

**Outcome 4:****Re-entries into Foster Care from Reunification & Adoption, Borough Summary**

This outcome provides a measure of the foster care system's success at achieving permanency for children discharged to their families. This performance report provides information on this outcome for children whose home borough was the borough of this report. It focuses on two perspectives: (1) discharges from; and (2) admissions into foster care. The top section focuses on what is perceived to be the best measure of Outcome 4: the rate at which children discharged to reunification<sup>1</sup> return to care within one year. This portion of the report also measures the rate of re-entry based on length of stay at time of discharge, comparing the re-entry rates of those discharged within 90 days of placement to the re-entry rates of those discharged after 90 days of care. The bottom section considers the total number of placements from home (admissions) and provides information on foster care history for those children.

\* "CYTD" refers to running totals for the specified calendar year, through the end of MAR

\*\*All discharge numbers are based on the number of children that were discharged for the displayed month, one year prior.

(e.g., for a column marked 'Jan 2000', discharge numbers reflect the number of children discharged in January of 1999)

<sup>1</sup> Reunification is defined as discharge to parent, relative or primary resource person.

<sup>2</sup> A spell is the time between foster care entry and discharge. A child's first spell is his/her first episode in foster care. Subsequent episodes in foster care are higher-order spells (2nd spell, 3rd spell and so on).

<sup>3</sup> Re-entry from reunification is defined as admissions whose previous discharge was to reunification.

<sup>4</sup> Currently the data to complete this analysis are unavailable.

**Outcome 4:****Re-entries into Foster Care from Reunification & Adoption, Community District Summary**

This outcome provides a measure of the foster care system's success at achieving permanency for children discharged to their families. This performance report provides information on this outcome for children whose home community district (CD) was the CD of this report. It focuses on two perspectives: (1) discharges from and; (2) admissions into foster care. The top section focuses on what is perceived to be the best measure of Outcome 4: measuring the rate at which children discharged to reunification return to care within one year. This portion of the report also measures the rate of re-entry based on length of stay at time of discharge, comparing the re-entry rates of those discharged within 90 days of placement to the re-entry rates of those discharged after 90 days of care. The bottom section considers the total number of placements from home (admissions) and provides information on foster care history for those children.

\* "CYTD" refers to running totals for the specified calendar year, through the end of MAR

\*\*All discharge numbers are based on the number of children that were discharged for the displayed month, one year prior. (e.g., for a column marked 'Jan 2000', discharge numbers reflect the number of children discharged in January of 1999)

<sup>1</sup> Reunification is defined as discharge to parent, relative or primary resource person.

<sup>2</sup> A spell is the time between foster care entry and discharge. A child's first spell is his/her first episode in foster care. Subsequent episodes in foster care are higher-order spells (2nd spell, 3rd spell and so on).

<sup>3</sup> Re-entry from reunification is defined as admissions whose previous discharge was to reunification.

<sup>4</sup> Currently the data to complete this analysis are unavailable.

**Outcome 4:****Re-entries into Foster Care from Reunification & Adoption, Community District Summary**

This outcome provides a measure of the foster care system's success at achieving permanency for children discharged to their families. This performance report provides information on this outcome for children whose home community district (CD) was the CD of this report. It focuses on two perspectives: (1) discharges from and; (2) admissions into foster care. The top section focuses on what is perceived to be the best measure of Outcome 4: measuring the rate at which children discharged to reunification return to care within one year. This portion of the report also measures the rate of re-entry based on length of stay at time of discharge, comparing the re-entry rates of those discharged within 90 days of placement to the re-entry rates of those discharged after 90 days of care. The bottom section considers the total number of placements from home (admissions) and provides information on foster care history for those children.

\* "CYTD" refers to running totals for the specified calendar year, through the end of MAR

\*\*All discharge numbers are based on the number of children that were discharged for the displayed month, one year prior. (e.g., for a column marked 'Jan 2000', discharge numbers reflect the number of children discharged in January of 1999)

<sup>1</sup> Reunification is defined as discharge to parent, relative or primary resource person.

<sup>2</sup> A spell is the time between foster care entry and discharge. A child's first spell is his/her first episode in foster care. Subsequent episodes in foster care are higher-order spells (2nd spell, 3rd spell and so on).

<sup>3</sup> Re-entry from reunification is defined as admissions whose previous discharge was to reunification.

<sup>4</sup> Currently the data to complete this analysis are unavailable.

**Outcome 4:****Re-entries into Foster Care from Reunification & Adoption, Community District Summary**

This outcome provides a measure of the foster care system's success at achieving permanency for children discharged to their families. This performance report provides information on this outcome for children whose home community district (CD) was the CD of this report. It focuses on two perspectives: (1) discharges from and; (2) admissions into foster care. The top section focuses on what is perceived to be the best measure of Outcome 4: measuring the rate at which children discharged to reunification return to care within one year. This portion of the report also measures the rate of re-entry based on length of stay at time of discharge, comparing the re-entry rates of those discharged within 90 days of placement to the re-entry rates of those discharged after 90 days of care. The bottom section considers the total number of placements from home (admissions) and provides information on foster care history for those children.
