Please also note that the first paragraph on page 3C-6 of the CEQR Technical Manual should be modified to read as follows (text with ~~strikethrough~~ is to be deleted):

"Table 3C-4 above calculates by borough the estimated number of low- to moderate income housing units that could yield at least 50 children eligible for publicly financed child care. ~~(The calculations are based on the ratios for elementary school students per low- and low/moderate-income housing unit, as presented in Table 3C-2 in Section 231. The income levels used to determine eligibility for subsidized housing— up to 80% of the Median Family Income (MFI)— are roughly equivalent to child care financial eligibility levels.)~~"
