December 7, 2013

Where can I view project documents?

Online at:

<http://www.nyc.gov/hml/oer/html/repository/RBrooklyn.shtml>

Internet access to view documents is available at the public library. The closest location is:

Brooklyn Library
Brooklyn Heights Branch
280 Cadman Plaza
Brooklyn, New York 11201

Please call (718) 623-7100 for hours of operation

Whom can I contact for project information?

Rebecca Bub
Project Manager
NYCOER
100 Gold Street, 2nd Floor
New York, NY 10038
(212) 341-2073
Rbub@dep.nyc.gov

and

Shaminder Chawla
Assistant Director
NYCOER
(212) 442-3007
Schawla@dep.nyc.gov

NYC VCP Cleanup Plan Available for Review and Comment

The New York City Office of Environmental Remediation (OER) provides this Fact Sheet pursuant to New York City's Voluntary Cleanup Program (VCP). An application has been submitted by Dumbo Assemblage LLC for enrollment of the property located at 173, 177 and 185 Front Street in the DUMBO section of Brooklyn, New York and identified as Block 41, Lots 44, 42 and the southern portion of Lot 13 into the VCP. The Remedial Investigation Report (RIR) details the results of an environmental investigation at the site including the nature and extent of contamination. The draft Remedial Action Work Plan (RAWP) proposes remedial actions to address contamination delineated in the RIR.

Public Comments on the RAWP

OER is accepting public comments on the draft RAWP for 30 days until December 7, 2013. The RIR and draft RAWP are available for review at the document repositories identified in the box on the left including a public library branch and through a link to OER's website. Comments should be sent to Mr. Shaminder Chawla via mail or e-mail (see contact information at left).

Site Description

The Site is 18,625 square feet and is currently vacant and contains an asphalt paved parking lot, a one-story building and a gravel-lined parking lot. The proposed future use of the Site consists of a new 12-story apartment building, with a cellar-level parking garage and landscaped area along the northern portion of the site.

Summary of RIR

The environmental investigation identified up to 8-13 feet of historic fill. Several Semi-Volatile Organic Compounds (SVOCs), metals were detected above cleanup guidelines.

Groundwater samples identified one Volatile Organic Compound (VOC), and three metals above Groundwater Quality Standards. Soil vapor samples showed moderate levels of petroleum-related and chlorinated VOCs above the monitoring level ranges established by New York State DOH.

Summary of the Remedy

The specific elements of the proposed remedial action include:

- Preparation of a Community Protection Statement and performance of all required NYC VCP citizen participation activities according to an approved Citizen Participation Plan;
- Performance of a Community Air Monitoring Program for particulates and volatile organic carbon compounds;
- Establishment of Track 4 Site-specific Soil Cleanup Objectives (SCOs).
- Excavation and removal of soil/fill in excess of SCOs. Most of the property will be excavated to depths of 12 feet for the new building's cellar-level parking.
- Collection and analysis of endpoint samples to determine if the remedy meets SCOs;
- Transportation and off-site disposal of all soil/fill material at permitted facilities in accordance with applicable laws and regulations for handling, transport and disposal of contaminated soil;
- Construction and maintenance of an engineered composite cover across the entire Site consisting of the building slab and foundation;
- Installation of a vapor barrier system below the building slab and behind the foundation walls of the new building;
- Installation and operation of a passive sub-slab depressurization system;
- Submission of an approved Site Management Plan (SMP) in the Remedial Action Report (RAR) for long-term management of residual fill, including certification of Engineering and Institutional Controls and reporting at a specified frequency;
- Submission of a RAR that describes the remedial activities and certifies that the remedial requirements have been achieved and lists any changes from this RAWP; and
- Continued registration with E designation for the property.

Next Steps

OER will review the draft RAWP and consider all public comments submitted during the comment period before it approves a final RAWP. The approved RAWP will be placed in the public library branch and on OER's website and a second fact sheet will be issued before remedial work begins.

If you have any questions or know of any neighbor that would like to be added to the site contact list, please contact the OER Project Manager listed on the front page of this Fact Sheet. We encourage you to share this Fact Sheet with neighbors and tenants and/or post it in a prominent area of your building.
