

PUBLIC MEETING #3

On the CSO Long Term Control Plans for the Hutchinson River and Westchester Creek

Wednesday, September 16, 2015

**Public School 071 Rosa E. Scala
3040 Roberts Avenue, Bronx, NY 10461
6:00pm to 8:00pm**

DEP will provide a brief presentation at 6:30pm.

When there are heavy rains and the sewer system has reached its capacity, a diluted mixture of rain water and sewage, also known as combined sewage, may overflow into local waterways as a combined sewer overflow (CSO). The New York City Department of Environmental Protection (DEP) is developing CSO Long Term Control Plans (LTCP) that will identify and evaluate alternatives to reduce the impact of CSOs in NYC's waterbodies and waterways. In 2014, DEP submitted LTCPs for Hutchinson River and Westchester Creek to the New York State Department of Environmental Protection (DEC) for its review. At this meeting, you will learn about these LTCPs and their proposed alternatives/projects.

How to Get Involved?

To RSVP, please email ltcp@dep.nyc.gov or call (718) 595-4148.

For more information on DEP's CSO program, please visit our LTCP Program website at www.nyc.gov/dep/ltcp or follow us on Facebook: www.Facebook.com/NYCWater.
