

Manhattan Bridge

Mobility and Safety Improvements

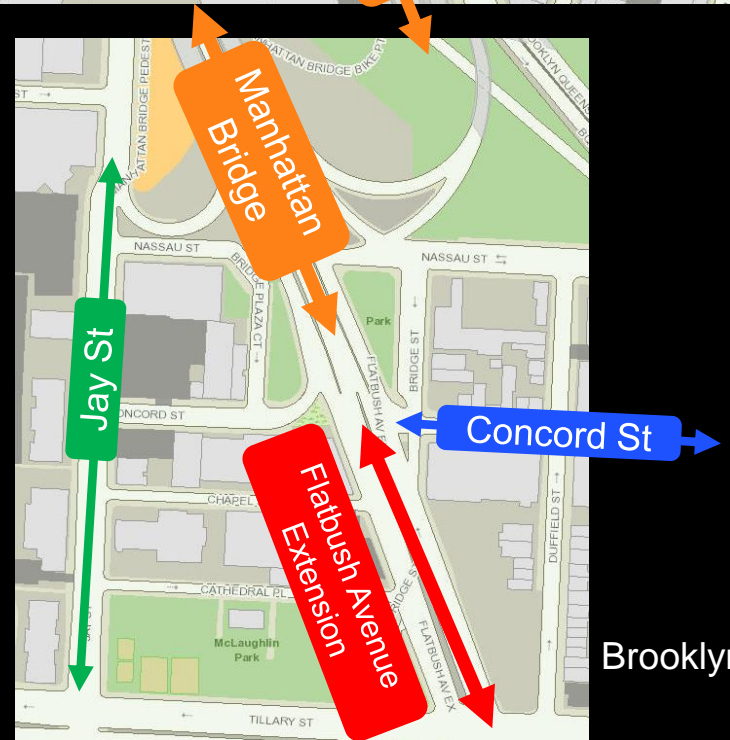

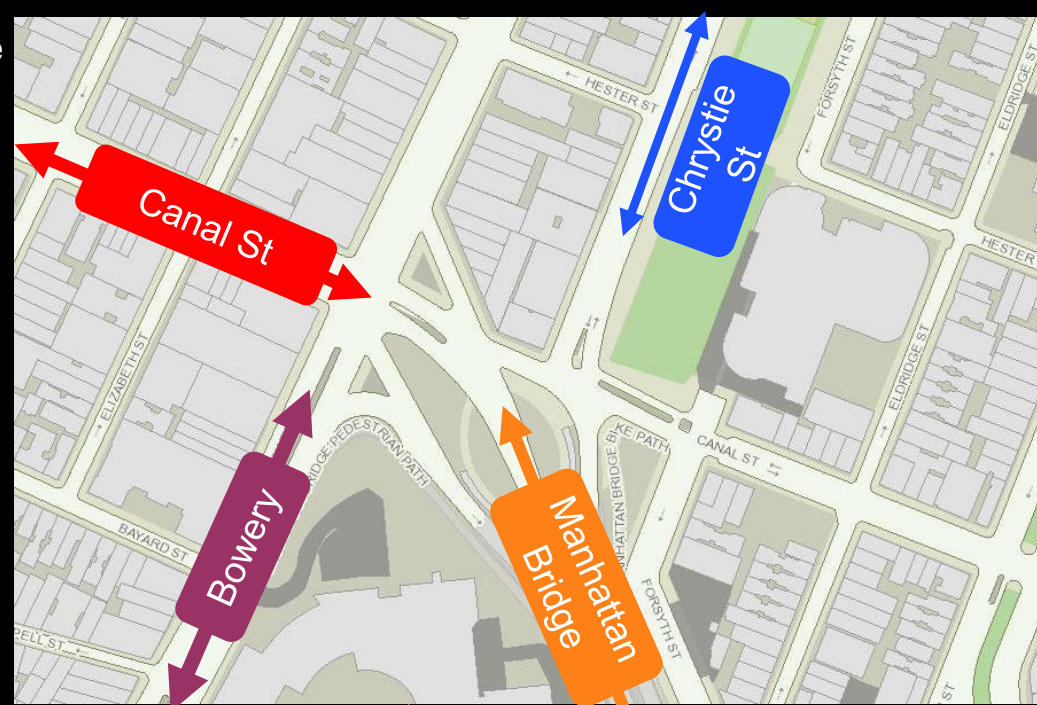

2015

New York City Department of Transportation, Pedestrian Projects Group
Presented to the Manhattan Community Board 3 Transportation Committee on May 12, 2015

Project Area

Manhattan Side

Brooklyn Side

Project Area

Background

- Community requests for pedestrian safety and access improvements, including Council Member Chin
- Vision Zero location
- High Crash Corridor – in top 10% of locations in Manhattan with crashes resulting in fatalities or severe injuries

Canal St - Bowery to Chrystie St, MN

Injury Summary, 2009-2013 (5 Years)

	Total Injuries	Severe Injuries	Fatalities	KSI
Pedestrian	16	7	1	8
Bicyclist	8	0	0	0
Motor Vehicle Occupant	133	9	0	9
Total	157	16	1	17

Fatalities, 01/01/2009-4/27/2015 : 1

Source: Fatalities: NYCDOT
Injuries: NYSDOT
KSI: Persons Killed or Severely Injured

Pedestrian Issues: Bowery Slip

High pedestrian
volume (1,525)
In peak hour

Unmarked & uncontrolled crossing
with high-speed vehicle conflict

Pedestrian Issues: Bowery

Long, uncomfortable crossings of Bridge entrance

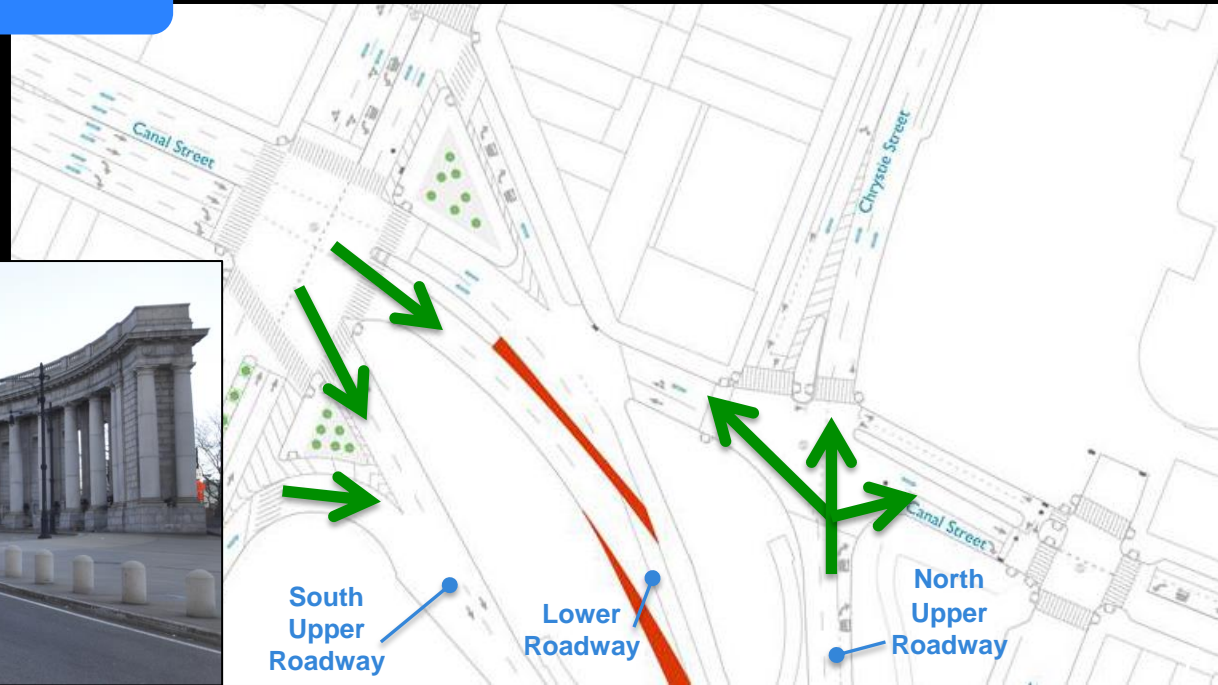

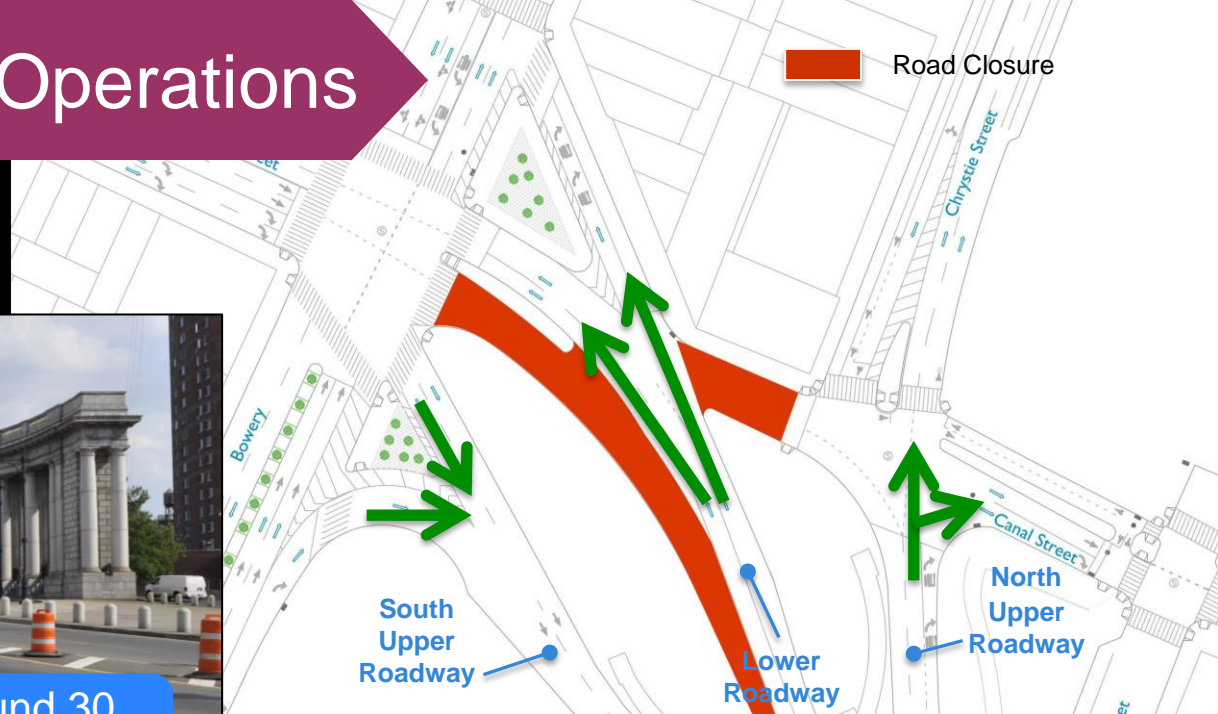

Manhattan Existing Operations

All other times Lower Deck:
Manhattan bound

Lower Deck is only Brooklyn bound 30
out of 168 hours per week

3-9PM Lower Deck:
Brooklyn bound

Inconsistent Operations

Reversal operation is inefficient & subject to non-compliance

PM, Canal St should be open

AM, Canal St should be closed

