2002 - Sangesland spoke with Joe Ostrowski of A.L.Eastmond. Joe says they were opening up the top of a tank to do a tank test and found a leak from the return line (line from boiler back to buried tank). The return line is being replaced, the area is being excavated and end point samples will be taken. Eastmond will prepare a closure report with end point sample results and color photos of the excavation. 6/13/2002 - Sangesland visited the site with Joe Ostrowski of Eastmond. The tank and associated piping has been removed. The area in the front courtyard between the two front doors has been dug up. There continues to be heavy contamination in the 10ft to 15 ft level. There was a pool of heavy black oil product at the base of the excavation. Sangesland requested Eastmond to bring in a structural engineer to determine exactly how close they could dig to the building. The pit also looks precarious in terms of collapse. Sangesland suggested that an appropriate bridge be constructed between the main walkway and the front door steps of the two doors. This will allow the safe expansion of the excavation while maintianing public access to the building. Once the bridge is in place, the additional excavation can be completed and the DEC will reinspect the site. 8/12/2002 - Eastmond submitted a request for

Map ID	Site	Database(s)	EPA ID Number

SPILL NUMBER 0201207 (Continued) **S106003250**

closure on this project. Included in this request was a summary of events that occured during late June 2002. On June 24, 2002 NYSDEC was informed that a collapse occurred at this worksite during additional excavation. One person was hurt. NYFD was on site and required the excavation to be filled immediately. NYSDEC Randy Austin was contacted and gave permission to backfill. Just prior to the collapes on 6/24, two soil end point samples were taken. These samples were tested 2 weeks later and showed no significant contamination. The age of the samples may have altered the test quality. A total of 92.5 drums of contaminated soil was removed from the site. (Manifests for this soil is in the file) On 8/6/2002 Eastmond provided an additional soil boring from the location and depth, just beyond the location of the last endpoint. Results from this sample showed no exceedences of VOC's (8021) and only very minor exceedences for Semi Volatile Compounds (8270). Based on the excavation completed and the final soil samples presented, the DEC will Close this spill out with: No Further Action Status "

Remarks: "they were on site uncovering a tank to do a test & they found the return line leaking - clean up in progress"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was RODRIGEUZ E2MIS 149552 30-July-2003 09:58 I&A Oper Superv. T.Guion 11930 reported while installing a new transformer at VS-502 discovered 4 gallons of oil and water mix. No smoke or fire is/was involved. No sewers, waterways, or private property affected. The source of the oil is unknown and a pcb and oil id sample is being taken and Env tag is being placed. 30-July-2003 11:17 Oper Superv T.Guion 11903 placed Env tag 29830 and sampled. Lab Sequence Number: 03-06272-001: Analysis indicates the presence of a substance similar to a dielectric fluid. Lab Sequence Number: 03-06271-001: Total PCB 8 ppm 31-July-2003 @ 00:33 hrs. Underground Environmental Mechanic Ed Henn, 14210 reports the tanker removed most of the water and they found dielectric fluid coming in from the sides of the sump. This location will not be cleaned within 24 hours due to this condition.

Map ID	Site	Database(s)	EPA ID Number

TM-502 (Continued) **S106016656**

Tag left in the manhole. Job to proceed on the next shift. 8/5/03 cleanup complete. Structure was double washed and rinsed. CFS tanker removed 100 gallons of non-hazardous liquid waste to be transported to Astoria WWTP. No solid waste in structure. Sump was sealed by Mr. Gafur and is no longer leaking in liquids. Cleanup complete. Source of oil unknown. ~~~~~~~~~~~~~~~~~~~~~~~~~ DEC Inspector notes: 2/11/04: Con Ed submitted spill for closure. Request denied, with following comments: E2mis report states that dielectirc fluid was leaking into the vault through the sump (assumed soil sump). The corrective action taken was to seal the sump. The source of oil outside the vault must be investigated. (JHO)"

Remarks: "ORIGINALLY REPORTED AS 4 GALLONS OF AN OIL AND WATER MIXTURE IN THE MANHOLE. SAMPLES WERE TAKEN. TESTS RESULTS INDICATE 8 PPM OF PCB'S. WHILE CLEANING UP THEY NOTICED THAT THE HOLE WAS CONTINUING TO FILL BACK UP THROUGH THE SUMP. CREWS ARE CONTINUING THE CLEAN OUT THE HOLE. ONCE IT'S CLEANED OUT THEY PROBABLY SEAL UP THE SUMP. CON EDISON REFERENCE NUMBER 149552."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MANHOLE #3377 (Continued) **S105141768**

