# Executive Summary

The Combined Sewer Overflow Order on Consent (DEC Case # CO2-20000107-8) was entered into by the City of New York (City), the New York City Department of Environmental Protection (DEP) and the New York State Department of Environmental Conservation (DEC) on January 14, 2005. This Order on Consent was modified on April 14, 2008, September 3, 2009, and March 8, 2012 (collectively, the “Order”). Pursuant to Section IV, Paragraph A of the Order, the City shall submit quarterly status reports to DEC (Quarterly Reports). The Quarterly Reports shall describe the actions that have been taken toward achieving compliance with this Order during the past three-month period. This Quarterly Report sets forth the status of and progress made by DEP in complying with the milestones set forth in the Order between July 1, 2012 and September 30, 2012.

## Critical Events This Quarter

The following critical events occurred this quarter:

1. DEP certified completion of the following milestones. A copy of each Certification letter is provided in Appendix A:
   a. Newtown Creek Green Infrastructure Demonstration Project Engineering Report and Design Submittal, July 10, 2012 (Milestone VIII.L.1). Hutchinson River Green Infrastructure Demonstration Project Notice to Proceed, July 24, 2012 (Milestone XI.H.2);
   b. Jamaica Bay 26th Ward Wet Weather Stabilization Low Level Main Sewer Pumps Notice to Proceed, September 14, 2012 (Milestone XII.K.2);

2. DEC accepted DEP’s certifications of completion for the following milestones:
   a. Alley Creek CSO Retention Facility Construction Completion, September 25, 2012 (Milestone I.D.4);
   b. Newtown Creek Green Infrastructure Demonstration Project Engineering Report and Design Submittal, July 23, 2012 (Milestone VIII.L.1);
   c. Jamaica Tributaries Destratification Facility Construction Completion, July 23, 2012 (Milestone VI.E.4);
   d. Westchester Creek Pugsley Parallel Interceptor Initiation of Final Design, July 2, 2012 (Milestone IX.F.1);
   e. Hutchinson River Green Infrastructure Demonstration Project Notice to Proceed, July 25, 2012 (Milestone XI.H.2);
   f. Jamaica Bay 26th Ward Wet Weather Stabilization Low Level Main Sewer Pumps Notice to Proceed, September 26, 2012 (Milestone XII.K.2).

3. DEC acknowledged DEP’s June 29, 2012 Certification of Construction Completion for the Avenue V Pumping Station and Force Mains (Milestones VII.C.4 and D.4.) on July 2,
2012. DEP provided a Notice of Force Majeure related to the Con Ed lockout for the
Inner Harbor Gowanus Pumping Station and Flushing Tunnel on July 20, 2012
(Milestones III.F and III.G). An update to the Notice of Force Majeure and Modification
Request for the Bronx River Floatables Control Facility (Milestone X.C) was submitted
for the same reason on August 31, 2012. DEC affirmed the Con Ed Force Majeure for
both projects on September 21, 2012 and granted an extension to October 18, 2012 for
DEP to certify completion of the Bronx River Floatables Control Facility.

4. On July 23, 2012, DEC responded to DEP's Notice of Force Majeure regarding the June
11, 2012 tunnel leak for the Inner Harbor Gowanus Pumping Station and Flushing Tunnel
(Milestones III.F and III.G). DEP provided an update on September 6, 2012. DEC
affirmed the tunnel leak Force Majeure on September 21, 2012.

5. On September 14, 2012, DEP withdrew its Force Majeure claim related to contractor
selection for the Newtown Creek Enhanced Aeration in Lower English Kills (Milestone
VIII.H) because the issue had been resolved. However, DEP noted in that letter that a
USACE permit required to perform the work had not been received and that this may be a
force majeure event.

6. DEC issued a Notice of Permit Modification on August 10, 2012 revising the Paerdegat
Basin Permit Conditions. NYC Legal approved the Final Design Documents on July 12,
2012; the Invitation to Bid was advertised on July 25, 2012; the Bid Opening occurred on
August 29, 2012; and a Pre-Award Meeting with the Low Bidder was held on October
18, 2012.

7. DEP issued a Notice of Force Majeure and Modification Request for the PCM Milestones
associated with the Newtown Creek, Hutchinson River, and Jamaica Bay Green
Infrastructure Demonstration Projects on August 22, 2012 (Milestones VIII.L.4, XI.H.4,
and XII.J.4, respectively). DEC accepted the request and revised these Milestones on
September 6, 2012.

8. On September 26, 2012, DEC accepted DEP's funding redistribution proposal for the
Environmental Benefits Program established by Paragraph III.C of the Order.

9. DEC approved the annual report template for the Green Infrastructure Reporting
Requirements on July 2, 2012.

Major Actions This Quarter

DEP continued to make progress in the planning, design and construction of its CSO facilities
during this quarter, as documented in this report. As stipulated by the Order, DEP and DEC held
a Quarterly Progress Meeting on September 24, 2012 at the Bowery Bay WWTP to discuss
issues related to the Order and to review milestones met during the last quarter.

Table 1 presents the milestones that occurred this quarter. For each milestone listed in Table 1
below, either met or postponed, written notification was submitted by DEP to DEC. Table 2
presents milestones from the reporting quarter that are under consideration for potential
modification.
Major Actions Next Quarter

The following major actions are expected to occur from October 2012 through December 2012:
Hold the next Quarterly Progress Meeting between DEC and DEP on December 11, 2012.

2.0 Construction Contracts

The 2012 CSO Consent Order contains milestones and schedules governing the planning, design and construction of DEP’s Citywide CSO Program. Numerous CSO related facilities will be constructed to reduce combined sewage discharges to the receiving waters surrounding the City. The table below provides a list of construction contracts, identified in Appendix A of the Order, necessary to fulfill the requirements of the Order. This table identifies, by percentage, the estimated amount of construction that has been completed.

Note: Changes from the previous reporting period are shown in **bold**

(1) Percentage Construction Completion is tracked based on cost incurred.

(2) DEP certified Construction Completion and DEC has performed final inspection. **Formal acceptance was given by DEC on August 24, 2012.**

(3) Dredging NTP 3 years from effective date of permit; completion within 5 years of EDP.

(4) For escrow recovery; enforceable milestone is July 2020.

(5) Dredging NTP 2 years from effective date of permit (DEC and USACE); completion TBD per permits.
3.0 Detailed Description of Work Performed

3.1. Alley Creek CSO

The Alley Creek CSO Facilities Planning area includes approximately 1,975 acres within the Tallman Island Wastewater Treatment Plant (WWTP) service area that discharges to Alley Creek in northeastern Queens. The Consent Order projects are constructed under contracts ER-AC1 and AC2, which include the following items:

- A 5 MG CSO storage facility to capture discharges from Outfall TI-008 just south of Northern Boulevard on the west bank of Alley Creek
- A double-barrel outfall sewer and outfall structure
- Upgrading the Old Douglaston Pumping Station
- Rehabilitation of Outfall TI-008 and restoration of a 1.51-acre surrounding area
- Additional water mains, stormwater sewers, and combined sewers.

