7. a) How often are fund accounts audited by an independent accountant?

Only audited by the New York State Insurance Department.

- b) Name and address of independent accountant

Response to question 6.

Upon appointment, each Firefighter becomes a member of the New York Fire Department Life Insurance Fund. A deduction of \$4.15 effective 01/01/1999 is taken from every paycheck and credited to this fund. Upon the death of an active member, a lump sum benefit of \$8,500 effective 01/01/1999 is paid to the decedent's beneficiary(ies). At retirement, a \$9.00 deduction effective 01/01/1999 is made from each monthly pension check. Upon the death of a retired member, a lump sum benefit of \$5,600 effective 01/01/1999 is paid to the decedent's designated beneficiary(ies). Effective 01/01/2001, the retired death benefit was increased to \$5,800.00. Recent legislation Chapter 654 of the Laws of 1999 prescribes rules on how future member premiums are set.

Effective on July 1, 2007, the retired death benefit payment was increased from \$5,800.00 to \$6,000.00 for member who died on or after that date. At its meeting on December 6, 2007, The Office of the Actuary and the Board of Trustees of the New York City Fire Life Insurance Fund also approved the increased retired death benefit of \$6,000.00 for beneficiaries of retirees who died on or after December 1, 2006.

**SPECIAL NOTES WITH REFERENCE
TO ITEMS 12-16 incl.**

TO THE EXTENT THAT THE FOLLOWING REQUIRED INFORMATION IS CONTAINED IN AN ACTUARIAL REPORT SUBMITTED WITH THIS ANNUAL STATEMENT. IT IS ONLY NECESSARY TO SO INDICATE UNDER THE PERTINENT ITEMS.

12. Number of participants:---as of 06/30/2006 (most recent valuation):

(a) Retired	15,683
(b) Active	11,672
(c) Separated from Employment with Vested Benefits	-

13. Type and Basis of Funding--State the methods of funding and determination of costs currently being used for the Plan.

Funding of the Fire Life Insurance Fund is solely from participant contributions (i.e., premiums). The level of these premiums is based on recommendations of the Actuary (from actuarial valuations), Board of Trustees approval and regulatory limitations.

14. Actuarial Assumptions and Methods

Attach a statement of the actuarial assumptions currently being used in determining the contributions or premium payments under the contract identified in item 2a. Any such statements or reports submitted as attachments should be related to the contract involved by marketing such attachments with the contracts identification. Where, under the type and basis of funding, figures are entered in item 15, below, a further statement is required showing the actuarial assumptions and methods used in deriving the liabilities of the Pension Plan, including a descriptions of precise meaning assigned to each of the terms of item 15, below, with respect to the amounts shown.

Statement of actuarial assumption attached--Yes*

*Note, the actuarial assumptions used for assessing the level of premium is shown in Appendix G of the attached report.

15. Except for the benefits which are completely guaranteed by the carrier, give the following information:

(Benefits which are completely guaranteed by the carrier are those benefits under the contract for which no further premiums and due or are to be paid to the insurance carrier.)

Amount of current and past service liabilities as determined by the actuarial valuation:

(a) (1) Total accrued actuarial liability including any past service or supplemental cost.	1/\$	* see page 14a
(2) Current service or normal cost. 2/		* attached
(b) Enter the amount of the applicable reserve. 3/		*

- 1/ Before any offset for reserves entered in (b).
- 2/ The annual amount from the last valuation should be used.
- 3/ This should include any applicable assets maintained under a collateral fund or insurance company separate account fund. Any such assets should be valued on the basis regularly used for the fund in reports to the United States Treasury Department or on the basis of aggregate cost or present value, whichever is lower. If not reported to the United States Treasury Department.

16. (a) Date of last valuation 6/30/2006

(b) If last valuation was conducted in whole or in part by an actuary or other person not in the full-time salaried employment of the insurance carrier, state the name and business address of such actuary or other person.

Name	Robert C. North, Jr. Chief Actuary,
	NYC Office of the Actuary,
Address	75 Park Place,
	New York, NY 10007.

Name and title of the officer of the insurance carrier who signed the document certifying the information from the insurance carrier:

Name	_____
Title	_____

Response to question 15.

*While the actuarial valuation is used to determine the adequacy of current member premiums versus current benefits promised, it is not utilized directly to determine contributions to the Fund. However, in the attached report, the valuation assets are shown in Appendix A and the actuarial present value of all future benefits is shown in Appendix B.

