

# NYC Department for the Aging Annual Plan Summary

**April 1, 2013 – March 31, 2014**

For  
The Older Americans Act (OAA)  
The New York State Community Services for the Elderly (CSE) Program  
The Expanded In Home Services for the Elderly Program (EISEP)

---

**September 2012**

---

**Lilliam Barrios-Paoli, Commissioner**

2 Lafayette Street

New York, New York 10007

New York City Department for the Aging

# 2012 Public Hearings

The New York City Department for the Aging (DFTA) has published the 2013-2014 **Annual Plan Summary** on the DFTA website: [www.nyc.gov/aging](http://www.nyc.gov/aging). This Plan provides a valuable opportunity for the Department to share its goals, objectives and program planning with the aging network.

DFTA encourages consumers, community partners, advocates, and other interested parties to attend a public hearing and comment on the Plan, or give testimony on other issues that impact New York City's older adults. **To register, call one of the numbers on the right hand side of this page, or e-mail:**

**[testimony@aging.nyc.gov](mailto:testimony@aging.nyc.gov)**.

If you are unable to attend one of the hearings, please feel free to submit written testimony or comments via email (above) or mail to:

**NYC Department for the Aging**  
*c/o Yvette Parrish-Chenault*  
**2 Lafayette Street, 7<sup>th</sup> Floor**  
**New York, New York 10007**

The NYC Department for the Aging welcomes your input and values your expertise. We look forward to learning from you as you share your insights and ideas.

All Public Hearings are scheduled from **10:00 a.m. – 12:00 noon:**

**Manhattan:**

**Monday, October 15, 2012**

220 Church Street. Room 328  
New York, NY 10007

**Staten Island:**

**Tuesday, October 16, 2012**

All Saints Episcopal Church  
Community Center  
2329 Victory Boulevard  
Staten Island, NY 10314

**Queens :**

**Wednesday, October 17, 2012**

Queens Borough Hall, Room 213  
120-55 Queens Boulevard  
Kew Gardens, NY 11424

**Brooklyn:**

**Thursday, October 18, 2012**

Brooklyn Borough Hall  
209 Joralemon Street  
Brooklyn, NY 11201

**Bronx:**

**Friday, October 19, 2012**

Bronx Borough President's  
Office Rotunda  
851 Grand Concourse  
Bronx, NY 10451

## Introduction

### New York City Department for the Aging

The New York City Department for the Aging (DFTA or the Department) is the lead Mayoral agency addressing public policy and service issues for the aging; it is a local government agency and the largest agency in the Federal network of Area Agencies on Aging (AAA) in the United States. Established to represent and address the needs of elderly residents of New York City, the Department administers and promotes the development and provision of accessible services for older persons and serves as an advocate on legislative and policy issues.

DFTA's mission is to work for the empowerment, independence, dignity and quality-of-life of New York City's diverse older adults and for the support of their families through advocacy, education, and the coordination and delivery of services. DFTA continues its long history of collaborative partnerships with community-based organizations for the provision of programs and services, which aim to foster independence, safety, wellness, community participation, and quality-of-life. DFTA's various programs and initiatives pursue the following strategic goals:

- Foster independence and individual choices, confront ageism, and promote opportunities for older people to share their leadership, knowledge and skills;
- Inform and educate the general public about aging issues, including services, supports and opportunities for older New Yorkers and their families;
- Serve as a catalyst for increased resources to enhance and expand programs and services for older New Yorkers;
- Ensure the provision of quality services fairly and equitably to older New Yorkers;
- Enhance and expand effective, productive partnerships with consumers, advocates, and private and public organizations; and
- Recognize the value of all staff and encourage their creativity in building the Department's capacity for continuous improvement.

### Purpose and Scope of the Annual Plan Summary (APS)

The Older Americans Act (OAA), Section 306(a)(6)(D) requires AAAs to develop an area plan. New York State also requires AAAs to submit an Annual Implementation Plan (AIP) to the New York State Office for the Aging (NYSOFA) on programs funded through federal and state resources, including the New York State Community Services for the Elderly Program (CSE) and the Expanded In-Home Services for the Elderly Program (EISEP). The Annual Plan Summary (APS) is a synopsis of the AIP and presents DFTA's strategic goals, programming, and budget and service

levels. This Plan represents the second year of a four-year plan covering the period April 1, 2012 to March 31, 2016.

The OAA requires the provision of various services for older adults, including access to nutrition, benefits counseling, employment opportunities, legal assistance, and in-home services. The CSE Program and EISEP require the provision of community-based services for the frail elderly. The Department works with its Senior Advisory Council, Interagency Councils on Aging, consumers, advocacy and provider groups, elected officials, and community boards to identify and address local needs. The allocation of Department resources is determined by legislative mandates and directives, the availability of funding, the results of demographic analyses, assessment of unmet needs, recommendations from local communities, and the availability of services through alternate sources.

## Annual Plan Public Hearings

---

Each year, the Department for the Aging conducts public hearings to obtain recommendations and comments on its Annual Plan Summary. The public hearings provide an opportunity for older persons, service providers and advocates to identify priority needs, recommend ways to enhance services, and suggest an agenda for legislative advocacy to DFTA and its Senior Advisory Council. The Department welcomes written and oral testimony on the Annual Plan Summary. This input will help DFTA prepare its plan for Fiscal Year 2014 and enhance its long-term efforts on behalf of the City's elderly.

## Community Dialogue and Feedback

---

In addition to an ongoing dialogue and meetings with community partners, who provide invaluable feedback and input regarding DFTA services and programs, the Department provides opportunities for constructive engagement through its Senior Advisory Council and public forums:

- **DFTA's Senior Advisory Council** is mandated by the OAA, Section 306(a)(6)(D), New York State, and the New York City Charter to advise DFTA and its Commissioner on all matters relating to the development, administration and operations of its area plan. The Council is made up of 29 members serving three-year terms, at least half of whom are service recipients. The remainders are community partners, all of whom offer a unique perspective on aging issues and services.
  - **Public forums** encourage service providers, community leaders and the public to share their views and recommendations on aging services, including the Annual Plan
-

Summary Hearings and Borough Budget Consultations. Stakeholder sessions of various kinds, including forums to offer input into the design of solicitations and programs, as well as other discussions with providers, elected officials, Interagency Councils, community boards, Borough President Cabinets, and older New Yorkers, have been held to assist DFTA in strengthening its services.

### DFTA's Website: [www.nyc.gov/aging](http://www.nyc.gov/aging)

The Department invites visitors to the DFTA website, which includes information and resources about older adult programs and services, publications, and a calendar of events. Each year the Annual Plan Summary and hearings schedule is posted on the site.

## Assessing the Current and Future Needs of the Elderly

New York City's large older adult population is ethnically, culturally, and economically diverse with broad and wide-ranging service needs. Needs assessment is the first step to ensure appropriate and effective services. The Department identifies these needs through ongoing consultation with consumers, providers, advocates, and elected officials, an examination of the potential impact of policy and legislative changes on New Yorkers, and an analysis of changing demographic patterns.

The results of the 2010 and 2000 Censuses, the 2010 American Community Survey (ACS), and population projections through 2030 provide a foundation to determine the current and future needs of New York City's elderly. As the City addresses the challenges and capitalizes on the opportunities presented by an aging population, knowledge becomes critical in formulating policy, planning for services, and effectively allocating resources.

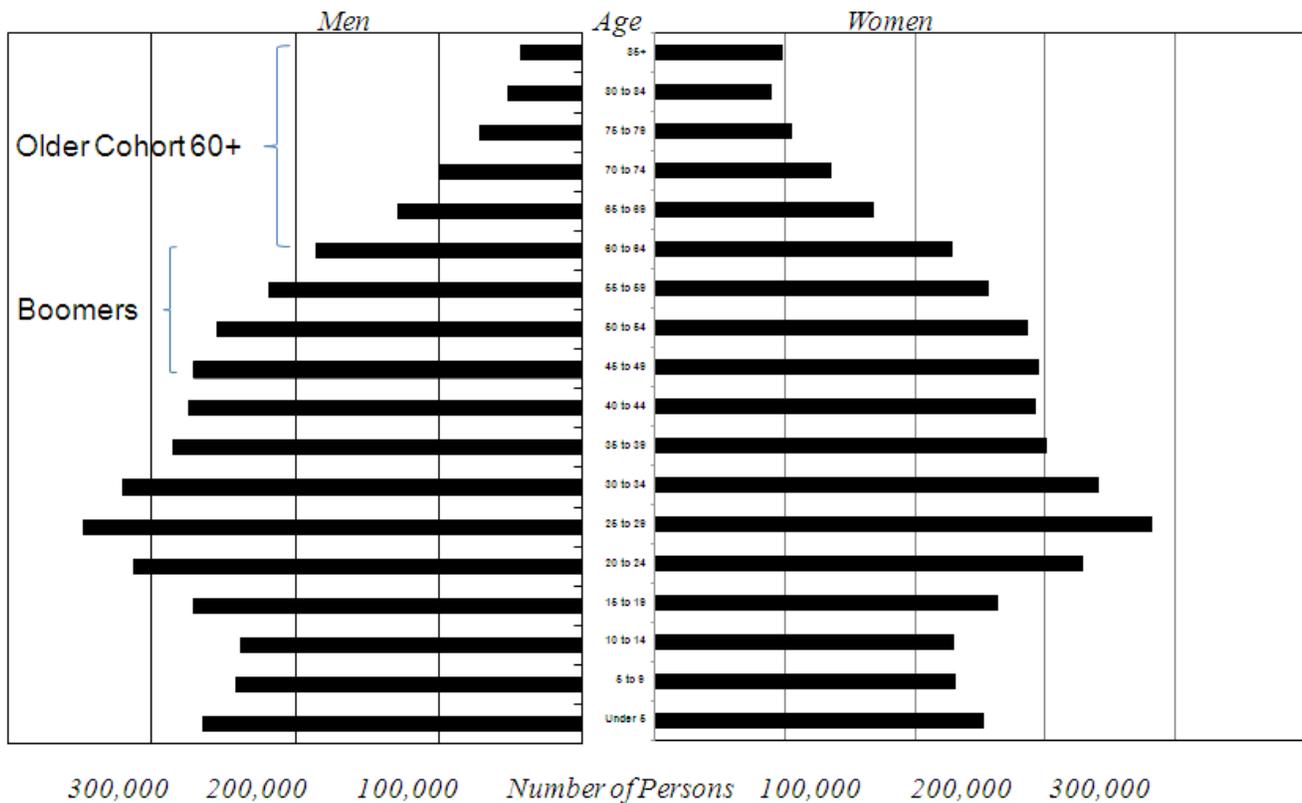

In the next few decades, the composition of New York City's population will change dramatically as a result of the aging of the "Baby Boom" population, continuing increases in life expectancy, and the City's increasing diversity. As these demographic shifts occur, the needs of the elderly will expand and change.

