HERE.** 

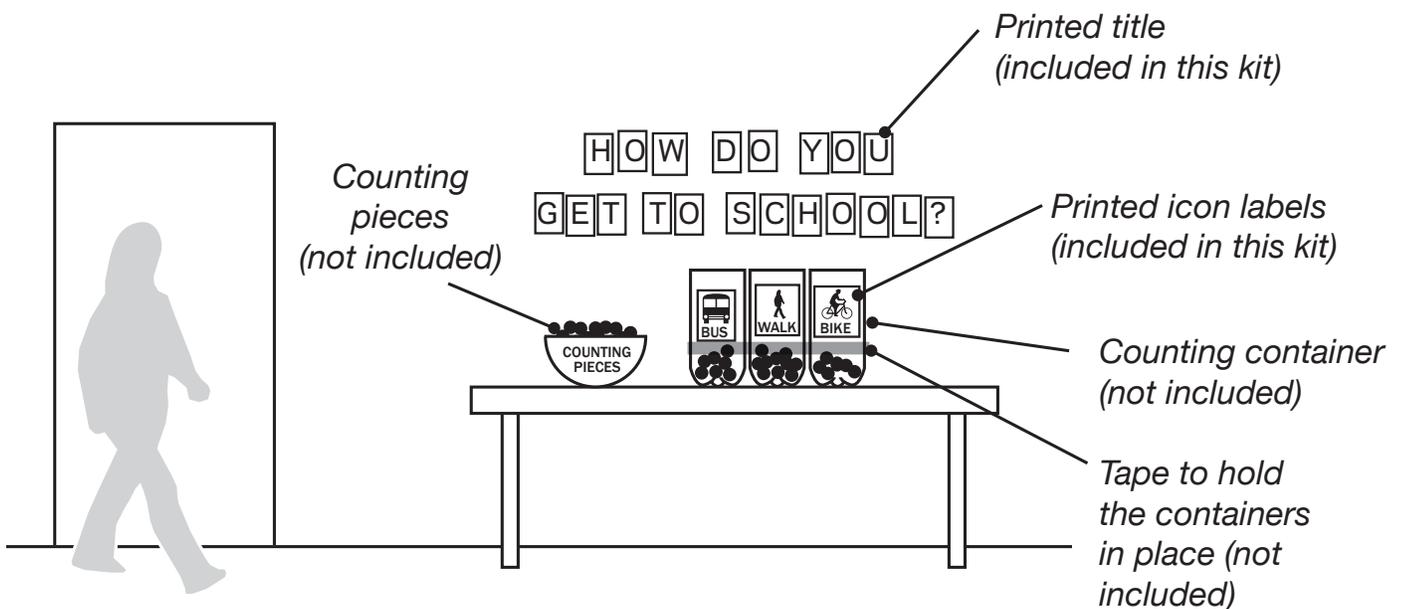

School-wide Activities

Counting Jar Diagram

Supplies

- **Chart title (included):** Print out the words and place them near the containers as the title.
- **Icons (included):** Print out these icons and tape them onto the front of the containers.
- Packing tape
- Containers: We suggest using 2-liter bottles or 1/2 gallon milk cartons. Cut the tops off so it's easy to toss in a counting piece.
- Counting pieces: Try using something small and low-cost such as pennies, dried beans or paper clips.

TIP: Many elementary schools have large amounts of walkers so make sure you have lots of room for that category.

Wall Chart Diagram

Supplies

- **Chart title (included):** Print out the words and place them above the chart as the title.
- **Icons (included):** Print out these icons and use them as labels for the chart.
- Butcher paper (or some type of backing for the entire chart.)
- Hang colorful markers or provide stickers to tally the results. Choose the best way for each student to “make their mark.”

TIP: Make sure it's hung low enough for the littlest ones!