Re: Findings of the Actuary Regarding the June 30, 2006 Actuarial
Valuation of the New York Fire Department Life Insurance
Fund ("FLIF") - **Revised**

Dear Members:

Introduction

The Office of the Actuary ("OA") is presenting a summary of the Actuarial Valuation of the New York Fire Department Life Insurance Fund ("FLIF") as of June 30, 2006.

Recent History

In the most recent prior actuarial valuation of FLIF as of June 30, 2005, it was determined that the then monthly premium rate of \$9.00 per participant was sufficient to support the FLIF benefits then in effect.

A discussion of the Actuary's review of the June 30, 2006 valuation results and recommendations follows.

Board of Trustees
New York Fire Department
Life Insurance Fund
June 19, 2007
Page 2

Results and Comparison of Actuarial Valuations

Benefits

For the June 30, 2006 actuarial valuation, the benefit levels for participants (the "Current Plan") who decease are unchanged from the prior valuation as follows:

- Death in Active Service ("Active"): \$8,500.
- Death not in Active Service ("Retired"): \$5,800.

Census Data

Membership of FLIF has increased at June 30, 2006 to 27,355, which consists of 11,672 active participants and 15,683 retired/vested participants.

This represents a net increase of 195 participants since June 30, 2005, a net increase of 146 active participants combined with a net increase of 49 retired/vested participants. There were 717 new entrants added during the one-year period.

Between June 30, 2005 and June 30, 2006, FLIF paid death benefits of approximately \$2.6 million on behalf of 440 deceased participants.

Assets

For the period June 30, 2005 through June 30, 2006 the rate of return on FLIF assets was approximately 1.7% which is less than the current Actuarial Interest Rate ("AIR") assumption of 5.0% per annum.

Appendix A presents a comparison of the assets of FLIF as of June 30, 2005 and June 30, 2006.

Page 3

Comparison of Results with the Prior Valuation - Based on the Same Actuarial Assumptions

Presented in Appendix B are comparative results of the actuarial valuations of FLIF as of June 30, 2005 and June 30, 2006.

The actuarial valuation as of June 30, 2006 shown in Appendix B is based on the same actuarial assumptions ("2006 Assumptions") and methods as were used in the actuarial valuation as of June 30, 2005.

The results of this June 30, 2006 actuarial valuation indicate that, based on the census data and actuarial assumptions and methods employed, the \$9.00 per month participant premium rate currently being paid by each FLIF participant is sufficient to support the benefit levels currently being provided.

Based on the closed group of participants as of June 30, 2006, the results of the June 30, 2006 actuarial valuation indicate that the per participant premium rate required to adequately finance the current level of benefits for current FLIF participants is approximately \$8.29 per month, or \$0.71 per month less than the \$9.00 per month participant premium rate currently in effect.

Overall, using the 2006 Assumptions, the monthly participant premium rate required to maintain FLIF benefits has decreased from \$8.48 per month to \$8.29 per month.

Alternative Results

In recognition that the revised Investment Policy including 40% equity securities is expected to produce a greater rate of return on investments over time, a June 30, 2006 actuarial valuation has also been prepared assuming an AIR assumption of 6.0% per annum with all other actuarial assumptions the same ("6% Assumption").

In addition, a June 30, 2006 actuarial valuation has been prepared based on the discounting of projected benefits and participant premiums using expected yields on United States Treasury securities ("UST Assumption").

Board of Trustees
New York Fire Department
Life Insurance Fund
June 19, 2007
Page 4

These results based on the UST Assumption provide an analysis of the financial status of the Fund were the Fund to seek maximum security of payments.

The results of these two, alternative actuarial valuations are presented in a table in Appendix C.

Projected Cash Flows

Appendix D includes tables showing estimates of cash flow and assets of the Fund projected from June 30, 2006 based on current participants, the 2006 Assumptions and assuming no changes with respect to premiums or benefits. The first such table in Appendix C presents projections based on projected investment earnings of 5.0% per annum.

Under the 2006 Assumptions and projected investment earnings of 5.0% per annum, continuing the current premium and benefit policies is expected to result in the assets of the Fund being sufficient through Fiscal Year 2047 (the last year shown in the tables).

Also included in Appendix D are similar projections based on projected investment earnings of 4.0% per annum and 6.0% per annum.

Appendix E includes graphic presentations of some of the tabular information included in Appendix D.

