Statement of Basis and Purpose

The foregoing rule amendment is promulgated pursuant to the authority of the Commissioner of Buildings under Sections 643 and 1043(a) of the New York City Charter. In accordance with the below, the Department is adding these new infractions to Subdivision (j) of 1 RCNY 102-01 and the Department's Penalty Schedule in order to adequately and effectively enforce the applicable local laws.

Section 1

The amendment to Section 102-01 of the Department's rules results from the enactment of Local Law 63 of 2009, which took effect on February 4th, 2010, and amended BC 1704.21 and 1704.22. The local law requires successful hydrostatic pressure testing of new and altered sprinkler and standpipe systems for buildings. Hydrostatic pressure tests will help ensure the integrity of these systems during construction or demolition operations.

Section 2

The amendments to Section 102-01 of the Department's rules result from the enactment of Local Law 64 of 2009 which took effect on February 4th, 2010, and amended BC 3303.8 by adding a new section BC 3303.8.1 requiring air pressurized alarm systems for dry standpipe systems during construction and demolition operations. An air pressurized alarm system will quickly alert workers, authorities and emergency responders whenever there is a compromise of the standpipe system.
