LOCAL LAWS
OF
THE CITY OF NEW YORK
FOR THE YEAR 2003

No. 77

Introduced by Council Members Gerson, The Speaker (Council Member Miller), Clarke, Comrie, Jennings, Perkins, Yassky, Avella, Serrano, Koppell, Quinn, Seabrook, Katz, Breuer, Gennaro, Gioia, Gentile, De Blasio, Moskowitz, Liu, Baez, Lopez, Martinez, James, Weprin, Jackson and Nelson; also Council Members Boyland, Recchia Jr., McMahon and Vallone Jr.

A LOCAL LAW

To amend the administrative code of the city of New York, in relation to the use of ultra low sulfur diesel fuel and the best available technology by nonroad vehicles in city construction.

Be it enacted by the Council as follows:

Section 1. Declaration of Legislative Findings and Intent. The Council finds that diesel emissions, due in large part to their high concentrations of particulate matter, are associated with severe and multiple health risks to the citizens of New York City. Public health organizations, including the National Institute of Occupational Safety and Health, the World Health Organization, the United States Environmental Protection Agency (EPA), the California Environmental Protection Agency and the United States Department of Health and Human Services' National Toxicology Program, have associated diesel exhaust or diesel particulates with an increased risk of cancer. Additionally, the health effects associated with particulate matter include decreased lung function, aggravated asthma, respiratory symptoms and premature death. Nonroad diesel equipment is the single largest mobile source-based source of diesel particulate matter.

Diesel exhaust also contains nitrogen oxides, which combine with volatile organic compounds in the air, such as hydrocarbons -- also emitted by nonroad vehicles -- to form ground-level ozone, or smog, in the presence of heat and sunlight. Ozone may cause a variety of respiratory problems, including aggravated asthma, decreases in lung capacity and increased susceptibility to respiratory illnesses. It is damaging to lung tissue in high concentrations and during long-term exposure. New York City continues to be classified as a “severe-17 nonattainment area” for ozone.

As mentioned above, increased particulate matter concentrations and nitrogen oxides have been positively linked to increases in the aggravation of asthma, which can lead to increased rates of preventable hospitalization and premature death. The Council finds that reducing particulate matter and nitrogen oxide emissions may help to stem the tide of the asthma epidemic in New York City. In the year 2000 alone, there were 26,868 asthma-related hospitalizations in New York City. These hospitalizations resulted in $242,454,056 of medical expenses -- an average of $9023.90 per hospitalization -- of which 49.4% of the charges, or $119,772,304, was paid by Medicaid and 23.1% of the charges, or $56,006,887, was paid by Medicare.

The EPA, recognizing the harmful effects of diesel emissions from nonroad vehicles, issued a proposed rule on April 15, 2003, which would require that sulfur levels in nonroad diesel fuel be limited to 15 parts per million in

5 This classification means that the area does not meet the national primary or secondary ambient air quality standard for ozone; it has a design value of from 0.190 up to 0.280 ppm for ozone and, it has until 2007 to attain compliance with the standards. http://www.epa.gov/oar/oaspgd/greenbk/define.html#Designations.

2010. This rule would also require, starting in 2008 for smaller nonroad vehicles, that engines meet more stringent emissions standards.

Nonroad vehicles, such as backhoes, bulldozers, excavation machines, generators and cranes, have been and will be used to perform necessary and important functions at Ground Zero and will play a major role in the rebuilding of the area for years to come. The Council finds, however, that the City has a responsibility toward the people who live, work and attend school in Lower Manhattan, to minimize, wherever practical, the pollution such equipment and machinery emit into the air. The Council finds that the use of ultra low sulfur diesel fuel to power the diesel-powered nonroad vehicles operating at Ground Zero and in other parts of Lower Manhattan would reduce the amount of particulates released into the air by these vehicles, thereby improving air quality in that area. The Council further finds that using nonroad vehicles that utilize the best available technology for reducing the emission of harmful pollutants, such as particulate matter and nitrogen oxides, would have a dramatic impact on the level of pollutants being released in Lower Manhattan.

