COMMUNITY ADVISORY NOTICE

INSTALLATION OF WATER MAINS ALONG GRAND STREET

PROJECT # MED 609 (606)

Borough: Manhattan

March 13, 2014

TEST PIT EXCAVATION

Along Grand Street between Bowery Street and Essex Street

Beginning the week of March 17, 2014

Beginning the week of March 17, 2014, and continuing for approximately 6 weeks, the NYC Department of Design and Construction (DDC) will be excavating test pits along Grand Street and at all intersections between Bowery and Essex Streets. There should be about 25 Test Pits Excavations and take approximately 2 to 3 days for each test pit. Typical Work Hours are 7AM to 3:30PM. The permitted work hours are 7AM to 10PM Monday to Friday; 8AM to 10PM Saturday and Sunday; 9PM to 5AM Grand Street between Bowery & Forsyth Street.

WHY IS THIS WORK BEING DONE?

This work is being performed in advance of the Grand Street Trunk Water Main Project and will allow DDC to identify the location of existing sub-surface infrastructure and utility hardware. The information gathered from the test pits will be used to determine the location of the new trunk water main. Please note: After work hours, the construction barriers Zones will be removed. All test pit excavations will be temporary restored upon completion.

COMMUNITY IMPACTS DURING TEST PIT EXCAVATIONS

The following are temporary impacts while the work is being performed:

- Parking will be restricted in certain locations
- Pedestrian access will be maintained at all times.
- One pedestrian crosswalk may be fully closed at a time during work operations
- Signs will be posted for directing pedestrians to the opposite crosswalk. All other crosswalks will be maintained during work hours.
- During work hours, the construction barriers will allow 1 lane for vehicular traffic with shared Bike Lane on Grand Street.

We appreciate your cooperation and thank you for your patience while we rebuild NYC's infrastructure.
