

Green Infrastructure Grant Program Combined Sewer Area Reference Map

This map should be used for planning, guidance, and reference purposes only. All non City-owned properties in purple are eligible, but applicants must confirm with DEP's local sewer office that the property is in fact served by combined sewers. The most effective way to get this information is to go to the local sewer office in person with the address and Borough, Block and Lot (BBL) of the property and ask the staff to pull the records for the property. Be sure to make a copy of the Site or House Connection Proposal to submit with your application. Visit www.nyc.gov/dep for local sewer office information.

*Applications that propose projects within these priority areas receive additional points during the review process.

-  Eligible Combined Sewer Areas
-  Priority Combined Sewer Areas*
-  Ineligible Areas

DEP, as the administrative manager of the Green Infrastructure Grant Program, has the sole discretion to determine eligibility, award or retain funds, and make payments to grantees.
