Dear Sunnyside Resident:

Every effort is made to schedule work for the East Side Access project during the daytime, however due to track outage limitations it is sometimes necessary to perform work during overnight hours. **Please be advised of the following ongoing East Side Access work:**

Beginning tonight, **Tuesday, January 5th**, and continuing for the following three nights, work will be performed along the right-of-way just west of the 48th Street Bridge. The work will begin each night at 11:00 p.m. and conclude at 7:00 a.m. the following morning. The contractor will be continuing the preliminary work needed for the removal of the signal bridge.

Residents in proximity to this location may see lights in use and hear some noise from the equipment and a hi-rail truck. The contractor has been reminded to aim the lights away from residential areas as long as it does not impact the safe execution of this work or the trains as they travel past.

ESA Community Outreach aims to provide the most up to date information on work activities; **however the schedule of work is subject to change.**

We apologize in advance for the potential disruptions you may experience from the ongoing work. For questions or concerns about the work, please contact the East Side Access Community Outreach team:
