Proposed Master Plan to Allow Changes to Content of Painted Advertising Sign

Secondary Facade of 393 West Broadway [facing North]

Background of sign shall be limited to a single color

Sign space shall be distinguished from surrounding facade by either a black or white colored border or background color different from the surrounding area

Distinction of definitions between Photorealistic and Graphic/Illustrative signs with criteria for both

Photorealism: reproduction of an image utilizing shading to achieve a photographic quality painting

- Black and White photorealistic images, with one accent color (with various shades of the color allowed), not to exceed 60% of sign space (including text)
- Color photorealistic images not to exceed 40% of the sign space (including text)

Graphic: Any number of painted colors that are clearly separated with no blending or shading between them

- Graphic images with less than 5 colors (with various shades per color allowed), not to exceed 60% of sign space (including text)
- Graphic images with 5 or more colors (with various shades per color allowed), not to exceed 40% of sign space (including text)
