

The NYC Green Infrastructure Plan

## Public Meeting at Pace University, Downtown Campus

Wednesday, February 2, 2011 at 6:30pm

6:30pm – 8:30pm

Please join the New York City Department of Environmental Protection (DEP) for a public meeting on the “NYC Green Infrastructure Plan.” The Plan, released on September 28, 2010, outlines how the City will use green infrastructure to improve the quality of NYC’s waterways by capturing and retaining stormwater to reduce sewer overflows. The meeting will provide an opportunity for the public to ask questions and make recommendations on the implementation of the plan, which can be viewed on DEP’s website at: [www.nyc.gov/dep/greeninfrastructure](http://www.nyc.gov/dep/greeninfrastructure).

This event is Co-Sponsored by Pace University’s Office of Government and Community Relations.