DEP Certified Construction Completion of the Alley Creek CSO Facility on June 27, 2011. The facility was certified as being operational as of March 11, 2011 and the certification of Construction Completion was accepted by DEC on September 25, 2012.

No Planning, Design, or Construction Work Performed During This Quarter.

3-1
3.2. **Inner Harbor CSO**

The Inner Harbor CSO Facility Planning area consists of the drainage areas of the North River, Newtown Creek, and Red Hook Wastewater Treatment Plants (WWTPs) and their associated sewers and pumping stations. The receiving waters of the study area include the Lower East River, Hudson River, Upper New York Bay, and Gowanus Canal and Bay. The Consent Order projects are constructed under contracts CSO-DRDG/DRG-GC and CSO-GCER, which include the following items:

- Environmental dredging in approximately 825 feet of the head end of Gowanus Canal to a final water depth of 3.0 feet below mean lower low water
- Gowanus Canal Pumping Station reconstruction to improve operational reliability and to redirect flow directly to the Columbia Street Interceptor via a new force main to be constructed within the Flushing Tunnel.
- Rehabilitation of the Gowanus Flushing Tunnel to eliminate shutdowns during low tide and many maintenance operations with the installation of a new pumping system with redundant, interchangeable pumps.

Gowanus Canal was added to the US EPA Superfund National Priorities List (NPL) on March 2, 2010. According to EPA, placing the Gowanus Canal on the list allows the Agency to further investigate contamination at the site and develop an approach to address the contamination.

**No Design Work Performed During This Quarter**

**Construction Work Performed During This Quarter**

- **Gowanus Canal – Rehabilitation of Flushing Tunnel and Reconstruction of Gowanus Pump Station**
  - The Interim Wastewater Pumping System continued operation.
  - Flushing Tunnel: Dewatering of the Flushing Tunnel continued this period to maintain water levels within the tunnel. Contractor completed installation of additional concrete invert.
  - Flushing Tunnel Building: Demolition of the existing slab and excavation of east side of the building for the new flushing tunnel pump intake chamber commenced during this period. The Contractor also installed additional support of excavation steel frames as excavation progresses.
  - Force Main: Removal of the force main and concrete cradle at the Tunnel west of the Exit Chamber was completed. Installation, testing and shotcrete encasement of the new 33-in FRPMP force main piping commenced during this period.
  - Wastewater Pumping Station: The installation of the 30-in ductile iron force main piping and valves within the pump station continues. Exterior and interior masonry walls were constructed during this period. The bridge crane and associated rails and beams were installed during this period. The precast roof planks at the Mezzanine and Roof levels
were installed and concrete masonry walls were constructed above to meet at the parapet wall at the Roof. The Plumbing Contractor also installed piping for water, roof drains and waste lines for the restrooms.

- **Service Building**: Concrete masonry work continued in the Service Building on exterior and interior walls including the installation of acoustical masonry units for the Generator Room. The single-ply roofing system was installed during this period. The E Contractor received Con Edison delivery of materials required for the construction of the Network Protection system. The Plumbing Contractor installed piping for roof drains, cold water and sump pump discharges from within the Con Edison Transformer Vault. The reinforced concrete splice chambers were constructed during this period. All concrete equipment pads were constructed.

**Anticipated Construction Activities for Next Quarter**

- **Gowanus Canal – Rehabilitation of Flushing Tunnel and Reconstruction of Gowanus Pump Station**
  - The Interim Wastewater Pumping System will continue operation.
  - Flushing Tunnel: Dewatering will continue
  - Flushing Tunnel Building: Complete excavation inside the building and construct new concrete intake structure for the Flushing Tunnel Pumping system.
  - Force Main: Complete installation and testing of 33-inch FRPMP force main pipe and encasement. Perform shotcrete and other masonry repairs to sections of the Flushing Tunnel.
  - Wastewater Pumping Station: Continue with the installation of force main piping inside the building. Continue masonry work. Installation of submersible concrete pump bases and slider brackets. Removal of existing Tide Gate No. 1 and installation of new Tide Gate No.1. Install roof drains and construct concrete parapet wall at Roof. Install single-ply roofing system.
  - Service Building: Complete installation and testing of roof. Complete all concrete masonry unit work. Install conduit, piping and ductwork at the first and second floors. Begin brick veneer and stone masonry work. Deliver and install Motor Control Centers, Switchgear and associated Electrical equipment. Deliver and install HVAC rooftop equipment as well as Control Room Air Conditioning Units. Construct roof slab and backfill at the Fuel Oil Tank vault.
  - Continue installation of Con Edison Network Protection equipment

3.3. **Paerdegat Basin CSO**

The Paerdegat Basin CSO Facility Planning area includes the portion of the Coney Island WWTP service area, associated sewers, and pumping stations that discharges to Paerdegat Basin in Brooklyn. The Consent Order projects are constructed under contracts CSO-5 and CSO-DRDG, which include the following items:

- The Paerdegat Basin CSO Retention Facility, located at the intersection of Flatlands and Ralph Avenues. The facility receives combined sewer overflows from outfalls CI-004, CI-005, and CI-006 serving approximately 6,000 acres of Brooklyn. The facility consists of a four bay underground storage tank and operations buildings. The stored CSO is pumped back to the Coney Island WWTP for treatment after each rain event.

- Environmental dredging in the head end of Paerdegat Basin to a final water depth of 3.0 feet below mean lower low water

**Design Work Performed During This Quarter**

- **Environmental Dredging**
  - DEC issued a Notice of Permit Modification on August 10, 2012 revising the Paerdegat Basin Permit Conditions.
  - NYC Legal approved the Final Design Documents on July 12, 2012; the Invitation to Bid was advertised on July 25, 2012; the Bid Opening occurred on August 29, 2012; and a Pre-Award Meeting with the Low Bidder was held on October 18, 2012.

