New York City Department of Environmental Protection and
Historical Perspectives, Inc. present

Flowing Waters, Passing Time: The Critical Role of Water in Prehistoric and Historic Westchester County

Join the New York City Department of Environmental Protection and Historical Perspectives for a special presentation about the new Catskill/Delaware Ultraviolet Light Disinfection Facility currently under construction in Eastview. Learn about the Native American use of the site and their artifacts uncovered during the construction (some will be on display for viewing) and the history and present-day New York City Water Supply System.

**October 18, 2012
7:00pm – 8:30 pm**