Traffic Issues: Conflict

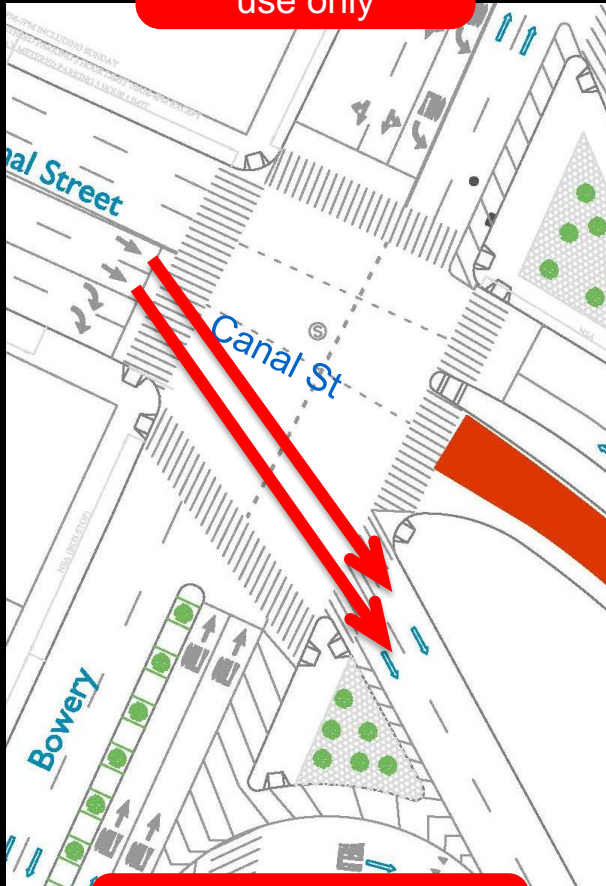

Unclear and conflicting lane assignments

133 crashes from 2009 - 2013

23.5% of vehicles make a conflict movement

Canal aligned for 3 PM to 9 PM use only

All other times awkward lane shift

40 crashes from 2009 - 2013

19% of vehicles make a conflict movement

Traffic Issues: Bowery Conflicts

Traffic Issues: Canal St Confusion

Traffic Issues: Chrystie St Conflicts

Rapid Response Toolkit

- Pavement markings
- Painted and/or textured surfaces
- Concrete sidewalk extensions
- New signage
- Signals
- Planters and delineators