The Council finds that air quality is a concern in all parts of New York City, as well as in Lower Manhattan, particularly since the City suffers from some of the highest asthma rates in the country. Therefore, the Council finds that it is in the best interest of the health of our City’s residents, workers and schoolchildren for the City to use ultra low sulfur diesel fuel and the best available technology for reducing the emission of pollutants in its diesel-powered nonroad vehicles in all areas of the City, in addition to Lower Manhattan. The Council also finds that the City should contract for construction services with contractors who use ultra low sulfur diesel fuel and the best available technology to minimize the release of harmful pollutants in diesel-powered nonroad vehicles. Acting with the discretion allowed any private participant in the market, the City should choose to allocate its purchasing dollars in order to protect the health of its residents, thus decreasing the number of asthma hospitalizations and associated costs to the City, as well.

This legislation requires that any diesel-powered nonroad vehicle, fifty horsepower and greater, that is owned by, operated by or on behalf of, or leased by a City agency be powered by ultra low sulfur diesel fuel and utilize the best available technology for reducing the emission of pollutants. Additionally, this legislation requires that any solicitation for a public works contract and any contract entered into as a result of such solicitation include specifications that all contractors in the performance of such contract use ultra low sulfur diesel fuel and the best available technology for reducing the emission of pollutants for diesel-powered nonroad vehicles. All contractors in the performance of such contract must comply with such specifications. Although these requirements would apply to such vehicles only in Lower Manhattan at first, they would subsequently apply to nonroad vehicles in all other areas of the City. The Council finds that this legislation will have an important impact on improving the air quality throughout New York City and, consequently, may annually save the City millions of dollars in avoided health care costs.

§ 2. Title 24 of the administrative code of the city of New York is hereby amended by adding a new section 24-163.3 to read as follows:

§ 24-163.3 Use of ultra low sulfur diesel fuel and best available technology in nonroad vehicles. a. For purposes of this section only, the following terms shall have the following meanings:

(1) “City agency” means a city, county, borough, administration, department, division, bureau, board or commission, or a corporation, institution or agency of government, the expenses of which are paid in whole or in part from the city treasury.

(2) “Contractor” means any person or entity that enters into a public works contract with a city agency, or any person or entity that enters into an agreement with such person or entity, to perform work or provide labor or services related to such public works contract.

(3) “Lower Manhattan” means the area of New York county consisting of the area to the south of and within Fourteenth street.

(4) “Motor vehicle” means any self-propelled vehicle designed for transporting persons or property on a street or highway.

(5) “Nonroad engine” means an internal combustion engine (including the fuel system) that is not used in a motor vehicle or a vehicle used solely for competition, or that is not subject to standards promulgated under section 7411 or section 7521 of title 42 of the United States code, except that this term shall apply to internal combustion engines used to power generators, compressors or similar equipment used in any construction program or project.

(6) “Nonroad vehicle” means a vehicle that is powered by a nonroad engine, fifty horsepower and greater, and that is not a motor vehicle or a vehicle used solely for competition, which shall include, but not be limited to, excavators, backhoes, cranes, compressors, generators, bulldozers and similar equipment, except that this term

2
shall not apply to horticultural maintenance vehicles used for landscaping purposes that are powered by a nonroad engine of sixty-five horsepower or less and that are not used in any construction program or project.

(7) “Person” means any natural person, co-partnership, firm, company, association, joint stock association, corporation or other like organization.

(8) “Public works contract” means a contract with a city agency for a construction program or project involving the construction, demolition, restoration, rehabilitation, repair, renovation, or abatement of any building, structure, tunnel, excavation, roadway, park or bridge; a contract with a city agency for the preparation for any construction program or project involving the construction, demolition, restoration, rehabilitation, repair, renovation, or abatement of any building, structure, tunnel, excavation, roadway, park or bridge; or a contract with a city agency for any final work involved in the completion of any construction program or project involving the construction, demolition, restoration, rehabilitation, repair, renovation, or abatement of any building, structure, tunnel, excavation, roadway, park or bridge.