KRIMGOLD Leaking fill line for 22-24 Elliot Place, Bronx. Transferred to Rommel for follow up. (JHO, 8/24/01) ~~~~~~~~~~~~~~~~~~~~~~~~~~~~ E2MIS 139060 21-Aug.-2001 @ 21:23 Hrs. Environmental Underground Operating Supervisor, Larry Fischer, #55784 reports 1 gallon unknown oil in manhole #3377 Elliott Pl. No water in manhole. Samples taken. Manhole to be cleaned pending test results. On December 11, 2001, the Spill Report Form remarks section says that the clean up was completed. Lab results collected on November 11, 2001 appear OK. J Peck closed this spill on November 7, 2005. 22-Aug.-2001 @ 03:46 Hrs. Lab. results as follows: Lab Sequence Number: 01-08430-001 Date Approved: 8/22/2001 PCB Analysis < 1.0 ppm 22-AUG-2001 12:30 Environmental Flush Mech. B Richard Amelio and Mech. B Edward Cedeno report clean up complete. 100 gallons liquid waste removed from manhole. Environmental Flush operating supervisor Charlie D'Alisera reports that oil is suspected to be entering manhole through walls. Possible 3rd party spill, pending sample results. Sample taken for Oil ID. 22-AUG-2001 17:41 ChemLab reports analysis indicates the presence of the cleaner only, no oil was present in the sample. 23-AUG-2001 06:55 Supervisor C. D'Alisera #48339 reports that this structure has cable that is saturated with oil. The Under Ground Electric Department will start the process of replacing this cable today. Upon completion Mr. D'Alisera will power wash this structure again. The Environmental tag will stay in place until we are satisfied. It appears to be a heavy #6 heating oil that has contaminated this structure. DESCRIPTION: MANHOLE M3377 - OILY GOO LOCATION: 24 ELLIOT PLACE,BRONX,NY Analysis indicates the presence of a mixture similar to a lubricating oil and a fuel oil 24-Aug-2001 07:00 Supervisor C. D'Alisera reports that oil is leaching into MH-3377. It appears to be fuel oil. The fuel line to 24 Elliott Place is right next to the structure. A Under Ground crew is working at this location today, and a supervisor will be available to meet with the state. 24-Aug-2001 09:00 ERT D. Shah #80479 notified the EH&S desk to call CIG with the new findings of oil in this structure. 09:10 spoke with C. D'Alisera to verify how much oil had leached into structure. He stated that oil is migrating through the service cable from 24 Eliot Place at a rate of a few drops minute. 09:47 CIG MCCARTHY 06416 NOTIFIED. 10:37 Jan O'Connel from the DEC is on location. 11:30 C. D'Alisera reports that Ms. O'Connel spoke with the Superintendent of the building, and Langsam Property services, which is the building Management Company. The building will have a plumber break the sidewalk on Monday, or Tuesday of next week. (08/27, or 08/28.) The building was told to notify Ms. O'Connel before the begin to break the sidewalk so a Rep from the DEC can witness the findings. The phone number for Langsam Property Service is (718) 518- 8000. This information is being given to the emergency desk to generate a B-Ticket to be referred to the law dept. 05-Sep-2001 18:00 Jane O'Connell DEC has turned this case over to another manager, please only involve her if this incident continues to impact con edison. 07-SEP-2001 11:00 Jennifer Rommell (Phone # (646) 739-2831) of the DEC contacted the environmental desk regarding contractor cleaning of contamination on exterior of Con Ed manhole 3377. Environmental Flush operating supervisor C. D'Alisera 48339 on route to location. ERT Dan Shah 80479 notified of DEC request. Clean up contractor Al Eastman Phone # (718) 378 7000 Contacts Rene or Joe. 11-DEC-2001 12:35 Environmental Flush Mech A. E. Henn 14210 and Mech B. N. McAllister 20363 report clean up complete @ 10:45. Third party completed clean up adjacent to manhole and new ducting and cable was installed.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

