

City of New York
DEPARTMENT OF ENVIRONMENTAL PROTECTION
Citywide Job Vacancy Notice

Civil Service Title: Environmental Engineer	Level: 02
Title Code No: 20618	Annual Salary: \$67,922 / \$78,110 - \$94,363
Office Title: Environmental Engineer	Work Location: 96-05 Horace Harding Expwy., Corona, NY
Division/Work Unit: Bureau of Wastewater Treatment/Division of Regulatory Planning/Wet Weather & Mandates Section	Number of Positions: 1
Hours/Shift: 35 Hours per Week/Day	Agency Tracking #: N/A

Job Description

The selected candidate will be responsible for planning, evaluations, and technical reviews associated with the Combined Sewer Overflows (CSO) and Municipal Separate Storm Sewer System (MS4) programs. The candidate will be directly responsible for the review, development, and final submittal of the Citywide CSO Long Term Control Plans that will evaluate various grey and green alternatives to mitigating CSO and associated water quality impacts; and assist in preparing MS4 materials and conducting landside and water quality modeling associated with the Annual CSO Best Management Practices (BMP) Report as well as site specific modeling analysis on an as needed basis to assist operations or evaluate water quality impacts.

Qualification Requirements

A valid New York State Professional Engineer License and four years of full-time experience in environmental engineering. A master's degree in environmental engineering from an accredited college will be accepted as equivalent to one year of the full-time experience in environmental engineering. Current New York State registration as a Professional Engineer must be maintained for the duration of this employment.

The selected candidate must have at least one year within the last three years of experience as a major contributor or a project leader on a complex project requiring additional and specific expertise in the disciplines needed to design or construct the project.

Preferred Skills

The selected candidate should have three years or more of full time experience associated with combined sewer overflows and/or MS4 projects; experience with landside modeling such as InfoWorks, XP-SWMM, and Rainman. In addition, experience with water quality modeling and Geographical Information System (GIS) Software.