Manhattan Proposal: Operational Changes

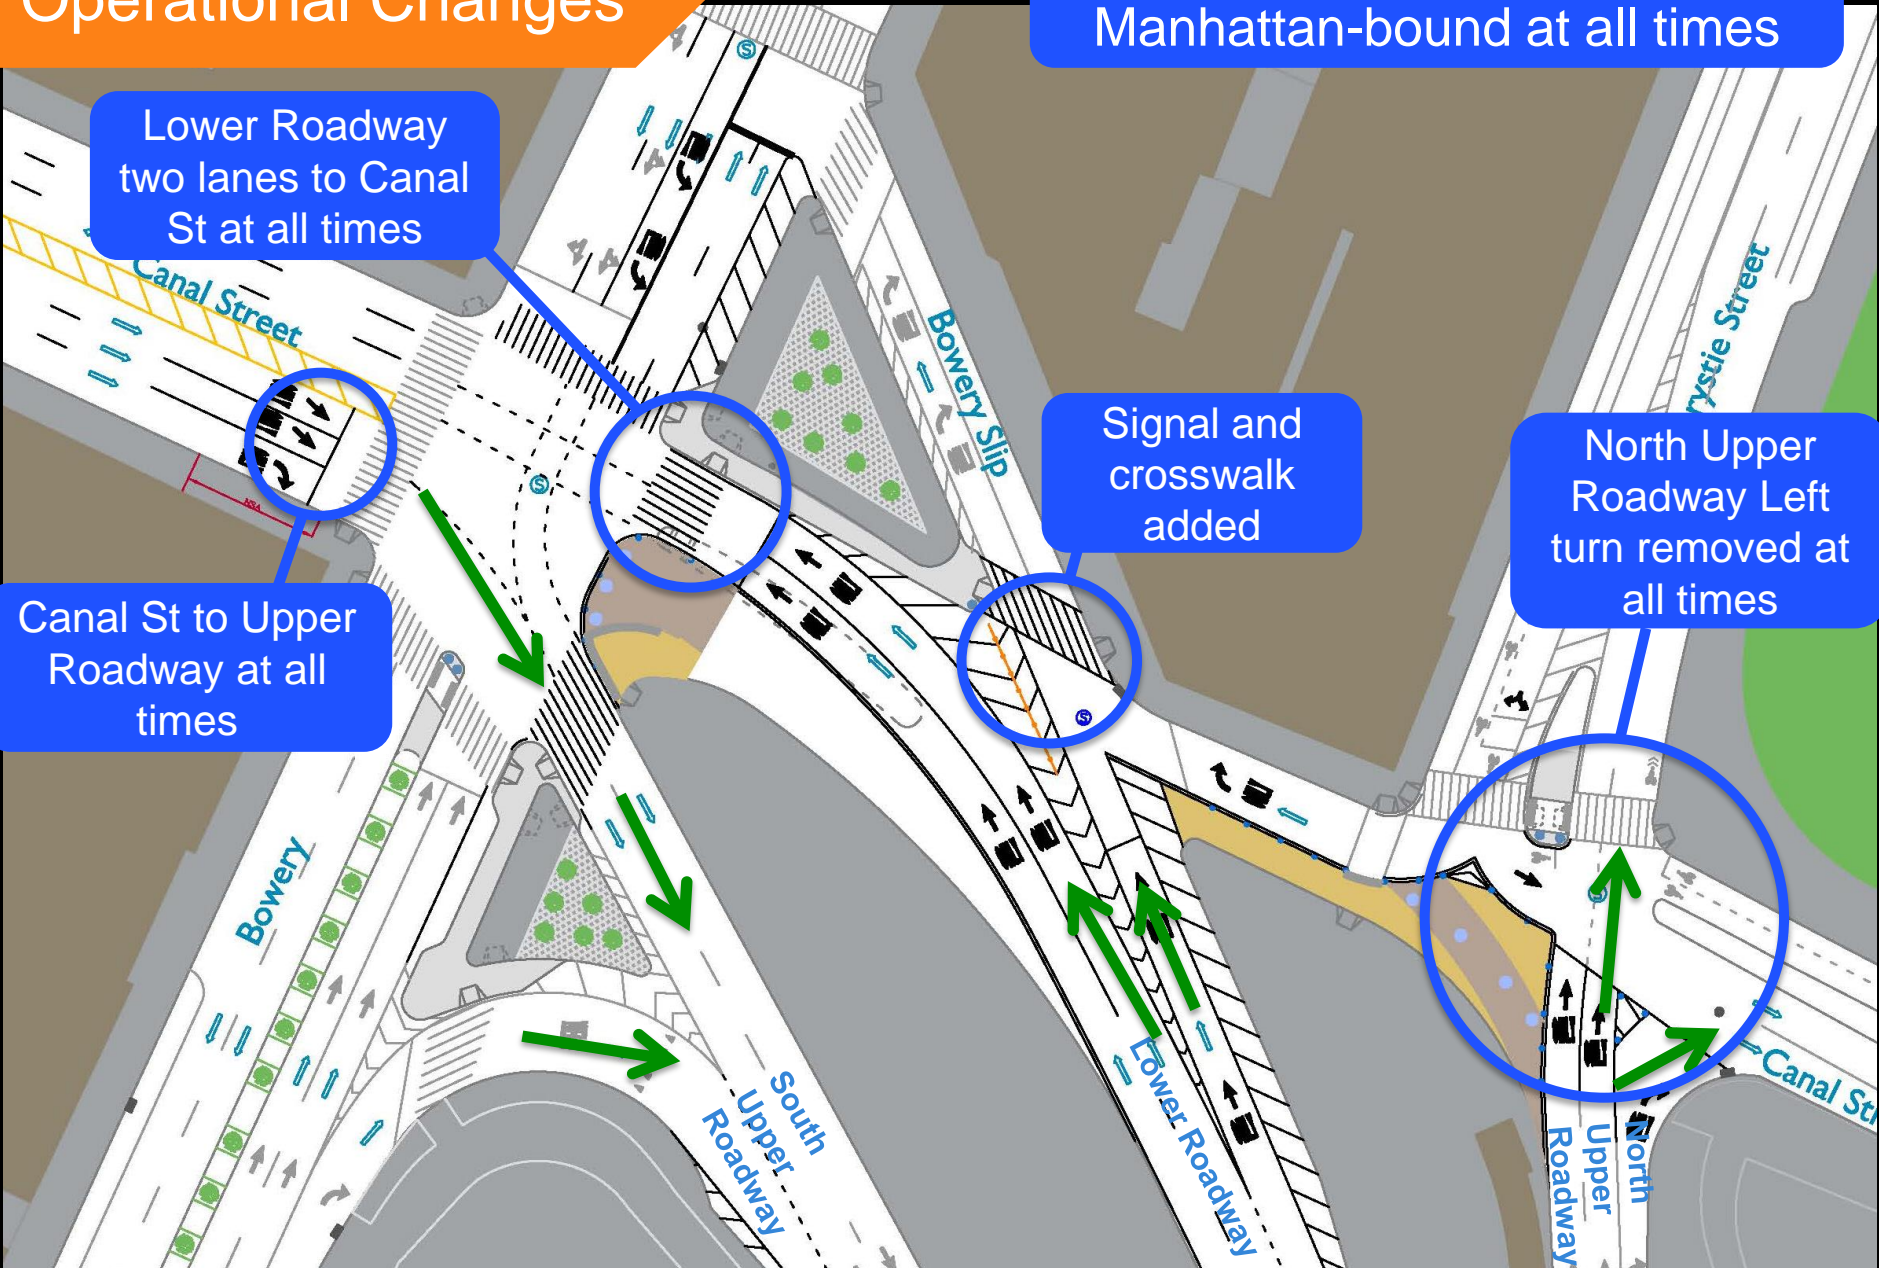

Lower Roadway
Manhattan-bound at all times

Lower Roadway
two lanes to Canal
St at all times

Canal St to Upper
Roadway at all
times

Signal and
crosswalk
added

North Upper
Roadway Left
turn removed at
all times

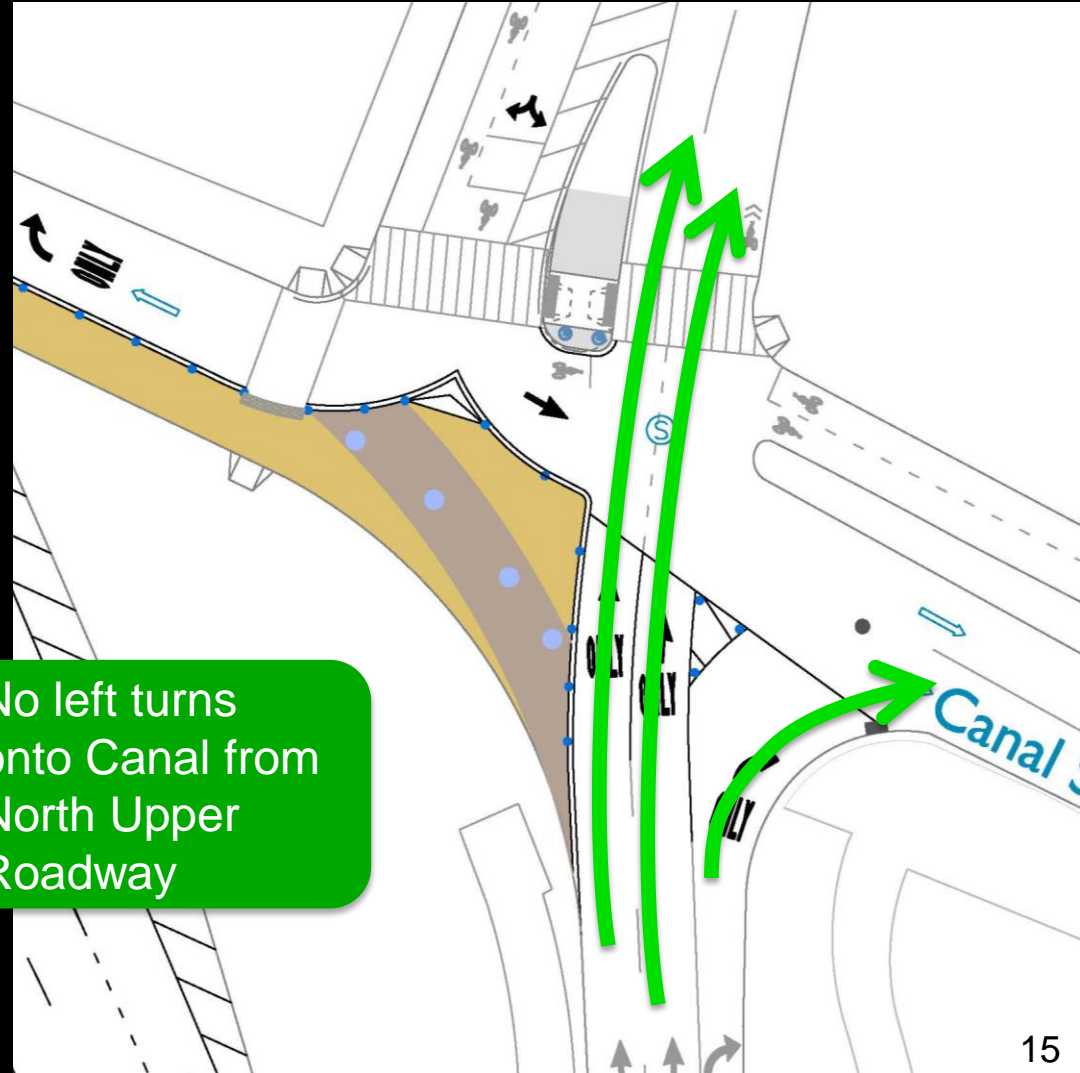

