

Size and Weight

(single above ground bench)

Length: 82.67 in

Width: 35.43 in

Height: 19.68 in

Weight (empty): 66 lbs (30 kg)

Weight (full): 1168 lbs (530 kg)

Capacity

(single above ground bench)

132 gal

Rain Collection

317 gallons ; 50 inches rainfall

Material

50% Recycled Polyethylene (LLDPE). UV Resistant

Components

Single Unit:

Bench x1

PVC socket x4

PVC screw in cap x2

Inlet buttons x 50

Outlet Valve (lockable)

Rechargeable pump battery

Self priming water pump

Water Bench

Notes:

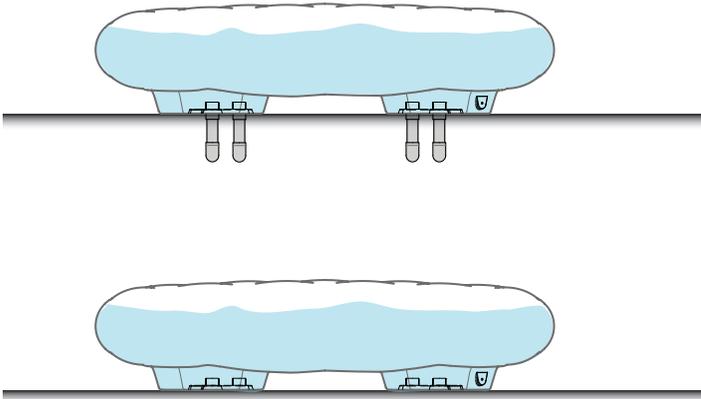

132 gal would be able to irrigate a garden radius of about 30 sq ft over six months.

The bench needs around 21 inches of rainfall to fill up completely.

A september installation, would mean that the bench would fill up for the first time around March (if none of the collected water is used during this time).

Water Bench

Assembly

Option 1

Single Fixed Unit- For public squares and street solutions. Anchored to the ground in concrete pits or packed in soil.

Option 2

Single Moveable Unit- For terrace gardens and private yards. No installation required. Completely above ground.