16 ELLIOT PL (Continued) **S103517579**

Obligado 5/13/14- Obligado - I received a forwarded message from Greg Menagio, requesting guidance on how to close out spill. I called back Greg. I recommended doint an inspection of the boiler pit area with PID and submission of a Closure Request letter. 6/16/14 - Obligado - I received a spill closure request. Enviroschience Consultants inspected the site. According to Enviroscience no significant areas of petroleum staining or spillage were identified in the boiler room vault, the boiler room, or the tank room. Additionaly according to the report, areas of the basement, boiler room, boiler room vault, and the tank room were screened using a PID. Based on this screening, no detectable levels of organic vapors were identified Photo graphs were provide of the sump in question and no significant petroleum impact was observed in the sump. This historic spill is closed."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY TRANSFERRED TO I. ISLAM 8/23/05- The site's soil and GW are under remediation by LiRo Engineers by excavating the two highly soil contaminated areas followed by bio-nutrient slurry application through injection wells in 2003.Reviewed the semi-annual monitoring report ending May/05. A pilot test results revealed infeasility of an SVE system application at the site to remediate the contaminated soil in between two excavated areas where excavation could not be done due to heavy underlying utility lines. Low level GW contamination persists in six of the nine on-site monitoring wells. Natural attenuation will continue and monitoring will be done on semi-annual basis. Soil samplings in between the earlier excavated areas are due during the next monitoring period via three borings (GP-15, 16 and 17). Filed the report in the eDoc folder.- II 3/09/06: This spill transferred from I. Islam. to Q. Abidi. 08/18/06: Trasnferred to SK. According to the URS Bi-monthly update report, during a November 10, 2005 meeting it was suggested that BioRem Product injections be considered as a remedial action. It is unknown if LiRo considered any design. URS sampled the GW on June 29, 2006 and will prepare a report with recommendations for further actions based on the results. - SK 10/27/06 Spill case transferred from S. Kraszewski to J. Maisonave. - JAM 1/29/07 On January 19, 2007, URS requested in an e-mail correspondence that additional contaminated soil be excavated in between areas previously excavated by LiRo (Areas 1 and 2). LiRo did not excavate the 10' by 12' area reportedly due to the presence of utilities (a water line). URS believes the area could be excavated carefully without damaging the water line. I sent an email today approving the additional excavation. - JAM 10/07/08 Reviewed the Excavation and Groundwater Sampling Results/Request for Spill Closure Report submitted by URS and dated September 12, 2008. Between June 23 and July 1, 2008, Franklyn and URS excavated approximately 53.52 tons of petroleum contaminated soil from an area measured approximately 17.5 feet by 11 feet and 10 feet deep. The excavation depth was modified during field work so as not to undermine the structural stability of the building. At a depth of 4 feet against the wall of the building a 45 degree slope was extended to a target depth of 10

Map ID	Site	Database(s)	EPA ID Number

NYC DEPT OF SANITATION - J SCHIAVONE (Continued) **1000140999**

feet. As a result approximately 10 cubic yards of soil were left in place. Farnklin applied 1,260 pounds of RegenOx to the exposed soil to address any residual contamination. End point soil samples were collected from the east wall, the west wall and the bottom. The north and south walls were not sampled because the excavation extended to the clean backfill from the LiRo excavations. Some residual soil contamination remains beneath the street to the east and the building to the west. Further excavation was not feasible. Groundwater samples were collected from all accessible monitoring wells. Only very minor dissolved phase contaminated was observed. URS report is uploaded to eDocs. Since all accessible contaminated soil was removed, the residual soil contamination is not affecting groundwater conditions, and there are no apparent exposure pathways, this spill case poses no threat to human health or the environment. This spill case was close and an NFA letter was issued on 10/07/08. - JAM"

Remarks: "UPON TANK REMOVAL SOIL CONTAMINATION WAS DISCOVERED-SOIL BEING REMOVED AT THIS TIME."