### Demographics of the Aging Population: 2000-2030

The Age and Gender Pyramid below shows an overall profile of New York City's 2010 population. The area shaded in black reflects the population aged 60+, which comprises 1.41 million adults, or 17.2% of the City's population. The dotted bars represent those 45 to 59, who comprise 1.6 million people, or 19.3% of the population.<sup>1</sup> The first of the boomer generation –

those born in 1946 – turned 65 in 2011, and as they continue to mature, the demand for aging services will increase.

### Age and Gender Pyramid for New York City (2010)<sup>2</sup>

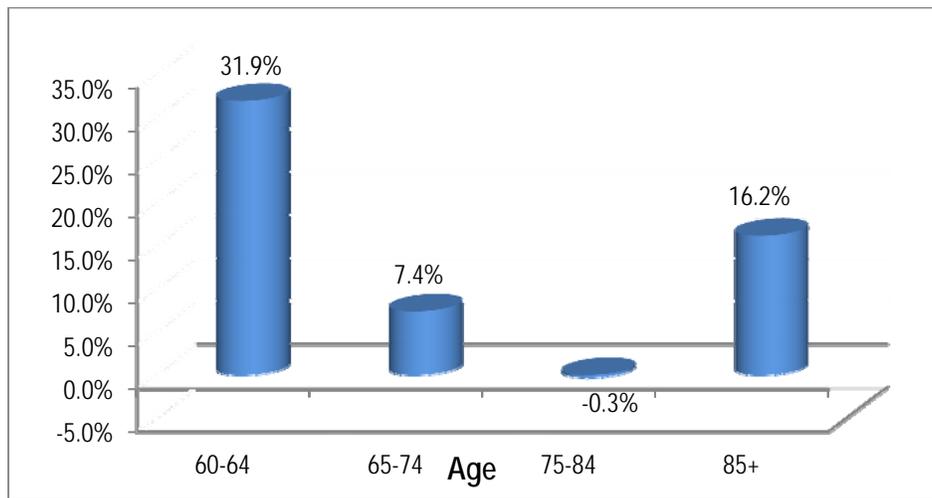

By 2030, New York’s 60+ population will significantly increase to a projected 1.84 million, a 47% increase from 2000. This group will comprise 20% of the total population compared with 15.6% in 2000. Consequently, the elderly, who were less than one in every six New Yorkers in 2000, will make up one in every five in 2030.<sup>3</sup>

### Aging Within the Older Population

The City’s total older population, which increased from 1.25 million in 2000 to 1.41 million in 2010, has significantly changed in age composition.

### Percentage Change of Selected Age Groups, New York City (2000-2010)<sup>4</sup>

From 2000 to 2010, the number of people aged 60-64 increased dramatically by 31.9%, and the eldest group (85 and older) increased by 16.2%. Those 65-74 years increased by a relatively modest rate of 7.4%, whereas those 75-84 years decreased slightly. By 2050, boomers will be part of the oldest population group, and the cumulative growth of this 85+ group will be nearly 200%, constituting 4% of the total population compared with 1.5% in 2000.<sup>5</sup> Disability is prevalent among the oldest cohort, creating a growing need for long-term care services.

### Increase in Life Expectancy

The latest figures indicate that the New York City life expectancy at birth is at an all-time high of 80.6 years, an increase of 2.9 years from 2000 to 2009.<sup>6</sup> However, life expectancy gains are not shared uniformly across gender or race. Women continue to experience longer life expectancies at birth compared to men. In 2009, New York City women had a life expectancy of 83 years, while men had an average life expectancy of 77.8 years.<sup>7</sup> Additionally, the 2000 U.S. Census shows the Hispanic population in New York City had an average life expectancy at birth of 79.7 years, the white population of 77.7 years, and the black population of 73.2 years.<sup>8</sup> Life expectancy data for Asians were not available in the 2000 US Census.

### Increase in the Older Female Population

Not only do women have a greater life expectancy than men, but as of 2010, women continue to outnumber men by nearly 3 to 2 within the 60+ age group. This ratio is nearly 7 to 3 among those 85 and older.<sup>9</sup> By 2030, the sex ratio (number of females per 100 males) for New Yorkers is projected at 118 for those 55-64, 131 for those 65-74, 159 for those 75-84, and 213 for those 85 and older.<sup>10</sup> Thus, women 85+ will outnumber men their age by more than 2 to 1, and this greater longevity results in more women living alone during their later years.

Women 65 and older also comprise 69% of the frail older population.<sup>11</sup> Frailty can lead to functional impairments, which may require long-term care. Women are also more likely to have incomes below the poverty level, since women tend to receive lower Social Security payments, due, in part, to time spent out of the paid workforce, as well as a prevalence of lower paying salaries than their male counterparts during their years of employment.

## Increase in Diversity

ACS data shows that from 2000 to 2010, the non-Hispanic white older population decreased whereas the number of minority members of that group grew rapidly. In 2010, 53% of New Yorkers 65 and older were members of minority groups, compared to 43% in 2000 and 35% in 1990. Between 2000 and 2010, the black population increased by 16%, the Hispanic population by 42%, and the Asian population by 65%.<sup>12</sup>

Table A: **Minority 65+ Population in New York City, 2000-2010**<sup>13</sup>

Race/Ethnic Profile	2000 Census	2010 Census	% Change 2000-2010
White (Non-Hispanic)	533,982	468,164	-12.3%
Black	185,088	214,281	15.8%
Hispanic	138,840	197,332	42.1
Asian/Pacific Islanders	59,056	97,580	65.2
All Minorities	382,984	509,193	33.0%

There are also significant linguistic differences: English is not the primary language of 25% of New Yorkers<sup>14</sup>, and nearly 50% speak another language at home.<sup>15</sup> Linguistic and cultural differences coupled with the challenges of aging and disability can have a significant impact on health outcomes. A review of health literature found that language barriers have a negative impact on access to and quality of health care as well as patient satisfaction and, in certain instances, cost. The development of a language assistance plan that includes interpreter services and bilingual clinicians is an effective measure for improving care.<sup>16</sup> In July 2008,

Mayor Bloomberg signed Executive Order 120 requiring the City’s social service agencies to provide translation and interpretation services in the top six languages spoken by New Yorkers; each of these agencies, including DFTA, has developed a language access implementation plan for at least six languages. 3-1-1, New York City’s 24-hour information and services number, provides services to callers in 170 languages.<sup>17</sup>

## The Supportive Service Needs of Older Adults

The significant increase in the older adult population along with rapidly changing demographics presents challenges for planning and developing supportive services for older adults. When considering the following service issues, the aging network needs to balance the needs of a new cohort of well elderly with the service needs of the increasing number of frail elderly:

### Income and Poverty

Inadequate income continues to be a critical problem facing the elderly in New York City. Whereas the United States has experienced a decline in the national poverty rate for older people, from 12.8% in 1990 to 9.0% in 2010, New York City’s older adults have experienced a slight increase in poverty from 16.5% to 17.2% for the same time period.<sup>18</sup> The current federal poverty level is \$11,170 for a single person and \$15,130 for a couple,<sup>19</sup> and the current average Social Security benefit is \$1,230 per month, or \$14,760 a year for a retired worker.<sup>20</sup> This average benefit is often inadequate to cover the high cost of living in New York City but does not allow many to qualify for public assistance benefits.

Table B: **Poverty by Race for Older New Yorkers Aged 65 and Above** (2010)<sup>21</sup>

	Total Older Cohort*	Number Below Poverty	% Below Poverty Level (2010)
White	555,219	74,442	13.4%
Black	221,019	44,415	20.1%
Hispanic	193,623	48,208	24.9%
Asian	99,938	23,179	23.2%

*\*Note: Totals do not match Table A as poverty information was not available for all persons.*

The percentage of minority elderly living in poverty is significantly higher than the white population. This data indicates that a large proportion of minority older people live in poverty – 25% of Hispanics, 23% of Asians, and 20% of blacks. In addition, the number of older women living below the poverty level is approximately double that of their male counterparts.<sup>22</sup>

In 2010, the median household income for older New Yorkers was \$28,407, 21% higher than the 2000 median of \$23,388; however, it continues to remain lower than the nation’s median of \$32,500.<sup>23</sup> Median income also varies significantly by race. In 2010, the median income of:

- Hispanic households was \$22,500, 31% less than the white population; and
- Asian and Black households was \$27,500, 15% less than the white population, who earned a median household income of \$32,500.<sup>24</sup>

With an increasing percentage of New York City’s older adults living in poverty, a targeted expansion of multiple income support services would help those most in need, including Supplemental Security Income (SSI), Medicaid, food stamps, and housing subsidies.

