## NYC VCP Cleanup Plan Remedial Activities to Begin

The New York City Office of Environmental Remediation (OER) is providing this Fact Sheet pursuant to the New York City Voluntary Cleanup Program (VCP). OER has approved the Remedial Action Work Plan (RAWP) submitted by GGP Staten Island Mall, LLC for 2655 Richmond Avenue, Staten Island, New York (Block 2400, Lot 80). The remedial work will begin in January 2016. The RAWP can be reviewed electronically or in person at the document repositories identified in the box at left.

### Site Description:

The 154,000 square-foot site currently used for commercial retail business and contains parking for the Staten Island Mall, as well as a Macy's retail store. The proposed development consists of the construction of a new parking deck (Lot 80).

### Summary of the Remedy:

The remedial action for 2655 Richmond Avenue is a Track 2 Residential Soil Cleanup Objectives. The specific elements of the proposed remedial action include:

- Preparation of a Community Protection Statement and performance of all required NYC VCP citizen participation activities according to an approved Citizen Participation Plan;
- Performance of a Community Air Monitoring Program for particulates and volatile organic carbon compounds;
- Establishment of Track 2 Residential Soil Cleanup Objectives (SCOs); Excavation and removal of soil/fill in excess of SCOs;
- Transportation and off-site disposal of all soil/fill material at permitted facilities in accordance with applicable laws and regulations;
- Collection and analysis of end-point samples to determine if the remedy attains Track 2 SCOs;
- Construction of an engineered composite cover consisting of a four-inch thick asphalt layer with a 6-inch clean granular sub-base beneath all building areas, 4-inch poured concrete on a 6-inch sub-base in sidewalk areas, and one foot of clean soil in all open space and landscaped areas;
- Performance of all activities required for the remedial action, including acquisition of required permits and attainment of pretreatment requirements, in compliance with applicable laws and regulations.
- Submission of an approved Site Management Plan (SMP) in the Remedial Action Report (RAR) for long-term management of residual historic fill; and
- Submission of a RAR that describes the remedial activities certifies that the remedial requirements have been achieved, defines the Site boundaries, and describes all engineering and institutional controls to be implemented at the Site.

Cleanup activities are scheduled to begin in May 2016 and are expected take approximately eighteen months to complete.

**Next Steps:** After the enrollee completes the remedial work, a RAR will be prepared and submitted to OER. The RAR will describe the cleanup activities and certify that all cleanup requirements were met. Once the RAR is approved, OER will issue a Notice of Completion, a City liability release, and a New York City Green Property Certificate. OER will then issue a fact sheet announcing the completion of the remedial action and identify all engineering and institutional controls to be used at the Site.

If you have any questions or know of any neighbor that would like to be added to the site contact list, please contact the OER Project Manager listed on the front page of this Fact Sheet. We encourage you to share this Fact Sheet with neighbors and tenants and/or post it in a prominent area of your building. For information regarding New York City's Voluntary Cleanup Program, please visit our website at: [www.nyc.gov/oer](http://www.nyc.gov/oer).