Proposal: Chrystie St

Existing inconsistencies

Proposed: Consistent Configuration

No left turns onto Canal from North Upper Roadway

Proposal: Bowery Slip

1,525
pedestrians
in peak hour

Extended
sidewalk

Existing

Proposal: Bridge Entrance

Proposal: Pedestrian exposure reduced by 42%

Existing long crossing distances

New painted pedestrian space

New concrete curb extension

Concrete median tip extension

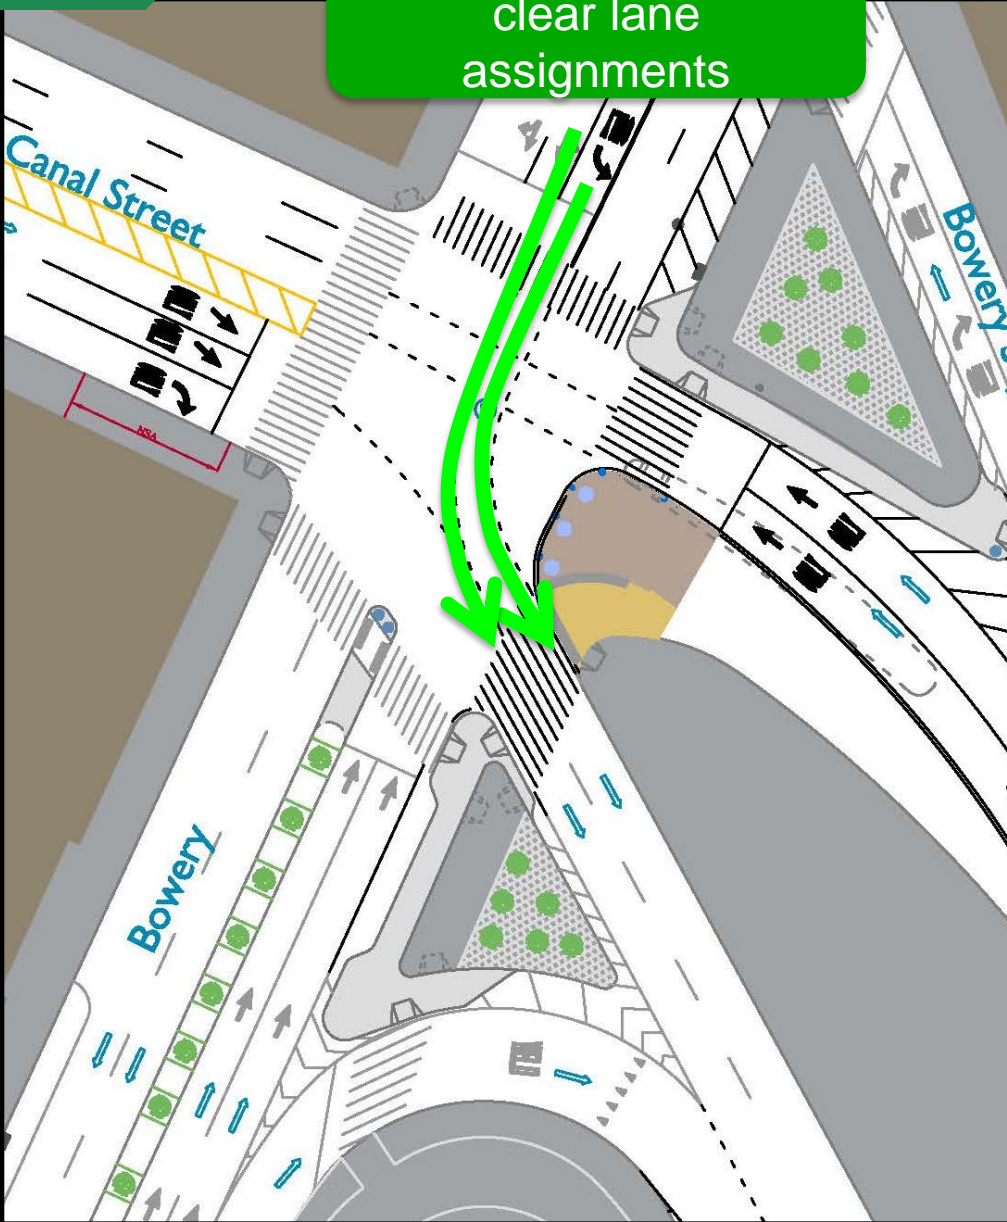

New concrete curb extension

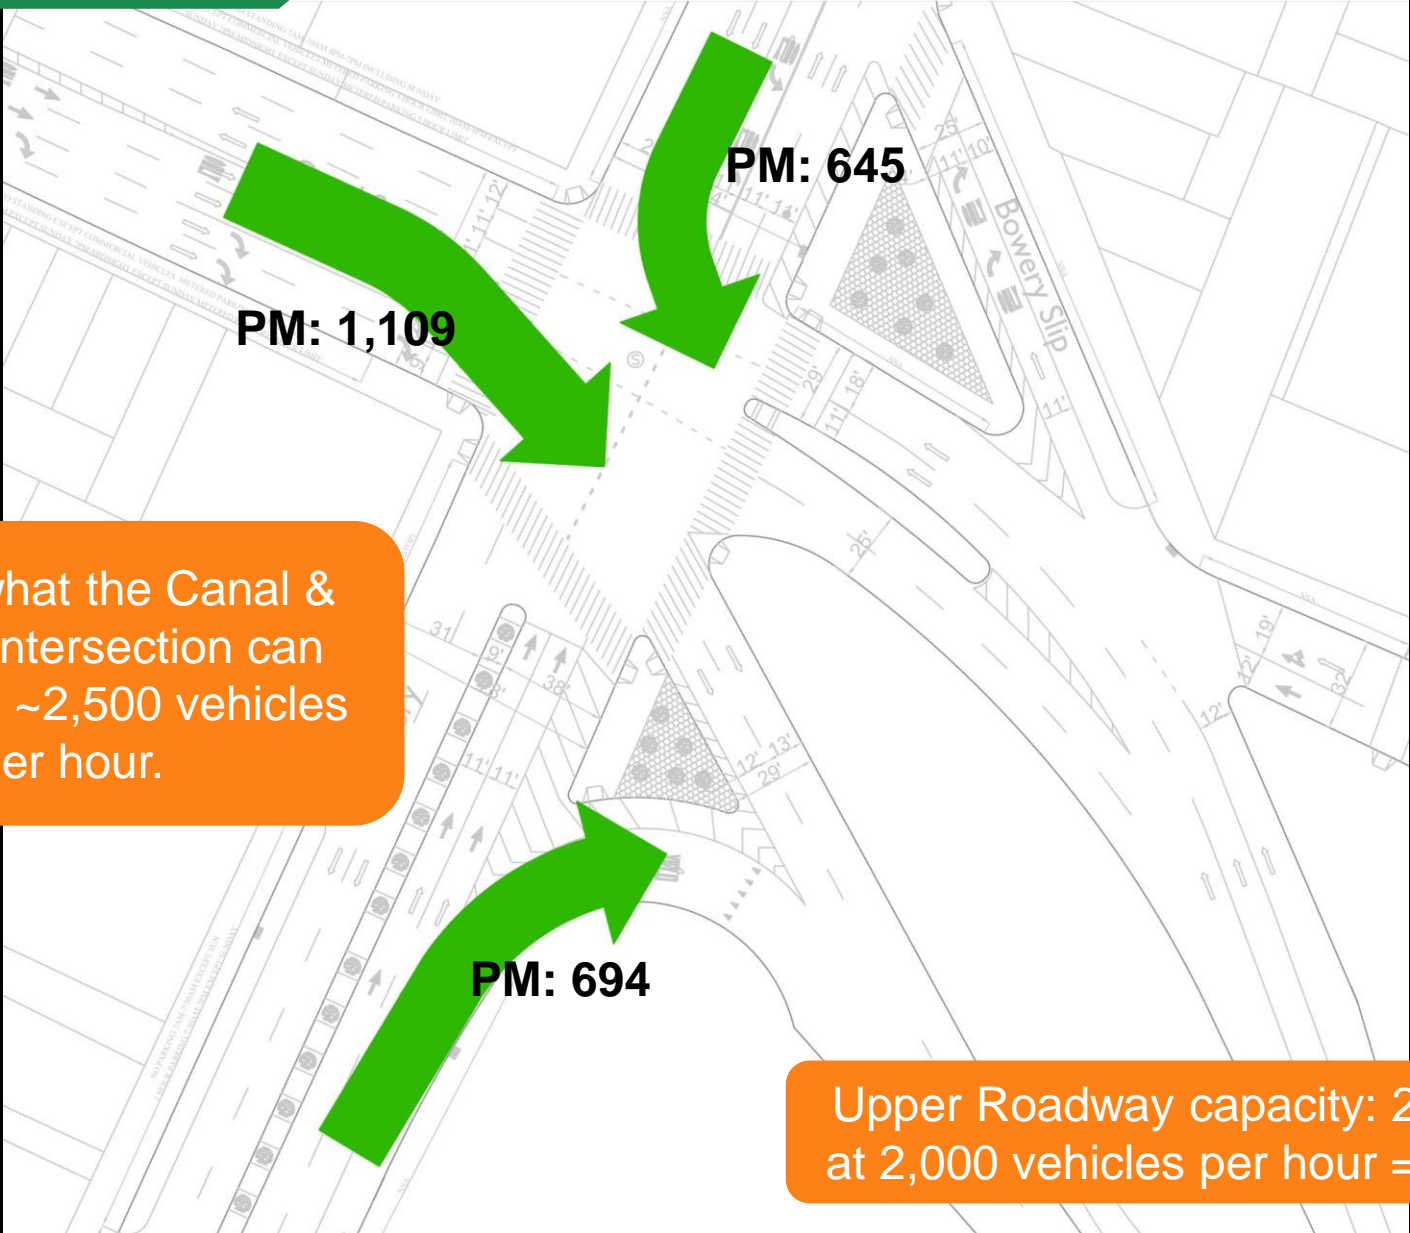

Proposal: Bridge Entrance

Proposal: Signed and clear lane assignments

Existing conflicting turns