**Construction Work Performed During This Quarter**

- **Phase III - Structures and Equipment**
  - All contract work was found to be substantially complete on August 5, 2011 with only change order work, minor punchlist work and warranty repairs remaining.
  - All contractors have continued turnover of final operation and maintenance (O&M) documents, as-built drawings and final copy working drawings.
  - The 5G contractor performed the following work: continued minor repairs in the Five Barrel Outfall structure; continued installation of the vehicle fueling station feeder-root and continued performing warranty work as necessary.
  - The 5E contractor continued performing banding, labeling and tagging and continued troubleshooting of the Electrical Power Monitoring Control System. Contractor also completed change order installation of emergency light fixtures.
  - The 5H contractor continued performing punch list work in the process buildings; and complete balancing in the Existing Pump Station. Contractor also completed installation of the Boiler Master Control Panel as well as commissioning of the same.
- The 5P contractor continued performing punch list throughout the Process Buildings. Contractor also completed installation of the change order emergency eyewash and installation of the hot water tank in the Pump Back Building.

- Environmental Dredging
  - Negotiating Construction Management Contract.

### Anticipated Design Activities for Next Quarter

- Environmental Dredging
  - Continue procurement process for environmental dredging construction contract.
  - Continue to respond to DEC Requests for Information on Final Design in order to obtain permit approval.

### Anticipated Construction Activities for Next Quarter

- Phase III - Superstructures and Equipment
  - All contractors will continue to turnover O&M Manuals, as-built drawings and final copy working drawings.
  - The 5G contractor will perform warranty work in the Process Buildings as needed; complete remaining work at the 5-Barrel and complete installation of vehicle fueling station and receive inspection from the FDNY.
  - The 5E contractor will finalize Electrical Power Monitoring Control System; continue performing punch list and warranty work in the Process Buildings as needed; finalize light pole foundations for tank roof and complete lightpole installation.
  - The 5H contractor will continue performing punch list and warranty work in the Process Buildings as needed; and complete balancing work in the Existing Pump Station.
  - The 5P contractor will complete all punch list documentation and perform warranty work in the Process Buildings as needed.

- Environmental Dredging
  - Advertise and Award construction contract.
  - Submit a Force Majeure for the environmental dredging of Paerdegat Basin Construction NTP related to the National Grid Oil Spill.

Changes from the previous reporting period are shown in **bold**
3.4. **Flushing Bay CSO**

The Flushing Bay CSO Facility Planning area includes the portions of the Tallman Island WWTP and the High Level Interceptor of the Bowery Bay WWTP drainage areas, associated sewers, and pumping stations that discharge to Flushing Bay and Flushing Creek in Queens. The Consent Order projects are constructed under contracts TI–WW-1, EE-DSGN-4, CS-FB-LLD, CS-FB-BWR, and CSO-DRDG, which respectively include the following items:

- Tallman Island Whitestone Interceptor
- Tallman Island Flushing Interceptor
- Diversion of low-lying sewers and raising of the weir at BB-R02
- Regulator Modifications
- Environmental dredging of Flushing Bay

**Design Work Performed During This Quarter**

- **Tallman Island Flushing Interceptor**
  - Contractor submitted proposal to DEP for performing diving inspection to determine the condition of the bottom and sides of the sewer. Inspection and cleaning protocol will be submitted to DEC for approval. Revised engineering report will be submitted by November 16, 2012 as required.

- **Divert Low-Lying Sewers/Raise Weir BB-R02**
  - The basis of design report (BODR) was reviewed and comments were incorporated. The Basis of Design Report was approved on July 18, 2012.
  - Preliminary Design was submitted on July 20, 2012. Design of the sewers and drop structures began.
  - Regulator modification drawings were prepared DEP began reviewing submittal.
  - A preliminary list of specifications was prepared.
  - The need for additional field surveys was identified during this period.

- **Regulator Modifications**
  - Met with NYCDOT & NYSDOT to discuss project needs.
  - Continued work on the BODR.

- **Environmental Dredging**
  - Continued field work (odor monitoring, noise, topographic survey, wetland delineation).
  - Continued work on environmental review and planned for development preparation of EAS and JAP.
- Received waiver from DEC for seasonal restrictions for both Winter Flounder and Striped Bass on May 10, 2012.

Construction Work Performed During This Quarter

- Tallman Island Whitestone Interceptor
  - Continued mobilization to Powell’s Cove Park and installed CM field trailer.
  - Completed Clearing, Grubbing and tree removal along alignment of new Whitestone Interceptor.
  - Installed and maintained erosion and sediment control measures in Wetland and adjacent areas.

Anticipated Design Activities for Next Quarter

- Tallman Island Flushing Interceptor
  - Developing an inspection protocol for diving inspection and submitting to DEC for review.
- Divert Low-Lying Sewers/Raise Weir BB-R02
  - Obtain approval of the BODR and begin final design phase of the project. Proceed to final design.
  - Conduct Environmental Borings.
  - Continue permitting.
  - Inspect nearby structures.
  - Start 90% design.
- Regulator Modifications
  - Complete & submit Basis of Design Report for approval by operating bureaus.
- Environmental Dredging
  - Submit Habitat Characterization Study for Winter Flounder and Striped Bass to DEC.
  - Conduct 30% Design Review and Scope Freeze Workshop.
  - Complete field work.
  - Continue work on and submit EAS and JAP.
  - Meet with DEC Staff to further discuss wetland impact/mitigation and capping approaches.
Anticipated Construction Activities for Next Quarter

- Tallman Island Whitestone Interceptor
  - Complete mobilization to Powell’s Cove Park
  - Complete dewatering system installation
  - Begin Demolition of Pier at 7th Avenue.
  - Begin construction of New Whitestone Interceptor in Powell’s Cove Park
  - Begin work for new connection chamber at Tallman Island WPCP

Changes from the previous reporting period are shown in **bold**
3.5. Jamaica Tributaries CSO

The Jamaica Tributaries CSO Facility Planning area includes the drainage area of the Jamaica WWTP and its associated sewers and pumping stations. The receiving waters of the study area are Bergen, Thurston, Shellbank, and Hawtree Basins, which are located along the eastern shore of Jamaica Bay on either side of JFK International Airport. The Consent Order projects are constructed under contracts CSO-JT-SB, CS-JA-BBS, and CS-JA-BWR, which include the following items, respectively:

♦ The Destratification Facility, a permanent diffused-air bubble mixing system at Shellbank Basin designed to eliminate temperature stratification during the summer season, which leads to poor water quality conditions in the basin, odors and marine life kills.

♦ A Parallel 48-inch sewer under the Belt Parkway to complement the existing 36-inch double barrel Belt Parkway crossing in the West interceptor.

♦ Bending Weirs at regulators J3 and J14 in the West Interceptor and J6 in the East interceptor drainage area.

Design Work Performed During This Quarter

- Parallel 48-inch Siphon/Interceptor
  - The Addendum to the Basis of Design Report (BODR) was approved, the project is proceeding with 30% design.

- Bending Weirs
  - The BODR was approved. The project is proceeding with 30% design.

