Billing Data Notes

1 Overview
* The data included in this workbook provides aggregate data for the building at the address noted in the building summary tab.
* No customer account numbers are provided to protect customer confidentiality.
* No financial information is provided.

2 Building Summary Sheet
* Provides a description of the most common service classifications that may be present in the building.
* The SC number is used on the other sheets in the workbook.
* All of the active accounts we currently have on our billing system during a particular meter reading period are captured in the customer totals.
* If you have to extrapolate any missing data, please use the total number of units that the building owner has on record. An example of how to extrapolate missing residential data can be found in question number 12 of the FAQ document that was provided to you.

3 Consumption Data Sheet
* Con Edison archives customer billing records after customers close their accounts, such that the information is not available in the company's billing information database.
* Since some data is not readily available, a full 3 year history for all units in the building can not be provided until 2014.
* Consumption data provided is grouped by service class and from and to date of the meter reading cycle.
* The number of units billed for each meter reading cycle is provided.
* Accounts billed off cycle are automatically added into the appropriate meter reading cycle.
* The service class listed is the current service class on the account and therefore could have changed over the period of data provided.
* The building owner is required to reconcile this tab with their internal records.

Building Address	Town	Zip Code
123 Sample Street	NEW YORK	10003

Service Class Number	Service Class Description
1	Residential and Religious
2	General Small Commercial
7	Residential and Religious Heating
8	Multiple Dwellings - Redistribution
9	General Large Commercial
21	Residential and Religious
39	General Large Commercial
41	Residential and Religious Heating

*If there are Service Class Numbers in the Consumption Data tab of this report that are not listed above please visit www.coned.com/rates for a description.

Number of Units	Service Class	From Date	To Date	Consumption(kwhrs)
