

# Community Link

Community Link provides targeted services by creating a direct connection between community leaders and appropriate city agencies to identify and address persistent quality of life issues. The initiative aims to streamline communication and has created a central repository to record, address, monitor, and continually evaluate complex quality of life issues that require a multi-agency response. This Community Link initiative has been approved by the Mayor and is overseen by the Office of the First Deputy Mayor and Deputy Mayor of Public Safety.

The Community Link Team receives quality of life complaints directly from community leaders/representatives through the Department's Community Ambassadors. The team evaluates the complaints to see if it meets the following initiative condition criteria: (1) chronic and persistent despite previous efforts by the local Precincts; or (2) requires a multi-agency response.