## Nutrition and Hunger

---

Good nutrition is a vital component in maintaining health and optimal functioning; for example, older adults who eat breakfast have greater energy/nutrient intake, less worry about whether they would be able to get food or run out of food, and have fewer depressive symptoms.<sup>25</sup> Hunger and malnutrition may contribute to the decline in resistance to disease as people age, hasten the onset of a number of degenerative diseases, and can exacerbate cardiovascular disease, hypertension, osteoporosis, cancer, diverticulitis, and diabetes.<sup>26</sup> The percentage of New Yorkers 65 and older who had difficulty affording food increased from 23 percent in 2003 to 27 percent in 2011, though this figure has dropped from 47 percent in 2008 and 38 percent in 2009 during the recession.<sup>27</sup>

The U.S. Department of Agriculture’s (USDA) Supplemental Nutrition Assistance Program (SNAP) – also known as the Food Stamp Program – provides critical food assistance to many households. However, only 68% of eligible New Yorkers are receiving benefits,<sup>28</sup> and of all New Yorkers that use emergency food programs (EFPs) – food pantries and soup kitchens – households with older adults have the lowest food stamp participation rate (19%).<sup>29</sup> In 2007, 12% of those who utilized EFPs were 65 and older (154,000 persons);<sup>30</sup> in 2009, 66% of EFPs saw an increase in the number of older adults at their sites, and 28% saw an increase of 25% or more in the number of seniors.<sup>31</sup>

Integrated public policy among government and hunger organizations aids older adults experiencing food insecurity by ensuring greater access for them to available services.<sup>32</sup>

Integrated policy should also emphasize increased food stamp outreach, greater availability of nutrition services, and screening for older adults for risk factors.<sup>33</sup> DFTA is committed to various programs and supports legislation that combats hunger among older New Yorkers, including SNAP.

## Functional Capacity and Mobility

---

As individuals age, their range of mobility decreases and the need for appropriate in-home services, adaptive equipment, and the least restrictive environment increases.<sup>34</sup> In 2010, there were 355,706 older people who reported some level of disability, or 35.8% of the civilian non-institutionalized population. Of this group:

- 27% had physical disabilities that affected walking, climbing stairs, reaching, lifting, or carrying;
- 19% had conditions that restricted their ability to go outside the home, shop, or visit the doctor;
- 11% had mental or emotional conditions causing difficulties in learning, remembering, or concentrating;
- 11% were limited in their ability to perform self-care activities, such as dressing, bathing or getting around inside the home;
- 10% reported hearing disabilities; and
- 8% reported vision disabilities.<sup>35</sup>

The Eye Disease Prevalence Research Group reports that blindness and low vision increase significantly with age, with Americans 80 years and older accounting for 69% of the blind population; the most common eye diseases for those 40 and older are age-related macular degeneration (AMD), cataracts, glaucoma and diabetic retinopathy.<sup>36</sup> Adaptive devices, rehabilitative services, and environmental adaptations to a home and work setting can provide support for this population.

Disability rates are much higher for older New Yorkers when compared nationally. Older women have more difficulty with activities of daily living than do older men. Older Hispanic men and especially women have higher disability rates compared with their non-Hispanic counterparts. Disability is also associated with poverty: older people with disabilities reported higher poverty rates than those without.<sup>37</sup>

---

The Olmstead Act (1999), not limited to Medicaid-funded services, gave individuals with disabilities the right to be placed in the least restrictive and most integrated environment appropriate to their needs. The Supreme Court's decision calls upon states to develop accessible community-based services for disabled persons of all ages. Supportive social services provided in the home remain the services most in demand by older adults with functional impairments, and OAA services are intended to help adults maintain their independence, remain in the community, and delay institutionalization.<sup>38</sup>

## Chronic Illness and Preventive Health

---

As individuals age, they are increasingly likely to suffer from chronic and acute illnesses. Four out of five Americans 50 and older experience at least one chronic condition, the most common being high blood pressure, high cholesterol, mental illness, diabetes, and heart disease.<sup>39</sup> In 2010, the leading cause of death by far for New York City residents age 65 and older was heart disease, accounting for 40% of all older adult deaths, despite the fact that heart disease can in many cases be prevented or its progression slowed.<sup>40</sup> There are also more than 110,000 people living with HIV/AIDS in New York City, with 41.7% being 50 and older.<sup>41</sup> Bone loss intensifies after age 50, particularly for postmenopausal women, and an estimated 54% of American women 50 and older will suffer a fracture during their lifetimes due to osteoporosis.<sup>42</sup>

Preventive care, including immunization, health screenings, and education on effective coping and treatment mechanisms is essential to help New Yorkers avert or manage debilitating aspects of disease. As part of its Take Care New York health policy, the New York City Department of Health and Mental Hygiene (DOHMH) has a number of goals associated with efforts to improve the health of New Yorkers and has succeeded in reducing diabetes, smoking, hypertension, and cardiovascular disease. In 2003, only 42% of New Yorkers 50 and older were screened for colon cancer, a preventable disease; that number increased to 66% in 2009, with a target of 80% by the end of 2012.<sup>43</sup> In 2008, 80% of adults 65 and older received a flu shot,<sup>44</sup> a 17% increase from 2005.<sup>45</sup> Medical and social service providers must work together to improve the quality of health for older adults by data sharing and increasing coordination of patient care and advocating for resources to support research on prevention and treatment of diseases. DFTA has a number of preventive health and disease management programs, including the Community Innovations for Aging in Place Grant (see Page 24 for more details).

## Mental Health, Addiction and Developmental Disabilities

---

DOHMH estimates that approximately 20% of New Yorkers 55 and older experience a psychiatric disorder not part of the normal aging process; this number is expected to double by 2030.<sup>46</sup> Older adults with serious mental illnesses experience service inequalities and higher mortality rates and are more likely to be placed in nursing facilities.<sup>47</sup> DFTA's Depression Screening Initiative continues to successfully increase access to treatment (see Page 37 for more details). New York State's Office of Alcoholism and Substance Abuse Services estimates that approximately half a million older New York State residents experience problems because they are knowingly or unknowingly misusing alcohol and/or drugs. These chemical dependencies are primarily related to alcohol misuse and deleterious interactions between alcohol and prescription or over-the-counter medicines.<sup>48</sup> The growth in the number of older adults with mental health needs and addiction issues will have a major impact on health service utilization and costs, highlighting the need to integrate mental health into an affordable and accessible continuum of community-based health and long-term care.

An estimated 6.6% of adults 55 and older in New York City have a severe cognitive impairment.<sup>49</sup> Day program activities for persons with developmental disabilities should be age-appropriate and include education in health and wellness activities.<sup>50</sup> The public and private sectors must forge new partnerships to develop and expand appropriate services for older people with special needs, including increased adult day programs.

## Health Care Expenditures

Health care costs have risen substantially, even after adjusting for inflation. Out-of-pocket health care costs pose a particular burden for those in need of long-term care services – which Medicare does not cover – prescription drugs, and those not eligible for Medicaid or Medicare.<sup>51</sup> A study by the Kaiser Family Foundation found that Medicare covered only 45 percent of a beneficiary's total health care costs, and AARP estimated that out of pocket costs for these participants were an average of almost \$3,500 per year.<sup>52</sup> Among older adults in New York City, 36% rely only on Medicare with no supplemental private coverage. These older adults are considered underinsured, and results can include delayed care, not seeking preventive care, and limited or skipped medication doses.<sup>53</sup> Last year, legislative changes to the Medicare prescription drug plan, or Part D, helped to address this coverage gap, or "doughnut hole" for 18 million older Americans, including 57% of New York State's Part D enrollees.<sup>54</sup> It is essential for lawmakers to continue to seek solutions to address the growing underinsured population. DFTA's Health Insurance Information Counseling and Assistance Program (HIICAP) has trained counselors that provide assistance with health care coverage choices and

enrollment, including the latest information on health care reform law provisions (see Page 29 for more details).

## Social Isolation

---

Those living alone as well as those in poverty can be more vulnerable to social isolation. In 2010, 32.7% of persons age 65 and over and nearly one-half of persons 85 and older in New York City were living alone,<sup>55</sup> and those living alone had the highest poverty rate (30%) among all older households.<sup>56</sup> However, social isolation is a complex concern for older adults, and it is important to note that these are not the only factors that may contribute to vulnerability. Other factors include disability, inadequate access to primary care, and the population density of older people, which measures the number of persons 65 and older in an area.<sup>57</sup>

## Housing

---

The housing preferences of older adults are to age in place and to maximize autonomy, choice, familiarity, flexibility and privacy;<sup>58</sup> therefore, appropriate and stable housing is vital, but not always possible, due to fixed incomes, high housing costs, competing healthcare expenditures, and physical limitations that must be addressed by in-home care or structural modifications.<sup>59</sup>

The main source of subsidized, low-income housing for adults 62 and older in New York City is Section 202 Supportive Housing for the Elderly. Federally operated by the U.S. Department of Housing and Urban Development (HUD), it provides funding to not-for-profit groups for the new construction or rehabilitation of permanent low-income rental housing with support services. Income limits are currently \$28,650 for a single person and \$32,750 for a couple,<sup>60</sup> and there are 190 Section 202 buildings with approximately 17,680 units in the City.<sup>61</sup> Additional sources of housing include 57 New York City Housing Authority (NYCHA) developments with more than 10,000 units targeted solely to older New Yorkers and 18 Mitchell Lama sites with 3,533 units.<sup>62</sup> There are also assisted living facilities for those who need an increased level of care, including the Assisted Living Program (ALP), adult homes, and the Enriched Housing program, providing 10,760 beds.<sup>63</sup> Waiting lists for certain housing programs can be years long; therefore, additional financing and flexibility for housing developments is crucial. In July 2003, Mayor Bloomberg enacted the 10-year New Housing Marketplace Plan to create and preserve 165,000 units of affordable housing for 500,000 New Yorkers by 2014,<sup>64</sup> including an additional 1,000 units of Section 202 housing;<sup>65</sup> as of FY 2011, 124,510 affordable housing units had been financed.<sup>66</sup> DFTA's Senior Housing Initiatives Unit (see Page 31) continues to advocate

for affordable new older adult housing as well as assisted living opportunities, and provides information and referral.