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL DEC Investigator Notes: EPA #NYP 004 039 376 for transport. Treating as 50-499ppm PCB. TM552 was sampled and are awiting results. Oil in bottom of vault. Orlando Negron checked sump. Vault has cable ducts as low as 2'. Oil level was reportedly just below minimum. Con Ed estimated 130gal oily water removed. 4-6hr turnaround requested on sample. Sampled before 3pm. e2MIS Notes: Discovered dielectric fluid in TM552 while locating a fault on feeder 2X08. Approx 100gal water and 50gal oil. Transformer in TM552 was split open. No sewers or waterways affected. Conduit plate 18-D-4 indicates no sewer connection. Cleanup 50-499ppm PCB. Update 7/14/99: Tanker crew at location were being shot at by wither a bee bee gun or 22 pistol. He immediately instructed his crew to leave location and called 46 PCT. Update 16:20hrs 7/14/99: Police and Fire Dpet on location. Tanker and Flush are also at location to complete clean up. Sample results returned 18ppm PCB. Complete tag pulled."
Remarks:	"TRANSFORMER SPLIT AND CAUSED SPILL. CLEANUP CREW ENROUTE. CON ED # 125793."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO Backpressure in fill line caused by in-line meter caused back-up of fuel in delivery hose causing release of approximately 5 gallons #4 oil to environment. Driver was taken to area hospital for injuries caused by above event. Injuries are reported to include skin, face and eyes. Remainder of petroleum impacted concrete and was cleaned by Castle Oil personnel. This backpressure problem had been previously identified and Castle will not make future deliveries to building until problem is repaired."
Remarks: "spill due to back pressure in the line....possible blockage in line...material spilled onto sidewalk and cleaned up."

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is

Map ID	Site	Database(s)	EPA ID Number

CROMWELL COLLISION & TOWING INC (Continued) **1016060027**

used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

FINDS:

Registry ID: 110019696783

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	"While doing construction of footings for a new school at the site, petroleum impacted soil and three 20,000 gallon, fuel-oil USTs were discovered in a concrete vault. The tanks were last used in the 1970s. During excavation for new building footings and a basement, from 9/11/97 through 12/2/97, 1,052 tons of petroleum impacted soil and fractured bedrock and 2,902 gallons of petroleum impacted groundwater were removed from the site and properly treated and disposed of. On October 21, 1997, Mark Tibbe of NYSDEC Region 2 stated that, once all impacted materials are removed from the site, a product recovery system would not be necessary."
Remarks:	"while doing construction at the above location it was discovered that the oil tank had leaked into the concrete vault. The tank was last used 25 years ago clean up is being done within the next 3 days. Mark Tibbe was on site for DEC today per caller"

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

US EPA Air Quality System (AQS) contains ambient air pollution data collected by EPA, State, Local, and Tribal air pollution control agencies from thousands of monitoring stations.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

AIR MINOR

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"12/13/13-Hiralkumr Patel. alternate addresses: 150 East 168th Street, 1246-1248 Grandview Place PBS #: 2-295450. as per PBS record, the site has one 5,000 gal #6 oil AST on saddles, installed in Jan. 1947. other spills #: 0108483, 0712115 spill # 0108483 was reported on 11/21/2001 as 5 gal #4 oil spilled onto building walls and sidewalk, during disconnecting delivery hose from the fill port. case closed. spill # 0712115 was reported on 02/17/2008 as 5 gal (as per spill remarks) #4 oil spilled onto sidewalk due to faulty connection to fill port. case closed. 1:48 PM:- left message for David at Eastmond. 1:49 PM:- spoke with Ms. Martinez, property manager. she mentioned that Eastmond suspects leak in one of the line. she confirmed that the tank is aboveground on saddles and there is no leak from tank itself. asked her to seal the fill port to prevent any misdelivery, until the tank system is fixed. also asked her to check for any leak in supply/return lines. 1235 Concourse Tenants Corp. **property owner** c/o Total Realty Associates **management company** 733 Yonkers Ave, Suite 103 Yonkers, NY 10704 Attn.: Milagros Martinez **property manager** Ph. (914) 964-0554 email: millie@totalrealtyassoc.com Volanco **building super** Ph. (917) 532-7624 1:56 PM:- left message for Volanco, building super. 2:01 PM:- received call from Volanco. he confirmed no leak from tank or supply/return lines. he stated that a leak is found in remote fill line, under the sidewalk. asked him to seal the fill port. 2:09 PM:-