(9) “Ultra low sulfur diesel fuel” means diesel fuel that has a sulfur content of no more than fifteen parts per million.

b. (1) Any diesel-powered nonroad vehicle that is owned by, operated by or on behalf of, or leased by a city agency shall be powered by ultra low sulfur diesel fuel.

(2) Any diesel-powered nonroad vehicle that is owned by, operated by or on behalf of, or leased by a city agency shall utilize the best available technology for reducing the emission of pollutants.

c. (1) Any solicitation for a public works contract and any contract entered into as a result of such solicitation shall include a specification that all contractors in the performance of such contract shall use ultra low sulfur diesel fuel in diesel-powered nonroad vehicles and all contractors in the performance of such contract shall comply with such specification.

(2) Any solicitation for a public works contract and any contract entered into as a result of such solicitation shall include a specification that all contractors in the performance of such contract shall utilize the best available technology for reducing the emission of pollutants for diesel-powered nonroad vehicles and all contractors in the performance of such contract shall comply with such specification.

d. (1) The commissioner shall make determinations, and shall publish a list containing such determinations, as to the best available technology for reducing the emission of pollutants to be used for each type of diesel-powered nonroad vehicle to which this section applies for the purposes of paragraph two of subdivision b and paragraph two of subdivision c of this section. Each such determination, which shall be updated on a regular basis, but in no event less than once every six months, shall be primarily based upon the reduction in emissions of particulate matter and secondarily based upon the reduction in emissions of nitrogen oxides associated with the use of such technology and shall in no event result in an increase in the emissions of either such pollutant. In determining the best available technology for reducing the emission of pollutants, the commissioner shall select technology from that which has been verified by the United States environmental protection agency or the California air resources board for use in nonroad vehicles or onroad vehicles where such technology may also be used in nonroad vehicles, but the commissioner may select technology that is not verified as such as is deemed appropriate.

(2) No city agency or contractor shall be required to replace best available technology for reducing the emission of pollutants or other authorized technology utilized for a diesel-powered nonroad vehicle in accordance with the provisions of this section within three years of having first utilized such technology for such vehicle.

e. A city agency shall not enter into a public works contract subject to the provisions of this section unless such contract permits independent monitoring of the contractor’s compliance with the requirements of this section and requires that the contractor comply with section 24-163 of this code. If it is determined that the contractor has failed to comply with any provision of this section, any costs associated with any independent monitoring incurred by the city shall be reimbursed by the contractor.

f. (1) The provisions of subdivision b of this section shall apply to any diesel-powered nonroad vehicle in use in Lower Manhattan that is owned by, operated by or on behalf of, or leased by a city agency and the provisions of subdivision c of this section shall apply to any public works contract for Lower Manhattan upon the effective date of this section.

(2) The provisions of paragraph one of subdivision b of this section shall apply to all diesel-powered nonroad vehicles that are owned by, operated by or on behalf of, or leased by a city agency and the provisions of paragraph one of subdivision c of this section shall apply to all public works contracts six months after the effective date of this section.
(3) The provisions of paragraph two of subdivision b of this section shall apply to all diesel-powered nonroad vehicles that are owned by, operated by or on behalf of, or leased by a city agency and the provisions of paragraph two of subdivision c of this section shall apply to any public works contract that is valued at two million dollars or more one year after the effective date of this section.

(4) The provisions of paragraph two of subdivision c of this section shall apply to all public works contracts eighteen months after the effective date of this section.

