

**NEW YORK CITY FIRE DEPARTMENT
JOB VACANCY NOTICE**

CIVIL SERVICE TITLE Computer Specialist SW, L-III	Title Code # 13632
OFFICE TITLE Technical PM/SAN Administrator	SALARY \$81,290 - Minimum salary for full-time employees with less than 2 years City service \$93,484 - Minimum salary for full-time employees with more than 2 years City service
BUREAU/DIVISION/UNIT Technology Development & Systems/CAD Programming & Operations Group	LOCATION 9 MetroTech Center, Brooklyn, New York

JOB DESCRIPTION

The Technical Project Manager (TPM)/Storage Area Network (SAN) Administrator will support FDNY's production of a SAN environment with virtualized storage resources and services. Support and oversee the tracking of deliverables and schedules. Perform program management for several functional areas with focus on building, integrating and maintaining a detailed program schedule, driving for project task completion per the project plan; provide timely and accurate status to product stake holders. Define and manage overall project risks and take corrective action in a proactive manner to mitigate those risks. Drive continuous improvement of project processes – methodology, templates, best practices etc. based on lessons learned from projects.

- QUALIFICATION REQUIREMENTS:**
1. A baccalaureate degree from an accredited college, including or supplemented by 24 semester credits in computer science or a related computer field and two years of satisfactory full-time computer software experience in computer systems development and analysis, applications programming, database administration, systems programming, data communications, including one year in a project leader capacity or as a major contributor on a complex project; or
 2. A four-year high school diploma or its educational equivalent and six years of satisfactory full-time computer software experience as described in "1" above, including one year in a project leader capacity or as a major contributor on a complex project; or
 3. Education and/or experience equivalent to "1" or "2" above. College education may be substituted for up to two years of the required experience in "2" above on the basis that 60 semester credits from an accredited college is equated to one year of experience. A master's degree in computer science or a related computer field may be substituted for one year of the required experience in "1" or "2" above. However, all candidates must have at least a four-year high school diploma or its educational equivalent and at least one year of satisfactory full-time experience in a project leader capacity or as a major contributor on a complex project

PREFERRED SKILLS:
Five years or more experience in a complex enterprise environment.
In-depth experience with systems deployment, including project management, in particular with migration to ESX environment (P2V) and data.
Knowledge and experience implementing and maintaining Microsoft and Linux operating systems, NEC RAID Arrays and Falconstor storage virtualization appliances, HP and Dell Servers, Brocade Fiber Channel switches, and VMWare.
Broad experience across various IT technologies including networking protocols, encryption, security, firewalls, operating systems/ file-systems, multi-pathing, database and applications.
Excellent organizational, administrative, and scheduling skills needed to manage multiple high profile IT. Strong Microsoft office skills in Visio, Excel and PowerPoint.