Map ID	Site	Database(s)	EPA ID Number

TANK TEST FAIL (Continued) **S116156769**

sent TTF letter to Ms. Martinez. asked her to submit report by the end of 02/14/14. letter emailed to Ms. Martinez. 02/25/14-Hiralkumar Patel. 11:22 AM:- left message for Ms. Martinez. 02/28/14-Hiralkumar Patel. 1:39 PM:- received email from Neil Tomasetti of Eastmond. he mentioned that after replacing fill line, during retesting they found bad manhole flange and neck on tank. for repair, they had to the take tank out of service, but due to unpaid ECB violation, they could not get permit for temp tank. finally building management paid pending fines and temp tank should be installed by next week.
03/10/14-Hiralkumar Patel. 1:35 PM:- left message for David Vega at Eastmond. 1:38 PM:- sent email to Neil inquiring updates. email copied to Ms. Martinez. 3:23 PM:- received email from Neil. he stated that they are waiting for NYC DOB permit. he also mentioned that tank is being monitored daily and it is not leaking any oil.
05/13/14-Hiralkumar Patel. 9:27 AM:- spoke with Ms. Martinez and asked her to submit report. 11/13/14-Hiralkumar Patel. 12:17 PM:- sent email to Ms. Martinez (including copy of letter dated 12/13/13) and asked her to submit report by the end of 11/28/14.
11/25/14-Hiralkumar Patel. 2:57 PM:- received call from Israel from Millenium Tank. he inquired about documents needed for case closure. informed him that the department requires submission of report including cause of initial failure, actions taken to correct the problem, any petroleum release from the leak point, any cleanup needed and tank system test result after repairs are made. informed him that the report is due on 11/28/14. Israel Millenium Tank PH. (718) 685-2545 millenniumtankmaintenance@gmail.com 3:10 PM:- sent email to Millenium Tank including copy of letter dated 12/13/13.
11/26/14-Hiralkumar Patel. 10:41 AM:- received call from Israel. he mentioned that the tank system was tested last night and it failed again. Riteway is responding to pump out the tank today. asked Israel to report tank test failure. Israel mentioned that the tank is sitting on floor and all lines are aboveground except part of fill line that is under the sidewalk. he also mentioned that property owner is planning to remove the tank system. he will call back with further details. 11/28/14-Hiralkumar Patel. 12:53 PM:- received call from Israel. he mentioned that during isolation test, leak was found in vent line. tank and other lines passed the test. as owner decided to remove the tank, Israel will install temp tank to transfer remaining oil. asked him to call for inspection, once tank system is removed. a new spill report (# 1408816) received due to tank system test failure on 11/26/14. 12/18/14-Hiralkumar Patel. received tank test results, tank removal affidavit and some photographs from Millennium Tank Maintenance. tightness test result shows the empty tank system failed in dry portion on 11/26/14. on 11/28/14, the tank passed the test. as per the tank removal affidavit dated 12/15/14, the 5,000 gal tank and associated piping were removed. pictures show new concrete floor in former tank area. this document does not include following: - cause of tank system failure - condition of area around and underneath the tank, including condition of floor underneath the tank - report for spill cleanup along leaking fill line 3:27 PM:- spoke with Emily Holmstock at Millennium Tank Maintenance. asked her to submit document confirming cause of tank system failure, condition of area underneath the tank and report on cleanup of contaminated material from the leaking fill line.
12/19/14-Hiralkumar Patel. received email from Emily (at 4:11 PM on 12/18/14) including two pictures. she mentioned that a small leak was noted in the pipe. picture shows cement floor was underneath the tank

DEC Memo:	"11/28/2014 - Feng - Duty Desk. Talked to Emily Holmstock of Millennium Tank (718-685-2545, MillenniumTankMaintanance@gmail.com). They performed a tant test and the tank failed the test. The tank is located in the basement. It is an 5,000-gallon AST for #6 oil. They are on gas now. They are emptying the tank now and plan to remove the tank. No evidence, i.e. stain, of spill. The owner is: CO Total Realty Associate Incorporation Superb of the building: Polanco (917-532-7624) There is a spill 13-09105 for the same location and same tank test failure. Discussed with K. Patel. The tank failed the test a year ago and they had kept using the tank system for another year. DEC required the tank to be tested again and the tank failed again. The spill will be closed and consolidated/referred to the spill 13-09105. "

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 1/8/03 6000 GAL TANK ENCASED IN CONCRETE, NO SOIL SAMPLES TAKEN YET. ARAKHAN 1/15/03 TTF LETTER MAILED AND FAXED. 2/20/2003