There are subsidy programs available to older adults to assist with aging in place, including the Senior Citizen Rent Increase Exemption Program (SCRIE). SCRIE assists adults age 62 and older who reside in rent regulated apartments by authorizing exemptions from future increases to their monthly rent; the current income eligibility limit is \$29,000, and tenants must already be paying more than 30% of their income toward rent.<sup>67</sup> In FY 2009, 44,775 households received SCRIE.<sup>68</sup> Another housing program, the Senior Citizen Homeowner Exemption Program (SCHE), provides homeowners 65 and older who have federal adjusted gross household incomes of up to \$37,399 with property tax exemptions.<sup>69</sup>

## Transportation

Given the functional decline in mobility as people age, the availability and subsidization of appropriate transportation is a critical factor in enabling an individual to live independently. The Council of State Governments recommends policies to keep older American drivers and pedestrians safer, including an improvement in infrastructure, better access to and more options for public transportation, and better coordination of transportation resources via mobility management.<sup>70</sup> The design of safer roads is particularly important as New York State has the third highest pedestrian fatality rate per 100,000 persons 65 and older after Hawaii and California.<sup>71</sup>

The New York Metropolitan Transportation Council has also identified some of the following transportation service issues for New York City's older adults:

- Varied pedestrian environments that can create issues for those who move slowly and those who need increased waiting areas for public transportation;
- A lack of accessible and well-maintained subway system infrastructure, including signage; and
- A need for increased DFTA-sponsored transportation outside of normal business hours.<sup>72</sup>

The Department provides some transportation for older adults through contracted non-profit organizations and continues to advocate for increased transportation funding. Through a New Freedom Grant award from the Federal Transit Administration (FTA), DFTA is completing the final year of the New York City Senior Transportation Investment Program (TIP), which allows a community organization in each borough to purchase vehicles to provide additional

transportation to people with disabilities (see Page 25); DFTA also offers free bus trips for older adults to numerous sites ranging from supermarkets to museums and in the fall will be offering taxi vouchers to disabled residents of two communities (see Page 26 for more details).

## Caregiving

---

Family members and other informal caregivers – 60% of whom are older adults themselves<sup>73</sup> – are vital to the supportive network that helps older adults remain living in their homes and communities; these 2.2 million caregivers in New York State<sup>74</sup> – 79% of whom are female<sup>75</sup> – provide an estimated 80 percent or more of all community-based long-term care.<sup>76</sup> This saves the New York State health care system \$25 billion in unpaid care.<sup>77</sup> There is a need for services that benefit both caregiver and recipient, including respite care, transportation, information and outreach, civic engagement, and affordable and alternative housing models and adaptive support.<sup>78</sup> Title III-E of the OAA Amendments of 2000 established the National Family Caregiver Support Program (NFCSP), which provides basic services for family caregivers including information and referral, assistance in accessing benefits and entitlements, peer support, individual counseling, respite care and supplemental services. This program represents an important model for supporting caregivers and care recipients. DFTA’s Alzheimer’s and Caregivers Resource Center provides a variety of caregiver support services. (See Page 33 for more details).

## Legal Services

---

Legal assistance can be critically important for older adults when dealing with issues of housing, landlord/tenant disputes, entitlements, consumer affairs and family issues, and may also involve planning for retirement, long-term care, loss of capacity, and end-of-life matters. The expanding use of free websites and legal hotlines offers opportunities for older persons to independently obtain information on legal issues, and publicly-funded and private legal services help older New Yorkers access benefits and services to which they are entitled. The majority of cases handled by DFTA-funded legal services are housing cases, including eviction intervention services and those situations in which the landlord fails to make needed upgrades, a factor that can pose safety problems. (See DFTA’s “Assigned Counsel Project,” Page 33 for more details).

## Elder Abuse

---

Elder abuse includes physical and psychological abuse, financial exploitation, and neglect. Many types of fraud, including predatory lending, internet scams and identity theft, are common examples of financial elder abuse crimes.<sup>79</sup> Perpetrators of elder abuse crimes are often family members, friends or caregivers of victims. Because of the relationship, victims are often fearful or reluctant to report the abuse, and as a result, the incidence and prevalence of elder abuse is grossly under-reported.<sup>80</sup> DFTA, Lifespan of Greater Rochester, Inc., and Weill Cornell Medical Center collaborated on an in-depth, statewide elder abuse incidence and prevalence study. The aims of the study were to estimate the prevalence of elder abuse in both self-reports and documented cases, estimate rates of under-reporting, and identify demographics. The study found that only a fraction of elder abuse cases in New York State are formally documented; elder abuse occurs at a rate nearly 24 times greater than the number of reported cases referred to social service, law enforcement or legal authorities.<sup>81</sup> The full study can be found at: [http://www.nyc.gov/html/dfta/downloads/pdf/publications/under\\_the\\_radar.pdf](http://www.nyc.gov/html/dfta/downloads/pdf/publications/under_the_radar.pdf).

Education and community outreach are essential to prevent elder abuse and increase safety, as well as advocating for legislation that takes a proactive approach to violence prevention. DFTA's Elderly Crime Victims Resource Center and its community partners provide direct services to crime and elder abuse victims and training to groups that work with older adults on how to identify signs and provide intervention. Services include crisis intervention, counseling, advocacy, information and assistance, limited emergency financial assistance, and legal services referrals (see Page 35). DFTA provides Elder Abuse intervention strategies to seniors experiencing any of several forms of maltreatment by someone who has a special or "trusting" relationship with the elder. The aim is to increase the client's sense of control and self-acceptance and to provide a range of legal and social service options for ending abuse. (see Page 36). The Problem Solving Therapy Elder Abuse Initiative aims to increase self-determination of elder abuse victims through use of an evidence-based therapeutic technique (see Page 25).

## Lesbian, Gay, Bisexual and Transgender (LGBT) Elders

Lesbian, gay, bisexual and transgender (LGBT, or GLBT) older adults are particularly vulnerable to service barriers, including discrimination, lack of access and community engagement. Twice the percentage of LGBT older adults live alone than heterosexual elders and are four times more likely not to have children, which can possibly lead to social isolation and a lack of

caregiving.<sup>82</sup> Medical and community providers must be aware of health risks that particularly affect the underserved LGBT older community, including depression and anxiety; breast cancer in women over 40; HIV, prostate, testicular and colon cancer in men over 50; sexually transmitted diseases (STDs), including hepatitis and Human Papilloma Virus (HPV); alcohol and substance abuse; tobacco-related health issues; and eating disorders.<sup>83</sup> Elected and government officials, and advocacy and provider groups, must identify and address local LGBT needs and rights to ensure the safety, wellness, independence, and quality-of-life for LGBT older adults. DFTA provides training sessions on LGBT cultural competency with our service providers, including all directors, supervisors, and frontline case managers in DFTA-contracted case management agencies. In addition, DFTA has trained managers and supervisors in DFTA-contracted senior centers and Naturally Occurring Retirement Community (NORC) programs on the topic of “Creating an LGBT Welcoming Center.” Community organizations, including Services and Advocacy for GLBT Elders (SAGE), provide training and assistance to providers in LGBT programming and sensitivity. SAGE was awarded an Innovative Senior Center (ISC) contract, and opened its doors in March 2012 (see Page 22 for more on ISCs). The SAGE Center for LGBT Older Adults is the nation’s first full-service senior center that specifically serves LGBT elders, integrating congregate meals, social services, and a wide range of activities available to participants. SAGE will also be working with satellite sites to provide programmatic opportunities for LGBT older adults in every borough.

## Technology

Technological advances continue to improve the quality-of-life for older adults. Remote diagnoses and continuous health monitoring deliver high-quality medical services via computerized home health care systems. Tele-healthcare machines store patient records, monitor health, and connect patients and doctors by video, and all stored data is accessible by health care providers in clinical settings.<sup>84</sup> “E-learning” is a growing resource for older adult online education, information, and referral, particularly for those with limited mobility. According to a February 2012 survey by the Pew Internet and American Life Project, 53% of Americans 65 and older use the internet or email, representing the first time that half of older Americans are online; this represents a large increase from 38% in 2008. Additionally, one-third of these users (34%) frequent social networking sites, including Facebook; this represents a huge increase from 13% in April 2009. Furthermore, 69% of older adults have a cell phone.<sup>85</sup>

New York State recommends that to better serve the older population, there needs to be an increasing reliance on existing and new technologies to improve communication and streamline service access and delivery. State agencies emphasize the need to adapt solutions to the age, language ability level and educational characteristics of users, recognize that users will need education and personal assistance in using technologies, and recognize the importance of security and privacy issues.<sup>86</sup> DFTA's Broadband Technology Opportunities Program (BTOP) (see Page 23 for more details) is establishing sites to improve digital literacy and provide multimedia training for low-income older adults in vulnerable population areas. Technological developments are essential to increasing access and linking services to help support and enhance the lives of older adults.