Summary and Recommendations

The June 30, 2006 actuarial valuation shows that the sum of the present and prospective assets of FLIF exceed liabilities.

A separate study will be submitted to evaluate the level of benefits payable taking into account the implications of the recently revised Investment Policy that includes 40% equity securities and future changes in expected mortality (general trend toward improvements possibly offset by the impact of the World Trade Center ("WTC") attack).

Board of Trustees
New York Fire Department
Life Insurance Fund
June 19, 2007
Page 5

The Actuary recommends that the current benefit levels be continued until this additional study is completed.

Hypothetical Illustrations

As noted, the Actuary will present a study to investigate the possibility of enhancing FLIF benefits.

For illustration purposes only at this time, Appendix F includes tables showing estimates of cash flow and projected assets of the Fund based on current participants if premiums remain unchanged but the Retired Benefit increases to \$6,000 and the projected investment earnings are 4.0% per annum, 5.0% per annum and 6.0% per annum, respectively.

Under each of these assumptions (including projected investment earnings of 4.0% per annum), continuing the current premium while increasing the benefit is expected to result in the assets of the Fund being sufficient through Fiscal Year 2047 (the last year shown in the tables). Under the projected investment earnings assumptions of 5.0% per annum and 6.0% per annum, the level of expected FLIF assets through Fiscal Year 2047 remains significant.

Appendix G includes a graphic presentation of some of the tabular information included in Appendix F.

As discussed earlier, the results of a more extensive study of benefit levels will be provided.

Asset Allocation

Previously, the Actuary presented the Board of Trustees with information on the implications of possible changes to the Investment Policy (i.e., asset allocation policy) of FLIF.

The information was prepared on an open group basis (i.e., assuming future new entrants) and considered possible future revisions in benefits and/or premiums.

Board of Trustees
New York Fire Department
Life Insurance Fund
June 19, 2007
Page 6

The Board of Trustees voted in December 2004 to revise the Investment Policy of the Fund to include 40% equity securities.

As of June 30, 2006, the allocation to 40% equity securities had not been implemented due to complex technical issues.

As of the date of this letter, the Board of Trustees has approved investment manager selections for the allocation of 40% of FLIF assets to equities with allocations of 30% of FLIF assets to domestic equities and 10% of FLIF assets to foreign equities. The funding of these decisions is in the process of being implemented.

Actuarial Assumptions and Methods

The financial results presented in this letter have been determined based upon the census data for FLIF participants as of June 30, 2006 and upon the actuarial assumptions and methods shown in Appendix H.

The Actuary believes that the 2006 Assumptions basis, including an AIR assumption of 5.0% per annum, is somewhat conservative in light of the implementation of the Investment Policy including equity securities. However, the Actuary believes that these actuarial assumptions and methods are reasonable for the purpose of analyzing the financial status of FLIF as of June 30, 2006.

The Actuary believes that the 6% Assumption basis may more closely reflect the long-term expected rate of return on the Fund. The Actuary also believes that the UST Assumption basis provides results on a market-related basis that represent a useful check on the financial status of the Fund.

The demographic actuarial assumptions for the June 30, 2006 actuarial valuation of FLIF shown in Appendix H are the same as the demographic actuarial assumptions adopted by the Board of Trustees of the New York City Fire Pension Fund ("FIRE") for use in determining employer contributions to FIRE for Fiscal Years 2006 and after.

APPENDIX A

APPENDIX A

Following is a comparison of the assets of the New York Fire Department Life Insurance Fund as of June 30, 2005 and June 30, 2006:

ASSETS OF THE NEW YORK FIRE DEPARTMENT LIFE INSURANCE FUND*		
	June 30, 2005	June 30, 2006
Assets:		
Cash	\$ 2,335,078	\$ 2,767,542
Bonds: US Government	\$12,055,981	\$11,388,474
Foreign Government	1,000,000	1,000,000
Non-Government	<u>1,206,704</u>	<u>1,101,257</u>
Subtotal Bonds	\$14,262,685	\$13,489,731
Short-Term Investment Fund	\$ 2,327,690	\$ 3,305,179
Accrued Interest	157,692	220,155
Receivable Participant Contributions	<u>156,652</u>	<u>161,179</u>
Total Assets	\$19,239,797	\$19,943,786
Liabilities:		
Unpaid Claims Incurred during Year	\$ 992,070	\$ 680,100
Unpaid Reserve for Claims before BOY	<u>412,317</u>	<u>467,417</u>
Total Liabilities	\$ 1,404,387	\$ 1,147,517
Net Assets Available for Future Benefits	<u>\$17,835,410</u>	<u>\$18,796,269</u>

* Information shown (excepting cents) are from the Annual Statements for the New York Fire Department Life Insurance Fund filed with the New York State Insurance Department for the Fiscal Years ending June 30, 2005 and June 30, 2006.

