GO WITH THE WALK

Go with the walk

Unless there is a bike signal or sign, cross the intersection when the pedestrian signal shows the “walk”.

Slow your roll

Always use caution in the intersection and yield to people walking.

Check for bike signals

Check for bike signals: Some places will have a special signal just for bikes. If you see one, wait for the green bike to go.

Stop for red

Running a red light is dangerous. Always wait for “walk” or the green light.