Map ID	Site	Database(s)	EPA ID Number

1215 GRAND CONCOURSE (Continued) **S109372882**

TIPPLE RECIEVED REQUEST FOR EXTENSION WITH CONTRACTORS INFORMATION. CALLED CONTRACTOR REFERENCED ON EXTENSION REQUEST AND THEY HAD NOT BEEN RETAINED BY PROPERTY OWNER. TANK REGISTRATION EXPIRED, MR. PERSAD STATED THAT HE WOULD CONTACT ME WITHIN THE WEEK TO CONFIRM THAT THE PROPER WORK/ REGISTRATION WOULD BE ADDRESSED PROPERLY. 3/21/03 Tipple spoke with Mr.Persad, he stated that the registration was sent to the Albany office a few weeks ago, Mr. Wolf will be doing the work. 3/25/03 called JM Mechanical again. TTF letter choose one option and proceed with work. 4/30/03TIPPLE SPOKE WITH TOM LEDDE PROTEST, TANK CLEANED, INVESTIGATION/SOIL SAMPLES TO FOLLOW IN ORDER TO DETERMINE NEXT STEP / REMOVAL/ ABANDONMENT. 05/17/06: This spill is transferred from Mr. koon Tang to Q.Abidi. Called Mr. Abraham Wachsler of NYC Tank Testing at(718)731-7011, left message to call me back. -QA 5/24/06: Mr. Wachsler of NYC Tank Testing sent copy of tank test report, showing failure with leak below product level (wet portion). - QA 06/28/07: I visited Spill site to inspect the oil tank. -QA 6/7/06: Called Mr. Persaud, property owner, left message on machine. - QA 06/20/06: Contacted Kasar Persaud at (718)992-6997 he said spill is cleaned up. He said he will find out the report of the spill and he will send it to me. -QA 06/30/06: Contacted Kasar Persaud at (478)719-4324(c) he said that he will fax me clean up report as soon as possible. (406)568-2836 (H). -QA P&R Realty of NYC Inc 4422 Chuluota Road Orlando, FL 32820 07/13/06: Reviewed letter of Neil Tomasetti, Eastmond & sons and sent letter to responsible party Mr. Kaisar Parsaud to submit work plan. Filed letter in e-Doc. -QA 01/24/07: Called Mr. Dave Pelletier (JADE Environmental) at (914)882-6074 and talked about the work plan with the diagram He said that he will fax work plan with the diagram today. -QA 01/25/07: I have reviewed the proposal for limited subsurface investigation for this spill, dated January 18, 2007. Sent e-mail to Mr. Dave Pelletier (Jade Environmental). Install 1 Geoprobe boring/temporary well in the sidewalk on the west down-gradient side of the on site building adjacent to the former tank. Soil and groundwater sample will be collected to evaluate potential impacts to soil and groundwater. provide advance notification of when the field work will be done. -QA 02/21/07: Mr. Pelletier e-mailed me today that Mr. Kaiser Parsaud has never contacted him regarding work. I called to Mr. Kaiser Persaud at (478) 719-4324 (C) and left message to call me back. -QA 04/02/07: Called Mr. Kaiser Persaud at (478)719-4324 he said that new owner will take care of the spill. Called Consultant Mr. Dave Pelletier and left message to call me back. -QA 05/14/07: Received e-mail from Mr. Dave pelletier regarding spill that this week they are proceeding for work. -QA 06/21/07: Mr. Dave Pelletier (Project Engineer, Jade Environmental) sent a report on 06/12/07. In report he mentioned that on dated 06/21/07 Jade Environmental made a total of four soil borings through the sidewalk, the deepest reaching about 6 ft. below ground level. At all four borings rock was encountered within a few feet of grade which appeared to be Schists, the known bedrock formation in the area. They collected only one sample from the deepest boring at about 6 feet below grade for lab testing for volatiles organic compounds only. All volatiles compounds are not detected. I called Mr. Pelletier and said that I want to visit the site. He said that he will call the new owner Mr. Ari and then he will let me know. -QA 06/28/07: Ivisited Spill site and inspected tank room. The tank was new but theris odor inthe basement. there is staining was also on the floor, wall and roof too. Also inspected fill port, vent line and the new boring location. Boring is about 15

