

IMPORTANT NOTICE

Division of Bridges

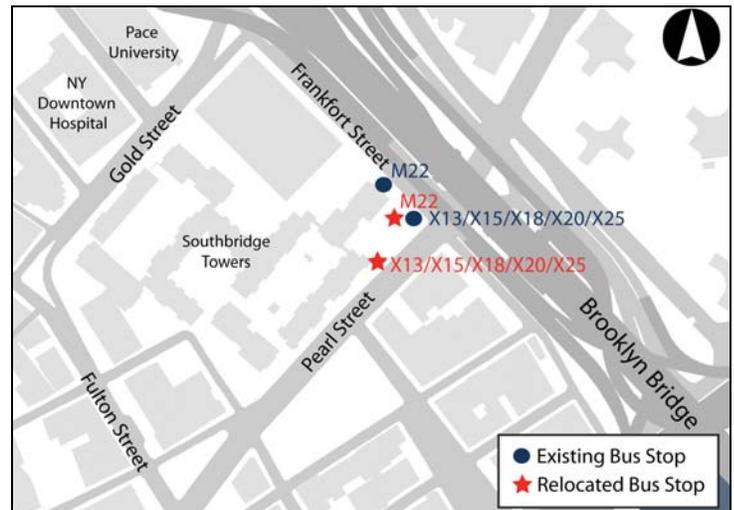

Rehabilitation of the Brooklyn Bridge

March 2010

CB 1 and 3 (Manhattan)

The New York City Department of Transportation is performing rehabilitation work on the Brooklyn Bridge ramps and approaches, which are in urgent need of repair. The entire span will also be repainted to prevent steel corrosion. This work will commence in the spring of 2010 and continue until 2014. To accommodate this construction, two bus stops on the south side of Frankfort Street, between Gold Street and Pearl Street, will be temporarily relocated:

- The express bus stop, serving the X13, X15, X18, X20, and X25, will be relocated around the corner onto the western side of Pearl Street, between Frankfort Street and Fulton Street.
- The local bus stop, serving the M22, will be moved about 100 feet east along Frankfort, to occupy the existing express bus stop location at the corner of Frankfort Street and Pearl Street. The bus shelter at this location will remain in place.

These relocations are necessary to prepare the area for painting work on the Brooklyn Bridge, slated to begin on or about May 1st. For more information on the project, please visit the website at http://www.nyc.gov/html/dot/html/bridges/brooklyn_bridge.shtml