Construction Work Performed During This Quarter

- Destratification Facility
  - DEC accepted the Certification of Construction Completion on July 23, 2012.

Anticipated Design Activities for Next Quarter

- Parallel 48-inch Siphon/Interceptor
  - Continue work on & complete 30% design.
  - Submit 30% design for review.

- Bending Weirs
  - Continue work on & complete 30% design.
  - Submit 30% design for review.

Changes from the previous reporting period are shown in **bold**
3.6. **Coney Island Creek CSO**

The Coney Island Creek CSO Facility Planning area includes the drainage area of CSO Outfall OH-021, approximately 2,900 acres within the Owls Head WWTP service area in Brooklyn. Outfall OH-021 discharges into Coney Island Creek approximately midway between its head end and the mouth. The Consent Order projects are constructed under contracts PS-79G, PS-79H, PS-79P, PS-79E, and PS-79F, which include the following items:

- Upgrade of Avenue V Pumping Station to increase the wet weather pumping capacity; and
- Construction of Avenue V Force Mains to provide additional conveyance to the increased pumping station capacity.

**Construction Work Performed During This Quarter**

- **Avenue V Pumping Station Upgrade**
  - Interim System: Completed the decommissioning of the temporary bypass system B and removed pumps, meters, piping, gate valves from the Wet Well Extension. Continued the pumping of raw sewage from the Wet Well by using the permanent system.
  - Main Building: Continued activities associated with the remaining Main Building terra cotta work and completed installation of coping stones and existing steel repairs at “water line”. Continued the work associated with Cast iron restoration including window frames, fascia and handrails restoration work in the Main Building. Commenced interior glazed tiles installation inside Main Building. Completed installation of granite stone at old Building entrance.
  - Completed the installation of Valve Room sump pump equipment and piping. Completed the installation of RPZ and associated pipe/valve for sprinkler system inside MER. Commenced the work associated with the installation of Garden Roofing System on top of MER roof.
  - Generator Building: Completed all work associated with the generator building. Miscellaneous punch list items to be completed.
  - Network Protection Structure: Completed all work associated with the NPS. Miscellaneous punch list items to be completed.
  - Site work: Continued construction of perimeter wall, yard pavement installation, curb/sidewalk and road base installation. Completed foundation installation for flag poles, installation of light pole bases, installation of yard hydrant, and installation of catch basins and basin connections for PS property.
  - Continue to maintain all installed equipment

- **New Force Mains**
  - Continued Punch List, landscape, and maintenance work.
Anticipated Construction Activities for Next Quarter

- Avenue V Pumping Station Upgrade
  - Complete all exterior restoration work, including terra cotta, garden roof, and associated yard and fence work.
  - Continue to install interior terra cotta tile and other miscellaneous architectural details
  - Complete all interior and exterior lighting work
  - Complete all HVAC work
  - Continue Main Building/Generator Building HVAC equipment maintenance
  - Commence installation of plumbing fixtures.
  - Continue operating and maintaining all installed equipment

- New Force Mains
  - Punch list activities.
  - Continue maintenance of installed landscaping.

Changes from the previous reporting period are shown in **bold**.
3.7. **Newtown Creek CSO**

The Newtown Creek CSO Facility Planning area includes the portions of the Newtown Creek WWTP and the Low Level Interceptor of the Bowery Bay WWTP drainage areas that discharge to Newtown Creek, English Kills, Dutch Kills, Whale Creek, Maspeth Creek and the East Branch along the Brooklyn-Queens border. The Consent Order projects are constructed under contracts CSO-NC-2, CSO-NC-3, CSO-NC-4, CS-NC-REG & FLO, GBNC15-05, which include the following items:

- Enhanced Aeration in the Lower English Kills
- Enhanced Aeration in East Branch and Upper Newtown Creek
- Enhanced Aeration in Dutch Kills and Lower Newtown Creek
- Bending Weirs / Floatables Control
- Green Infrastructure Demonstration project in the Newtown Creek watershed

Newtown Creek was added to the US EPA Superfund National Priorities List (NPL) on September 29, 2010. According to EPA, placing Newtown Creek on the list allows the Agency to further investigate contamination at the site and develop an approach to address the contamination.

**Design Work Performed During This Quarter**

- **Enhanced Aeration**
  - The US Army Corps of Engineer (USACE) is still reviewing our permit application for the Enhanced Aeration in Lower English Kills project. We have requested a meeting with USACE in an effort to understand their concerns so we may address them.
  - The Basis of Design Report (BODR) was approved for the Enhanced Aeration in East Branch and Portions of Newtown Creek Enhanced Aeration project. This project is now proceeding with 30% design.
  - Continued evaluation of the Borden Ave. Pump Station to be used as a potential site to house the aeration equipment for the Enhanced Aeration in Dutch Kills and Portions of Newtown Creek project.

- **Bending Weirs and Floatables Control**
  - The BODR was reviewed and comments were incorporated. Approval of the Final BODR is pending.

- **Green Infrastructure Demonstration Project in Newtown Creek Watershed**
  - Updates on the GI Demonstration Project are discussed in the Green Infrastructure Section of this report.

**Anticipated Design Activities for Next Quarter**

- Enhanced Aeration
- Meet with USACE & address their concerns for the individual permit required for the Enhanced Aeration in Lower English Kills project. Register the construction contract.

- Continue work on the 30% design for the Enhanced Aeration in East Branch and Portions of Newtown Creek project.

- Complete & submit BODR for approval for the Enhanced Aeration in Dutch Kills and Portions of Newtown Creek project.

- **Bending Weirs and Floatables Control**
  - Complete surveying, geotechnical and related work.
  - Complete 30% design.
  - Complete 30% design workshop.

- **Infrastructure Demonstration Project in Newtown Creek Watershed**
  - Updates on the GI Demonstration Project are discussed in the Green Infrastructure Section of this report.

3.8. Westchester Creek CSO

The Westchester Creek CSO Facility Planning area includes the portion of the Hunts Point WWTP drainage area, its associated sewers, and pumping stations that discharges to Westchester Creek and Pugsley Creek in the Bronx. The Consent Order projects are constructed under contracts CS-ER-WCM and CS-ER-WCP, which respectively include the following items:

- Modifications to CSO-29 and CSO-29A to increase conveyance to the WWTP and reduce discharges from Outfall HP-014
- Pugsley Creek Parallel Interceptor to increase conveyance to the WWTP and reduce discharges from Outfall HP-013

Design Work Performed During This Quarter

- Modifications to CSO-29 and 29A
  - Continued preparation of BODR
- Pugsley Creek Parallel Interceptor
  - The drainage plan amendment was finalized on June 26, 2012.