g. (1) On or before January 1, 2005, and every succeeding January 1, the commissioner shall report to the comptroller and the speaker of the council on the use of ultra low sulfur diesel fuel in diesel-powered nonroad vehicles and the use of the best available technology for reducing the emission of pollutants and such other authorized technology in accordance with this section for such vehicles by city agencies during the immediately preceding fiscal year. This report shall include, but not be limited to (i) the total number of diesel-powered nonroad vehicles owned by, operated by or on behalf of, or leased by each city agency or used to fulfill the requirements of a public works contract for each city agency; (ii) the number of such nonroad vehicles that were powered by ultra low sulfur diesel fuel; (iii) the number of such nonroad vehicles that utilized the best available technology for reducing the emission of pollutants, including a breakdown by vehicle model and the type of technology used for each vehicle; (iv) the number of such nonroad vehicles that utilized such other authorized technology in accordance with this section, including a breakdown by vehicle model and the type of technology used for each vehicle; (v) the locations where such nonroad vehicles that were powered by ultra low sulfur diesel fuel and/or utilized the best available technology for reducing the emission of pollutants or such other authorized technology in accordance with this section were used; (vi) all findings, and renewals of such findings, issued pursuant to subdivision j of this section, which shall include, but not be limited to, for each finding and renewal, the quantity of diesel fuel needed by the city agency or contractor to power diesel-powered nonroad vehicles owned by, operated by or on behalf of, or leased by the city agency or used to fulfill the requirements of a public works contract for such agency; specific information concerning the availability of ultra low sulfur diesel fuel or diesel fuel that has a sulfur content of no more than thirty parts per million where a determination is in effect pursuant to subdivision i of this section; and detailed information concerning the city agency’s or contractor’s efforts to obtain ultra low sulfur diesel fuel or diesel fuel that has a sulfur content of no more than thirty parts per million where a determination is in effect pursuant to subdivision i of this section; and (vii) all findings and waivers, and renewals of such findings and waivers, issued pursuant to paragraph one or paragraph three of subdivision k or subdivision m of this section, which shall include, but not be limited to, all specific information submitted by a city agency or contractor upon which such findings, waivers and renewals are based and the type of such other authorized technology, if any, utilized in accordance with this section in relation to each finding, waiver and renewal, instead of the best available technology for reducing the emission of pollutants.

(2) Where a determination is in effect pursuant to subdivision i of this section, information regarding diesel fuel that has a sulfur content of no more than thirty parts per million shall be reported wherever information is requested for ultra low sulfur diesel fuel pursuant to paragraph one of this subdivision.

h. This section shall not apply:

(1) where federal or state funding precludes the city from imposing the requirements of this section; or

(2) to purchases that are emergency procurements pursuant to section three hundred fifteen of the charter.

i. The commissioner shall issue a written determination that permits the use of diesel fuel that has a sulfur content of no more than thirty parts per million to fulfill the requirements of paragraph one of subdivision b and paragraph one of subdivision c of this section if ultra low sulfur diesel fuel is not available to meet the needs of city agencies and contractors to fulfill the requirements of this section. Such determination shall expire after six months and shall be renewed in writing every six months if ultra low sulfur diesel fuel is not available to meet the needs of city agencies and contractors to fulfill the requirements of this section, but in no event shall be in effect after September 1, 2006.

j. Paragraph one of subdivision b and paragraph one of subdivision c, as that paragraph applies to all contractors’ duty to comply with the specification, of this section shall not apply to a city agency or contractor in its fulfillment of the requirements of a public works contract for such agency where such agency makes a written finding, which is approved, in writing, by the commissioner, that a sufficient quantity of ultra low sulfur diesel fuel, or diesel fuel that has a sulfur content of no more than thirty parts per million where a determination is in effect pursuant to subdivision i of this section, is not available to meet the requirements of paragraph one of subdivision b or paragraph one of subdivision c of this section, provided that such agency or contractor in its fulfillment of the requirements of a public works contract for such agency, to the extent practicable, shall use whatever quantity of
ultra low sulfur diesel fuel or diesel fuel that has a sulfur content of no more than thirty parts per million is available. Any finding made pursuant to this subdivision shall expire after sixty days, at which time the requirements of paragraph one of subdivision b and paragraph one of subdivision c of this section shall be in full force and effect unless the city agency renews the finding in writing and such renewal is approved by the commissioner.

k. Paragraph two of subdivision b and paragraph two of subdivision c, as that paragraph applies to all contractors' duty to comply with the specification, of this section shall not apply:

(1) to a diesel-powered nonroad vehicle where a city agency makes a written finding, which is approved, in writing, by the commissioner, that the best available technology for reducing the emission of pollutants as required by those paragraphs is unavailable for such vehicle, in which case such agency or contractor shall use whatever technology for reducing the emission of pollutants, if any, is available and appropriate for such vehicle; or