Opportunities

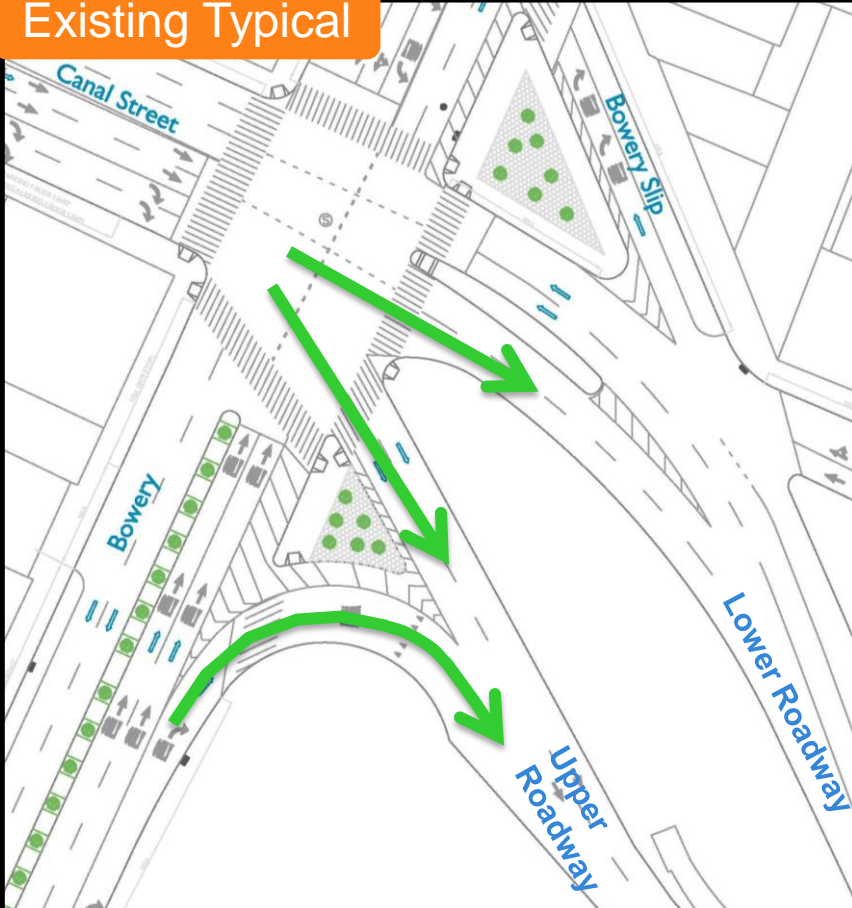

Limit to what the Canal & Bowery intersection can process = ~2,500 vehicles per hour.

Upper Roadway capacity: 2 lanes at 2,000 vehicles per hour = 4,000

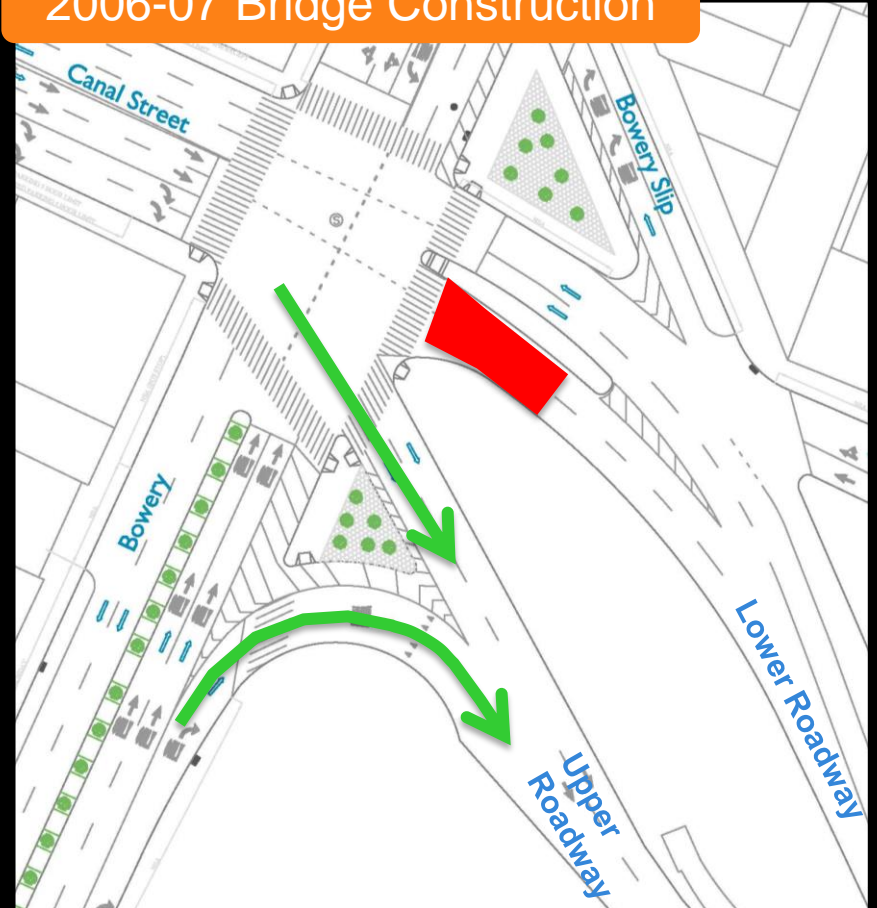

Traffic Considerations

Existing Typical

Brooklyn bound PM peak hour:
2,550 spread over Upper and
Lower Roadways

2006-07 Bridge Construction

PM peak hour: ~2,400 vehicles
accommodated on Upper Roadway
during Lower Roadway closure

Summary

- Reduces pedestrian crossing distances
- Improves pedestrian access and safety
- Clarifies traffic movements
- Maintains traffic capacity