Anticipated Design Activities for Next Quarter

- Modifications to CSO-29 and 29A
  - Submittal and review of BODR.
  - Proceed with Design Activities.
- Pugsley Creek Parallel Interceptor
  - Commence topographic survey.
  - Continue with design activities.

3.9. **Bronx River CSO**

The Bronx River CSO Facility Planning area includes the portion of the Hunts Point WWTP service area, the associated sewers, and pumping stations that discharge to the Bronx River in the Bronx. The Consent Order project is constructed under contract ER-BR-1 which includes the following items:

- Floatables Control at the Bronx Zoo site (CSO-27)
- Floatables Control at the Bronx Park Avenue site (CSO-27A)
- Floatables Control at the Soundview Park site (CSO-13)
- Floatables Control at the West Farm Road site (CSO-28)
- Green Infrastructure Demonstration project in the Bronx River watershed

The green infrastructure demonstration project originally intended for the Bronx River CSO drainage area has been modified to take place in the Hutchinson River drainage area due to a lack of viable sites in the originally planned area. Updates on the GI Demonstration Project are discussed in the Green Infrastructure Section of this report.

**Construction Work Performed During This Quarter**

- Floatables Control at the Bronx Park Ave site (CSO-27A)
  - Installed access chamber steps railing and painted access chamber steps.
  - Completed installation of mechanical screens control panels and hydraulics.
  - Completed construction of new retaining wall.
  - Completed relocation of utilities (sewer lines).
  - Commence site restoration at Bronx Park Ave.
  - Article 16 granted on September 27, 2012.

- Floatables Control at the Soundview Park site (CSO-13)
  - Article 16 granted on May 8, 2012.

- Floatables Control at the West Farm Road site (CSO-28)
  - Article 16 granted on May 8, 2012.

- Floatables Control at the Bronx Zoo site (CSO-27)
  - Article 16 granted on May 8, 2012.

**Anticipated Construction Activities for Next Quarter**

- Floatables Control at the Bronx Park Ave site (CSO-27A)
  - Complete site restoration.

Other Issues

Changes from the previous reporting period are shown in **bold**
3.10. Hutchinson River CSO

The Hutchinson River CSO Facility Planning area includes the portion of the Hunts Point WWTP drainage area, its associated sewers, and pumping stations that discharges to the Hutchinson River in the Bronx. The Consent Order projects are being executed under contracts LTCP1, CSO-PLANYC, and GXHP-24-03 (DPR), which include the following items:

- Waste Load Allocation Field Sampling
- The Green Infrastructure Demonstration project that had originally been planned for the Bronx River drainage area, which will now be conducted in the Hutchinson River drainage area within subcatchment HP-024, per Modification Request submitted by DEP to DEC on March 30, 2012.

Planning Work Performed During This Quarter

- Waste Load Allocation Field Sampling
  - The Field Sampling and Analysis Plan (FSAP) was approved by DEC on May 15, 2012.
  - DEP initiated field sampling on May 22, 2012. A Certification letter was submitted to DEC on May 31, 2012. DEC accepted the Certification on June 1, 2012.
  - Two wet weather marsh outflow sampling events were performed on May 22, 2012 and June 6, 2012.
  - Two dry weather marsh outflow sampling event were performed on June 11, 2012 and July 11, 2012.
  - Three dry weather sampling at manholes were performed on September 12, 2012, September 21, 2012 and September 25, 2012.

Design Work Performed During This Quarter

- Hutchinson River Green Infrastructure Demonstration Project
  - Updates on the GI Demonstration Project are discussed in the Green Infrastructure Section of this report.

Anticipated Planning Activities for Next Quarter

- Waste Load Allocation Field Sampling
- Sampling program completed as of October 12, 2012 per the QA/QC team. Last sampling date was September 25, 2012.

**Anticipated Design Activities for Next Quarter**

- Hutchinson River Green Infrastructure Demonstration Project
  - Updates on the GI Demonstration Project are discussed in the Green Infrastructure Section of this report.

3.11. Jamaica Bay CSO

The Jamaica Bay CSO Facility Planning area includes the drainage areas of the 26th Ward, Coney Island, and Rockaway WWTPs and their associated sewers and pumping stations. The receiving waters of the study area include Fresh Creek, Hendrix Creek, Spring Creek, and the open waters of Jamaica Bay. The Consent Order projects are constructed under contracts CSO-DRG and CSO-GCER, which include the following items:

- Interim dredging of the head-end of Hendrix Creek
- Improving conveyance to the Rockaway WWTP
- 26th Ward High Level Storm Separation (HLSS)
- Demonstration
- 26th Ward Wet Weather Stabilization
- 26th Ward Green Infrastructure Demonstration Project

Design Work Performed During This Quarter

- 26th Ward Green Infrastructure Demonstration Project
  - Updates on the GI Demonstration Project are discussed in the Green Infrastructure Section of this report.
- 26th Ward Wet Weather Stabilization
  - DEP is finalizing the design contract with a new consultant. As such there will be a delay to the start of the design process and consequently the design completion date. DEP will soon be providing additional details in a modification request letter.

Construction Work Performed During This Quarter

- Hendrix Street Canal Dredging
  - Continued preparation of the first Post-Dredge Monitoring Report.
  - Complete ambient odor monitoring for the second Post Dredge Monitoring Report.

Anticipated Design Activities for Next Quarter

- 26th Ward Green Infrastructure Demonstration Project
  - Updates on the GI Demonstration Project are discussed in the Green Infrastructure Section of this report.

Anticipated Construction Activities for Next Quarter

- Hendrix Street Canal Dredging
  - Complete and submit first Post Dredge Monitoring Survey Report to the DEC.
  - Complete bathymetric survey and benthic field activities for the second Post Dredge Monitoring Report.

Changes from the previous reporting period are shown in **bold**
3.12. Environmental Benefits Projects

These projects were undertaken in connection with the settlement of an enforcement action taken by New York State and DEC for violations of New York State law and DEC regulations. The 2008 Modification to the CSO Consent Order requires not less than $4 million worth of DEP-funded Environmental Benefit Projects (EBPs) designed to abate CSOs and/or address wet weather water quality impacts from CSOs and to benefit the waters in and around New York City. The 2012 Modified Consent Order requires the extension of DEP’s existing Green Infrastructure Grant Program and a commitment to use no less than $3 million of EBP funds over the next three years to expand available grant funding for applicants. DEP will identify awarded projects with signed Funding Agreements to commit EBP funds toward before December 31 for each year of the three-year grant program (i.e., 2012, 2013 and 2014).

