Premises Account Number: Plumber Account Number:	
Permit Type:	Permit Number: Fee:
Date Issued:	Issued By:

Application for Meter Permit Instructions and Notes

1. Incomplete applications will not be accepted. The only field that may be left blank is the Meter Number for the new meter.
2. Guidance on meter selection is available in DEP's "List of Approved Meters" available on our website at nyc.gov/dep. The Licensed Plumber has responsibility for installing a properly-selected water meter. Approval of this permit application does not constitute final approval of the meter.
3. If this is a permit application limited only to a meter accuracy test, a DEP-permitted Meter Test/Repair Company may be named instead of a Licensed Plumber.
4. Permits for new construction are valid for 365 days. Permits for meter work in existing buildings are valid for 30 days. Permits may be extended under certain circumstances if a written request is submitted before the original permit expires.
5. The completed permit must be returned within ten business days of completion of the work. A completed permit shall include:
 - a. Meter Manufacturer and Model Name/Number
 - b. Register Model
 - c. Meter Size
 - d. Meter Serial Number
 - e. Installation/Replacement/Work Date
 - f. Meter Location
 - g. Meter Manufacturer's Test Tag or Sheet
6. Licensees who receive three or more violations within a three-month period may lose their ability to receive new permits until the violations are corrected.
