

Public Comment Period

April 22, 2015
to
May 22, 2015

Where can I view project documents?

Online at:

<http://www.nyc.gov/html/oer/html/repository/RBrooklyn.shtml>

Internet access to view documents is available at the public library. The closest location is:

Brooklyn Public Library
Midwood Branch
975 East 16th Street
Brooklyn, NY 11230

Please call (718) 302-3485 for hours of operation

Whom can I contact for project information?

Katherine Glass
Project Manager
NYCOER
100 Gold Street, 2nd Floor
New York, NY 10038
(212) 676- 4925
kglass@dep.nyc.gov

and

Shaminder Chawla
Deputy Director
NYCOER
(212) 442-3007
Schawla@dep.nyc.gov

**NYC VCP Cleanup Plan
Available for Review and Comment**

The New York City Office of Environmental Remediation (OER) provides this Fact Sheet pursuant to New York City's Voluntary Cleanup Program (VCP). An application has been submitted by Chess Builders LLC for enrollment of the property located at 1326 Ocean Avenue in the Midwood section of Brooklyn, New York and identified as Block 6703, Lot 55 into the VCP. The Remedial Investigation Report (RIR) details the results of an environmental investigation at the site including the nature and extent of contamination. The draft Remedial Action Work Plan (RAWP) proposes remedial actions to address contamination delineated in the RIR.

Public Comments on the RAWP

OER is accepting public comments on the draft RAWP for 30 days until May 22, 2015. The RIR and draft RAWP are available for review at the document repositories identified in the box on the left including a public library branch and through a link to OER's website. Comments should be sent to Mr. Shaminder Chawla via mail or e-mail (see contact information at left).

Site Description

The Site is 21,237 square feet and is currently vacant. The proposed future use of the Site consists of an 8-story residential building in the eastern portion of the Site with a partial basement used for gym, bicycle storage, residential storage, pet spa and mechanical rooms and parking on the remainder of the site.

Summary of RIR

The environmental investigation identified historical fill material up to depths 20 feet. Several Volatile Organic Compounds (VOCs), Semi-Volatile Organic Compounds (SVOCs), metals, and two pesticides were detected above cleanup guidelines in soil. Several SVOCs were detected above Groundwater Quality Standards. Soil vapor samples showed petroleum related VOCs and low levels of chlorinated VOCs.

Summary of the Remedy

The specific elements of the proposed remedial action include:

- Preparation of a Community Protection Statement and performance of all required NYC VCP Citizen Participation activities according to an approved Citizen Participation Plan;
- Performance of a Community Air Monitoring Program for particulates and volatile organic carbon (VOCs) compounds;
- Establishment of Site-Specific (Track 4) Soil Cleanup Objectives (SCOs);
- Excavation and removal of soil/fill exceeding Track 4 Site-Specific SCOs. The building footprint will be excavated to a depth of approximately 5 feet for the new building's cellar level. Approximately 1,305 tons of soil will be excavated and removed from Site;
- Transportation and off-Site disposal of all soil/fill material at permitted facilities in accordance with applicable laws and regulations for handling, transport, and disposal, and this plan. Sampling and analysis of excavated media as required by disposal facilities and appropriate segregation of excavated media onsite;
- Collection and analysis of end-point samples to determine the performance of the remedy with respect to attainment of SCOs;
- Installation of a vapor barrier system beneath the concrete slab of the building as well as behind foundation walls of the proposed building;
- Construction and maintenance of an engineered composite cover consisting of 6 inch thick concrete building slab to prevent human exposure to residual soil/fill remaining under the Site in the area covered by the building, and asphalt capping in the parking area;
- Submission of a Remedial Action Report (RAR) that describes the remedial activities and certifies that the remedial requirements have been achieved and lists any changes from this RAWP;
- Submission of an approved Site Management Plan (SMP) in the RAR for long-term management of residual contamination, including plans for maintenance, inspection and certification of Engineering and Institutional Controls and reporting at a specified frequency; and
- Continued registration with E-designation for the property.

Next Steps

OER will review the draft RAWP and consider all public comments submitted during the comment period before it approves a final RAWP. The approved RAWP will be placed on OER’s website and a second fact sheet will be issued before remedial work begins.

If you have any questions or know of any neighbor that would like to be added to the site contact list, please contact the OER Project Manager listed on the front page of this Fact Sheet. We encourage you to share this Fact Sheet with neighbors and tenants and/or post it in a prominent area of your building.
