Customers can save money on heat by using these tips this fall:

- Have a qualified contractor clean and inspect your heating system. This includes cleaning air ducts and heating vents to ensure adequate air flow and eliminate any loss of heated air
- Place insulation on hot-water pipes or hot-air ducts that pass through unheated areas
- Clean or replace filters for your hot-air furnace and heat-pump
- Install a programmable or smart thermostat and set it automatically to reduce the temperature when no one is home
