

Indicator 2: Neighborhood-Based Placements, Borough Summary

This indicator provides a measure of the foster care system's success at placing children in their own communities. This performance report focuses on placements of children from the borough of this report. This report uses community districts (CD) as a proxy for neighborhood. The best indicator of success at neighborhood-based placement is the rate at which children placed in regular¹ foster boarding homes (FBHs) are placed in their home CD. This report focuses on two perspectives: (1) level of care; and (2) sibling groups.

The first perspective, which is shown on this page, shows the rate at which children placed in regular FBHs are placed in their home CDs. It also considers placement into home CD for children placed in kinship care and placement into home borough for regular and specialized² FBH, kinship and congregate care placements.

* "CYTD" refers to running totals for the specified calendar year, through the end of MAR

¹ A regular FBH is a home that is licensed for one or more beds that are not specialized. A regular FBH may also be licensed for specialized beds.

² A specialized FBH is a home that is only licensed for beds that are specialized (i.e., special medical, HIV/AIDS, therapeutic or emergency.)

³ Total placements include children with incomplete address information. The % in-boro and in-CD placements are based only on children with complete address information

Indicator 2: Neighborhood-Based Placements, Borough Summary (cont.)

The second perspective, shown on this page, looks at intactness of sibling groups placed into foster care from the borough of this report. It considers placements of sibling groups that enter care on the same day and are joining other siblings in care; those who enter care with siblings and have no other siblings in care; and children who enter care alone and are joining siblings. The in-CD and in-borough rates are shown for those sibling groups that are fully intact (all siblings in the group are in one facility).

* "CYTD" refers to running totals for the specified calendar year, through the end of MAR

¹ A regular FBH is a home that is licensed for one or more beds that are not specialized. A regular FBH may also be licensed for specialized beds.

² A specialized FBH is a home that is only licensed for beds that are specialized (i.e., special medical, HIV/AIDS, therapeutic or emergency.)

³ Total placements include children with incomplete address information. The % in-boro and in-CD placements are based only on children with complete address information

Indicator 2: Neighborhood-Based Placements, Community District Summary (cont.)

The second perspective, shown on this page, looks at intactness of sibling groups placed into foster care from the CD and borough of this report. It considers placements of sibling groups that enter care on the same day and are joining other siblings in care; those who enter care with siblings and have no other siblings in care; and children who enter care alone and are joining siblings. The in-CD and in-borough rates are shown for those sibling groups that are fully intact (all siblings in the group are in one facility).

* "CYTD" refers to running totals for the specified calendar year, through the end of MAR

⁴ Fully intact refers to sibling groups in which all siblings are placed together in the same foster home or facility.

⁵ Partially intact refers to sibling groups of three or more in which some of the siblings are placed in the same foster home or facility and some are not.

⁶ Separated refers to sibling groups in which none of the children are placed in the same home or facility.