Work Performed During This Quarter

- 2012 Green Infrastructure Grant Program
  - Design and review of legal documents including restrictive covenants and funding agreements commenced for awarded projects; 60% design review completed for four projects and ongoing for two projects.
  - One recipient (Lefrak) opted out of grant program due to concerns about restrictive covenant; as a result, the total number of selected projects was reduced from 11 to 10 and; the current total value of grants awarded is $4.2 million ($3.2 million capital program and $1.0 million funded as EBP).

- Bronx River and Gowanus-Flushing EBP Grant Projects
  - Commence soil boring work in both the Bronx and Gowanus.
  - Legal review of contract transferred to Columbia from NYC Audubon was completed, and Columbia signed the contract.
  - Modular green roof trays are being grown.
  - Unisphere and RPA designs have been completed and put it out to bid.

- DEC US Forestry Service Grant
  - Gaia portion of grant completed.
  - Riverkeeper is working on finding another site.

Anticipated Activities for Next Quarter

- 2013 Green Infrastructure Grant Program
  - Announce opening of application period for the 2013 Green Infrastructure Grant Program cycle, which will make a total of $6 million (including $1 million in EBP funding) available for projects in combined sewer areas.
  - Hold a series of workshops to explain eligibility requirements, guide users through the online application and provide support in computing the stormwater calculations.
- DEP to submit an updated EBP Grant Plan that provides more detail on how the total $3 million will be committed over the three years and reflects any rollover amounts to be committed in the second and third years.

- 2012 Green Infrastructure Grant Program
  - Review and approve 60% Designs to be submitted for four remaining projects.
  - Review and approve Funding Agreements and execute Declarations of Restrictive Covenants, dependent on responsiveness of grant recipients, and forward to NYC’s Comptroller’s Office for contract registration.
  - Certify to DEC that Funding Agreements have been signed for select grant projects to be funded through EBP.
  - Submit an updated EBP Grant Plan to provide DEC with details on how the total $3 million will be committed over the three years.

- Bronx River and Gowanus-Flushing EBP Grant Projects
  - Install modular green roof trays in late summer 2012
  - Apply for DOB permit for green roofs
  - Continue to incorporate soil boring information into designs.

- DEC US Forestry Service Grant
  - USFS contracts almost completed, may have extension of time.

3.13. Green Infrastructure Program Implementation

This section of the quarterly report provides the status of green infrastructure program implementation required under the 2012 CSO Consent Order. The Order sets forth financial commitments, schedule and capture targets, and other requirements for the program to reduce runoff and CSO through the use of green infrastructure. Additionally, Appendix A of the 2012 CSO Consent Order contains completion milestones for three green infrastructure demonstration projects:

- Newtown Creek Green Infrastructure Demonstration Project
- Hutchinson River Green Infrastructure Demonstration Project
- Jamaica Bay Green Infrastructure Demonstration Project in 26th Ward Sewershed

This information is in addition to and complementary with the Environmental Benefits Projects described in the previous section.

Design and Construction Work Performed During This Quarter

- Green Infrastructure Program (Citywide)
  - Final standard ROW bioswale designs were signed on July 25, 2012 and updated August 3, 2012; final designs were subsequently forwarded to DEC, EFC and city agencies and posted on DEP’s website.
  - DPR advertised a survey and boring contract to on-call engineering firms for the Bronx River Watershed on September 27, 2012.
  - New York City Environmental Development Corporation (EDC) issued a limited request for proposals (RFP) to EDC Retainer Civil Engineers for the design work including borings/survey/permeability tests in the 26th Ward Sewershed on August 28, 2012; proposals were received on September 14, 2012 and are currently being negotiated with contractor.
  - As part of DEP’s 2011 Green Infrastructure Grant Program, two out of 12 grants projects awarded in 2011 started construction. Of these, Brooklyn Navy Yards is complete and Queens College is anticipated for completion in October. In addition, Bishop Loughlin (green roof) was registered during the third quarter of 2012; See also 2012 Grant Program information under Section 3.12 Environmental Benefits Program.
  - Design commenced for on-site work at NYCHA’s Edenwald Houses in Hutchinson River Watershed.

- Hutchinson River Green Infrastructure Demonstration Project (Demo Area 1)
  - Construction commenced on the ROW bioswales on September 13, 2012.
  - A Modification Request was submitted to DEC on August 22, 2012 to modify the due date for post-construction monitoring (PCM) reports for the Hutchinson River Watershed, 26th Ward Sewershed and Newtown Creek Watershed and change the report submittal to one consolidated report; the request was granted by DEC on September 6,
2012 and the modified milestone date for the submittal of one PCM report is August 2014.

- **Jamaica Bay Green Infrastructure Demonstration Project in 26th Ward Sewershed (Demo Area 2)**
  - Comments about other planned GI and surface cover changes were received from DEC on August 20, 2012. Responses to these comments will be submitted to DEC.
  - In a parallel effort, DEP incorporated NYCHA’s design comments and finalized 90% designs in September for on-site stormwater management system at Seth Low Houses.
  - DEP staff led a tour of the demonstration project area during construction for DEC staff on September 24, 2012.
  - A Modification Request was submitted to DEC on August 22, 2012 to modify the due date for post-construction monitoring (PCM) reports for the Hutchinson River Watershed, 26th Ward Sewershed and Newtown Creek Watershed and change the report submittal to one consolidated report; the request was granted by DEC on September 6, 2012 and the modified milestone date for the submittal of one PCM report is August 2014.

- **Newtown Creek Green Infrastructure Demonstration Project (Demo Area 3)**
  - Bid opening for the construction of the ROW bioswales occurred on July 12, 2012. Three bids were received and a low bidder was identified. Pre-award meetings and contract development are underway. An award letter was forwarded to J. Pizzirusso Landscaping Corporation on September 19, 2012, and the contract was subsequently finalized for submittal to Comptroller’s Office for registration.
  - Comments about the overall size of the demonstration area and other design parameters were received from DEC on July 24, 2012. Responses to these comments were submitted to DEC on August 30, 2012 and additional comments were received from DEC on September 7, 2012. Responses to these additional comments will be submitted to DEC as part of an Amended Engineering Report.
  - In a parallel effort, DEP incorporated NYCHA’s design comments and finalized 90% designs in September for on-site stormwater management system at Hope Gardens Houses.
  - A Modification Request was submitted to DEC on August 22, 2012 to modify the due date for post-construction monitoring (PCM) reports for the Hutchinson River Watershed, 26th Ward Sewershed and Newtown Creek Watershed and change the report submittal to one consolidated report; the request was granted by DEC on September 6, 2012 and the modified milestone date for the submittal of one PCM report is August 2014.