Assets are valued at actual cost for cash and short-term investments and at Market Value for bonds.

APPENDIX B

APPENDIX B

Following is a comparison of the results of the actuarial valuation of FLIF as of June 30, 2005 and June 30, 2006 based on the benefit levels and monthly premiums in effect:

COMPARISON OF ACTUARIAL VALUATION RESULTS		
	June 30, 2005	June 30, 2006
	2005 Assumptions	2006 Assumptions
Benefit Level		
Active	\$ 8,500	\$ 8,500
Retired	\$ 5,800	\$ 5,800
Monthly Premium	\$ 9.00	\$ 9.00
Membership		
Actives/Inactives	11,623	11,672
Retired/Vested	<u>15,537</u>	<u>15,683</u>
Total Members	27,160	27,355
Funded Status		
Actuarial Present Value of Fund Benefits	\$54,912,300	\$55,325,449
Net Value of Fund Assets	\$17,835,410	\$18,796,269
Actuarial Present Value of Future Premiums	\$39,361,829	\$39,639,783
Excess of Fund Assets over Obligations	\$ 2,284,939	\$ 3,110,603
Monthly Premium Rate Required to Fund Benefits	\$ 8.48	\$ 8.29

<u>Valuation Date</u>	<u>Actuarial Assumptions Employed</u>
June 30, 2005	2005 Assumptions: 5.0% per annum AIR assumption and the June 30, 2005 FIRE demographic assumptions.
June 30, 2006	2006 Assumptions: 5.0% per annum AIR assumption and the June 30, 2006 FIRE demographic assumptions.

APPENDIX C

APPENDIX C

Following is a comparison of the results of the actuarial valuation of FLIF as of June 30, 2006 under alternative assumptions based on the benefit levels and monthly premiums in effect:

COMPARISON OF ACTUARIAL VALUATION UNDER ALTERNATIVE ASSUMPTIONS		
	June 30, 2006	June 30, 2006
	6% Assumption	UST Assumption
Benefit Level		
Active	\$ 8,500	\$ 8,500
Retired	\$ 5,800	\$ 5,800
Monthly Premium	\$ 9.00	\$ 9.00
Membership		
Actives/Inactives	11,672	11,672
Retired/Vested	<u>15,683</u>	<u>15,683</u>
Total Members	27,355	27,355
Funded Status		
Actuarial Present Value of Fund Benefits	\$47,830,623	\$53,619,688
Net Value of Fund Assets	\$18,796,269	\$18,796,269
Actuarial Present Value of Future Premiums	\$35,567,629	\$38,470,701
Excess of Fund Assets over Obligations	\$ 6,533,275	\$ 3,647,282
Monthly Premium Rate Required to Fund Benefits	\$ 7.35	\$ 8.15

<u>Valuation Date</u>	<u>Actuarial Assumptions Employed</u>
June 30, 2006	6% Assumption: 6.0% per annum AIR assumption and the June 30, 2006 FIRE demographic assumptions.
June 30, 2006	UST Assumption: Discounting of projected benefits and projected premiums using expected yields on United States Treasury securities and the June 30, 2006 FIRE demographic assumptions.

* Projected Fund assets are developed from premium and benefit payments which are based upon the census data, actuarial assumptions and methods as of June 30, 2006 and Fund investments are assumed to earn the specified rate of return.

APPENDIX G

Fire Life Insurance Fund

Estimated Fund Balances (Closed Group) - Revised Benefit

June 30

Projected Fund assets are developed from projected premium and benefit payments based upon the census data as of June 30, 2006 and the 2006 Assumptions and adjusted to increase Retired Benefits to \$6,000. Fund investments are assumed to earn the specified rate of return.

APPENDIX H

APPENDIX H

The June 30, 2006 actuarial valuation of FLIF was prepared based upon the following actuarial assumptions and methods:

Actuarial Interest Rate	5.0% per annum.*
Demographic Assumptions	Same as those used for actuarial valuation of FIRE (2006 Assumptions).**
Funding Method	Level premium.
Valuation of Assets	Market Value for bonds, actual cost for short-term investments.
New Entrants	Closed group valuation without new entrants.

