GREENWICH VILLAGE HISTORIC DISTRICT DESIGNATION REPORT:

Volume 1 (1969) #308

“This three-story residence was one of a row of three houses built by Solomon Banta in 1847, of which two were replaced by the apartment building at Nos. 310-312. This was originally a Greek Revival house; it still retains the proper proportions and corniced lintels at the windows and doorway. A high brick parapet with stone coping replaces the original cornice.”

NEW YORK CITY LANDMARKS PRESERVATION COMMISSION-
ROWHOUSE MANUAL, P4

BRICKS AND BROWNSTONE
THE NEW YORK ROW HOUSE 1733-1929
CHAPTER 2 GREEK REVIVAL STYLE, P97

The Greek Revival Style
(1830-1850)

- characterized by simple and bold architectural elements, imitating Greek motifs;
- three to three and one-half stories high with basement, sometimes an attic story below the cornice;
- brownstone base with brick upper façade (laid in English bond);
- stoop of medium height with wrought- or cast-iron handrails, fence, and newels
- vertical paneled wood door;
- grand entrance pilasters, sidelights, and stone enframements;
- six-over-six double-hung wood windows, six-over-nine often on the parlor floor, and sometimes small attic windows;
- modest molded stone window lintels and sills; and
- wood dentiled cornice.

Some of the most beautiful Greek Revival style iron work was on the parlor-window balcony, a feature introduced on New York row houses around 1830. The palatial Late Federal row houses often were built five or ten feet deeper than similar houses only a few years earlier to gain the large parlors suitable for entertaining, and parlor windows dropped to the floor to light and ventilate the large rooms. To shield the parlor from the sight of passersby on the street, the builder added a simple iron railing or "window guard" to the lower portion of each parlor window or a single several-foot-high balcony, protruding several feet from the façade and running between the two windows. With a larger area than the stoop railing or single window guardrailing, the two-window-wide balcony offered splendid opportunities for iron-work decoration, and most New York row houses had parlor windows that dropped to the floor and were shielded by the low iron balcony into the 1850s. Though most are gone because of decay and wartime scrap-iron drives, the few remaining parlor-window guards and balconies in Manhattan and Brooklyn show the iron work and Greek Revival decorative motifs in perhaps their most elaborate and imaginative forms.
