 Left-turn adjustment, fLT

For special case of single-lane approach opposed by multilane approach, see text.

- * If $Pl \geq 1$ for shared left-turn lanes with $N > 1$, then assume de-facto left-turn lane and redo calculations.
 - ** For permitted left-turns with multiple exclusive left-turn lanes, $flt = fm$.
- For special case of multilane approach opposed by single-lane approach or when $gf > gq$, see text.
