

ASSETS

The Private Assets & Logistics Management System (PALMS) is a web-based registry of goods and services businesses may have available for use by the City in an emergency.

After a major disaster, businesses are often among the first to provide support. PALMS ensures donations are used and distributed effectively in the wake of an emergency.

PALMS helps the City identify private assets, such as generators, fuel, office space, and skilled labor (manual and professional) before an emergency occurs.

If your business has assets that may help the City during an emergency, register with PALMS to ensure they can be accessed and distributed effectively.

A list of most-needed assets is available on OEM's website, www.NYC.gov/oem.

Learn more about how your business can stay informed, access facilities, and help the City respond to emergencies at www.NYC.gov/oem. If you have specific questions about these programs contact OEM's public/private initiatives team at publicprivate@oem.nyc.gov, or call 311.

ASSETS ACCESS & INFORMATION

Working with the private sector before, during, and after emergencies.

For more information and to enroll in PALMS log on to www.NYC.gov/oem or call 311

Michael R. Bloomberg, Mayor
Joseph F. Bruno, Commissioner

New Yorkers walk across the Brooklyn Bridge during the 2003 power outage.

When disaster strikes, its effects can ripple through every aspect of life in New York City. A major incident, such as a fire or water main break, may require the City to shut down utilities or restrict access to an entire block, affecting all businesses and organizations in the area. In addition to coordinating the City's response to disasters, the New York City Office of Emergency Management (OEM) works with the private sector to ensure they have the resources and information they need to make decisions before, during, and after an emergency.

ACCESS

The Corporate Emergency Access System (CEAS) pre-credentials essential employees for access to restricted areas following an emergency. When activated, the system allows these employees to shut down or sustain core business functions until normal entry is restored.

CEAS is the only program recognized by the NYC Police Department and OEM that allows emergency access to restricted areas. If there is a major disruption in your work location, CEAS may enable you to:

- Gain access to your facility.
- Rescue valued assets such as cash, checks, receipts and certificates.
- Retrieve vital records such as contracts, invoices, customer records, insurance documents, tax records, and licenses.
- Shut down technology or industrial systems.
- Restore essential building functions.
- Retrieve critical equipment, such as laptops and servers.

For more information and to enroll in CEAS log on to www.CEAS.com or call 311

INFORMATION

CorpNet is a free e-mail service that provides businesses with current, accurate information about emergencies to aid decision making.

OEM's Watch Command monitors public safety radio and information networks, news media, and weather 24 hours a day. OEM sends messages to CorpNet subscribers about:

- Major fires
- Building collapses/construction incidents
- Water main breaks
- Widespread utility outages
- Explosions
- Weather-related information
- Major transportation incidents
- Hazardous materials incidents
- Planned events, like parades or VIP visits