Map ID	Site	Database(s)	EPA ID Number

1215 GRAND CONCOURSE (Continued) **S109372882**

feet away from the basement. This spill need housekeeping. The spill will remain open till they clean the whole basement. After very good housekeeping spill site will be reinspected. Photos of spill site is in e-Doc. -QA 07/03/07: Talked to Mr. Ari at (718)234-3797 regarding housekeeping in the basement, he said that when cleaning will be done in the basement he will inform me for reinspection. -QA 07/05/07: Mr. Issac Mungra from Eastmond Company called me and said that he is going to start cleaning in the tank room and the baement on monday July 9, 2007. -QA 07/16/07: I reinspected the spill site, site is improved better than earlier. There is not any odor or smell of gasoline. But still there are spots of oil on the walls, roof and floor of the tank room and basement. Also received cleaning documents from Mr. Issac Mungra (Eastmond Company). 07/18/07: Called property owner Mr. Ari (Aron Sheiner) and advised to clean more to remove spots of oil from walls , roof and floor of the tank room and the basement to resolve the problem. -QA 10/02/07: Called Mr. Ari to remind regarding additional cleaning of the basement. He was not there left message to call me back regarding cleaning of the basement to resolve the problem. -QA 06/04/08 Spoke with David Pallatier (JADE Environmental) and told him that if site owner wants spill closed, a report must be prepared and submitted to DEC providing rationale for spill closure. I would look for some sampling to get current data. If data is alreay availbale I will review it if submitted. (VB) 06/16/08 Based on the 5/29/2007 report, June 12, 2007 and June 9, 2008 letters from Jade Ennvironmental, investigation revealed no evidence of subsurface contamination downgradient of the boiler room and futher that the building is sitting directly atop bedrock. Boiler room inspection conducted in 2008 revealed that the spill in the boiler room was cleaned as ordered by inspector Abidi and no longer represents a threat to human health and/or the environment. Based on these findings of these invesitgations and Jade Environmental's understanding of the incident, it is Jade Environmental's professional opinion that no further actions are warranted and the spill case shoul be closed. Spill is closed effective June 16, 2008. (VB) "

Remarks: "TANK TEST FAILURE AT ABOVE LOCATION. RECOMMEND UNCOVER/REPAIR/TETEST."

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL DEC INSPECTOR'S NOTES Called jim McCabe left message Final amount is 2gals. unknown oil according to Jim McCabe. CON ED E2MIS REPORT 3-21-01 20 gals. oil in V1394, no sump pump visible or sewer connection. NYCDEP rep. is on location and is requesting that we have a crew on location to keep the area safe unitl the lab results come back and the cleanup can begin. He slao indicated to me that a Comissioner's order willmost likely be issued fro this incident. 9:25 A commissioner order has not been issued. I&A crew is onlocation and will pressure test unit. 12:21 Cleanup is completed. Vault 1394 was double washed utilizing Bio-gen, 250 gals. of water and 2gal.s of oil were removed via a <50 tanker truck as non-hazardous waste. Tag was removed, I&A pressure tested unit and indicated that the unit passed the test.The unit's integrity demeed good at this time, Cleanup complete as of 3-21-01 12:21"
Remarks:	"SPILL IN VAULT WILL BE PICKED UP PENDING RESULTS CON EDISON REF #136024 "