(2) to a diesel-powered nonroad vehicle that is used to satisfy the requirements of a specific public works contract for fewer than twenty calendar days; or

(3) to a diesel-powered nonroad vehicle where the commissioner has issued a written waiver based upon a city agency or contractor having demonstrated to the commissioner that the use of the best available technology for reducing the emission of pollutants might endanger the operator of such vehicle or those working near such vehicle, due to engine malfunction, in which case such city agency or contractor shall use whatever technology for reducing the emission of pollutants, if any, is available and appropriate for such vehicle, which would not endanger the operator of such vehicle or those working near such vehicle.

l. In determining which technology to use for the purposes of paragraph one or paragraph three of subdivision k of this section, a city agency or contractor shall primarily consider the reduction in emissions of particulate matter and secondarily consider the reduction in emissions of nitrogen oxides associated with the use of such technology, which shall in no event result in an increase in the emissions of either such pollutant.

m. Any finding or waiver made or issued pursuant to paragraph one or paragraph three of subdivision k of this section shall expire after one hundred eighty days, at which time the requirements of paragraph two of subdivision b and paragraph two of subdivision c of this section shall be in full force and effect unless the city agency renews the finding, in writing, and the commissioner approves such finding, in writing, or the commissioner renews the waiver, in writing.

n. Any contractor who violates any provision of this section, except as provided in subdivision o of this section, shall be liable for a civil penalty between the amounts of one thousand and ten thousand dollars, in addition to twice the amount of money saved by such contractor for failure to comply with this section.

o. No contractor shall make a false claim with respect to the provisions of this section to a city agency. Where a contractor has been found to have done so, such contractor shall be liable for a civil penalty of twenty thousand dollars, in addition to twice the amount of money saved by such contractor in association with having made such false claim.

p. This section shall not apply to any public works contract entered into or renewed prior to the effective date of this section.

q. Nothing in this section shall be construed to limit the city’s authority to cancel or terminate a contract, deny or withdraw approval to perform a subcontract or provide supplies, issue a non-responsibility finding, issue a non-responsiveness finding, deny a person or entity pre-qualification as a vendor, or otherwise deny a person or entity city business.

§ 3. Subparagraph (i) of paragraph 5 of subdivision b of section 24-178 of the administrative code of the city of New York is amended by inserting the following lines in the Table of Civil Penalties, immediately following the line regarding civil penalties for a violation of section 24-163.2 of this chapter:

| 24-163.3(o); plus twice the amount of money saved by the contractor in association with making such false claim | 20,000 | 20,000 |
§ 4. If any section, subsection, sentence, clause, phrase or other portion of this local law is, for any reason, declared unconstitutional or invalid, in whole or in part, by any court of competent jurisdiction such portion shall be deemed severable, and such unconstitutionality or invalidity shall not effect the validity of the remaining portions of this law, which remaining portions shall continue in full force and effect.

§ 5. This local law shall take effect one hundred eighty days after its enactment, except that the commissioner of environmental protection shall take all actions necessary, including the promulgation of rules, to implement this local law on or before the date upon which it shall take effect.

THE CITY OF NEW YORK, OFFICE OF THE CITY CLERK, s.s.:
I hereby certify that the foregoing is a true copy of a local law of the City of New York, passed by the Council on December 15, 2003, and approved by the Mayor on December 22, 2003.

VICTOR L. ROBLES, City Clerk, Clerk of the Council

CERTIFICATION PURSUANT TO MUNICIPAL HOME RULE LAW §27
Pursuant to the provisions of Municipal Home Rule Law §27, I hereby certify that the enclosed Local Law (Local Law 77 of 2003, Council Int. No. 191-A) contains the correct text and:

Received the following vote at the meeting of the New York City Council on December 15, 2003: 50 for, 0 against, 0 not voting.
Was returned signed by the Mayor on December 22, 2003.
Was returned to the City Clerk on December 22, 2003.

JEFFREY D. FRIEDLANDER, Acting Corporation Counsel