## Employment

---

As baby boomers continue to age, the number of older employees will become an increasingly significant proportion of all workers. In 2010, one out of every six workers in the American labor force was 55 or older (16.9%), and projections have indicated that from 2006-2016, this age group will account for more than 90 percent of the growth in the labor force.<sup>87</sup> Additionally, more than 70% of older workers work full-time, and 97% of those who work part-time do so by choice.<sup>88</sup> The U.S. Government Accountability Office recommends that government agencies work together to identify sound policies to extend the work life of older Americans.<sup>89</sup> There will be a growing demand for employers to ensure that work environments are adjusted in response to the needs of older and disabled workers, including physical modifications, assistive devices, flexible work schedules, off-site work arrangements including telecommuting, and greater use of family leave for caregivers.<sup>90</sup>

## Volunteerism and Intergenerational Exchange

---

Volunteer programs increase community resources while simultaneously providing older adults with opportunities to contribute their talents and skills and remain active. Volunteering is positively associated with life satisfaction and perceived good health among older adults,<sup>91</sup> and those who volunteered at least 15 hours per week with Experience Corps, a program that places older adults in public elementary schools, had increased physical, cognitive and social activity levels relative to their peers who did not volunteer,<sup>92</sup> yet less than half of those over 50 are being asked to volunteer, despite research indicating that the volunteer rate for those who were asked is three times higher.<sup>93</sup> Programs including Foster Grandparents (Page 26), Intergenerational

programs (Page 27), ReServe (Page 28) and TimeBanksNYC (Page 22) have tapped into the invaluable resource of the City's older adults.

## Program Initiatives

DFTA has been deeply engaged in developing visions to enhance the City's livability and capacity to support people of all ages and abilities; this includes addressing the social dimensions of our City's sustainability. The Department is part of the Age-Friendly NYC Commission and continues to implement recommendations from the report, "**Age-Friendly NYC: Enhancing Our City's Livability for Older New Yorkers**," which impacts everything from community and civic participation to public spaces and transportation. One Age-Friendly NYC/DFTA initiative is New York City's **TimeBanksNYC**, a strengths-based community development program to promote volunteerism. TimebanksNYC enables participants of all ages to offer and receive services in a managed exchange, wherein someone provides services or shares skills with other members and gets a "time dollar" in exchange, which can then be redeemed for a service from someone else. The aim is to forge a strong sense of community and leverage the assets that New Yorkers have to offer each other. New Yorkers can participate in **TimeBanksNYC** in all five boroughs and can register at [www.TimeBanksNYC.org](http://www.TimeBanksNYC.org). For more information about Age-Friendly NYC, visit <http://www.nyam.org/agefriendlynyc/>.

The establishment of a new system of comprehensive **senior congregate services**, which now includes **Innovative Senior Centers (ISCs)** and **Neighborhood Centers**, is a cornerstone of Age-Friendly NYC. Last year, DFTA released a new and streamlined solicitation for the procurement of both types of centers, and broad stakeholder input as summarized in a New York Academy of Medicine report entitled "NYC Senior Centers: Visioning the Future" (found at <http://www.nyam.org/intiatives/sp-pub.shtml>) was instrumental in shaping the solicitation. DFTA awarded eight Innovative Senior Center contracts (ISCs), and those centers are now open; two additional Brooklyn contracts will be finalized later this year. DFTA also recently announced the 238 senior centers that were awarded contracts to serve as Neighborhood Centers; the list of centers awarded contracts is posted on the DFTA website (see Page 30 for more details on senior centers).

The following sections highlight programs and initiatives the Department will direct its efforts toward during the 2012 – 2013 program year.

## Grant-Funded Initiatives

---

The Department for the Aging, as well as its not-for-profit charitable arm, the Aging in New York Fund (ANYF), seeks resources through public and private partnerships to develop innovative service models that address the unmet needs of older New Yorkers, their caregivers, and the aging services network. Current research and development programs funded by grants that serve New York's older adult community include:

- **The Broadband Technology Opportunities Program (BTOP).** DFTA, in partnership with Older Adult Technology Services (OATS), received a grant from the National Telecommunications and Information Administration (NTIA) as part of NYC Connected Communities, a project through the New York City Department of Information Technology and Telecommunications (DoITT). The aim of the project is to improve public access to technology for low-income older adults in vulnerable population areas by establishing programs to improve digital literacy and provide multimedia training. As part of the grant, DFTA and OATS are upgrading broadband access, upgrading or installing new workstations, and providing 150 sessions of training at 23 community-based sites, or "BTOP sites." Twenty-one of these sites are DFTA-funded senior centers; the other two are a public housing community center that attracts many older adults and a senior housing location. Upgrades to all sites are in the process of being completed, and all training sessions will be provided by August 2013. The grant is also providing funding for the development of a Center for Technology Exploration, Training, and Support for older New Yorkers, which is currently under construction and expected to be completed this fall. Under the administration of OATS, this Center will:
  - Provide a state-of-the art presentation space where participants can explore emerging technologies in telemedicine, communications, creative expression, and entertainment;
  - Include training labs and an intergenerational support center for drop-in customers, operated in collaboration with OATS youth services partners;
  - Support a research and development team to work on a new curriculum and online tools to help older adults with emerging technologies in health, independent living, workforce and other needs; and

- Support enhancement of [www.seniorplanet.org](http://www.seniorplanet.org), a digital community website, and its programs.
  - **Community Innovations for Aging in Place.** In collaboration with the New York City Mental Health Association (MHA), Community Resource Exchange, and four NORC Supportive Service Programs (SSPs), the Healthy Aging Initiatives Unit (see Page 29 for more details) has been actively involved in the development stage of a “Community Innovations for Aging in Place” grant from the Administration on Aging (AoA). The goal of the project is to meet the physical and mental health needs of older adults who are aging in place and subsequently strengthen the communities served by the NORC SSPs. Staff at the NORCs are currently being trained in Behavioral Activation, a brief treatment initiative targeting depression, often dually diagnosed with chronic disease. Workshops utilizing the Stanford University Chronic Disease Self-Management model are being provided at all programs, and NORC staff have the option of being trained in the facilitation of these workshops, with a goal of training staff and seniors to provide workshops themselves. Evidence-based health programs have been shown to reduce health expenditures, maximize health and wellness, and reduce health disparities for largely preventable chronic conditions.<sup>94</sup>
  - **The “Parenting the Second Time Around” (PASTA) Project.** The Grandparent Resource Center (GRC) has entered into a three-year partnership with Cornell University Cooperative Extension NYC for a project to introduce grandparents and other relative caregivers in New York City to information, skills, and resources designed to enhance their ability to provide effective care for the young relatives they are parenting. The information is provided by use of a curriculum entitled “Parenting the Second Time Around” (PASTA), which has been used successfully in other areas of New York State and throughout the country. A research study will allow DFTA to obtain data regarding the effectiveness and impact of the PASTA program in a large urban setting as well as to learn more about how the PASTA project impacts grandparents and other kinship caregivers’ ability to effectively care for the children they are responsible for as well as themselves. The intention is for PASTA participants to strengthen their communication skills with the children they take care of and identify new resources for support based on their needs. (For more information about kinship caregiver programs, see “The Grandparent Resource Center,” Page 26.)
-

- **The Problem Solving Therapy Elder Abuse Initiative.** DFTA is working with the Department of Psychiatry at Weill Cornell on a one-year mental health initiative for elder abuse victims served by the Elderly Crime Victims Resource Center (ECVRC), the first project of its kind. National studies have illustrated a link between elder abuse and mental health problems.<sup>95</sup> There is some evidence that depression may make older adults less likely to ask for help, and therefore more vulnerable to elder abuse. The goal of the project is to decrease mental health issues such as depression and anxiety in order to increase elder abuse victims' acceptance of services that have the potential to decrease abuse. Elder abuse social workers will be taught to screen victims for depression and anxiety. Those victims suffering from a mental health issue will be assisted by a mental health worker, who will implement Problem Solving Therapy, a short-term evidence-based therapeutic technique.
  - **Senior Participation in the Arts Citywide SPARC Program:** The SPARC program—formerly known as Space for Art—concluded its second year in July 2012. This collaboration among the Department of Cultural Affairs (DCA), DFTA and the five borough arts councils is an exchange program that places professional local artists at senior centers; artists provide workshops or develop art projects with seniors, generally in exchange for studio space at the center. The program began with 12 artists “in residence” at nine senior centers throughout New York City. Through a \$200,000 grant received from the National Endowment for the Arts (NEA), the program expanded to 45 senior centers with 50 artists participating. The NEA grant provided stipends to the artists for use in purchasing materials. At the program's conclusion, the centers hosted public events to showcase the projects resident artists had been working on with center members. The program was developed as part of Age-Friendly NYC.
  - **The Senior Transportation Investment Program (TIP):** Through a New Freedom Grant award from the Federal Transit Administration (FTA), DFTA is in the process of completing the final year of the New York City Senior Transportation Investment Program (TIP). The grant allows five community organizations, one in each borough, to purchase vehicles to provide additional transportation to people with disabilities. An important aspect of the grant involves mobility management and a mobility coordinator, who assists individuals in choosing the most efficient and safe means of public transportation to a particular destination, as well as educating service providers about the special needs of the elderly. The principle objectives of TIP are to
-

improve accessibility and availability of transportation services; improve effectiveness and efficiency through operational and process changes; increase utilization and customer satisfaction; and to establish greater coordination and communication between community and transportation providers and the wider health and human services network.

- **Taxi Voucher Project:** In the fall of 2012, DFTA, in collaboration with the Mayor's Office for People with Disabilities (MOPD) and community-based organizations (CBO) and assistance from the Taxi and Limousine Commission, will implement the New Freedom Taxi Voucher Project, which will give persons with disabilities debit cards to pay for taxi rides. Vouchers can be used as an alternative to the subscription services provided by Access-a-Ride, and participants can choose when and where they wish to travel. Eligible participants include disabled residents of Brooklyn Community District 18 (Canarsie/Flatlands) and Queens Community District 1 (Astoria).

