Does Your Data Center Meet the Portfolio Manager Definition?

Do you have a Data Center that relies on Portfolio Manager generated IT Energy estimates?

No → No action required.

Yes ↓

Is your Data Center a closet or small room **without** supplemental air / dedicated conditioning?

Yes → This is **not** a Data Center as defined by Portfolio Manager.

Reclassify the square foot of this space as the primary building type and include the number of servers in the count of PCs. Delete the Data Center space.

No ↓

Is your Data Center a room that is greater than 2,000 sq ft, with a raised floor, dedicated conditioning, and equipped to meet the needs of sophisticated data storage and processing?

Yes → This is a Data Center by Portfolio Manager's definition. **After July 1, 2013, EPA will no longer automatically apply IT energy estimates**. EPA encourages measuring and tracking the actual IT energy.

No ↓

Does the space have a constant total power load (including non-IT energy use for power distribution and cooling systems) of more than 75 kW?

Yes → (connects to Data Center by Portfolio Manager's definition box above)

No ↓

This is **not** a Data Center as defined by Portfolio Manager.

Reclassify the square foot of this space as the primary building type and include the number of servers in the count of PCs. Delete the Data Center space.
