

PARK Smart NYC Pilot Program

What is PARK Smart NYC?

PARK Smart is a new program developed with the community to make parking easier while reducing congestion and improving safety. A six-month trial of **PARK Smart** will begin on October 6, 2008 in Greenwich Village.

PARK Smart aims to increase the number of available metered parking spaces by encouraging motorists to park no longer than necessary. The meter rate is higher when demand for parking is greatest and decreases when demand is lower.

The Greenwich Village pilot will be conducted in the area shown on the reverse side. Meter rates will be \$2.00/hr. from Noon to 4PM and \$1.00/hr. at all other times that meters are in effect. All other regulations will remain the same – hours in effect (i.e. Monday – Saturday for posted time periods) and duration (i.e. 1 Hour or 2 Hour meters).

Goals of PARK Smart NYC

- Increase the availability of parking spaces
- Increase safety
- Reduce double-parking
- Reduce pollution
- Reduce congestion from circling vehicles

How do I identify a PARK Smart NYC Meter?

All **PARK Smart** meters will have the **PARK Smart** logo shown in the upper-right hand corner of this leaflet. **PARK Smart** meters will accept both quarters and NYC Parking Cards. NYC Parking Cards are sold in \$10, \$20, \$50 and \$100 increments and are available from nearby merchants where you see the PARK Smart NYC logo as well as online at www.nyc.gov/dot.

For more information on **PARK Smart NYC** visit www.nyc.gov/dot or dial 311