## Active Aging

---

- **The Foster Grandparent Program** enables low-income older adults to provide one-on-one tutoring and mentoring to children at community sites citywide. Screened and trained Foster Grandparents are placed in day care centers, elementary schools, Head Start programs, Reach Out and Read Literacy Programs, hospital pediatric and child life units, courts in the juvenile justice system, and NYCHA after-school programs. Specially trained Foster Grandparent volunteers provide mentoring for children in foster care and for children who are chronically absent from school. The program has successfully developed partnerships with the Administration for Children's Services (ACS), the Department of Education, the NYC Housing Authority and the Department of Juvenile Justice.
  - **The Grandparent Resource Center (GRC)** provides supportive caregiver services to older adults raising their grandchildren. The GRC has built a network of support groups, programs, services and community partners across the City, including intergenerational programs, and provides trainings and presentations on grandparent caregiving, self-advocacy and empowerment, support group start-up,
-

sensitivity training, recreational opportunities, and health education to grandparent caregivers, community-based groups and City employees. Staff and support group members have been featured in various media outlets discussing issues relating to grandparent caregiving. GRC staff has worked with the African-American Religious Leaders on HIV/AIDS and on a LGBTQ Sensitivity Training for grandparent caregivers. The GRC will continue to increase outreach to diverse communities including Latino, African, Caribbean and Russian grandparent families. The GRC has also entered into a three-year partnership with Cornell University Cooperative Extension NYC to introduce the “Parenting the Second Time Around” (PASTA) program (See Page 24).

- **The Intergenerational Programs Unit** operates the **Intergenerational Work Study Program (IWSP)** in partnership with the Department of Education. The IWSP is a year-round program for public high school students and older adults to interact at senior centers, in nursing homes, and in in-home service settings. Students gain valuable work experience and receive academic and community service credits toward graduation. The IWSP also offers scholarships to graduating high school seniors and encourages students to pursue careers in aging services. DFTA and its partners will continue as advocates for intergenerational programming as members of the **New York State Intergenerational Network (NYSIgN)**. In collaboration with NYSIgN, DFTA has recently developed the publication “Good Practices in Intergenerational Programming – Models Advancing Policy, Practice and Research,” which can be found on the DFTA website.
- **The Senior Employment Unit** operates the **Title V Senior Community Service Employment Program (SCSEP)** and provides recruitment, training, and employment opportunities for adults 55 and older, including job search skills workshops, career advisement, job fairs, and computer technology and customer service training. This year, the SCSEP expanded training components to offer a variety of online courses geared to helping participants become more successful during their job search. The Senior Employment Unit will continue to expand partnerships with organizations that provide marketable skills training and demonstrate a commitment to creating job and training opportunities for older adults. Fifty-six new organizations have joined SCSEP this year to extend training to seniors that will lead to employment in the future. SCSEP also hosts two senior employment job fairs each year providing direct connections to employers who have experienced tremendous benefits from hiring mature workers from the program.

DFTA also offers the **ReServe** program, in partnership with ReServe Elder Services: the program matches retirees/Reservists with short-term City agency projects that utilize their experience and expertise. To date, the program has matched 491 ReServists with 710 assignments among 23 City agencies. The **Summer Meals Program**, which DFTA participates in with the Mayor's Office and the NYC Public Library, connects older adult workers with children at public libraries in the summer through reading, math and art, as well as by serving meals and providing light clean-up support.

- **The Work Experience Program (WEP)** links WEP workers to community partners, such as senior centers, as supportive staff to better serve the elderly. WEP workers help with office duties, provide maintenance and community services, and assist in preparing and serving food.

## Bureau of Community Services (BCS)

---

The Bureau of Community Services (BCS), in addition to the Units listed below, organizes a variety of projects for older adults each year, including:

- Distributing close to 34,000 **Farmers' Market check booklets** to eligible low-income older adults through a network of participating contractors to encourage the consumption of more fresh fruit and vegetables;
  - Sponsoring close to 500 **free bus trips** for older adults to numerous sites, including supermarkets, museums and flea markets, in partnership with the Department of Education (DOE). Over 75 of these trips are part of City Hall's "**Healthy Food**" **initiative**. Some trips are made to sites selling a larger variety of fresh fruit and vegetables;
  - Providing **Automated External Defibrillator (AED) and CPR training** with the support of the American Heart Association to over 350 staff from senior centers where defibrillators have been placed; and
  - The **Bookmobile program**, a joint project with the Brooklyn Public Library (BPL) in which the library's bookmobiles visited 12 senior centers and issued 315 library cards last year. Centers can choose the category of books stocked by the bookmobiles based on their members' interests.
-

The Units that make up the Bureau of Community Services are as follows:

- **Healthy Aging Initiatives** includes the **Health Promotion Services Unit** and healthy aging-related, grant-funded projects, including **Community Innovations for Aging in Place** (see Page 24 for more details). **The Health Promotion Services Unit** and its network of older adult volunteers conduct health education programs and activities for older New Yorkers. Staff currently train 1,100 volunteers to lead a broad range of programs including:
    - **Stay Well exercise classes** geared toward all levels and abilities, with routines to enhance balance, build muscle strength, and reduce stress;
    - **Keep on Track Blood Pressure Monitoring programs** to measure blood pressure and help participants understand their readings;
    - **Alert & Alive discussion groups** for participants to share experiences that celebrate their lives and discuss the realities of aging;
    - **Partner to Partner** peer support for volunteers and clients with similar life experiences to engage in one-on-one supportive discussions;
    - **The Big Apple Senior Strollers Walking Clubs**, where members are presented with certificates listing steps accumulated by all members;
    - **The Save a Life Campaign**, “Know Your Numbers,” which focuses on the implications of common medical tests including blood pressure readings, glucose and cholesterol/fats numbers. Seniors are urged to discuss these findings with their physician; and
    - **Workshops and lectures** on various topics including falls prevention, medication management, diabetes, insomnia, hypertension, and memory.
  
  - **The Health Insurance Information Counseling and Assistance Program (HIICAP)** conducts public outreach presentations for older adults, community partners, and other groups on Medicare, Medicaid, Medigap, Elderly Pharmaceutical Insurance Coverage (EPIC), private health insurance, preventive services, and long-term care planning. HIICAP’s trained counselors provide assistance with prescription plan
-

selection and enrollment by appointment and over the telephone at 33 community based sites citywide and in 17 languages. HIICAP is also responsive to the needs of boomers new to Medicare needing special assistance with health care coverage choices, including those still working. Counselors have been trained in the new health care reform law provisions, including additional benefits and effective dates.

- **The BCS Nutrition Unit** includes dietitians and nutritionists who serve as experts for the Department’s community partners and for seniors living in the community that attend congregate meal programs. They ensure that seniors receive nutritious meals that meet all City, State and Federal guidelines. They also provide extensive technical assistance on meal planning, recipe development, food safety, and the City Agency Food Standards. Dietitians and nutritionists also participate in senior-focused community health fairs and provide nutrition education workshops annually at senior centers. The Nutrition Unit is currently developing tools to streamline the menu planning process and increase the use of fresh, local produce in senior centers. The Unit runs an internship program each semester, in which students work on a variety of projects while receiving school credit; during the summer, some paid internships are offered as well.
- **Senior Centers:** The Department funds senior centers (**Neighborhood Centers**) for older adults citywide, with approximately 27,000 people attending these sites daily. Participants are provided with congregate meals and an environment where they can participate in a variety of recreational, health promotional and cultural activities, as well as receive information on and assistance with benefits. A new and streamlined solicitation for the procurement of comprehensive senior congregate services, or Innovative Senior Centers (ISCs) was released last year, and eight awards were made. The centers, which opened in early 2012, are implementing many innovative program features, and are located in the Bronx, Manhattan, Queens and Staten Island. Two additional ISCs will commence operations in Brooklyn soon. Two of the new ISCs are ground-breaking programs designed for special populations: VISIONS, the first senior center in the nation for the blind and visually impaired, and SAGE (Services and Advocacy for GLBT Elders), the first center in the nation geared to the LGBT community. Beyond meals, the enhanced programming at these ISCs includes robust health and wellness programs, additional access to health care services, arts and cultural programs, and technology and volunteer opportunities. Centers have flexible and expanded hours

including evenings and weekends, as well as transportation options to facilitate access to the centers, particularly those in Queens and Staten Island.

In December 2011, the Department released a solicitation for Neighborhood Centers, which comprise the Department's entire non-ISC senior center portfolio. The solicitation was designed to insure that all senior centers going forward will have a consistent set of services, including a minimum of 60 meals per day, an average daily attendance of 75 persons, and a required Health and Wellness component. DFTA recently announced the 235 senior centers that were awarded contracts to serve as Neighborhood Centers; this includes six new agencies that were not previously funded by DFTA, including two agencies serving the growing Asian-American community in Brooklyn. Of the 235 centers, 73 are located in Brooklyn, 56 are in Manhattan, 53 in Queens, 42 in the Bronx, and 11 on Staten Island. The list of centers awarded contracts is posted on the DFTA website, and the new contracts are expected to start this fall.

- **The Senior Housing Initiatives Unit:** DFTA will continue advocating for affordable new older adult housing as well as assisted living opportunities. Senior Housing staff provides information and referral on low-income housing for seniors and other housing-related issues. The Senior Housing Initiatives Unit also oversees City-funded Naturally Occurring Retirement Community Supportive Service Programs (NORC SSPs), which provide social work services, assistance with health care management, wellness activities, and other social and educational programs. Later this year, DFTA plans to release an RFP for NORC SSPs; the new contracts are expected to start in the fall of 2013. Senior Housing staff will also continue to work with the current NORC SSPs in continuing the **NORC Health Indicators Project**, which strives to improve the management of and reduce the risks associated with diabetes, falls or heart disease.
- **Transportation services:** The Department provides transportation for older adults through contracted non-profit organizations. These providers transport frail older New Yorkers who have no access to, or cannot use public transportation, for the purpose of attending senior centers and essential medical and social service appointments. Through a Federal grant, DFTA is in the process of completing the final year of the New York City Senior Transportation Investment Program (TIP) to provide additional transportation to people with disabilities (See Page 25). DFTA has also collaborated with the Department of Transportation (DOT) and *Plays for Living*,

a not-for-profit organization that produces plays dramatizing real-life issues, to educate older adults at senior centers about street safety.