**Anticipated Design and Construction Activities for Next Quarter**

- **Green Infrastructure Program (Citywide)**
- Complete remaining borings/survey/permeability tests in Flushing Bay (Phase I) via DPR contract.
- Contractor to commence construction of bioswales and stormwater greenstreets in Flushing Bay (Phase I) under DPR contracts.
- Construction to commence for bioswales and stormwater greenstreets in Bronx River under DPR contracts.
- Design work including borings/survey/permeability tests anticipated to commence in the 26th Ward Sewershed under EDC contract.
- Finalize and register contracts for design services for Gowanus, Newtown Creek and Flushing Bay.
- Proceed with design of on-site work at NYCHA’s Edenwald Houses in Hutchinson River Watershed to finalize designs and bid package in first Quarter of 2013.

- **Hutchinson River Green Infrastructure Demonstration Project (Demo Area 1)**
  - Continue monitoring data collection related to wet weather flows.
  - Continue construction in anticipation of construction completion certification in second Quarter of 2013.

- **Jamaica Bay Green Infrastructure Demonstration Project in 26th Ward Sewershed (Demo Area 2)**
  - Complete construction and submit certification of construction completion by December 31, 2012.
  - Continue monitoring data collection related to wet weather flows.
  - In parallel effort, finalize 100% designs and contract documents for construction of on-site work at NYCHA Seth Low Houses through EDC on-call contract.

- **Newtown Creek Green Infrastructure Demonstration Project (Demo Area 3)**
  - Continue monitoring data collection related to wet weather flows.
  - Register contract and forward NTP to construction to J. Pizzirusso Landscaping Corporation; submit certification of NTP to DEC by October 31, 2012.
  - In parallel effort, finalize 100% designs and contract documents for construction of on-site work at NYCHA Hope Garden Houses through EDC on-call contract.

Changes from the previous reporting period are shown in bold. In addition, DEP is in the process of designing and constructing onsite installations that when combined with ROW installations will achieve the EPB funding requirements of Section III, Paragraph B of the Order.
4.0  Community Relations

During the Third Quarter of 2012, DEP completed several community relations-related tasks and provided several LTCP-related updates and education materials to the public. All tasks, efforts and updates are described in this Quarterly Report.

DEP’s public participation plan was released to the public on June 26, 2012 and describes the multipronged tools and activities DEP will utilize to inform and involve diverse stakeholders and the broader public throughout the LTCP process.

The purpose of the public participation plan is to create a framework for communicating with and soliciting input from interested stakeholders and the broader public on water quality and the challenges and opportunities for CSO controls. The public participation plan is designed to keep important stakeholder issues associated with the LTCP program before the public and ratepayers throughout the life of the program.

DEP will report quarterly to DEC on completed public participation activities outlined in the public participation plan as part of this and all future CSO Quarterly Reports. All updates to the Public Participation Plan implemented as a result of public comments received and quarterly reviews of public participation activities by DEC will be posted annually to DEP’s website.

LTCP Meetings

- July 19, 2012: SWIM Coalition Quarterly Meeting on GI Program (30 attendees)
- September 12, 2012: Queens Borough Cabinet Meeting; topics presented on included NYC’s CSO program, LTCP process and development schedule for Alley Creek and LTCP public participation plan (15 attendees)
- September 27, 2012: Green Infrastructure Steering Committee Meeting (17 attendees)
- September 29, 2012: Little Neck Bay Festival; DEP staffed a table and provided information on the Alley Creek LTCP schedule, NYC’s CSO program and LTCP process (50 attendees at DEP table)

LTCP Education and Outreach Activities

- On September 12, 2012, DEP presented the Alley Creek LTCP development schedule, background on NYC’s CSO program and the LTCP public participation plan to the Queens Borough President and Queens Community Board representatives. DEP provided Community Board representatives with the PowerPoint presentation on September 21, 2012, to be forwarded to their constituents.
- On September 29, 2012, DEP staffed a table at the Little Neck Bay Festival at the Alley Pond Environmental Center in Douglaston, Queens. DEP distributed an Alley Creek summary, an Alley Creek LTCP Kickoff notice and other LTCP-related educational materials to attendees.
- DEP’s LTCP Program website was updated several times during this quarter. A summary of the Citywide LTCP Kickoff Meeting was added to the website on August 6, 2012. In addition, an Alley Creek LTCP-specific page was added in September and includes a
meetings announcement section, educational handouts section and a link to the Alley Creek WWFP.

- DEP updated its Green Infrastructure Website with bioswale information in August.

**Planned Activities Not Conducted During This Quarter**

- DEP conducted all planned activities this quarter.

**Summary of Comments Received**

- A summary of comments received during the Second Quarter of 2012 was developed and reviewed by DEC and approved on August 6, 2012. DEP posted the summary to the LTCP Program website and emailed the summary to all meeting attendees on August 6, 2012. Comments received during the Second Quarter of 2012 were specific to the public participation process, CSO advisories, public access, water quality standards and ecological restoration.

- DEP received the following comment via email and provided the following responses:
  
  August 8, 2012: Would you be able to share the sign in sheet or at least a list of attendees with organizational affiliation?

  - DEP provided the list of organizational affiliations, as requested.
5.0  Key Personnel Changes

The table below provides key personnel as of the Second Quarter of 2012.

Received 9/26/12
7.0 Status of LTCP Development

According to the Order, the reporting on the progress of the Drainage Basin Specific Long Term Control Plan (LTCP) and Waterbody/Watershed Facility Plan (WWFP) development shall be included in the first and third quarterly reports of each calendar year beginning in the year 2005 and continuing until all Appendix A requirements have been completed and approved.

- The 2012 CSO Consent Order established dates for the submittal of all Long-Term Control Plans. The dates are specified below.
  - Alley Creek: June 2013
  - Coney Island Creek: June 2014
  - Hutchinson River: September 2014
  - Flushing Creek: December 2014
  - Bronx River: June 2015
  - Gowanus Canal: June 2015
  - Jamaica Tributaries and Bay: June 2016
  - Westchester Creek: June 2017
  - Newtown Creek: June 2017
  - Citywide: December 2017

- The following Waterbody/Watershed Facility Plans (WWFPs) were approved during the Second and Third Quarters of 2012: Newtown Creek: (June 21, 2012); Flushing Bay (May 4, 2012); Flushing Creek (May 4, 2012); and Westchester Creek (May 4, 2012).

- The Jamaica Bay and CSO Tributaries that was resubmitted on January 17, 2012 has not been approved as of the end of the Third Quarter of 2012.

- All remaining WWFPs have been previously approved.

Demonstration Project in Newtown Creek Watershed, 1. Submit
Engineering Report and Design
Certification of Completion

Dear Mr. DiMura:

In accordance with Paragraph III.F of the CSO Order this letter certifies compliance by the New York City Department of Environmental Protection with the above referenced milestone. Enclosed are the Engineering Report and Design for the Green Infrastructure Demonstration Project in the Newtown Creek Watershed, which are due July 31, 2012.

