

Outcome 6:**Increase Permanency For Adolescents, Borough**

This outcome provides measures of the foster care system's success at moving adolescents (children 12 years and older) from the borough of this report into permanent homes on a timely basis. This performance report focuses on three perspectives: 1) the status of adolescents placed in annual admissions cohorts;¹ 2) placements of adolescents; and 3) adolescents in care at a given point in time.

The first perspective, shown on this page and the second page of this report, looks at the status of adolescents placed in annual admissions cohorts. The best indicators of success at achieving increased permanency from this perspective are the percent discharged to reunification² and the percent discharged to adoption. This page provides information on adolescents admitted to their first spell³ in foster care and the next page considers cohorts of adolescents in their second or greater spells. For each year the number of adolescents placed in foster care and their age group at time of admission are provided. The remaining indicators in this report consider the status of these cohorts as of a set point in time following the end of each admission year. For those still in care, the most current Permanency Planning Goal (PPG)⁴ is provided. For adolescents that have been discharged, information on discharge destination and time in care are provided.

**Outcome 6:
Increase Permanency For Adolescents, Borough (continued)**

The second perspective, presents the number of placements of adolescents who were 12-13 years old, 14-15 years old and 16-17 years old when they entered foster care. It also provides the level of care of these placements and the percent that were second or greater spell. The best indicator of success from this perspective is the percent of adolescents placed in family settings (i.e. kinship and foster boarding homes).

Outcome 6: Increase Permanency For Adolescents, Borough (continued)

The third perspective presents the number of adolescents, 12-13, 14-15, 16-17 and greater than 17 years old in care in facilities managed by the borough of this report at a specified point in time. The counts shown are of the last day of each month listed. The most recent Permanency Planning Goals (PPGs) for the adolescents in care are also provided in this section. The critical indicator from this perspective is the percent in care with adoption and reunification PPGs.

¹ Annual adolescent admission cohort refers to the group of adolescents, 12 years and older at the time of placement, placed in foster care in a given year.

² Reunification is defined as discharge to parent, relative or primary resource person.

³ A spell is the time between foster care entry and discharge. A child's 1st spell is her/his 1st episode in foster care. Subsequent episodes in foster care are 2nd or greater spells.

⁴ Permanency Planning Goal (PPG) refers to a goal that must be specified for every child in foster care at all times.

Outcome 6:**Increase Permanency For Adolescents, Community District**

This outcome provides measures of the foster care system's success at moving adolescents (children 12 years and older) from the community district of this report into permanent homes on a timely basis. This performance report focuses on three perspectives: 1) the status of adolescents placed in annual admissions cohorts;¹ 2) placements of adolescents; and 3) adolescents in care at a given point in time.

The first perspective, shown on this page and the second page of this report, looks at the status of adolescents placed in annual admissions cohorts. The best indicators of success at achieving increased permanency from this perspective are the percent discharged to reunification² and the percent discharged to adoption. This page provides information on adolescents admitted to their first spell³ in foster care and the next page considers cohorts of adolescents in their second or greater spells. For each year the number of adolescents placed in foster care and their age group at time of admission are provided. The remaining indicators in this report consider the status of these cohorts as of a set point in time following the end of each admission year. For those still in care, the most current Permanency Planning Goal (PPG)⁴ is provided. For adolescents that have been discharged, information on discharge destination and time in care are provided.

**Outcome 6:
Increase Permanency For Adolescents, Community District (continued)**

The second perspective, presents the number of placements of adolescents who were 12-13 years old, 14-15 years old and 16-17 years old when they entered foster care. It also provides the level of care of these placements and the percent that were second or greater spell. The best indicator of success from this perspective is the percent of adolescents placed in family settings (i.e. kinship and foster boarding homes).

**Outcome 6:
Increase Permanency For Adolescents, Community District (continued)**

The third perspective presents the number of adolescents, 12-13, 14-15, 16-17 and greater than 17 years old in care at a specified point in time. The times shown are the last day of each month listed. The most recent Permanency Planning Goals (PPGs) for the adolescents in care are also provided in this section. The critical indicator from this perspective is the percent in care with adoption and reunification PPGs.

¹ Annual adolescent admission cohort refers to the group of adolescents, 12 years and older at the time of placement, placed in foster care in a given year.

² Reunification is defined as discharge to parent, relative or primary resource person.

³ A spell is the time between foster care entry and discharge. A child's 1st spell is her/his 1st episode in foster care. Subsequent episodes in foster care are 2nd or greater spells.

⁴ Permanency Planning Goal (PPG) refers to a goal that must be specified for every child in foster care at all times.

Outcome 6:**Increase Permanency For Adolescents, Community District**

This outcome provides measures of the foster care system's success at moving adolescents (children 12 years and older) from the community district of this report into permanent homes on a timely basis. This performance report focuses on three perspectives: 1) the status of adolescents placed in annual admissions cohorts;¹ 2) placements of adolescents; and 3) adolescents in care at a given point in time.

The first perspective, shown on this page and the second page of this report, looks at the status of adolescents placed in annual admissions cohorts. The best indicators of success at achieving increased permanency from this perspective are the percent discharged to reunification² and the percent discharged to adoption. This page provides information on adolescents admitted to their first spell³ in foster care and the next page considers cohorts of adolescents in their second or greater spells. For each year the number of adolescents placed in foster care and their age group at time of admission are provided. The remaining indicators in this report consider the status of these cohorts as of a set point in time following the end of each admission year. For those still in care, the most current Permanency Planning Goal (PPG)⁴ is provided. For adolescents that have been discharged, information on discharge destination and time in care are provided.

**Outcome 6:
Increase Permanency For Adolescents, Community District (continued)**

The second perspective, presents the number of placements of adolescents who were 12-13 years old, 14-15 years old and 16-17 years old when they entered foster care. It also provides the level of care of these placements and the percent that were second or greater spell. The best indicator of success from this perspective is the percent of adolescents placed in family settings (i.e. kinship and foster boarding homes).

* "CYTD" refers to running totals for the year, through the end of MAR

**Outcome 6:
Increase Permanency For Adolescents, Community District (continued)**

The third perspective presents the number of adolescents, 12-13, 14-15, 16-17 and greater than 17 years old in care at a specified point in time. The times shown are the last day of each month listed. The most recent Permanency Planning Goals (PPGs) for the adolescents in care are also provided in this section. The critical indicator from this perspective is the percent in care with adoption and reunification PPGs.

¹ Annual adolescent admission cohort refers to the group of adolescents, 12 years and older at the time of placement, placed in foster care in a given year.

² Reunification is defined as discharge to parent, relative or primary resource person.

³ A spell is the time between foster care entry and discharge. A child's 1st spell is her/his 1st episode in foster care. Subsequent episodes in foster care are 2nd or greater spells.

⁴ Permanency Planning Goal (PPG) refers to a goal that must be specified for every child in foster care at all times.