## Emergency Preparedness

---

DFTA's Office for Emergency Preparedness (OEP) continues to work with the New York City Office of Emergency Management (OEM) on the design and implementation of emergency response plans and community partnerships including the Regional Catastrophic Planning Grant Program, the Citizen Corps Council, the OEM Special Needs Advisory Group, the General Population Shelter workgroup, the Advance Warning System, NYC Voluntary Organizations Active in Disaster (VOAD), the Mitigation Planning Council, the Heat Emergency Steering Committee, the Coastal Storm Plan, the Area Evacuation Plan, the Pandemic Flu and West Nile Virus workgroups, and the Adult Immunization Coalition. The Office continues to incorporate its emergency response into the citywide Continuity of Operations Plan (COOP) to ensure that critical services continue to be available citywide following an emergency.

The Department's network of senior centers function as cooling centers when heat emergencies are declared, and DFTA works with both OEM and 311 to ensure that all information, including locations is readily available.

The Office for Emergency Preparedness also participated in updating and distributing the "Ready NY Guide for Seniors and People with Disabilities" that is being replaced with "My Emergency Plan".

The Office for Emergency Preparedness is affiliated with special citywide committees representing seniors and people with disabilities and gives emergency preparedness presentations at senior centers, senior housing facilities, community boards, block associations, houses of worship, and other venues.

DFTA joined other City agencies and community groups in helping the Department of Health and Mental Hygiene (DOHMH) with free flu voucher distribution to adults without access to the vaccine between November 2011 and April 2012.

For 2012-2013, OEP will work with the Bureau of Community Services to hold focus groups to discern ideal neighborhood hubs for emergencies in different areas of the City.

---

## Legal Services

---

Legal Services offers the **Assigned Counsel Project (ACP)**, a joint collaborative effort between the NYC Department for the Aging and the Civil Court of the City of New York. ACP provides legal representation to older adults at risk of eviction from their homes and also to seniors who wish to commence a proceeding against tenants/subtenants on whom they are dependent for income. The primary goals of ACP are to preserve current housing, advocate for alternative housing options and address the immediate short-term social service needs of the older adult litigants that are accepted into the program. Upon referral from Housing Court Pro Se attorneys, DFTA-contracted legal providers offer legal representation to the client(s), with social work staff/interns working in partnership to provide needed services, such as home visits, and accompanying clients to Housing Court proceedings to provide support as well as advocacy. The ACP is currently operating in the boroughs of Manhattan, Brooklyn, Queens and the Bronx.

## Long Term Care

---

- **The Alzheimer's & Caregiver Resource Center** provides caregiver support services, including information, assistance, and referral to over 7,000 caregivers of older New Yorkers each year and provides consultations to community professionals who are seeking guidance in their work with clients. Trainings on Alzheimer's disease, residential alternatives, and caregiving are also provided to caregivers, professionals, and the community at large. The Unit offers Keeping Your Mind Sharp, an interactive program designed to increase awareness about the importance of mental and physical activity in reducing stress and maintaining good health. The caregiver website developed by this Unit, [www.nyc.gov/caregiver](http://www.nyc.gov/caregiver), offers online information and resources to caregivers and is available in English, Spanish, Russian, and Chinese. The Unit has translated the Departmental e-learning module *Understanding Alzheimer's Disease*, into five languages and provides written materials in these languages. The Alzheimer's & Caregiver Resource Center continues to provide technical assistance and support to the Chinese American and Korean American Alzheimer's Coalitions, whose development was fostered by this Unit. Both Coalitions regularly hold English and language-specific workshops and conferences, addressing timely issues such as changes in Medicaid, Medicaid Managed Long Term Care, and palliative care. Other initiatives include:

- **Working with the New York City Police Department (NYPD).** The **Silver Alert** program, akin to Amber Alert, is designed to locate a cognitively impaired individual who has wandered and been reported missing and reunite them with their family. The City passed this initiative into legislation in 2011, making New York City one of the first municipalities in the country to do so. This legislation is the outgrowth of long-standing collaborations between DFTA, the New York City Housing Authority and the NYPD, with OEM and DoITT working to implement Silver Alert as a part of City Hall's Age-Friendly Initiatives. The Alzheimer's & Caregiver Resource Center continues the NYPD partnership by providing information and service referral, including the Alzheimer's Association MedicAlert/Safe Return program, to families of persons with dementia who are reported missing.
- **Workshops on the evidenced-based Chronic Disease Self Management Program** offered in English, Spanish (Tomando Control de Su Salud), and Mandarin, with the Diabetes Self Management Program conducted in English and Spanish (see "Community Innovations for Aging in Place," Page 24 for more on CDSMPs.). The Positive Self Management Program is designed for persons with HIV/AIDS. The Unit also provides training of community agency staff and individuals to become lay leaders in these evidence-based programs.

The Alzheimer's & Caregiver Resource Center also oversees the administration of the **National Family Caregiver Support Program** in New York City. Ten qualified community based organizations are contracted with DFTA to support caregivers as they work to keep their care recipient safely at home for as long as possible. These Caregiver programs provide information and assistance, individual counseling, support groups, caregiver training, respite care, and other supportive services. Grandparents or other older relatives with the sole responsibility for raising their grandchild(ren) age 18 and under are also eligible for services.

---

- **The Elderly Crime Victims Resource Center (ECVRC)** provides direct services to crime and elder abuse victims and training to groups that work with older adults on how to identify signs and provide intervention. The ECVRC and its community partners – including the Mayor’s Office to Combat Domestic Violence and the Family Justice Centers of Brooklyn, Queens and the Bronx – provide crisis intervention, counseling, advocacy, information and assistance, limited emergency financial assistance, and legal services referrals. DFTA is a founding member of the NYC Elder Abuse Network (NYCEAN), made up of non-profit organizations, government agencies, law enforcement personnel, district attorneys, academic institutions and private sector groups. The Network was formed to assist victims with a coordinated service response, identify service gaps, and improve information sharing, and recently launched a new website, [www.nycean.net](http://www.nycean.net), to serve as a resource and connection point for professionals working with elder abuse victims. DFTA is also part of the Brooklyn Multidisciplinary Team on Elder Abuse (MDT), which coordinates care and creates solutions for the growing number of complex cases of elder abuse in New York City. The team includes representatives from DFTA and HRA, including their Adult Protective Services (APS) program, the Brooklyn District Attorney’s office, the Jewish Association for Services for the Aged (JASA), the Hebrew Home for the Aged, Cornell Weill Medical College, and other community-based organizations. The team utilizes a case consultation model to improve the health and quality-of-life for older adults by reviewing, discussing and coordinating cases of elder abuse. The ECVRC is also active with a variety of Elder Abuse taskforces, including the Bronx Taskforce on Elder Abuse, the Safe Horizons Elder Abuse Working Group at Queens Family Court, and the Manhattan and Brooklyn DA Offices’ Elder Abuse Taskforces.
  - **Home Care:** This program is designed for low-income seniors 60 years and older that have unmet needs in activities of daily living and do not qualify for Medicaid or other ongoing insurance-funded home care. The goal of this program is to maintain seniors safely at home, and prevent or at least delay the placement of frail elderly in more expensive Medicaid-funded nursing homes. Home care services are provided to assist seniors who need help with activities of daily living (e.g., dressing, bathing, personal care) and instrumental activities of daily living (e.g., shopping, cooking, house cleaning) to remain safely at home. As part of a comprehensive assessment, case managers assess senior needs and if home care is needed and there are available hours to provide, clients are authorized for home care. Client income and
-

expenses are considered when determining if a client requires a cost-share or a suggested contribution for their home care.

- **Long Term Care.** In pursuit of DFTA’s goal to assist vulnerable older New Yorkers to remain living in their homes and be engaged in their communities, DFTA’s Long Term Care unit includes **case management, home delivered meals, and elder abuse services:**
    - **Case management** is the gatekeeper for in-home services such as home delivered meals and home care: all clients receiving an in-home service funded by DFTA receive a comprehensive assessment from a case management agency. Case managers provide assessments to identify the strengths and needs of older persons and work with clients to plan and coordinate services and resources on their behalf.
    - **The home delivered meals program** provides nutritious meals to older New Yorkers while creating greater choice to address the future needs of a growing homebound population. All home delivered meals continue to meet dietary guidelines. Those older adults assessed by their case manager as capable of reheating a meal now have choice and flexibility between choosing twice weekly delivery of frozen meals or daily delivery of a hot meal. The selection of frozen meal delivery provides the option to decide when clients are ready to eat and which meal they wish to eat that day.
    - **Elder abuse services** are provided to seniors experiencing any of several forms of maltreatment (physical, sexual, financial, psychological, and/or active or passive neglect) by someone who has a special or “trusting” relationship with the elder (a spouse, a sibling, a child, a friend, a caregiver, etc.). The objective of elder abuse intervention strategies is to increase the client’s sense of control and self-acceptance and to provide a range of legal and social service options for ending abuse. This is accomplished by: 1) development of a safety plan with the client; 2) providing psycho-education about the nature of elder abuse including patterns of escalation over time; 3) encouragement to decrease levels of isolation; 4) provision of accurate
-

and sufficient information about resources, services, and opportunities (e.g., safety planning, discussion of legal options and instruments, supportive services, etc.); 5) assistance with benefits; 6) supportive contacts; 7) advocacy; 8) counseling; 9) support groups, and 10) ancillary services such as escorted trips, other transportation, security device installation and emergency financial assistance.

