**The Corridor**

The **Nostrand Avenue BRT Corridor** extends 9.3 miles between Sheepshead Bay and Williamsburg in Brooklyn. This corridor connects to subway routes A/C/G/J/M/Z/2/3/5. The corridor generally follows the route of the B44 bus, which has both local and limited service. On an average weekday, 41,446 transit passengers ride the B44.

**Service Plan Features**

Compared to the existing B44 Limited service, the BRT will have increased hours of service, improved frequency, and faster travel times.

**BRT Operations**

- BRT lane between Flushing Ave and Farragut Rd, southbound along Nostrand Ave and northbound along Rogers and Bedford Aves; and between Avenue X and Emmons Ave.
- Sidewalks widened into the curb lane at BRT stations, so buses do not need to pull to the curb.
- Fewer stops on BRT than on existing Limited: 15 instead of 37.
- Off-board fare collection: pay before the bus comes, then get on at any door.
- Transit signal priority: traffic lights turn green or stay green as the BRT bus approaches.

**Potential BRT Stations**

- Williamsburg Bridge Plaza
- Lee Ave/Taylor St Station
- Flushing Ave Station
- Lafayette/DeKalb Aves Stations
- Fulton St Station
- St. John’s Place Station
