New York City
Pedestrian Level of Service Study
Phase I

APRIL 2006

Michael R. Bloomberg, Mayor
City of New York

Amanda M. Burden, Director
NYC Department of City Planning
New York City
Pedestrian Level of Service Study
Phase I

April 2006

Michael R. Bloomberg, Mayor
City of New York

Amanda M. Burden, Director
NYC Department of City Planning
# TABLE OF CONTENTS

**EXECUTIVE SUMMARY**

1

**CHAPTER 1. INTRODUCTION**

- A. New York City and the Pedestrian 
  4
- B. Measuring Pedestrian Level of Service 
  5
- C. Goals and Objectives 
  6
- D. Report Overview 
  6

**CHAPTER 2. CURRENT HCM METHODOLOGY**

- A. Pedestrian LOS 
  9
- B. Vehicular LOS 
  11
- C. Pedestrian LOS and Vehicular LOS Comparison 
  13
- D. Pedestrian HCM LOS Strengths and Weaknesses 
  15

**CHAPTER 3. LITERATURE REVIEW**

- A. Introduction 
  23
- B. Analysis of Pedestrian Characteristics 
  24
  1. Personal Characteristics 
  24
  2. Trip Purpose and Expectations 
  24
  3. Behavior 
  24
  1. Usable Sidewalk Space and Obstacles 
  25
  2. Land Use / Amenities 
  26
- D. Analysis of Flow Characteristics 
  26
  1. Platooning 
  26
  2. Directional Flow 
  26
- E. Data Collection Techniques 
  27
  1. Direct Observation Methodologies 
  27
  2. Video Techniques 
  27
  3. Survey Methodologies 
  27
  4. Experimental vs. Non-Experimental Design 
  28
- F. Data Analysis and Simulation Models 
  28
  1. Regression Analysis / Modeling 
  28
  2. Microscopic Pedestrian Models 
  28
- G. Conclusion 
  29

**CHAPTER 4. METHODOLOGY DESIGN**

- A. Goals and Objectives 
  31
  1. Pedestrian Speeds, Counts, and Characteristics 
  32
  2. Impedance and Pedestrian Behavior 
  32
- B. Pedestrian Speeds, Counts, and Characteristics 
  33
  1. Survey Design 
  33
  2. Pedestrian Characteristics and Speed Data Collection 
  35
  3. Speed Walk 
  37
  4. Other Pedestrian Counts – Expository Database 
  38
- C. Impedance and Walking Behavior 
  40
1. Site Selection
2. Filming Preparation
3. Counts
4. Control Location
5. Video Processing
6. Data Collection – Pedestrian Characteristics and Speed
7. Obstacle Study
8. Street Furniture

CHAPTER 5. DATA SUMMARY AND ANALYSIS
A. Pedestrian Characteristics and Speed Data Collection
1. General Information
2. Analysis of Pedestrian Characteristic Frequencies
3. Analysis of Pedestrian Characteristics & Speed
B. Location Characteristics
1. Land Use
2. Location Characteristics and Speed
3. Speed by Time of Day
4. Location Characteristics and Impedance
5. Location Data and Pedestrian LOS
C. Others
1. Pedestrian Delay
2. Pedestrian Frictional Force
3. Seven-Day Vehicular and Pedestrian Count
4. Speed and Delay Walk

CHAPTER 6. FINDINGS AND FUTURE RESEARCH
A. Findings and Methodology Developments
1. Findings Based on the Literature Review
2. Pedestrian Impedance and Delay Findings
3. Shy Distance Findings
B. Future Research
1. Developing an Opposing Flow Methodology
2. Street Furniture Data Collection and Analysis
3. Conduct Additional Pedestrian Characteristics, Speeds, and Counts
5. Develop Pedestrian Impedance and Delay-based LOS
C. Phase II of Pedestrian LOS

REFERENCES

APPENDIX A. LITERATURE REVIEW SUMMARY
A. HCM Pedestrian LOS Design and Impact
B. Studies Recommending Changes in LOS Calculation
C. Pedestrian Case Studies
D. Pedestrian Simulation Models
E. Data Collection Methodology
New York City Pedestrian Level of Service Phase I