- **LTC Nutrition Unit:** The Nutrition Counselors provide in-home nutrition counseling for Case Management clients who are at high nutrition risk. Clients' nutritional needs are comprehensively assessed and they are counseled on topics such as key nutrients, hidden sources of sodium, no added salt diet, DASH diet, healthy choices, food shopping, meal planning, label reading, diabetes, fat, cholesterol, trans fats, fiber, water, calcium, Vitamin D, drug/nutrient interaction, and food safety. The Nutrition Consultant for the Home Delivered Meals program not only performs a comprehensive nutritional analysis of menus for the home delivered meal program, but also provides intensive technical assistance to providers and their hired Registered Dietitians to achieve thorough menu analysis that will meet City, State and Federal standards.

## Planning

---

- **The Depression Screening Initiative.** Developed in conjunction with DOHMH and MHA, this initiative focuses on identifying depression in at-risk older adult senior center clients and increasing access to treatment in high-risk areas of the City. Those identified as "at risk" are referred to their primary care physician or to a specialty mental health provider; on average, five percent of seniors tested were found to be at risk. Another goal of the project has been to educate older adults that depression is not a normal part of aging and is highly treatable. During its first six years, the Initiative has educated over 9,000 seniors. This year the program will work closely with the Innovative Senior Centers (ISC) to train staff and provide technical assistance, so that programs can provide depression workshops within their programs. In addition, this year the telephonic program will be expanded to educate and screen homebound seniors over the telephone. The Initiative has educated older adults in English, Spanish, Chinese, Korean, Japanese, and Russian.
-

- **The Social Work Education Program** is an internship program for social work graduate students interested in the growing field of gerontology. Interns are placed within DFTA to provide all levels of social work and administrative services for our City's older adult population.

## Public Affairs

---

The Public Affairs Unit provides community outreach through information and referral assistance to older New Yorkers and their caregivers regarding benefits and entitlement programs. Public Affairs staff members attend outreach events citywide year-round to conduct presentations and distribute information about DFTA programs and services to older New Yorkers, elected officials, caregiver organizations, government agencies, and community partners.

Public Affairs also launched DFTA's redesigned website in February, 2012. The site's simpler format makes it easy to find information about City agencies and not-for-profit organizations that provide services and programs for older adults and caregivers. It includes an expanded services menu and information about health and wellness, as well as entitlements and benefits, work and volunteer opportunities, and a wide range of resources for older residents, including computer training, cultural events and university programs. The site redesign is an initiative of the City's Age-Friendly NYC effort.

## Training and Learning Events

---

The DFTA Center for Organization Development and Strategic Initiatives will continue to provide quality classroom and long-distance learning experiences to address the job-related learning needs of DFTA staff and staff of DFTA's contracted community partners. These learning opportunities are designed to enhance the knowledge and skills that managers, supervisors and front-line workers in these settings need to more effectively manage their programs; assist older people to remain living meaningfully in their homes and communities; enable seniors and their caregivers to access needed social and health services, benefits and entitlement programs; and promote the physical, social and financial wellness of older New Yorkers. Last fiscal year, the Center provided more than 200 days of training attended by more than 3,200 participants. Special emphasis in recent years has been directed toward improving the quality of DFTA-contracted case management services

---

and to improving the utilization and programming of DFTA-funded senior centers. These will remain major focus areas in the coming year.

## Advocacy Objectives

The Department's advocacy efforts are directed towards improving the quality-of-life for older New Yorkers. The Department evaluates and comments on the fiscal, policy, and programmatic implications of proposed local, state, and federal laws, regulations, and policies affecting the elderly. It develops policy objectives to be enacted into federal, state, and City legislation and proposes them to the Mayor's Office.

The Department presents testimony at legislative and administrative agency hearings, disseminates information about the findings of its impact analyses, and participates in local, state, and national meetings and conferences.

The Department will advocate for funding strategies that more effectively support longevity and aging in place, including health promotion and overall wellness. Countless studies have not only demonstrated older adults' preference to continue living in their homes and communities as long as possible, but have also demonstrated the value of home- and community-based care. As such, DFTA will continue to advocate for more cost-effective home- and community-based supportive care options that enhance quality-of-life and sustain individuals in their communities for as long as possible.

Advocacy initiatives include the following:

### **Community Level**

- Analyze and disseminate information and data to the elderly and the aging services network to use in their advocacy efforts;
  - Inform the local aging services network about pertinent legislative and budget issues; and
  - Work cooperatively with interagency councils, advocacy groups, and with City and state citizen groups on behalf of elderly interests by participating in forums and meetings and collaborating on advocacy and policy concerns.
-

**City Level:**

- Continue to promote awareness among other City agencies and external partners by reviewing, analyzing, and coordinating activity on City, state, and federal matters of interest to the elderly, including the impact of proposed legislation;
- Continue to implement and monitor recommendations from the report, "Age-Friendly NYC: Enhancing Our City's Livability for Older New Yorkers." The initiatives, impacting everything from community and civic participation to public spaces and transportation, will help shape the way City government addresses the needs and desires of older New Yorkers;
- Develop City, state and federal agendas on aging service priorities for inclusion in New York City's comprehensive legislative agenda; and
- Continue to pursue innovative solutions to service needs of the elderly.

**State Level:**

- Increased funding for aging programs, including CSE, EISEP, and SNAP.
- Funding for legal representation and social services for the elderly in Housing Court, modeled after the collaborative Assigned Counsel Project between the Department for the Aging and New York Civil Court;
- Increased funding for and expansion of NORC SSPs, which provide supportive services to elderly individuals in residential buildings;
- Expansion of more affordable older adult housing units, assisted living opportunities, and financing for the development of new housing for older New Yorkers; and
- Support for programs that help kinship caregivers (grandparents and other relatives) raise children.

**Federal Level:**

- Effective utilization of funding associated with the Affordable Care Act to maximize benefits to older adults;
  - Additional funding and increased flexibility in the Older Americans Act as part of the Act's reauthorization, so that local AAAs can adequately support programs in the areas of aging in place, nutritional supports, socialization, health maintenance and
-

prevention, transportation services, and benefits outreach and counseling, among others;

- Implementation of the Elder Justice Act in a way that will support the efforts of elder abuse providers within the aging services network;
- The expansion of the Federal Section 202 Housing Program and the Assisted Living Conversion Program for Section 202 buildings;
- An additional increase in funding levels for the Federal Section 5310 Program – Transportation for Seniors and Persons with Disabilities. In addition, an increase in funding for the National Technical Assistance Center for Senior Transportation;
- Federal funding formulas that ensure New York’s fair share of funding for vital programs and services for older New Yorkers; and
- Increased appropriations for the Senior Farmers’ Market Nutrition Program.

## Projected Resources, Expenditures, and Service Levels

July 1, 2012 - June 30, 2013

The Department receives funding from a variety of sources to support a broad range of services. Many state and federal grants require the City to “match” a certain proportion of their funding. A significant portion of City Tax Levy funds are dedicated to match state and federal grants. The majority of DFTA-funded services are provided through contracts with community-based organizations. DFTA also provides a number of services directly, including older adult employment assistance, the Home Energy Assistance Program (HEAP), and other services for special populations.

The budget figures shown in the following tables are based on information as of September, 2012, and are subject to change. Table B (Page 42) lists DFTA’s revenue sources. For City Fiscal Year 2013 (July 1, 2012 - June 30, 2013), the Department’s budget is projected at \$267million; approximately 4% more than Fiscal Year 2012. City funding represents 55% of the Department’s budget; federal funding 31%; and state funding 14%. Tables C and D represent DFTA’s plan for the Fiscal 2013 Adopted Budget: Table C (Page 43) reflects planned support for each of the Department’s contracted services, and Table D (Page 45) reflects planned service levels, but does not include some services provided directly by DFTA.

Table B: Projected Fiscal Year 2012 Budget

July 1, 2012 – June 30, 2013<sup>1</sup>

<b>FEDERAL FUNDS</b>	
OAA Title III B Social Services	\$11,457,086

## Frequently Used Acronyms

AAA – Area Agency on Aging

ACS – American Community Survey

AIP – Annual Implementation Plan

ANYF – Aging in New York Fund

AoA – Administration on Aging

APS – Annual Plan Summary

ARRA – American Reinvestment and Recovery Act

CDSMP – Chronic Disease Self-Management Program

CSE – New York State Community Services for the Elderly Program

DFTA – Department for the Aging

DOHMH – New York City Department of Health and Mental Hygiene

DoITT – New York City Department of Information Technology and Telecommunications

EFPs – Emergency food programs

EISEP – Expanded In-Home Services for the Elderly Program

HIICAP – Health Insurance Information Counseling and Assistance Program

HRA – Human Resources Administration

HUD – Department of Housing and Urban Development

LGBT (aka GLBT, GLBTQ) – Lesbian, gay, bisexual, transgender, queer

MHA – New York City Mental Health Association

MIPPA – Medicare Improvements for Patients and Providers Act

NORC – Naturally Occurring Retirement Community

NORC SSP – Naturally Occurring Retirement Community Supportive Service Program

---

NYCHA – New York City Housing Authority

NYSOFA – New York State Office for the Aging

OAA – Older Americans Act

OEM – New York City Office of Emergency Management

SCRIE – Senior Citizen Rent Increase Exemption Program

Section 202 – Federal Section 202 Supportive Housing for the Elderly

SNAP – Supplemental Nutrition Assistance Program, i.e., Food Stamp program

USDA – United States Department of Agriculture

WEP – Work Experience Program
