

ADDENDUM #3

UNLOADER REQUEST FOR LICENSING PROPOSALS

(Questions received as of 10/1/08)

1. Section V, Evaluation Criteria, item 7, Unloading Zone Annual Operating Cost Estimate. We are required to provide annual operating cost estimate for electric, water, gas and sewage. Since there is no information available for how these costs will be measured (i.e., separate meter installed, vendor control for HVAC, charge for refrigeration units, etc.), please advise as to how we can estimate these expenses by year.

- a. There is a separate meter installed for the electric in the unloader area. There is no separate charge for the refrigeration units; however, the unloader is required to maintain the refrigeration units.
