Dear Dr. Young and Mr. Sweeney:

With this letter, I am submitting the following deliverables, due December 31, 2013, pursuant to EPA's July 2007 Filtration Avoidance Determination (FAD) and the Draft Revised FAD:

Program	Deliverable
4.9 East of Hudson Non-point Source Pollution Control Program East-of-Hudson Septic Repair Program Strategy (SRP)	Submit a proposal for review and approval, to implement or cause to be implemented a SRP that will be funded at a level sufficient to reimburse homeowners for a portion of the repair or replacement of 100 septic systems in the West Branch and Boyd Corners Reservoir basins in the remaining term of the 2007 FAD.

Section 3.3 Community Wastewater Management Program, of the Draft Mid-Term Revisions to the 2007 FAD calls for completion of Trout Creek Community Wastewater Management Program project by December 31, 2013. The wastewater treatment system, wastewater collection system, stormwater retrofit system and site restoration are substantially complete. It is anticipated that lateral installation will commence in the spring of 2014 and conclude in the summer 2014.

As always, if you have any questions about these reports or other aspects of the City's watershed protection efforts, please do not hesitate to contact me.

Sincerely,

David S. Warne
Assistant Commissioner