Please contact me at (718) 595-5045 if you have any questions regarding this submittal.

Sincerely,

Anthony Maracic, P.E.

Re: CSO Order on Consent DEC Case No. CO2-20110512-25, modification to CO2-20000107-8 (the “CSO Order”)
Appendix A, XI. Hutchinson River CSO, H. Green Infrastructure Demonstration Project in Hutchinson River Watershed, 2. Notice to Proceed to Construction
Certification of Completion

Dear Mr. DiMura:

In accordance with Paragraph III.F of the above referenced CSO Order, the New York City Department of Environmental Protection (“DEP”) hereby certifies compliance with milestone XI.H.2. Notice to Proceed to Construction (Order to Work) has been transmitted by the New York City Department of Parks and Recreation to the general contractor for work that includes the Green Infrastructure Demonstration Project (“Demo Project”) in the Hutchinson River watershed. The total contract amount of work attributable to the DEP’s Demo Project, specifically the construction of right-of-way bioswales, is approximately $300,000.

A copy of the Order to Work is attached.

Please contact me at (718) 595-5045 if you have any questions regarding this submittal.

Sincerely,

Anthony Maracic, P.E.

RE: ORDER TO WORK — FOR FURNISHING ALL LABOR, MATERIALS AND EQUIPMENT,
TOGETHER WITH ALL WORK INCIDENTALS THERETO, NECESSARY OR REQUIRED FOR THE
CONSTRUCTION OF GREENSTREETS DESIGNED FOR CAPTURING STORMWATER IN THE
BOROUGH OF THE BRONX, KNOWN AS CONTRACT # XG-212M, PIN: 8462012X000C03, (DEP Contract
# GXHP04-01/GXHP09-01)

Dear Gentleperson:

On May 14, 2012, the Agency awarded Contract XG-212M (the “Contract”) to Constar, Inc.
(hereinafter, “Contractor”).

On June 7, 2012, the New York City Comptroller registered the Contract and assigned it Comptroller’s
Contract 20121441566. Please pick up your copy of the registered Contract as soon as possible from the Office
of Contracts Administration located in Room 60 of the Olmsted Center, Flushing Meadows Corona Park,
Flushing, New York 11368.

This letter shall constitute the Agency’s Order to Work (“OTW”) for this Contract. Contractor is hereby
ordered to start work pursuant to this Contract on August 1, 2012, (hereinafter, the “OTW Date”).

The Term of this Contract is 365 calendar days and the Date of Completion is July 31, 2013.

This letter shall constitute all Department of Parks and Recreation (“DPR”) permits required for the Contract,
as awarded May 14, 2012.

YOU ARE REMINDED OF THE FOLLOWING:

1) Insurance Requirements: Within six (6) weeks of the OTW Date, the Agency requires the submission
of the originals and copies of all insurance policies required in accordance with Schedule A of the
Contract. All policies must name the City of New York and The Department of Parks and Recreation as
additional insured. Policies must be effective from the OTW Date listed through final acceptance and
completion of punch list work. Proof of valid insurance policies must be on file with the Agency by the
OTW Date and continue through the life of the Contract.
2) Contractor must submit a Progress Schedule to the Agency within ten (10) days of the OTW Date.

3) Subcontractor Approval
   a. Subcontractors shall perform no work unless and until approval has been granted in writing by the Agency;
   b. Unless the Agency has granted Contractor a pre-award waiver of, or the Contract is otherwise exempt from the M/WBE requirements set forth in Local Law 129 of 2005, Contractor shall, within thirty (30) days of the issuance of this OTW, submit a list of entities to which it intends to award subcontracts within the next twelve (12) months ("Subcontractor List[enclosed]).
      i. The Subcontractor List must include the following information for each subcontractor that the contractor intends to hire during the applicable twelve (12) month period
         1. The subcontractor name, address, EIN/SSN, contact numbers and e-mail;
         2. The type and estimated dollar value of, and general time frame for the work, that the contractor intends to award to the subcontractor; and
         3. Whether the subcontractor is acertified M/WBE.
      ii. If the Contract has a multi-year Contract Term, the Subcontractor List shall be updated and resubmitted on the anniversary of the registration date
   c. Submit the Contractor M/WBE Contractor Participation letter for all M/WBBlisted on the Subcontractor list (enclosed).
   d. All Subcontractor Lists should be sent to the attention of:
      Ms. Alicia H. Williams  
      D/M/WBE Program Manager  
      Olmsted Center, Room # 59 
      Flushing Meadows Corona Park  
      Flushing, NY 11368

4) Contractor shall notify Ms. Netty Compton, Director of Green Infrastructure as indicated below within at least forty-eight (48) hours before actual field operations begin to confirm the start of work
   Department of Parks & Recreation  
   Olmsted Center 
   Flushing, New York 11368  
   Telephone: (718) 760-6874

5) Prior to the start of construction, Contractor shall photograph the Project Site and forward Project Photographs to the Project Supervisor, identified above.

6) Permits: Contractor shall obtain and post at the Project Site any permits required by the Department of Buildings or other agency.

7) Variations in Unit Quantities: Contractor is hereby warned not to exceed the Engineer’s estimate of quantities without obtaining written approval to do so from the Agency.

8) Labor Law: Contractor must comply with the applicable Prevailing Wages laws, regulations, and requirements set forth in New York Labor Law § 220 et seq and the Contract. Contractor shall be liable for all costs incurred by the City in enforcing prevailing wage requirements, including the cost of an Order to Work Letter  
   Contract # XG-212M  
   June 14, 2012  
   Page 2 of 3
investigation conducted by or on behalf of the Agency or the Comptroller, where the City discovers a failure to pay prevailing wages by the Contractor or its Subcontractor(s). Violation of such laws may also subject Contractor to various administrative, civil and criminal penalties.

9) This Agency will not process Contractor's first partial payment until compliance with Contract requirements. Before submitting its first payment requisition, Contractor should review the Contract and confirm compliance with all Contract requirements or conditions, including but not limited to the following:

a. Insurance requirements listed above;
b. Contractor's delivery and Agency acceptance of Project and Anticipated Shop Drawing Submission Schedules and Contractor's lump sum breakdown;
c. Subcontractor Approval requirements indicated above;
d. Contractor's delivery of Pre-construction Project Photographs indicated above;
e. Contractor's delivery Agency acceptance of any Vehicle required by the Contract;
f. All required Construction Fence, Project Signage and Tree Protection installation is complete.

Sincerely,

[Signature]