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"01/14/15-Hiralkumar Patel. alternate address: 81-85 Mc Clellan Street, 1150-1164 Gerard Ave no other spills found. PBS #: 2-362476. as per PBS record, the site has one (1) 6,000 gal #6 oil AST in contact with soil, in-service, installed in Jan. 1939. 85 McClellan Street Owners, Inc. **property owner** c/o Skyline NY Management Solutions LLC. 141 Halstead Avenue Mamaroneck, NY 10543 Attn.: Nancy Rodriquez **property manager** PH. (914) 813-1900 Ext. 1956 email: nancyr@skylinenymgmt.com 10:56 AM:- spoke with Rob at Riteway. as part of fuel grade conversion, they cleaned out the tank and tested it prior to refilling. the tank system failed a test. techinician believes hole in bottom of the tank. the tank is sitting on floor. Riteway installed two (2) 275 gal temporary tanks and will send work proposal for tank removal. Riteway was sub-contracted by Altas Welding. 11:13 AM:- sent TTF letter to Ms. Rodriquez requiring report submission by the end of 02/27/15. letter emailed to Ms. Rodriquez. case assigned to DEC Zhune (off-hour secondary). 2/13/15-David Chan from Riteway sent the following email dated 2/13/15. The property was performing a conversion. We pumped out and cleaned the tank. After the tank cleaning we tested the tank and it failed. We cannot find any evidence of spill upon initial inspection. We suspect that during the cleaning process we dislodged some old sludge that may have been plugging a hole. We immediately set up temporary tanks for the buildings heat and hot water. We just sent a proposal to the client to lift and inspect the tank bottom for evidence of a leak and to make any necessary repairs and or remediation if required. Once we get the contract back and begin work on the tank, we can send you pictures of the tank bottom and area and give you an update. 5/1/15-David Chan sent the following email. For 85 McClellan, it failed the tank test on 1/13/2015. We evacuated the tank and installed temporary tanks on the same day. We did this for Atlas Welding 718-293-3300. We did not perform any follow up work. 5/1/15-Zhune spoke to Jean from Atlas Welding. he said he will find out about the repairs and he will call me back. 8/26/15-Zhune spoke to Jean. He said I have to contact the owner. Skyline Management 914-222-5350 Maribell. 8/26/15- Zhune poke to Marabell. Marabell is requesting an email from the Department to send the documentation to the DEC. maribellm@skylinenymgmt.com 3/24/16-Cardinal Tank Corp. sent spill closure letter. The letter stated that a tightness test was performed on 6000 gsllon #6 oil aboveground fuel oil tank and the tank failed wit a dry leak. The tank was being tested due to chsnge in grade of fuel. The tank was emptied and temporary tank was set up. The tank was resting on concrete saddles, There was no evidence of oil leak. All fuel oil lines were aboveground with no evidence of oil leak. Since the tank was going to store # 4 oil in future the owner asked us to investigate the failed tank test. The tank was disconnected and raised off concrete saddles and floor. The tank bottom was ultra -sounded and found to be in poor condition. A new steel bottom was welded on tank. All fuel oil lines tested tight. The tank was retested and placed on steel saddles. the tank was

Map ID	Site	Database(s)	EPA ID Number

APT COMPLEX (Continued) **S117395187**

reconnected to fuel oil lines and repainted. The existing walls and floor in tank room were epoxy painted. Base on the above information this spill is closed. "

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was AUSTIN 12/2/2002 - Sangesland on Desk Duty: Tracy Duran of Summit Transport (973-777-0404) says his company made a delivery on the morning of 12/1/2002. 24 hours later, the building super (718-645-4511) said there was oil on the floor (undefined how much oil and where specifically the oil was) Property manager is Charles Rosenwasser (718-645-4403). Property manager and oil company will work together to figure out who will do clean up. 2PM - Debra from property manager's office called back to say AB Environmental (631-567-6545) has been hired to do cleanup. Clean up crew was expected to arrive by 2:30PM. 12/3/2002 - (Randy Austin is assigned this site, but is out of the office today) Sangesland spoke with John Wade of AB Enviornmental. He says there was a spill outside around the fill port. There was also problems is both the tank room and the boiler room. Since the spill appears to be larger than originally discussed, a site vist was scheduled for 12:30 AM today - Jeff Vought will attend the site visit. 5/20/2003-Vought-Spoke with Summit and pictures and disposal manifest are being sent. Mark requested that NFA letter be sent to Mark Rosen Summit Transport. PO Box 56 Passaic, NJ 07055. Mark Rosen's number is 973-777-0404. 6/9/03 - AUSTIN - SPOKE WITH VOUGHT, WHO FORWARDED TO ME PHOTOS AND A NON-HAZ. MANIFEST SHOWING DISPOSAL OF 20 YDS OF MATERIAL - ACCORDING TO VOUGHT, NO FURTHER ACTION NECESSARY - CLOSE SPILL - END"
Remarks:	"some type of internal problem caused spill in the basement - management of the bldg is taking care of clean up"

EPA Waste Code Addendum

SECTION 4 - EPA WASTE CODES

There are no epa codes to report for this search area.

Section 5

Databases Searched and Update Dates

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/07/2016
Date Data Arrived at EDR: 04/05/2016
Date Made Active in Reports: 04/15/2016
Number of Days to Update: 10

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016
Date Data Arrived at EDR: 04/05/2016

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994
Number of Days to Update: 56

Data Release Frequency: No Update Planned

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 03/07/2016

Last EDR Contact: 04/05/2016
Next Scheduled EDR Contact: 08/01/2016
Data Release Frequency: Quarterly

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 03/07/2016
Date Data Arrived at EDR: 04/05/2016

Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/18/2014

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/04/2016

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

STATE AND LOCAL RECORDS

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR PROPRIETARY RECORDS

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