- * Alternative calculations have been prepared using AIR assumptions of 6.0% per annum and the expected yields on United States Treasury securities.
- ** These are the demographic actuarial assumptions adopted by the Board of Trustees of FIRE for use in determining employer contributions to FIRE for Fiscal Years 2006 and after.

A complete set of the FIRE demographic assumptions are presented in the August 31, 2005 report entitled "Proposed Changes in Actuarial Assumptions and Methods for Determining Employer Contributions for Fiscal Years Beginning on and After July 1, 2005 for the New York City Fire Pension Fund".

Director, Board of Trustees

MEMORANDUM

TO: Board of Trustees
Fire Life Insurance Fund

FROM: Robert C. North, Jr. 
Chief Actuary

SUBJ: \$6,000 Retiree Death Benefit

DATE: December 6, 2007

At its meeting on June 22, 2007, the Board of Trustees of the Fire Life Insurance Fund ("FLIF") approved an increase from \$5,800 to \$6,000 in the death benefit payable to beneficiaries of retirees who died on or after July 1, 2007.

Due to some misunderstanding, the beneficiaries of 30 retirees who died PRIOR to July 1, 2007 were paid \$6,000 or had their prior \$5,800 payment increased to \$6,000.

The earliest date of death for these retirees was December 2006.

Board of Trustees
Fire Life Insurance Fund
December 6, 2007
Page 2

Absent action by the Board of Trustees, the Actuary believes the overpayments would need to be recaptured.

Asking the beneficiaries to return the money would be administratively demanding and could create significant hardship for the beneficiaries and ill will for FLIF.

As a means of avoiding this problem, the Actuary believes that it would be more practical to revise the date of death for retirees after which beneficiaries would be entitled to the current \$6,000 payment rate.

By establishing December 1, 2006 as the date of death for retirees after which a beneficiary would receive a \$6,000 payment upon the death of a retiree, those paid erroneously would now be considered paid correctly.

An additional \$200 per retiree would need to be paid on behalf of approximately 220 deceased retirees who had died between December 1, 2006 and June 30, 2007.

Board of Trustees
Fire Life Insurance Fund
December 6, 2007
Page 3

The administrative staff of FLIF has indicated that this would not be an overly burdensome task.

In reviewing this situation, the Actuary believes the approximately \$44,000 in additional benefits would not significantly harm the financial status of FLIF.

Therefore, the Actuary recommends that the currently authorized \$6,000 death benefit payable to beneficiaries of retirees who die on or after July 1, 2007 be revised to permit payment to the beneficiaries of those retirees who die on or after December 1, 2006.

A draft Resolution is attached to this memorandum.

If you have any questions, please contact Mr. Brian S. Kheel, Mr. Sam H. Rumley or me.

Fire Life Insurance Fund
Resolution Adopting Revised Effective
Date for \$6,000 Retiree Death Benefit

WHEREAS, the Board of Trustees of the New York City Fire Life Insurance Fund, on June 22, 2007, approved an increase in the death benefit to \$6,000 for retirees who die on and after July 1, 2007, and

WHEREAS, due to a misunderstanding, the beneficiaries of 30 retirees who retired and died prior to July 1, 2007 received the \$6,000 death benefit instead of the \$5,800 to which they were entitled, and

WHEREAS, the retirees whose beneficiaries received payments died on or after December 1, 2006, and

WHEREAS, it would be administratively complex and could cause hardships for the beneficiaries to seek collection of the overpayments, and

WHEREAS, it is desired to find an administratively workable, non-arbitrary and non-preferential solution to this problem, and

WHEREAS, it has been determined to be administratively feasible to authorize the payment of \$6,000 as the death benefit to beneficiaries of all retirees who died on and after December 1, 2006, and

WHEREAS, the Actuary has reviewed this situation and, in a memorandum dated December 6, 2007, concluded that the financial implications are modest and do not represent a significant concern for FLIF, and has recommended this approach, and

WHEREAS, the Board of Trustees believes this recommendation to be the most appropriate means of handling this situation, now, therefore, be it

RESOLVED, that the death benefit of \$6,000 shall be payable to the beneficiaries of retirees who die on or after December 1, 2006.
