The New York City Office of Environmental Remediation (OER) provides this Fact Sheet pursuant to New York City's Voluntary Cleanup Program (VCP). Two Trees Management, LLC plans to enroll the property located at 330-350 Kent Avenue in the Williamsburg section of Brooklyn, New York and identified as part of Block 2414, Lot 1, into the VCP. The Remedial Investigation Report (RIR) details the results of an environmental investigation at the site including the nature and extent of contamination. The draft Remedial Action Work Plan (RAWP) proposes remedial actions to address contamination delineated in the RIR.

**Public Comments on the RAWP**

OER is accepting public comments on the draft RAWP for 30 days until September 29, 2014. The RIR and draft RAWP are available for review at the document repositories identified in the box on the left including a public library branch and through a link to OER's website. Comments should be sent to Mr. Shaminder Chawla via mail or e-mail (see contact information at left).

**Site Description**

The Site is approximately 48,475 square feet and is currently vacant. The proposed future use of the Site will consist of newly-mapped streets and a new mixed-use building that will consist of a 39 floor southern tower and a 31 floor northern tower.

**Summary of RIR**

The environmental investigation identified up to 15 feet of historic fill. Several contaminants were detected above cleanup guidelines and standards in soil and groundwater. Soil vapor samples showed petroleum-related VOCs and chlorinated VOCs at low concentrations and below the NY State Department of Health soil vapor guidance matrix for mitigation.

**Summary of the Remedy**

The specific elements of the proposed remedial action include:

- Preparation of a Community Protection Statement and performance of all required NYC VCP Citizen Participation activities according to an approved Citizen Participation Plan;
- Implement a Community Air Monitoring Plan for particulates and volatile organic carbon (VOCs) compounds;
- Performance of geophysical/test pits/trenches prior to start of building construction in proposed roads area and areas of the building footprint where excavation will not occur;
- Establishment of Site Specific (Track 4) Soil Cleanup Objectives (SCOs);
- Excavation and removal of soil/fill exceeding Track 4 SCOs;
- Transportation and off-site disposal of historic fill and impacted soils at permitted facilities in accordance with all applicable laws and regulations for handling, transport, and disposal, and this plan;
- Collection and analysis of end-point samples to determine the performance of the remedy with respect to attainment of SCOs;
- Construction and maintenance of an engineered composite cover consisting of the building's 2.5 and 5 foot thick concrete slab, 4 and 7 inch thick concrete sidewalks, and asphalt-paved streets;
- Installation of a vapor barrier below the slab and behind the foundation walls of the proposed building;
- Installation of an active venting system under the cellar slab and the unexcavated area within the building footprint;
- Submission of a Remedial Action Report (RAR) that describes the remedial activities, certifies that the remedial requirements have been achieved, defines the Site boundaries, and lists any changes from the RAWP;
- Submission of a Site Management Plan (SMP) in the RAR for long-term management of residual contamination, including plans for operation, maintenance, monitoring, inspection and certification of Engineering and Institutional Controls and reporting at a specified frequency; and
- Continued registration with "E" designation of the property at NYC Department of Buildings.

### Next Steps

OER will review the draft RAWP and consider all public comments submitted during the comment period before it approves a final RAWP. The approved RAWP will be placed on OER's website and a second fact sheet will be issued before remedial work begins.

If you have any questions or know of any neighbor that would like to be added to the site contact list, please contact the OER Project Manager listed on the front page of this Fact Sheet. We encourage you to share this Fact Sheet with neighbors and tenants and/or post it in a prominent area of your building.
