

CERTIFIED IT ADMINISTRATOR (WAN)

Serves as the project leader and network technical advisor, responsible for network security and application back-up. This entails performing regular independent validation and verification of network system functionality; conducting vulnerability assessments which include testing firewalls, anti-virus programs, and security protocols; and designing disaster recovery plans.

In addition to meeting the Qualification Requirements, all candidates must possess one of the following Professional Vendor certifications:

Cisco Certified Internetwork Expert (CCIE) Security, CCIE Routing and Switching, or CCIE Service Provider

Cisco Certified Internetwork Professional (CCIP)

Cisco Certified Network Professional (CCNP)

QUALIFICATION REQUIREMENTS

1. A BA/BS and 2 yrs of FT (not classroom based) exp in wide area network planning, design, configuration, installation, troubleshooting, integration, performance monitoring, maintenance, enhancement, and security management; or
2. A HS diploma or its equiv. and 6 yrs of FT (not classroom based) IT exp. of which at least 2 yrs must have been as described in "1" above; or
3. A Masters in computer science or a related field may substitute for 1 yr of exp. However, all candidates must have at least 1 yr of FT (not classroom based) IT exp. as described in "1" above.

Salaries commensurate with experience and salary history.

Interested candidates should submit a cover letter and two (2) copies of their resume to:
